Lincoln's Rebuke.

The saying that there are few hon-
est lawyers did not hold true in the
case of Lincoln. A man once called
to retain him on a suit.

"State your case," said honest Abe.
The man did, and then Lincoln said:
"I cannot represent you, for you are
wrong, and the other party is right."

"That is none of your business if I
employ you," said the client.
"Pardon me," said the man who af-
terward became president; "my busi-
ness is never to defend wrong. I never
take a case that is manifestly
wrong."

"Well, but you can make trouble for
the other fellow."

"Yes," said Lincoln, "I can set a
whole community at loggerheads, I can
make trouble for this widow and her
fatherless children and by so doing get
you \$600 that rightfully belongs to her,
but I won't do it."

"Not if I pay you well?"
"Not for all the money you are
worth," was the reply.

For a violin by Petrus Guarnerius,
dated 1695, £250 was given at a recent
sale in London; while one by Nicholas
Lupot fetched £240.

A Miss and a Find.

It was the habit of the Rev. James
Spurgeon, grandfather of the great
preacher of that name, to pray each
evening under a certain oak tree in a
secluded wood in Honeywood park.
One night he dreamed, the story goes,
that Satan appeared and threatened
to tear him in pieces if he followed his
accustomed route to the tree. There
was another path by which he might
go in safety. Remembering his dream,
Spurgeon felt sorely tempted the next
night to take the route in which Satan
was not. But this would be to capitu-
late. Trembling in every limb, he
made his way by the path in which the
danger lay. He reached his goal in
safety and in prayer and song returned
thanks for delivery from peril. When
his prayer had ended he rose to re-
turn. In his path lay a piece of solid
gold "as large as a curtain ring." An
inquiry failing to discover an owner,
he retained it and when he married had
his wife's wedding ring made from his
curious find.

Adam's Foresightedness.

Though Adam blamed Eve for tempt-
ing him to eat apples, it isn't on re-
cord that he gave her due credit for
making those first clothes.—Florida

SEWERAGE QUESTION

A Correspondent Makes Some Good Points for
Fredericton's Case.

To the Editor of the Herald:—

Sir,—In discussing the present pro-
blem of sewage disposal for this city
it may be well for those who may be
interested to consider carefully the
following facts: The system as in-
stalled, including the means of dis-
posal, was recommended successively
by Engineers Chikman of Toronto,
Coffin and Barbour of Boston. An-
alyses of St. John river water above
and below Woodstock, at Springhill,
at Kaskisiboo, a mile above the city
and at the water intake all showed
contamination of about similar de-
grees. These analyses of Prof. Mas-
on of Troy, New York, were pub-
lished in the water report of the city
for 1904 and made the subject of a
brochure for distribution by Prof.
Mason for scientific purposes. It is
readily understood that there is no
means by which the water of the St.
John river can be rendered entirely
safe for domestic purposes. At the
present time at least one quarter of
the sewage of the city finds its way
directly to the river by pipe lines, be-
side that which arrives there indi-
rectly through surface sewers and by
filtration through our highly impreg-
nated sandy soil.

Included in the direct outlet pipes,
are those from the government build-
ings, post-office, Normal and milit-
ary buildings and many private
buildings on Water, Row, Queen,
St. John and Church streets, etc. If
there is water above Fredericton is
polluted how much more so would it
be ten or twenty miles farther down
with the additional contamination.
Fredericton has been compelled to
go to large expense to render its
drinking water safe and it would
seem wise for those who may be com-
pelled to use it for such purpose and
who live below the city, to use
household filters to render it pure.

Both Prof. Starkey who represented
Sunbury Co., and Mr. Fuller who
was engaged by this city, stated at
the hearing before the government,
that such filters were practicable.
It is also known to be a protective
to boil water for household use, it
having been very commonly done in
this city.

Cattle can drink with safety, water
of a far worse character than that
which the river St. John shall ever
become. It should be realized that
all the typhoid that ever resulted
from the consumption of milk, was
the fault of any internal con-
tamination of the cow but from some pol-

lution affecting the milk after its ex-
traction.

In regard to sewage filters, these
points may be noted. Upon no river
in the world, have such plants been
required, that has been anything
nearly as large as the river St.
John.

The deposits in the river, over half
a million gallons of water which
would flow through the pipes daily,
would be invisible at the outfall.
Fredericton would have to be hun-
dreds of times as large as it is now
before there would be any evident
nuisance in the river.

Septic tanks do not filter the se-
wage but only act upon it so that its
volume is reduced and thus not per-
mitted to deposit in and clog the
small streams (where such tanks are
used) into which the sewage empties.

To actually filter the sewage 500-
000 gallons per day in Fredericton,—
and render the effluent drinkable, is
an expensive, exhaustive process re-
quiring a large amount of land. It
has not been done in climates as cold
or as continuously severe, as ours,
but it can probably be done with
much addition, cost, time and protec-
tion.

The only available site for such a
plant is on the flats below Lans-
downe St. which for part of the year
is covered with water. The expense
of pumping in connection with a
higher locality is unthinkable. It
must be always considered, that the
lower down river that the outfall is,
the greater the number of days will
pumping be necessary in the spring?

Further, we have been assured that
the vicinity of a sewage disposal
plant is rendered very objectionable.
Residents of that locality and those
having to pass that way may not
find it much more agreeable than
that of a fertilizer factory, an unfor-
gettable place.

That the value of contiguous real
estate would not be increased is a
superfluous statement. Would the
people residing below us on the river
after all that has been said, relish
very much more the river water hav-
ing in it water which came from
the filter, but was earlier and some-
what different. Might it not be fair
to assume that Fredericton would be
doing a favor to its neighbors by so
emphasizing the dangerous character
of the water that those neighbors
would for their own sakes give up
using for domestic purposes, the wa-
ter of the St. John river, which they
should have abstained from using in
its raw state long ago.

HOUSE ROUTINE.

Bills and Petitions Introduced at
Wednesday's Sitting.

The House met at three o'clock on
Wednesday.

On motion of the Hon. Mr. Sween-
ey, the bill to authorize the issuing
of debentures by the city of Moncton
was referred back to the committee
on the whole to correct a verbal er-
ror. Agreed to, reported to the House
and passed.

Hon. Mr. Pugsley, in reply to an
enquiry by Mr. Hazen, said the
amount due to the Bank of British
North America at 14th February,
1907, was \$1,043,158.98, of which
the amount of \$899,405.11 was for
capital expenditure, authorized by
the law. The rate of interest charged
by Bank of British North America
is 5 per cent. on net daily balance.

There was due to the Bank of New
Brunswick, St. John, on provincial
household account, at the same date,
\$49,507.77 at 5 per cent.

And at credit of Sinking Fund of
People's Bank of New Brunswick at
Fredericton, the sum of \$13,879.49.

Hon. Mr. Pugsley presented the
petition of Thos. McAvity and many
others against any change in the St.
John civic elections until the ques-
tion was first submitted to the peo-
ple.

Mr. Maxwell presented the petition
of George G. Christie and 200 others
to the same effect.

Mr. Currie introduced a bill relat-
ing to the town of Campbellton.

Mr. Hart introduced a bill to
amend the act relating to the town
of St. Andrew's.

Mr. Robertson introduced a bill to
incorporate the Hazen Avenue syna-
gogue.

Mr. Murray introduced a bill relat-
ing to Chatham sidewalks.

Mr. Burden introduced a bill relat-
ing to the valuation of the parish of
St. Mary's and a bill to change the
date of holding municipal elections in
York.

Mr. Clarke presented the petition
of J. Sutton Clarke and others for a
bill to incorporate the Canada At-
lantic railway company.

Mr. Leger presented the petition
of Elphege Leger and others for an act
to incorporate the Societe L'As-
sumption.

Mr. Young presented the petition
of the Rev. J. P. Allen for a bill to
amend the Caraque Lock-up Act.

The House then took up the order
of the day.

The Hon. Mr. Sweeney introduced
a bill to authorize the Moncton
School Trustees to issue debentures.

Mr. Hazen gave notice of enquiry
in regard to capital expenditure.

The House adjourned.

IT RINGS IN YOUR EARS.

That same cough is everywhere you
go, deep and hollow because consump-
tive. First, it was catarrh which
could have been cured by Catarrho-
zone. Moral, never neglect a 'cold,'
never trifle with catarrh, go to your
druggist and get Catarrhozone. It's
instant death to colds, cures them in
a few minutes. Throat trouble, cat-
arrh disappear as by magic. Cat-
arrhozone is the great throat, nose
and bronchial remedy today. Thou-
sands use it, doctors prescribe it,—
why, because it does relieve quickly
and cures thoroughly. Two sizes,
25c. and \$1.00 at all dealers.

As a married couple were walking
down one of the main thoroughfares
of a city the husband noted the at-
tention which other women obtained
from passers-by and remarked to his
better half:

"Folks never look at you. I wish
I had married some one better look-
ing."

The woman tartly replied: "It's
your fault. Do you think a man will
stare at me when you're walking
with me?" Might it not be fair
whether men don't look at me."

The husband hung back about a
dozen yards, and for the length of the
street was surprised to see every man
his wife passed stare hard at her
and even turn around and stare after
her.

"Sure, lassie," he exclaimed as he
rejoined her, "I was wrong and take
it back. I'll never say aught against
your looks again."

The wife had made a face at every
man she met.

A VALUABLE AGENT.

Deafness because usually due to
Catarrh, is quite curable. In a
thousand cases this is proved abso-
lutely true. Success invariably at-
tends cured catarrhal deafness of twen-
ty-five years standing. Penetrating
through the passages of the ear, the
soothing vapor of Catarrhozone re-
lieves the inflammation, destroys the
seeds of Catarrh and thereby allows
nature to re-assist herself. Try Cat-
arrhozone yourself. 25c. and \$1.00
sizes sold by all dealers.

A doctor who was recounting some
of his experience of hypnotism relat-
ed the following story:

"I once had a patient who was ill
with consumption and who ought
have gone to a warmer climate, but
whose means were insufficient, so I
resolved to try what hypnotism
would do for him. I had a huge sun
chalked on the ceiling of his room,
and by suggestion induced him to
think it was the sun which would
him. The result succeeded and he
was getting daily better, when one
day, on my arrival, I found he was
dead."

"Did it fail, after all, then?" ask-
ed the doctor's hearers.

"No," replied the doctor, "he died
of sunstroke."

ONE OF THE NEW SHIRT
WAISTS.

A Shirt waist of smart style which
is trim and not elaborate is shown,
and will please the amateur dress-
maker because of its ease in making and
unusual becomingness. The stole-yoke
lending breadth to the shoulders, and
slenderness to the waist, is one of
the nicest finishings of the newer
waists. The tucks at either side of
the front remove the fullness from the
yoke line and thus assist the becom-
ing result. The sleeves are of the re-
gulation shirt style, having the plain
straight cuff or the double turn-back
style. For silk, cloth or linen, the
waist is excellent style and requires
34 yards of 27 inch material in the
medium size.

8888-6 sizes, 12 to 42 inch bust
measure.

The price of this pattern is 10 cts.

To the Fredericton Herald:

Please send the above mentioned
pattern, as per directions given be-
low, to

Name.....

No.....Street.....

To.....Province.....

Measurement—Waist..... Bust.....

CAUTION.—Be careful to send size
of pattern wanted. When the pat-
tern is bust measure you need only
mark 32, 34, or whatever it may be.
When in waist measure, 22, 23, 26, or
whatever it may be. If a skirt, give
waist and length measure. When miss'
or child's pattern write only the fig-
ure representing the age. It is not
necessary to write "inches" or
"years." Patterns cannot reach you
in less than three or four days from
the date of order. The price of each
pattern is 10 cents in cash or postal
order or stamps.

Life Depends on

Healthy Blood.

IS YOURS RICH AND PURE?

Blood is the soul of life.
Check its formation, reduce its qual-
ity, lessen its red cells—you at once
sap strength and vitality—you peril
life itself.

When you are weak and ailing—
When the appetite is poor—when men-
tal efforts seem impossible, sleep
hard to get, be sure your blood has
grown poor and your nervous system
is consequently impaired.

Nothing so quickly stimulates the
formation of rich, red blood as Ferro-
zone.

Ferrozone's action upon the diges-
tive power is immediate—everything
you eat is converted into nourishing
and building material.

Ferrozone fortifies the action of the
kidneys, liver and stomach, increases
circulation, and by these means it
throws into the blood a vast store of
material to build up and to strength-
en.

Ferrozone, by making blood and
stimulating vital action, transmits to
the debilitated brain cells, exhausted
by toil, by anxiety, or by sickness,
the strength they need.

The beneficent action of Ferrozone
on the brain is transmitted through
the nervous system, and all powers of
the body are enormously increased.

Ferrozone enables the body to per-
form all its functions in a normal
and natural way, and with an abso-
lute freedom from reaction, which is
the most positive assurance that the
body is strengthened, not stimulated.

Whether the weakness you suffer is
profound or of long standing, what-
ever the conditions are—if the blood is
impaired, if its redness is reduced, if
its activity is lessened—Ferrozone is
an absolute and rapid remedy.

For any condition of weakness, de-
bility or ill health in men, women and
children, you can't find so nourishing
and strengthening a tonic as Ferro-
zone; try it; sold everywhere in 50c.
boxes.

"I'm very sorry, madam," said the
new boarder, "but I have arranged
to leave at the end of the week."

"Indeed," rejoined the landlady,
"Are you going to leave the city?"

"Oh, no," replied the n. b. "I'm
merely making a change on account
of the water."

"Why, what's wrong with the wa-
ter here?" quired the landlady.

"It's impure," answered the other.
I frequently detect a slight flavor of
coffee in it."

LIKE A NEW DISEASE.

New to the man who never had
corns is the pain relieved by Put-
nam's Corn Extirpator. Old corns
and new ones cured quickly by "Put-
nam's." Sold everywhere.
