Amherstburg Undertaker Holding it for Payment

DETROIT, Mich., July 31.—A ten-year-old boy, named Strazlkowski, was drowned here last week. His body was recovered in the lower river and taken care of by an Amherstburg, Ontario, undertaker. The boy's father went to Amherstburg yesterday to take charge of the body and bring it home, but the undertaker refused to give it up until he paid his charges, amounting to \$25. The matter

has been referred to the United States Consul at Windsor. Coroner Parker of this county thinks that if the Amherstburg undertaker has any claim, the Canadian authorities should settle it. Bodies of Canadians found in the river on this side are cared for and returned to their families, and the same thing should be done by Canada.

IT DOES CURE WOMANLY ILLS.

"I feel, it my duty" writes Mrs. S. Mead of Fraserville, Ont., "to let you know that sometimes previous to the change of life I suffered more than I could tell. Neighbors told me Ferrozone was the only remedy and their advice was good. Ferrozone put a stop to my pain and sickness, had a direct action on my troubles and relieved from the start. I safely passed the turn, and now enjoy perfect health and rest. No womanly medicine can be better than Ferrozone for female weakness of every kind, 50c. per box at all dealers.

"Crittick read your essay," said Dr. Riter's friend, "and he insists that you're beyond your depth." "Ah," replied Dr. Riter. "I thought he would." "You did? Then you know what he means?" "Yes," he means simply that I am beyond his depth."

SCHOOL FOR THE BLIND.

Are you blessed with good sight? If so are you willing to help the blind to help themselves. The school for the blind at Halifax is free to the blind youth of Nova Scotia, New Brunswick, Prince Edward Island and Newfoundland. The parents of partially or totally blind children, and those interested in the education of the blind will confer a favour by reporting to the Superintendent of the School, Dr. C. F. Frasier, the name, age and address of any boy or girl under twenty-one years of age who is unable, through lack of sight, to read ordinary print and attend the public schools.

During the past year one hundred and thirty-six pupils have been under instruction in the School for the Blind. Eight of those have recently graduated and are now in a position to earn their own living. In that age when wealth becomes the standard measure for greatness, then money will be a world-power.

WHAT IS A CHILD WORTH?

Steel Trust Purchases Them for Dollar Each

WORCESTER, Mass., July 31.—The American Steel and Wire Trust is buying children in Worcester for \$1 a head. Several hundred have already been sold to slave in the three huge mills of the trust in this city, and the sale of hundreds of others will soon be consummated if the State authorities do not interfere. To secure absolute control of the children the trust recently demanded that their parents

sign "a minor's release." Each parent who signs this release receives one dollar, and for that dollar he or she waives forever all control over the child. Many of the parents who have signed these documents and transferred their children to bondage, are natives of foreign countries who do not understand the English language. Few of them realize what they have done.

MORE MOTOR CARS.

Moncton Transcript: The body for the second I. C. R. motor car arrived from the shops of Rhodes Curry & Co. Amherst, on Saturday evening, and will be ready for service within two weeks.

Three cars were ordered from Rhodes & Curry, the three motors being constructed in the I. C. R. shops here. The motors are practically completed and the work of installing the motor in the second car will be commenced at once. After the usual trials, it is probable that this car will be sent to St. John for suburban service.

A motor, which was constructed in Austria, is now on its way to Moncton, having arrived in Montreal some time ago. It is now somewhere between Montreal and Moncton.

IT ACTUALLY DESTROYS THE CAUSE.

That's why catarrh is invariably cured by inhaling "Catarrhzone." The healing vapor spreads to every part of the breathing organs. Germs infecting the tissues of the nose, throat and lungs are killed. Nothing is left to cause inflammation. Spots that are sore are healed. Discharge is cleared away and catarrh becomes something of the past. Use "Catarrhzone" and your recovery is guaranteed. Two sizes, 25c. and \$1.00 at all dealers.

Our option on this small block of Underwriters' Stock expires August 6, 1907. Subscriptions post-marked at later date will be returned. Do you realize that investments of a hundred or a thousand will grow rapidly into hundreds and thousands and millions of dollars? The over-conservative and skeptical wildsmile—they will laugh at these predictions, some will even consider this a joke—but remember COBALT, if you please, two or three years ago? Then it was a "vision," it was a "dream," "a flash in the pan," "a bubble," somebody was "crazy," but now it is different. Those crazy men are now classed among the smartest and keenest business men of the day. The actual value of a few mines are worth at the present date more than one hundred millions of dollars. These are facts.

In presenting this investment for subscription we appeal to the good judgment of sensible persons as to its merit.

It embodies, we believe, a correct method for developing and establishing successful and paying mining enterprises. We desire first of all, to conduct a successful mine development. We intend this to be done in a way that will be absolutely fair and honest, and bring the largest profit possible to those who co-operate with us.

We therefore desire this proposition to be well understood by investors. We wish it to be known just how we propose to develop, establish and operate dividend paying mining companies by and through this investment.

THE PLAN—The plan involved in this proposition is that of uniting or consolidating the investments of a limited number of persons into one sum, and under one management, to be used in acquiring and developing mining properties in this wonderful region.

THE PRINCIPLE involved in this investment, we believe, is one of absolute fairness to all interested. The "promotion interest," common to all mining companies, and which is the great unfair feature to investors who put their money into stocks of these companies and whose money develops and makes the mine, if a mine is developed—does not exist in this proposition. There is no "promotion interest" bought and paid for by the investors.

In this proposition the investors and all the investors become promoters. They take the "promotion interest" and all the interest. They own the whole enterprise. No matter how large or small the investment—all stand on an equal basis. Our field of operation is probably one of the greatest and without doubt the richest mineralized region in the world.

For its basis, upon which we will establish and build up several great producing, paying mining companies, we will exploit and develop in a mining like and careful manner extensive

mining properties now known to us, and other properties which we may acquire for the mutual benefit of all investors in the company.

SUBSIDIARY COMPANIES.—The Larder Lake Exploration and Development Company will incorporate a series, not to exceed five, of subsidiary mining companies upon only the real proven properties acquired.

In each and every subsidiary company incorporated, whether mining, milling, smelting, water power or electric light, the Exploration Company will take over 90 per cent. of the capital stock of each company so incorporated, and will put 10 per cent. of the capital stock of each company in its treasury. It will probably never become necessary to sell any of this treasury stock.

Out of the total capital stock of each subsidiary company, the Exploration Company will retain 50 per cent. as its "Holding Stock." This will always control the company. It will take and hold 40 per cent. for the mutual benefit of all stockholders in the Exploration Company. This 40 per cent. will be known as the "Selling Stock," and as a market is created, it will be sold, and the proceeds received will be distributed pro rata to the stockholders in the Exploration Company, as their interests may appear.

The stock of the subsidiary companies will be listed on the New York Curb and Mining Exchanges of the country and started at 50 cents a share, where it can be bought and sold according to the daily market quotations. This will afford a channel by which stockholders can sell the 40 per cent. "Selling Stock" from time to time, if they wish.

PROPERTIES—Many different mining properties will be acquired and developed as stock in the Exploration Company is subscribed for. All properties will be described, and reports submitted regarding same, as soon and as often as they can be examined by the engineers.

The mining properties which will be acquired for this proposition will be

located in the gold and silver belt, extending from the Montreal River through Northern Ontario, eastward into Quebec, and will include properties in the Lady Evelyn District, the new Montreal River Silver District, Cobalt District, and the gold districts around Round Lake, Larder Lake, Lake Abitibi, and in the great undeveloped mineralized section of Quebec lying just east of Larder Lake and extending northward to Lake Abitibi.

We shall try and make every dollar count, and make as few mistakes as possible. We hope to create such an interest in this enterprise with investors that will result in extensive and widespread co-operation.

Under this plan no one can truthfully say that it is not a great mining investment. We want every investor to feel a personal interest in this mine development. The investors in this company will own this enterprise, and we want them to co-operate with us and our associates to make it a great success.

We are now organizing THE LARDER LAKE EXPLORATION AND DEVELOPMENT COMPANY, with what we consider sufficient capital (\$500,000). We now have options on and propose to acquire five distinct and separate properties which will be incorporated at \$100,000 each (100,000 shares—par value \$1.00). The Exploration Company will at all times hold a controlling interest in each of these companies, so that sixty per cent. of the dividends earned and declared will be paid into the treasury of the parent company, and the other forty per cent. distributed among the stockholders on record. This, in our opinion, will enable us to pay dividends and large ones in the very near future.

The board of directors in The Larder Lake Exploration and Development Company will be composed only of engineers of national repute, setting a precedent in this line—Mr. Robert Morton will be president, which fact in itself guarantees conservative and able management.

Investors have been pouring their

money into over-capitalized mining companies, they have been plunging about wildly in the hope of some day "striking it rich" never stopping to think for an instant that the greater part of their money never reaches the ground, as a rule, seventy-five per cent. of the money invested in stock schemes goes into the broker's hands. He pays his salesmen 20 to 50 per cent. on every dollar turned in, he must get his own commission, and engineers must be paid.

We never have had associated with us a stock salesman, we require no commission, and our engineers will be our directors, so that every dollar invested with us on this proposition will be honestly used in the purchasing and development of the different properties.

We are now offering for subscription the first allotment of stock in The Larder Lake Exploration and Development Company—every one hundred shares entitles the holder to forty shares of stock in each of the subsidiary companies to be incorporated, making in all 200 shares of stock in five different companies, which, as soon as development work is started and dividends announced, will make the stock of the Larder Lake Exploration and Development Company almost invaluable. This first allotment of only 50,000 shares (\$1.00 par value) will probably be largely over-subscribed in a few days.

The next allotment will be put out September, 25th, 1907, at 75 cents per share or higher.

This price (15c) will positively be withdrawn August 6, 1907. If this allotment is over-subscribed remittances will be promptly returned. Checks, drafts and money orders must accompany all applications and be made payable to the financial agents.

Interim certificates will be promptly returned to subscribers. The stock certificates of the company representing the shares purchased will be issued and delivered as soon as allotment can be made, after the 6th of August, to all subscribers who purchase at the first underwriting price prior to that date.

Are you going to get in now, in time, at Larder Lake; you can now get in at the ground floor prices on inside properties, making big profits and lots of money; or will you wait three or four months or a year, and then fall all over yourself in an irresistible desire to get in anywhere or at any price?
