NOTICE TO CONTRACTORS.

Sealed tenders addressed to the undersigned, marked on the envelope "Tender for Construction," will be received at the office of the Commissioners of the Transcontinental Railway, at Ottawa, until twelve o'clock noon of the 25th day of June, 1907, for the work required for the construction in accordance with the plans, profiles and specifications of the Commissioners, for the following section of the Transcontinental Railway, viz.:

District "A"—From a point designated on the plans of the Commissioners at or near the Town of Chipman, in the Province of New Brunswick, easterly for a distance of about eight miles.

Plans, profiles and specifications may be seen in the office of the Chief Engineer of the Commissioners at Ottawa; also in the office of District Engineer Guy C. Dunn, St. John, N. B.

Persons tendering are notified that tenders will not be considered unless made in duplicate, and on the printed forms supplied by the Commissioners.

Tenders shall not be in any way entitled to rely upon the classification or any other information given by any person on behalf of the Commissioners, and before submitting a tender, bidders should make a careful examination of the plans, profiles, drawings and specifications, and read the forms to be expected, and fully inform themselves as to the quantity and quality of materials, and character of workmanship required; and are understood to accept and agree to be bound by the terms and conditions contained in the form of contract, specifications, &c., annexed to the form of tender.

Each tender must be signed and sealed by all the parties to the tender, and witnessed, and be accompanied by an accepted cheque on a chartered bank of the Dominion of Canada payable to the order of the Commissioners of the Transcontinental Railway, for a sum equal to ten per cent (10 p. c.) of the amount of the tender.

Any person whose tender is accepted shall, within ten days after the acceptance thereof, furnish such additional approved security as may be required by the Commissioners; sign the contract, specifications and other documents required to be signed by the said Commissioners; and in any case of refusal or failure on the part of the party whose tender is accepted to complete and execute a contract with the said Commissioners, and to furnish the additional approved security within ten days after the acceptance of the tender, the said cheque shall be forfeited to the Commissioners as liquidated damages for such refusal or failure, and all contract rights acquired by the acceptance of the tender shall be forfeited. The cheques deposited by parties whose tenders are accepted will be deposited to the credit of the Receiver General of Canada as part of the security for the due and faithful performance of the contract according to its terms. Cheques deposited by parties whose tenders are rejected will be returned within ten days after the signing of the contract.

Attention is called to the following clauses in the form of contract:

"All mechanics, labourers or other persons who perform labour for the purposes of the construction of the works hereby contracted for shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate; and, in the event of a dispute arising as to what is the current or a fair and reasonable rate, it shall be determined by the Commissioners whose decision shall be final."

"This agreement is subject to the regulations now in force, or which may at any time hereafter be in force during the construction of the works hereby contracted for, made under the authority of the Department of Labour, and which are or shall be applicable to such works." (The schedule of Minimum wages determined upon by said department will form part of the contract.)

"The contractor shall, in connection with the whole of the said work, as far as practicable, use only material, machinery, plant supplies and rolling stock manufactured or produced in Canada, provided the same can be obtained as cheaply and upon as good terms in Canada as elsewhere, having regard to quality and price."

The contractor shall conform to the fire regulations adopted by the Commissioners; and also to the laws and regulations respecting fires in the different Provinces wherein the work is being performed.

The right is reserved to reject any or all tenders.

By order,
P. E. RYAN,
Secretary.

The Commissioners of the Transcontinental Railway,
Ottawa, June 5th, 1907.

D'A Corsets

They are the smartest models known to the Corset Manufacturer's art, science and sense having achieved a wonderful triumph.

Prices range from \$1.00 to \$5.00.

Will Improve Your Figure.

LIVE ON MILK AND HONEY.

Men Of Fine Physique Living On Slopes Of African Volcanoes.

London June 19.—Dr. A. F. R. Wollaston of the British Museum expedition to Ruwenzori (Mountains of the Moon), with Dr. D. Carruthers, has just crossed Africa from Mombasa to the south of Lake Albert Edward the mouth of the Congo, passing from through the heart of the Mumbiro volcanic region, a wild, mountainous and difficult country, with waterless stretches, where no Englishmen had ever been before. The natives in many cases, he informs Reuter, had never before seen a white man, although Captain Grosvenor, on his Cape-Cairo railway, passed the eastern side of the region.

For the most part the nine volcanoes are extinct; the highest is about 14,000 feet. Near the top they are covered with dense bamboo, supposed to be inhabited by a race of pigmies who live by raiding the villages on the lower slopes. As they are far removed from the Congo forest pigmies they are probably a new race. The sides of the extinct volcanoes are thickly populated by a people of fine physique, living principally on milk and honey.

The Manyema country is devastated by sleeping sickness. Dr. Wollaston saw dead and dying on the road side. Almost every village presented a revolting spectacle, as it is the custom to turn out the stricken to die.

ROSY CHEEKS FOR PALE GIRLS.

Don't be debarred from strength and spirit, don't give in to illness and despair. Ferrozone supplies tone and vigor through which all functions of womanly life are maintained and fortified. From New Richmond Que., comes the following statement from Mrs. Isidore Boissoneault: "I take deep pleasure in testifying to the powerful influence of Ferrozone. For years my daughter has been pale and sickly—showed signs of advanced anaemia. Her lips get so white and her cheeks so devoid of color I feared consumption. I can certify Ferrozone made an excellent cure, and to-day my daughter's health is the best." 50c. per box at all dealers.

MERTES AND HURST.

When Sandow Mertes first became a baseball player, he was recommended to the Philadelphia people by Hulen, one of the few left-handed short stops. The major league has ever known. Hulen was frank enough to declare one day out at the Phillies' park that he was not fast enough to hold the job he had; but he added: "I know a player who will show some of these major league outfielders a thing or two."

He referred to Mertes, and touted him so highly that he was at once brought on to Philadelphia. He was a lamb-like player at that time, and one could not get a murmur out of him. He afterwards, though, made up for it.

At any rate, in his modest period he was at the bat one day, and Tim Hurst was umpiring. Tim dearly loves to tease a new man. Mertes had been so unusually quiet that Tim called a couple of wide ones, just to hear him kick; but the fellow never made a noise.

Then Tim, putting a frown on his cherubic face, turned fiercely to Mertes and said:

"Ah, what is the matter with you? Why, you are getting to be a worse kicker than Elberfeld!"

Mertes nearly dropped with surprise, and he looked as if he was going to weep as he replied:

"Why, upon my word and honor, Mr. Hurst, I never opened my mouth."

And then, when Tim roared with laughter, the big fellow viciously swung at the next one and drove it out of bounds.

TURNS DOWN SUNDAY BALL.

New York, June 18.—Mayor McClellan yesterday disapproved of the legislative bill, providing for baseball playing on Sundays for amateurs.

In a memorandum on the veto, the mayor said in part:

"The bill is thoroughly disorganizing. The real object of the measure is simply to allow the smaller professional nines, recruited among men who have other means of livelihood, to indulge in mercenary enterprises on Sunday afternoons. In fact, it appears to me to amount to nothing more or less than a money-making scheme."

MOTHERS, HERE IT IS!

A friend and comforter, an unceasing aid in every house for the hurried and one ailments that do turn up. Nerviline is too valuable to be without. If some thing eaten causes trouble, if it's cramps, indigestion or headache, Nerviline cures. For cold on the chest, aching limbs or flu, rub on Nerviline and get swooshing relief. As a family safeguard, Nerviline. Get the large 25c. bottle from your dealer.

Because you've never been in jail is no sign you are as good as old John Bunyan.

HOUSEHOLD HINTS.

Some Interesting Information for Busy Housewives.

RECIPES.

CINNAMON BUN.

Melt a cup of butter and beat it gradually into a cup of cream; add a cupful of sugar and three eggs, beaten well. Have in another bowl a generous quart of flour; make a hole in the centre and pour into it two tablespoonfuls of lukewarm water in which has been dissolved a half-cake of compressed yeast; then the egg and butter mixture, and lastly a teaspoonful each of cinnamon and mace. Beat hard, add a cupful of currants, well dressed with flour, pour into a shallow baking pan, set to rise for three hours or less, until twice its original size; then bake for an hour in a good oven. When done, sprinkle thickly with powdered sugar and when this is melted take from the oven.

MAPLE AND NUT ICE CREAM.

Make a rich custard of a quart of milk, a cup of sugar and six eggs. Boil until it coats the spoon, stirring steadily, then remove from the fire. When cool beat in a quart of rich cream and turn into the freezer and freeze until thick, but not stiff. Take the top off the freezer and beat in two cups of ground hickory-nut meats. Replace the cover and grind the cream until stiff. When ready to serve turn out upon a platter and pour over it a sauce made by melting maple sugar and stirring into it a cup of coarsely chopped hickory-nut meats.

INDIAN PUDDING WHEY.

One egg, one cup of molasses (not a full cup, and not too sweet), three scant tablespoonfuls of Indian meal. One quart of boiling water. Put all over the fire, boil for five minutes, stirring steadily; pour into a deep earthen dish and just as you set it in the oven, add two tablespoonfuls of vinegar and one cup of cold water. Cook for three hours. The vinegar makes the whey. Eat with butter or cream.

HEALTH AND BEAUTY.

Lemon is a good nail bleach, but grease should be applied immediately afterward, as the acid is drying. To remove fruit stains from the hands, hold the hands in the fumes of a sulphur match or over burning sulphur.

A good powder will protect the skin and will keep the pores from becoming clogged with dirt that grinds in and forms blackheads.

For toothaches, try warm salt and water applied directly to the affected part. If used once a week salt will keep the gums healthy and the teeth free of tartar.

There is only one sure permanent remedy for superfluous hair, and that is the electric needle, used by an experienced operator. The needle is inserted into the pore, the current turned on and the hair root and papilla destroyed. When the work is carefully done, there is almost no discomfort.

The selection of proper underwear is very important. The skin should be prepared to resist the change of temperature, and not be in a warm, relaxed condition as is sure to be the case when the entire body is encased in woollens. Individuals who bundle themselves up from neck to toes are always worried and sneezing with colds and coughs.

EVERY LITTLE THING.

Pompadour silks make charming evening gowns under transparent over or skirts of point d'esprit, net or spangled tulle.

As a relief from the ubiquitous brown there is a medium tint of rather yellowish green, known as "tillend," which is seen in many of the new summer silks.

Underskirts are growing more and more elaborate and broad ribbon plays an important part in them. Many of them are of peau de sude, with deep silk flounces, while white attise petticoats are much trimmed

with insertions of lace and minutely plaited batiste and mousseline de soie.

Trimming of alternate rows of ribbon and lace insertion is seen on some of the late summer silk models. A new trimming for afternoon or evening dresses is of chenille flowers, especially in white, in combination with silver, as, for example, silver outer petals, silver berries or silver foliage.

For indoor gowns or elaborate tea gowns the broken or primitive Greek key pattern is much used as a trimming.

Some of the new hatpins can truly be regarded as jewelry. One of the novelties was a large head of tortoise shell, set with rubies and diamonds. Still another was encrusted with turquoises and diamonds.

The intermingling of flowers in contrasting color is a charming treatment for summer hats when the colors are chosen with discrimination. Dark crimson roses combine nicely with a few sprays of jasmine. Clusters of gardenias look well with Neapolitan violets and another favorite combination is of hyacinths mixed with small bunches of moss roses and rosebuds.

Navy blue is more in favor than it was at the beginning of the season, especially mixed with crude green and mandarin.

Save used tea leaves—To sprinkle over floor before sweeping. But to prevent your carpet being stained, before using them, put them into the colander and let water from a tap run through them. Squeeze dry with hands and they will be ready for use.

Where dishes are washed in the sink stretch a piece of white rubber tubing, about two inches long, over the ends of the faucets, letting it extend about two inches below. This will prevent the breaking and nicking of china that is caused by striking them against the faucets.

After using a bowl of starch do not throw away what remains but leave it to settle. Then pour off the clear water and dry what remains in a cool oven. This starch will be in the form of a firm cake, which can be put away for use another day, when it will be found to be as good as ever.

When walls or ceilings are papered with oilcloth or painted, put on wash boiler of water and close doors and windows and boil the water until the walls and ceilings are wet with the steam. Take a long-handled scrubbing brush or broom, tie a soft rag and wipe your walls. This will save lots of time and trouble.

Oranges for children or invalids should be cut in half and the juice squeezed from them on a lemon-squeezer into a glass. Thus the fruit may be drunk instead of eaten, but with far less trouble and no waste. The remaining peels may be dried and from the oil they contain, are capital kindling, useful with sticks for lighting a fresh fire or by themselves for reviving a dull one.

An old-fashioned method of keeping the shoes impervious to water in rainy weather was to rub the welt stitches with a piece of beef tallow. But this is objectionable, as traces of the grease can be seen in the white particles of the fat left. Castor oil applied with a small brush is very much better. Only a little should be used and the brush should preferably have stiff bristles—the kind that comes with a bottle of glue will answer.

A recipe which is good for cleaning fabrics without injuring their texture or changing their color is the following, which is good also for cleaning rugs and carpets. Grate two raw potatoes in a basin which contains a pint of clear, cold water. Now strain them through a sieve, allowing the liquid to fall into another bowl containing another pint of cold water. When it is settled pour off the water into a bottle and keep it for further use. Dip a sponge into the potato water and rub the soiled garment carefully, after which it may be washed in clear water.

We are sorry to hear that Mrs. Henry Jackson is in very poor health but we hope she will soon be around as usual.

Mrs. M. Renton of Moncton and her two children are visiting in this neighborhood. (She was formerly Miss Annie Clayton.)

Rev. Mr. Rose congregationalist of Keswick Ridge held services yesterday in the Union Church here and the Baptist Church here and the Baptist Church of Queensbury. In the evening Rev. Mr. Sherman preached to a full house in the Episcopal church here.

There are some twenty or more men at work pumping the water out of the Lake George Antimony Mines and preparing for Mining Antimony. We have they will find the mineral in paying quantities. William Boddy of Prince William is in charge of the operations.

Take this old world just as it is and try to make it better.

Some folks kids are a series of inexcusable mistakes.
