HELPS MEN TO WORK HARD

That's what Ferrozone does; it supplies the additional strength that enables a man to maintain health under difficulties. "Last spring I was so completely fagged out I could not work," writes J. W. McNichol of Turnbull, Man. "In the morning I was tired—limbs ached all over. Had no appetite, was sleepless, nervous and unhappy. Ferrozone put new life into me. Now I eat heartily, nerves are strong, I sleep well. I know the joy of health." It's by supplying nourishment and good blood that Ferrozone builds up; try it—50c. per box at all dealers.

An Insulting Landlord.

"These stairs are rather narrow," said the lady who was looking through the flat, "and as we have a baby?"
"A baby?" exclaimed the agent.
"Then there's no use considering the matter any further. Children are not allowed in this building. I thought you understood that."

"Sir! You are insulting. I was about to say that we have a baby grand piano. I desire to have you understand that we move in the best circles."

The Essential Consideration.

"Do you think there is any use in trying to convince people of the correctness of your arguments?"
"It isn't necessary," replied the born orator. "They do not care for the correctness of my arguments as much as for the eloquence with which I present them."—Washington Star.

Nuptials of Popular Young Couple

About three o'clock in the afternoon Rev. A. A. The young lady, leaning on her father's arm, walked from the front door and stood beside him who was so soon to assume control of her future. Rev. A. A. A VALUABLE AGENT.

Deafness because usually due to Catarrh, is quite curable. In a thousand cases this is proved absolutely true. Success invariably attends cured catarrhal deafness of twenty-five years standing. Penetrating through the passages of the ear, the soothing vapor of Catarrhazone relieves the inflammation, destroys the seeds of Catarrh and thereby allows nature to re-assist herself. Try Catarrhazone yourself. 25c. and \$1.00 sizes sold by all dealers.

The animal "trainer" having been taken suddenly ill, his wife reported for duty in his stead.

"Have you ever had any experience in this line?" asked the owner of the circus and menagerie, with some doubt.

"Not just exactly in this line," she said, "but my husband manages the beasts all right doesn't he?"

"Well, you ought to see how easy I can manage him."—Chicago Tribune.

Doping a Cold Doesn't Cure It

The average cough mixture doesn't cure a cold—it "dopes" it, or, in other words, temporarily holds it down, and bottle after bottle must be taken before a cure is effected.

Meantime you must suffer, and your poor stomach be burdened by the indigestion that invariably follows continual dosing with cough syrups.

If your bowels are kept open and the eliminating organs stimulated your cold would soon disappear.

Dr. Hamilton found that his Mandrake and Butterpill Pills were more valuable in colds than any cough cure. While you sleep at night they enliven the kidneys, liver and bowels, and thereby carry off the cold and all its evil effects.

Instead of deadening the stomach like cough cures, Dr. Hamilton's Pills afford this organ the greatest assistance by giving it tone, strength and healthy action.

One or two pills is sufficient. Take them just before retiring.

Next morning you feel like new. The cold is broken up, your system regulated and cleansed and no time lost.

The use of Dr. Hamilton's Pills for colds, coughs and rheumatic ills is popular because efficient. Get some today. 25 cents per box or five boxes for \$1.00, at all dealers, and refuse a substitute.

BY THE DOLLAR SIGN.

How do I know that the spring is here? It is not by the scent in the air Nor the first sweet lilt That the robin spilt From his throat in the tree up there.

I can tell by a sign that is surer far Than the song of a bird like that— By the magical sign Of the flowers that twine On the brim of Myrtille's hat.

By the mystical sign of her low cut shoe, By the sign of her openwork sock, By the wonderful shade— And the price I paid— For her marvelous Easter frock.

How do I know that the spring is here? It is not by the brook's sweet trill Nor the drifting skies, But by the size Of Myrtille's milliner's bill. —New York Press.

Past Thinking Time.

"Well," remarked Mr. Staylate at last, "I must be thinking of going. What time is it?"

"Oh," replied Miss Patience Gonne, "it's long past that time!"

No Chance.

A man who was summoned for beating his wife tried hard to put all the blame upon his mother-in-law and was chided by the bench for his lack of gallantry.

"Why should it always be the fashion for a man to malign his mother-in-law?" the magistrate remarked. "Is chivalry quite dead among us? I knew a man once who never spoke an unkind word to his mother-in-law, never blamed her in the least for his quarrels with his wife and never had the bad taste to complain about her to other people."

The wife beater stared open mouthed as he listened to the recital of the domestic paragon's virtues; then he said: "Oh, yes, I've heard of that fellow before. His name was Adam!"—London Tit-Bits.

What's In a Name?

A story is told of a waiter at a certain restaurant who was renowned for the clever way in which he interpreted the names of the different dishes to the cook through the speaking tube. For instance, if a customer ordered sausage and bread he would tell the cook "A doorstep and a bag of mystery" were wanted. On one occasion two city men had a wager, one of them saying he would give an order for which the waiter could not possibly find any other name. They repaired to the restaurant, and Mr. Jones gave his order: "Walter, bring me a couple of poached eggs on toast with the yolks broken."

The waiter shouted down to the cook, "Adam and Eve on a raft, and wreck 'em!"

For Silverware.

For silverware use sweet oil and whiting. Rub well with a flannel cloth and polish with chamois leather. But if silver is regularly washed with soap and water to which a little ammonia is added, well dried with a linen cloth and vigorously rubbed with chamois few stains will make their appearance.

Watches.

Watches are adjusted to heat and cold by being allowed to stand first in a room heated with dry heat to 120 degrees and then in cold storage, being regulated after each treatment.
