

WHEN OUR BARGAINS ARE EXHAUSTED

you will say with the others that you have seen some of the cheapest selling of

STANDARD MEDICINES, TOILET ARTICLES, ETC.,

that you ever saw.

But really there is no "give out" to our bargains. Things sold today are immediately replaced by other just as good and just as cheap. Low prices perch upon great value at all times.

(Continued.)

Dan glanced at the doctor with a slightly puzzled air. "What do you suppose is the matter?" he asked unsuspiciously. "Why, man, don't you understand? It's you!"

There was no need for him to say more, for the crowd had caught sight of Dan and a hundred voices cried: "There he is! There's Oakley!"

And in an instant Antioch, giving way to wild enthusiasm, was cheering itself black in the face, while above the sound of cheers and the crash of music the steam whistle at the shops shrieked and pealed.

The blood left Oakley's face. He looked down at the crowd and saw Turner Joyce. He saw McClintock and Holt and the men from the shops, who were, if possible, the noisiest of all. He turned helplessly to the doctor.

"Let's get out of this," he said between his teeth. The crowd and the noise and the excitement recalled that other night when he had ridden into Antioch. As he spoke he swung himself down from the steps of the coach, and the crowd closed about him with a glad shout of welcome.

The doctor followed more slowly. As he gained the platform the Hon. Jeb Barrows hurried to his side.

"Where is he to go, Doc?" he panted. "To your house or to the hotel?"

"To my house."

"All right, then. The crowd's spoiling the whole business. I've got an address of welcome in my pocket that I was to have delivered, and there's to be a supper at the rink tonight. Don't let him get away from you."

Meanwhile Dan had succeeded in extricating himself from the clutches of his friends and was struggling toward a closed carriage at the end of the platform that he recognized as the Emory's.

In his haste and the dusk of the dull October twilight he supposed the figure he saw in the carriage to be the doctor, who had preceded him, and called to the man on the box to drive home. As he settled himself he said reproachfully:

"I hope you hadn't anything to do with this."

A slim, gloved hand was placed in his own, and a laughing voice said:

"How do you do, Mr. Oakley?"

He glanced up quickly and found himself face to face with Constance Emory.

There was a moment's silence, and then Dan said, the courage that had brought him all the way to Antioch suddenly deserting him:

"It's too bad, isn't it? I had hoped I could slip in and out of town without any one being the wiser."

"But you can't," with a little air of triumph. "Antioch is going to entertain you. It's been in a perfect furor of excitement ever since it knew you were coming back."

"Well, I suppose there is no help for it," resignedly.

"Where is my father, Mr. Oakley?"

"I guess we left him behind," with sudden cheerfulness. He leaned forward so that he could look into her face.

"Constance, I have returned because I couldn't stay away any longer. I tried to forget, but it was no use."

She had withdrawn her hand, but he had found it again, and now his fingers

"There he is! There's Oakley!"

closed over it and held it fast. He was feeling a sense of ownership.

"Did you come to meet me?" he asked.

"I came to meet papa."

"But you knew I was coming too."

"Oh, no!"

It was too dark for him to see the color that was slowly mounting to her face.

"Constance, I don't believe you," he cried.

"I was not sure you were coming," Constance said weakly.

"You might have known that I'd come back—that I couldn't stay away."

"Don't you think you have been a long time in making that discovery?"

"Well, yes, but when I saw your father—"

"What did papa say to you?" with keen suspicion in her tones.

"You mustn't blame him, Constance. It was not so much what he said as what he didn't say. I never knew any one to be quite so ostentatious about what was left unsaid."

[TO BE CONTINUED.]

SELECTIONS

BALLOONING.

The Cost and the Fascination of This Aerial Sport.

I have often been asked how balloon flying compared with other sports both in cost and in enjoyment. The first cost to those who wish to soar above the clouds is smaller than in automobilizing, but each ascension costs some \$300. A flight may last less than an hour or it may continue the better part of a day.

The tendency is toward flights of longer duration, as invention helps the aeronaut, and with the multiplication of its devotees, particularly among the amateurs, the records will become longer both in hours and miles.

When one leaves the earth the impressions come so fast that one can hardly differentiate them. They produce a kaleidoscopic effect. A man must stop and concentrate his mind on certain special sensations, or else on returning to earth he will find that he has no sensation in particular to tell about.

There is the impression of the crowd of people shouting and waving their hands. Before you realize it they have vanished as individuals. The earth sinks from you, the houses become tiny boxes, and large rivers appear brooks that you could easily jump across.

The lakes are pools, and marsh land seems solid. This latter was the cause of my friend Nogue's landing where he did and sacrificing his life. Forests become smooth like pasture land. Railroad trains are like crawling worms, and all the earth sounds eventually cease.

At 1,000 or 2,000 feet you pass the dust line, which is as clearly marked as the line between water and air. As high as 2,000 feet there are still frequently seen butterflies, mosquitoes and other insects. Remarkably beautiful effects of clouds are seen from the balloon, especially when the sun shines on them. They often seem like snow banks, and their edges are always bluish, like water, and ever give the aeronaut the sensation of approaching the ocean.

When in the clouds you can see only the bushes and its occupants, and you may suddenly pass out of them to find that you are driving straight into a mountain peak, as we did once. If you stay in the fog there is nothing to warn you of such a danger except the roaring of the wind in the treetops, and a quick casting out of ballast may be necessary to save you from balloon wreck on the crags.—Dr. Julian P. Thomas in Appleton's.

Australian Gold.

Although most of the Australian gold is now obtained from depths of hundreds and thousands of feet, it is still possible to acquire a respectable nugget by pick and shovel close to the surface. The other day some workmen were making a drain near the city hall of Bendigo when the pick of one of them rebounded after having struck something hard. "That must be a nugget," remarked a jocular bystander. "I'll look," said the workman, and the next moment he had a lump of quartz thickly studded with gold in his hands. Then the earth that had been thrown out in the making of the drain was "cleaned up," as the miners say, and smaller gold specimens were secured. And now, if the law permits, a shaft is to be sunk in the back yard of a hotel close by.

Denatured Alcohol.

It is very misleading to base elaborate arguments on German experience with denatured alcohol. The conditions are by no means similar. Germany has no natural supply of gasoline and kerosene as have we. Germany depends upon alcohol; we do not. There are many problems to be met in this matter. In this work the farmer, distiller and machinists must co-operate. The advantages from the increased use of alcohol for industrial purposes will be manifold, and if the farmer keeps awake he will get his share of them.—Farming.

Individuality in Gifts.

Individuality should be the one thing looked for in Christmas gifts. They should be the particular thing the recipient desires, if possible, and if there is anything that can be marked it should be. One handkerchief marked with all the initials is worth half a dozen bought with a single initial, which any one might have. Every thing is marked this year, the lingerie and even the shirt waists in tiny handkerchief letters. It only costs a few cents a letter to have this done.—Harper's Bazar.

Maple Insect.

A scale insect known as the cottony maple scale has been doing a good deal of damage in some parts of the United States, especially in fine sugar maples grown for shade. This scale is much larger than the San Jose, larger even than the oyster shell bark louse. It has been found that the insect could be controlled by a winter treatment of kerosene emulsion, which should be made up rather strong.—Country Gentleman.

An Electric Overcoat.

The Electrical World announces the invention by a resident in Paris of an appliance known as the "electric thermophile." It consists of a light battery to be carried in the pocket and an arrangement of wires attached to an ordinary suit of clothes which will keep the wearer warm and do away with the necessity for an overcoat out of doors or a fire at home.

What the Jury Thought.

"Flatman, I hear you were arrested the other day for insulting and browbeating a janitor. How did you come out?"

"I was tried for it and acquitted."

"On the ground that it was justifiable?"

"No; the jury couldn't be made to believe such a thing was possible."

Study Yourself.

In order to judge of the inside of others study your own, for men in general are very much alike, and though one has one prevailing passion and another has another, yet their operations are much the same, and whatever engages or disgusts, pleases or offends you in others will engage, disgust, please or offend others in you.—Chesfield.

They Knew Him.

Knox—It seems that Grapher's acquaintances are all very shrewd people. Jenks—Did he tell you that? Knox—He implied as much. He announced the other day that he doesn't owe anybody a dollar.

Feminine Amenities.

"Yes, dear, I was married last month. I'd like you to call on me and see the pretty little flat I have."

"I've seen him, my dear!"

CONSTIPATION CLOGS THE BOWELS

No other cause produces so much sickness as constipation, and therefore it is dangerous to allow the bowels to become clogged up. Bad blood, dyspepsia, headaches, biliousness, boils, pimples, and piles, are all caused by constipation.

Avoid all of these troubles by the use of

BURDOCK BLOOD BITTERS,

nature's remedy for all diseases of the stomach, bowels and blood. It acts on the bowels and promotes their free and regular action, curing constipation and all troubles which arise from it. It has been on the market for over thirty years so you are not using a new and untried remedy. B.B.B. has cured thousands of others and will cure you. Mr. B. Woodcock, Nashua, Bridge, N.H., writes: "For over twenty years my wife was troubled with constipation. She tried several physicians but could get no relief, but after taking three bottles of Burdock Blood Bitters she was completely cured and is to-day in good health. My wife and I cannot speak too highly of B.B.B."

McGale's Butternut Pills

are safe to take in any season—in any climate. No calomel, no mercury—just the concentrated extracts, combined with other vegetable ingredients—very gentle in effect. They quickly

Cure Stomach, Liver and Kidney Disorders—strengthening the organs to healthy action. 25c. a box—at drug stores or by mail.

Sole Proprietors, THE WINGATE CHEMICAL CO., Ltd. MONTREAL, Can.

Lydia E. Pinkham's Vegetable Compound

is a positive cure for all those painful ailments of women. It will entirely cure the worst forms of Female Complaints, Inflammation and Ulceration, Falling and Displacements and consequent Spinal Weakness, and is peculiarly adapted to the Change of Life. It will surely cure

Backache.

It has cured more cases of Female Weakness than any other remedy the world has ever known. It is almost infallible in such cases. It dissolves and expels Tumors in an early stage of development. That

Bearing-down Feeling, causing pain, weight and headache, is instantly relieved and permanently cured by its use. Under all circumstances it acts in harmony with the female system. It corrects

Irregularity,

Suppressed or Painful Periods, Weakness of the Stomach, Indigestion, Bloating, Nervous Prostration, Headache, General Debility. Also

Dizziness, Faintness, Extreme Lassitude, "don't-care" and "want-to-be-left-alone" feeling, excitability, irritability, nervousness, sleeplessness, flatulency, melancholy or the "blues," and backache. These are sure indications of Female Weakness, some derangement of the organs. For

Kidney Complaints and Backache of either sex the Vegetable Compound is unequalled.

You can write Mrs. Pinkham about yourself in strictest confidence. LYDIA E. PINKHAM MED. CO., Lynn, Mass.

Defying the Tooth of Time.

The Hungarian chemist Brunn claims to have discovered a liquid chemical compound which renders certain kinds of matter proof against the effects of time. He asserts that it doubles the density of nearly every kind of stone and renders it waterproof. It imparts to all metals qualities which defy oxygen and rust. The professor says that while travelling in Greece some twenty-five years ago he noticed that the mortar in stones of ruins which were known to be 2,000 years old was as hard, fresh and tenacious as if it had been made only a year. He secured a piece of the mortar and has been working on it ever since, until now, when, he says, he has discovered the secret. His discovery, he claims, will at the least double the life of metal exposed to the air, such as in bridges, railroads, vessels and tanks.—Consultar and Trade Reports.

A Jewish University.

By the will of Moses A. Dropsie a sum of money has been set aside for the purpose of founding a Jewish university. At a meeting held at the home of Judge Mayer Sulzberger in Philadelphia, at which Judge Sulzberger, William B. Hackenberger, Dr. Cyrus Adler and Oscar S. Straus were present, it was decided to apply to the commonwealth of Pennsylvania for a charter for an institution to be known as "The Jewish University, founded by Moses A. Dropsie." The university will be established in Philadelphia, and it is expected that it will co-operate with other institutions which have been established for the promotion of Jewish learning.

INTERCOLONIAL RAILWAY

On and after Sunday, Oct. 14th, 1906 trains will run daily (Sundays excepted), as follows:

TRAINS WILL LEAVE FREDERICTON.

No. 303 Mixed for Campbellton, Moncton, Chatham and Loggieville. 6.45

No. 317 Suburban for Marysville. 6.15

No. 321 Suburban for Marysville. 11.15

No. 301 Express for Montreal, Chatham, Loggieville. 17.00

No. 327 Suburban for Marysville. 18.40

No. 329 Suburban for Marysville. 21.00

TRAINS WILL ARRIVE AT FREDERICTON.

No. 316 Suburban for Marysville. 8.15

No. 302 Express from Montreal, Quebec, Chatham and Loggieville. 18.00

No. 326 Suburban from Marysville. 18.30

No. 304 Mixed from Chatham Junction, Chatham and Loggieville. 18.40

No. 328 Suburban from Marysville. 19.15

All trains are run by Atlantic Standard time. Twenty-four hour notation. 24.00 o'clock is midnight. Moncton, N. B., Oct. 12th, 1906.
