Circular sent on request.

5000 LIVES SAVED YEARLY BY MODERN METHODS IN TREATING CONSUMPTION

In New York since 1881 there has been a reduction in the death
rate from tuberculosis of 40 per cent; that means an annual saving
of some 5,000 lives.

Before German scientists discovered the germ of this disease, it
was considered the visitation of an avenging Providence. Our fathers
gave it up as hopeless. Modern methods of treatment, however,
have done much toward eradicating the terrible disease.

A noted specialist, whose camp for consumptives in the Pine
Woods of Maine has attracted great attention, because of the re-
markable cures he has effected there, and whose methods have been
indorsed by the highest authorities, says his treatment was very
simple, consisting of open air exercise, deep breathing and nourish-
ing food. Every four hours the patient was given one teaspoonful
of a mixture of the Pure Virgin Oil from the White Pine Trees, com-
bined with Whisky and Glycerine, in the following proportions: One-
half ounce Virgin Oil of Pine (Pure), two ounces of Glycerine and
eight ounces of good Whisky. Shake well and take in teaspoonful
doses every four hours.

This treatment strengthened the lungs and healed the bronchial
tubes. He claims this formula will break up a cold in twenty-four
hours, and cure any cough that is curable. The ingredients can be
secured from any good prescription druggist at small cost, and can
be easily mixed in your own home.

Inquiry at the prescription department of one of our leading phar-
macies elicited the information that Virgin Oil of Pine (Pure) is put
up only in half-ounce vials for dispensing. Each vial is securely
sealed in a room air-tight case, with a migrated wrapper, with the
name—Virgin Oil of Pine (Pure), put up only by Leach Chemical
Co., Windsor, Ontario—plainly printed thereon. There are many
rank imitations of Virgin Oil of Pine (Pure), which are put out un-
der similar name and style of package. Never accept these as a
substitute for the Pure Virgin Oil of Pine, as they will invariably
produce nausea and never effect the desired result.

MAUGERVILLE.

Feb. 28.—Canon Cowie (Frederic-
ton) held service in Christ church
last Sunday morning.

Miss Catherine Miles, Gibson, who
has been visiting friends here the
past week returned home Sunday af-
ternoon.

The Baptist Sewing Circle meets
next Friday, March 1st, at the Bap-
tist parsonage.

Quite a number of our young men
have returned home from the lum-
ber woods.

Mrs. William Clark spent a few
days in Sheffield last week.

Miss Alice Clowes and Miss Dottie
Carruthers called on friends in Oro-
rocto Friday last.

W. M. Thurrott, our popular merch-
ant, visited his home here last week.

Miss Helen Ferguson, Lakeville
Corner, visited Mrs. Hatfield Dyke-
man last Friday.

Mr. Nixon is kept very busy cutting
wood in this locality. He has Mr.
William Clark with him this spring.

Miss Violet Banks visited Miss
Mabel Brown Saturday.

Mr. Walter Dykeman, Jensen, is
visiting Mr. and Mrs. D. C. Dyke-
man, Upper Maugerville.

Mrs. George M. Foster spent Sun-
day with Mr. and Mrs. R. A. Mc-
Fadden.

Mr. Walter Case, Burton, is ex-
pected at the Circle Friday evening
with his gramophone.

Miss Mamie Dykeman very nicely
entertained a number of her friends
last Saturday evening at her father's
residence. After greatly enjoy-
ing a number of games and lots of
music, a delightful luncheon was
served by Miss Dykeman, assisted by
her brother, Harry.

A number of people from Mauger-
ville attended the social Tuesday
evening at the home of Rev. Mr.
Whyte, Sheffield.

We regret to hear of the illness of
Councillor G. F. Banks, Upper Mau-
gerville.

Ralph W., youngest son of R. A.
McFadden, has been very sick with

MOUTH OF KESWICK.

Feb. 28.—The storm and wind this
week has made the roads almost im-
passable, but they are getting broken
out somewhat today.

The members of the Congregational
church at Keswick Ridge were to
have had a social at Mr. David
Pickard's at this place last night,
but as the roads were so bad, only
a very few could get there, so they
are going to try again tonight, and
we expect to see quite a crowd.

Mrs. Edward Merrithew has been
very ill again, but we are glad to
hear she is some better.

Mr. and Mrs. A. Hawkins and
daughter of Yorkton, Assa, are vi-
siting relatives and friends in this
place.

Mrs. Abram Merrithew returned
Friday night from a visit to her
daughter, Mrs. Kennedy, at Wood-
stock.

Mr. and Mrs. Grant Hawkins of
Windsor, Car. Co., are visiting Mrs.
Hawkins' mother, Mrs. Annie Wil-
liams.

Mr. McGill of the U. N. B., preach-
ing in the U. B. church Sunday morn-
ing. Rev. W. F. Foster is to
preach next Sunday evening.

Mrs. Charles Yerxa is at present
visiting her sister, Mrs. Brown at
Queensbury.

Mr. Chas. Jewett had a narrow
escape from having his home burned
this week. A spark from a stove in
the room set his bed on fire, and
considerable damage was done before
it was discovered.

THE ORIGIN OF "PLUG" TO- BACCO.

An old Missouri farmer visiting
Kansas City said, as he took a chew
of tobacco:

"All the difference in the world in
tobacco. I've tried some 20 different
kinds and none is as good as that we
used to make ourselves down on the
farm. We would take a maple
log which was green and bore a
dozen holes in it with a two-inch
auger. They were our molds. We se-
lected our choicest tobacco and soaked it
for a week or more in wild honey.

Then we'd take the log to the log
pile and a good hickory 'tampin' stick and
go to work.

"A little ball of the honey soaked
tobacco would be put in an auger
hole and tamped in with the stick
and a hammer. We'd pound it in
solid. Ball after ball would be ram-
med in until the whole log was
became a solid plug. When the hole
was nearly full we would pound in a
plug, and then the log would be put
away to season. As the wood dried
the moisture would be drawn from
the tobacco. And when it was taken
from the log 'plug' tobacco,
and that's where the name originat-
ed."

LOSS OF APPETITE AND EN- ERGY.

Singly they are a worry—combined
they become a burden, telling that
waste has been immensely greater
than the body's power to rebuild. The
first need is to reconstruct the blood
make good the deficiency of red cells.

Ferrozone improves digestion, makes
blood, the kind that nourishes and
rebuilds. Quickly the nervous sys-
tem responds to the new power sup-
plied by Ferrozone. Strength returns,
ambition revives, energy and endur-
ance give the system just what it
needs to maintain the balance of
health. No tonic better than Ferro-
zone, 50c. per box at all dealers.

TWO NEW DREADNAUGHTS.

London, Feb. 28.—A statement of
the naval estimates for 1907-8, pre-
sented to parliament tonight, intro-
duces quite a novel feature, for it
makes the construction of battleships
during the coming year dependent in
a measure upon the defence reached
at the next peace conference held at
The Hague. This new construction,
estimated at \$40,500,000, against \$46-
175,000 for 1906-7, Lord Lord Tweed-
mouth, First Lord of the Admiralty,
says, will include two, or unless an
understanding between the naval pow-
ers is reached at The Hague con-
fession three large armored vessels of
the Dreadnaught type.

One fast unarmored cruiser five tor-
pedo boat destroyers, twelve torpedo
boats and twelve submarines also are
provided for.

On April 1 there will be under con-
struction five battleships, seven arm-
ored cruisers, eight torpedo-boats,
seventeen torpedo boats and
twelve submarines.

The estimates for the year show a
total reduction of one thousand men
and \$5,675,000 as compared with
1906-7.

Lord Tweedmouth comments upon
the striking improvement in the gun-
nery of the fleet compared to last
year.

In dealing with the redistribution of
the fleets, Lord Tweedmouth touched
indirectly upon the position of Ad-
miral Lord Beresford. He explained
that the "home" fleet was still in
process of development and that some
time would elapse before it could
reach its full strength. He said the
fleets at home will continue to be
combined for war purposes under the
orders of the commander of the
Channel fleet, in other words, Lord
Beresford, while the Channel, Atlantic
and home fleets will carry out their
periodic manoeuvres together under
his command. This presumably
meets Lord Beresford's objec-
tion that practically all vessels of
the destroyers class had been taken
from the Channel squadron for the
"home" fleet, as Lord Beresford is
now in virtual command of both
fleets.

READY ON THE SHELF

That's where you'll find "Nervine"
in every well regulated house-
hold. So pleasant to take that even
little children will cry for it. So
certain to cure coughs, sudden colds
and tight chest that thousands of
bottles are used every day. Polson's
Nervine does prevent illness, it does
ease pain and inflammation, and by
being handy will save worry and keep
down the doctor bills. Large bot-
tles sold for a quarter at all dealers,
at all dealers.

WEAK WOMEN. READ BELOW.

One woman in three is struggling
against weakness.

Are you one of the weak ones?
Not exactly sick, but oh, how mis-
erable!

You discharge your daily duties, but
you can measure the burden, the
trial?

Talk of bravery, where find a finer
spirit than among half-sick women,
fighting, struggling to do their duty
day against terrible odds—and they
never give up until they drop.

If you could put a drop of blood
under the microscope the cause
would be revealed.

You would find the blood thin and
watery, red cells far too few, the
carrier of life very greatly reduced in
vitality, and this means slow death.

Ferrozone cures weakness by sup-
plying nutriment and building mate-
rial, by giving the body the constitu-
ents it requires for restoring tired or-
gans.

It gives vim, vigor and endurance.
Ferrozone is a tissue builder.

It adds force to all the vital func-
tions—the stomach, liver, kidneys.
Ferrozone gives sound sleep, sound
digestion, promotes perfect removal
of all the body wastes.

Ferrozone makes the body glow
with health.

Any weak, pale or sickly woman
that Ferrozone won't cure—why she
must be hopeless. Wonderful power
in Ferrozone, wonderful cures it
makes and this you can prove by
trying it. Sold everywhere in 50c.
boxes.

A MAINE MURDER.

Fort Fairfield, Me., March 3.—
Henry Michaud, of Caswell, was ar-
rested in Van Buren yesterday on a
charge of murdering George Evans,
also of Caswell.

The two men, between whom a feud
existed for several years, met yester-
day afternoon while on their way
home from New Brunswick. It is
claimed that both had been drinking.

A quarrel followed, and it is alleged
Michaud shot Evans in the abdomen.
Evans died late yesterday.

Michaud fled to Van Buren, but de-
cided to give himself up, and he was
taken to Limestone by Deputy Sheriff
A. C. Leighton of the latter town.

Evans was 22 years of age and the
son of Mrs. Jane Evans. He leaves a
widow.

BABY - HUMORS.—Dr. Agnew's

Ointment soothes, quiets, and effects
quick and effective cures in all skin
eruptions common to baby during
the teething time. It is harmless, and
in cases of Scald Head, and
Eczema, Salt Rheum and all
Skin Diseases of older people. 35
cents. Sold at the Central Pharma-
cy, A. J. Ryan.—55.

THE HEROINE OF HOCHELAGA.

Montreal has many stately monu-
ments, but there is need for another
in one of the most conspicuous
places in the city. No braver deed
to be found in Canadian annals
than that of Sarah Maxwell, the
schoolmistress of Hochelaga, who on
Tuesday gave her life for her pupils.

The story is Homeric in its simplic-
ity.

In those few terrible minutes one
woman was at work, untiring, un-
flinching. One after another she
carried the little ones out to the
windows and to safety, groping her
way back each time to rescue those
behind. There was not time to
carry them down the narrow stair-
way. It was impassable with
smoke and flames. Burned, blinded
and bruised, she still battled with
the smoke and flame until after hand-
ing out one little girl, the agony
she suffered forced her to cry out,
"Oh, I am burning."

But ever then she did not hesitate
for a moment. Back she went into
the blistering heat and the roaring
smoke, where, groping in search of
others, whom she could not see, but
whom she knew had not been saved,
Fireman Benoit found her as he
climbed the ladder and broke in one
of the windows of the second story,
himself almost blinded by the smoke
and badly scorched by the terrible
heat. He cried to her to come out
and save herself while there was yet
time, but she stayed on.

To the poet, the statesman and the
soldier Canada has raised not a few
fine monuments of bronze. These
men are worthy of remembrance, but
not more worthy, not nearly "so
worthy" most of them of having
their names graven on imperishable
tablets as this girl, who with the
agonized cry, "I'm burning," went
back to duty and death.

THE ISLAND'S SURPLUS.

Smallest Province Will be \$49,000
Ahead.

Charlottetown, P. E. I., Feb. 28.—
The debate on the draft address was
continued in the provincial legisla-
ture yesterday. The subsidy settle-
ment will be the great storm centre
of the session. Premier Peters yester-
day, in submitting the report of the
Ottawa conference, at which he
was a delegate, answered the conten-
tious question of the Island's objec-
tion to stand to have her per capita
allowance reduced with the decrease
of population, by saying that the
right of the Island to retain the pre-
sent per capita allowance paid on the
maximum population of 1891 was se-
cured by an Imperial order in Coun-
cil when the Island entered Confed-
eration, and that the Island delegates
were assured by Sir Wilfrid Laurier
and Hon. W. S. Fielding at the con-
ference that no reduction would take
place. Mr. Peters says the addition
of \$70,000 to the Island's specific
subsidy secured at the conference will
enable the province, with the ordi-
nary current expenditures, to have a
surplus of about \$19,000 and includ-
ing capital account of \$24,000.

WISDOM IS THE FRUIT OF EXPERIENCE.

Wisdom is the fruit of experience.

GREAT BRITAIN'S SONS.

Illustrious Fame Roll of the Mother
Country As Exemplified In
Many Men of Note.

Sir Robert Peel—"Bob, you dog, if
you're not Prime Minister I'll disin-
herit you." These words were once
jocularly uttered by the father of this
eminent English statesman, who was
anxious from the first that his heir
should make a figure in politics. How
Sir Robert, step by step, won his way
to the Premiership twenty-three years
later cannot be told here. Suffice it
to say that England has never pos-
sessed a statesman with greater tal-
ents for legislative business and fi-
nance. Personally Sir Robert was not
a popular or sociable man, but he
loved his work and the House of Com-
mons, and the country is indebted to
him for many reforms and much pros-
perity.

Sir Titus Salt.

The world admires a successful
man, and more so when that man
uses his gifts and prosperity to con-
fer benefits upon his fellow-creatures.

Sir Titus Salt built up the greatest
manufactory of alpaca fabrics in Eu-
rope, and he also built around that
manufactory a village of 900 employ-
ees. A man of thoroughly altruistic
principles, Sir Titus treated his hands
with great liberality, while he gave
principally gifts to Bradford, which town
he represented in Parliament and served
as mayor.

William Cobbett.

The sturdiness and indomitable
energy of Cobbett must arouse the ad-
miration of every Englishman. From
the son of a peasant he rose to be
one of the most daring and powerful
political writers of the early half of
the nineteenth century. It is true that
Cobbett had a capacity for getting
himself into "hot water," but this
did not deter him from fighting for
any cause he considered to be right.

Cobbett loved the poor as much as
he loved the country and the fields,
and he undoubtedly did much for his
trenchant writings—which called the
attention of reformers to work which
required to be done—towards amelior-
ating the conditions of those who
lived in the poverty corners of Eng-
land.

Dr. Tait, Archbishop of Canterbury.

Undoubtedly the greatest achieve-
ment of this prelate was performed
when he succeeded Dr. Bloomfield as
Bishop of London. So vigorously did
Dr. Tait labor in the metropolis that
in a few years he raised no less than
£350,000 for the building of churches,
schools, and parsonages in the poorer
districts of London. His sermons
and writings in their day were read
with avidity, for people recognized
that they emanated from a master-
mind. Dr. Tait had many difficulties
to overcome, but he grappled with
them in a manner which proved him
to be thoroughly equal to the duties
of the high offices conferred upon him.

Lord Melbourne.

Although this noted statesman never
earned fame as a great orator and
brilliant politician, he accomplished
some solid and valuable work for the
country, more especially when he be-
came Prime Minister. He signalled
his accession to his office, in 1835, by
carrying a great measure of municip-
al reform, and the following year
came the lowering of the stamp duty
on newspapers and the Tithe Com-
mutation Act, benefiting landowners
and clergy alike. One of the most not-
able and estimable features of Lord
Melbourne's career, by the by, was
the delicate tact and friendly and con-
scientious care with which he initi-
ated Queen Victoria into the duties
of Sovereign on her accession to the
throne.

Lord Dufferin.

This great Ambassador had one of
the most distinguished careers among
the most distinguished men of his
time. Among the letters which he was
entitled to write after his name were
P.C., K.P., G.C.B., G.C.S.I., G.C.M.
G., G.C.E., D.C.L., LL.D., F.R.S.

The LL.D. was conferred on him by
Oxford, Edinburgh and Harvard,
while he was also Doctor of Oriental
Learning of the Punjab University.

His Lordship acted as Governor-Gen-
eral of Canada as well as of India and
France, while early in his career he
filled various Under Secretarieships
of State. Once, in a moment of faze-
tiousness, he described himself as
"Maid-of-all-work to British Govern-
ments."

William Charles Macready.

The efforts of this great actor were
always directed towards elevating and
purifying the drama
