Women Who Wear Well.

It is astonishing how great a change a few years of married life often make in the appearance and disposition of many women. The freshness, the charm, the brilliance vanish like the bloom from a flower which is rudely handled. The matron is only a dim shadow, a faint echo of the charming maiden. Few young women appreciate the shock of the system through the change which comes with marriage and motherhood. Many neglect to deal with the unpleasant pelvic drains and weaknesses which too often come with marriage and motherhood, not understanding that this secret drain is robbing the cheek of its freshness and the form of its fairness.

As surely as the general health suffers when there is derangement of the health of the delicate womanly organs, so surely when these organs are established in health the face and form at once witness to the fact in renewed comeliness. More than a million women have found health and happiness in the use of Dr. Pierce's Favorite Prescription. It makes weak women strong and sick women well. Ingredients on label—contains no alcohol or harmful habit-forming drugs. It is made wholly of those native, American, medicinal roots most highly recommended by leading medical authorities of all the several schools of practice for the cure of woman's peculiar ailments.

For nursing mothers, or for those broken-down in health by too frequent bearing of children, also for the expectant mothers, to prepare the system for the coming of baby and make its advent easy and almost painless, there is no medicine quite so good as "Favorite Prescription." It can do no harm in any condition of the system. It is a most potent invigorating tonic and strengthening nerve, nicely adapted to woman's delicate system by a physician of large experience in the treatment of woman's peculiar ailments.

Bad Symptoms. The woman who has periodical headaches, backache, sees imaginary dark spots or specks floating or dancing before her eyes, has gnawing distress or heavy full feeling in stomach, faint spells, dragging-down feeling in lower abdominal or pelvic region, easily startled or excited, irregular or painful periods, with or without pelvic catarrh, is suffering from weaknesses and derangements that should have early attention. Not all of above symptoms are likely to be present in any case at one time.

Neglected or badly treated and such cases often run into maladies which demand the surgeon's knife if they do not result fatally. No medicine extant has such a long and numerous record of cures in such cases as Dr. Pierce's Favorite Prescription. No medicine has such a strong professional indorsement of each of its several ingredients—worth more than any number of ordinary non-professional testimonials. The very best ingredients known to medical science for the cure of woman's peculiar ailments enter into its composition. No alcohol,

harmful, or habit-forming drug is to be found in the list of its ingredients printed on each bottle-wrapper and attested under oath as complete and correct.

In any condition of the female system Dr. Pierce's Favorite Prescription can do only good—never harm. Its whole effect is to strengthen, invigorate and regulate the whole female system and especially the pelvic organs. When these are deranged in function or affected by disease, the stomach and other organs of digestion become sympathetically deranged, the nerves are weakened, and a long list of bad, unpleasant symptoms follow. Too much must not be expected of the "Favorite Prescription." It will not perform miracles; it will not cure tumors—no medicine will. It will often prevent them, if taken in time, and thus the operating table and the surgeon's knife may be avoided.

Doctor's All Agree. The most eminent writers on *Materia Medica*, whose works are consulted as authorities by physicians of all the different schools of practice, extol, in the most positive terms, the curative virtues of each and every ingredient entering into Dr. Pierce's Golden Medical Discovery. In fact it is the only medicine, put up for sale through druggists for the cure of all diseases of the mucous membrane, as nasal catarrh, throat, laryngeal, and bronchial affections attended by lingering, or hang-on-coughs that has any such professional endorsement—worth more than any amount of lay or non-professional testimonials.

Do not expect too much from the use of Dr. Pierce's Golden Medical Discovery. It will not work miracles. It will not cure consumption in its advanced stages. No medicine will. For is the "Discovery" so good for a sudden attack of acute cough, but for the lingering, obstinate, hang-on-coughs, accompanying catarrhal, throat, laryngeal and bronchial affections, it is a most efficacious remedy. In cases accompanied with wasting of flesh, night-sweats, weak stomach and poor digestion with faulty assimilation, and which, if neglected or badly treated are apt to lead to consumption, the "Discovery" has proven wonderfully successful in effecting cures.

The formula is printed on every wrapper of "Golden Medical Discovery," attested as to correctness under oath, and you can't afford to accept any substitute of unknown composition for this non-secret remedy no matter what selfish interests may prompt the dealer to urge such upon you. In fact it is an insult to your intelligence for him to do so. You know what you want and it is his place to supply that want.

Dr. Pierce's Pleasant Pellets are the original "Little Liver Pills" first put up by old Dr. Pierce over 40 years ago. Much imitated, but never equaled. They cleanse, invigorate and regulate stomach, liver and bowels, curing biliousness and constipation. Little sugar-coated granules—easy to take as candy.

Dr. Pierce may be consulted by letter free of charge. Address Dr. R. V. Pierce, Invalids' Hotel and Surgical Institute, Buffalo, N. Y. Dr. Pierce's Medical Adviser (1000 pages) is sent free on receipt of 31 one-cent stamps for paper-covered, or 50 stamps for cloth-bound copy. Address Dr. Pierce as above.

I. C. R. WILL SHOW BIG SURPLUS.

This Announcement was Made by Hon. Mr. Graham in Speech at Exeter, Ont.

EGETER, Ont., Jan. 21.—The Liberal rally last night in this town was marked by a strong speech by Hon. George P. Graham in defence of the Liberal government. Mr. Graham made two important announcements, one that this year, as he would shortly announce in the

House, the Intercolonial Railway would show a surplus of over \$300,000, the other that a bill would be introduced to bring the telegraph and telephone services under the control of the railway commission so that they be amenable to it for the regulation of rates or for anything else in the interest of the people.

STOPPED WIFE TALKING.

Doused Her with Water Because She would not Keep Quiet.

BAYONNE, N. Y., Jan. 22.—Mrs. Margaret Donnelly, of No. 140 Hobart avenue, was complainant against her husband, Edward J., in the police court. She testified that her husband, on several occasions, doused her with cold water as she lay in bed. Donnelly admitted the charge, and said he had resorted to the water cure to put a stop to his wife's incessant talking, which prevented him sleeping. He was sentenced to ninety days in the county jail.

JAPANESE IMMIGRATION

Hon. Mr. Lemieux gives Account of his Successful Mission to Restrict Flow of Orientals to Canada

OTTAWA, Jan. 22.—A statement of his negotiations with the Japanese government regarding immigration into Canada was made to the Commons yesterday by Hon. Rodolph Lemieux, who was sent to Japan for the purpose by the Canadian government.

Mr. Lemieux made a most satisfactory statement. He declared that between 1900 and 1907 the Canadian government had repeated assurances from Mr. Nossi, Japan's representative in Canada, that Japan would restrict emigration of Japanese to British Columbia, and showed that they did restrict them so that only about 200 a year came, and those mostly the families of Japanese living in Canada, merchants and students. He showed that when the Canadian government prepared to adhere to the Japanese treaty and to make restrictions as to the immigration of Japanese, Mr. Nossi asked that no restrictions be placed in the treaty, but that the pledge of Japan to limit emigration be relied upon. On this assurance the treaty was adhered to without restriction. Then a large arrival of Japanese occurred, and it was shown that the Japanese consul at Vancouver had represented that Japanese were wanted in Canada. Mr. Lemieux showed that his negotiations with the Japanese authorities had been entirely successful and read a written assurance from the Japanese minister of foreign affairs that the government of that country would in future restrict emigration to Canada.

THE JAPS FRIENDLY.

He showed that the Japanese government had the most friendly feeling toward Canada and desired to promote commercial relations. He also showed that in Japan Canada could find a great market.

The commission of 1900 discussed an order by Count Aoki, Foreign Minister for Japan, to the governors of the various prefectures of Japan, directing them to absolutely prohibit the emigration of laborers to Canada, and the United States. There was an undoubted understanding between the British, Canadian and Japanese governments for the restriction of emigration to Canada. The understanding was lived up to until the adhesion of Canada to the treaty of 1904. It had been asked why Canada had not followed the advice given by Hon. Joseph Chamberlain, secretary of colonies, that Canada should pass a restriction act similar to the Natal Act and then adhere to the treaty. Mr. Lemieux said the Japanese government was too high spirited to enter into a treaty which did not give her people full rights. The only way Japan would consider the limitation of the movement of her citizens was by doing it herself. The Japanese parliament in 1906 had passed an emigration act which gave the government of Japan full control of emigration. On the passage of that act and on the assurance of the Prime Minister that there was a tacit limit of emigration to Canada, the Canadian parliament gave effect to the Canadian government's adhesion to the British Japanese treaty. As soon as

the treaty had been adhered to the flood gates were opened and the Japanese began to flock into British Columbia. Mr. Lemieux said that the Japanese government was not responsible for the arrivals and could not be accused of bad faith in not living to its understanding. That immigration was promoted by the Canadian Nippon Supply Co. to fill the orders for labor given by Canadian companies. That the Japanese were the Asiatics most objected to was a tribute to their capacity. Japan did not desire its people to come to Canada. The interests of that country lay in the opposite direction, and every man who came to Canada was a loss to Japan.

"It seems to me," said Mr. Lemieux, "that if as a result of my negotiations with the Japanese government, we have succeeded in barring the avenue from Hawaii, and if, on the other hand, it is now possible to so restrict the immigration from Japan as to prevent to the order of things existing before 1907, when, on account of special circumstances the regulations were relaxed, my mission may not have been unsuccessful."

"If I had found the Japanese government not only willing but anxious to meet the views of the Canadian government so as to stop forever any large influx of immigrants, and consequently any future agitation in British Columbia by redeeming in the most absolute manner the assurances repeatedly given by their consul between 1900 and 1907, my efforts have not been in vain."

"I claim that this has been the result of my mission to Japan."

Mr. Lemieux then gave a narrative of his mission in Tokio. He said: "In dealing with such a delicate question I am not at liberty to divulge conferences and documents of a confidential nature."

"I hope I have convinced the house that the arrangement concluded with the Japanese government is satisfactory, though I am prevented from state reasons from confiding many of its essential details. It is not the first time in the history of parliamentary government that in matters of foreign policy, a minister, upon his own responsibility has withheld from the public such information as he may have judged contrary to the interests of the crown."

"In conclusion this arrangement is in my humble judgment a fair and honorable one. The Japanese government, I know, are not anxious to encourage the emigration of their laborers where they are not wanted, more especially where their presence is liable to draw the country into international entanglements. The fact that they have already suppressed the emigration companies on the ground that they become a dangerous exasperating factor shows plainly what course they are determined to take. Acting in that spirit and with a view to meet our desires they will voluntarily take such measures as will prevent any further trouble, thus continuing the cordial relations which should exist between allies and restoring peace and order in that fairest of the fair provinces of the Dominion."

WEALTHY WOMAN MISSING.

It is Feared that Mrs. Werner, of Boston, Has Suicided.

NEW YORK, Jan. 22.—"I am blue and miserable." This written message, found in her diary, is the only thing to explain the strange disappearance of Mrs. Frederick A. Werner, of Boston, a guest of the Hotel Belmont.

A woman of uncommon beauty, wealth at her command, a devoted husband who humored her every whim—all these things apparently failed to satisfy Mrs. Werner. She was plainly miserable, and for month past has made no attempts to hide this fact from her relatives and friends.

After spending all of Tuesday in writing letters and scribbling farewell and melancholy messages in a hotel and vanishing, leaving no trace. Her last letters and the things she wrote in her diary showed plainly that she contemplated suicide.

TENACIOUS FORM OF SYSTEM-ATIC CATARRH.

Not an easy thing to cure, and a remedy that makes good deserves the credit. Catarrhozone cured Chas. H. Webb of Woodstock, N. B., who writes: "For a number of years I was troubled with systematic catarrh. It was a very tenacious form of the disease and nothing helped. I used up my system I used Ferrozone. This catarrh and keep it out. Two sizes, 25c. and \$1.00 at all dealers, sold under combination can't be beaten. They cured me." Your case may be chronic but Catarrhozone will drive out catarrh and keep it out. Two sizes, 25c. and \$1.00 at all dealers, sold under guarantee of satisfaction.

SHUT IN MINE FOR FORTY-SIX DAYS.

Three Miners Rescued After Being Buried Alive by Fall of Rock.

ELY, Nevada, Jan. 22.—After having been entombed forty-six days one

thousand feet below the surface in the Alpa shaft of the Giroux mine, A. D. Brown, and Fred. McDonald and P. Bailey were rescued Saturday morning. Whistles all over the camp blew loudly, while crowds cheered in the streets of Ely to the ringing of bells.

On the morning of Dec. 4, McDonald, Brown and Bailey, and two Greeks were working in the bottom of a shaft 85 feet below the surface of the shaft caved in, snapping the cable used to haul the cage from the shaft and hurling thousands of tons of rock and timbers into the shaft. From the bottom of the compartment in which the men were working to the pumping station, a series of rickety ladders offered the only means of egress.

With falling rocks and timbers streaming down on them, the five men struggled up these ladders. Half way up falling timbers knocked the two Greeks from the ladders, killing them. Bailey, McDonald and Brown reached the pump station. Its timbered roof withstood the rock and timber that came down the shaft and offered them a safe prison where for a whole day the men crouched while at intervals rocks and timbers kept crashing above them, threatening momentarily to crush the deep tomb.

At first it was thought on the surface that all five men had perished, but twenty-four hours after the accident the three buried men managed to make themselves heard by tapping on a six-inch water pipe that reached from the pumping station to the surface. Communication was established with the world above and food and drink were plentifully lowered through the pipe.

Work of clearing the debris was slow work, as timbers, rocks and earth were so twisted together that a new shaft had to be cut for most of the 1,000 feet. At no time did the entombed men suffer greatly, except for the distastefulness of their forced seclusion.

Do you think horse racing a crime? Sure. But you owned a string of horses last season.

That's just it. I was referring to the way in which my horses raced.
