

Navies on Rampage.
Woodstock, July 8.—Fifty Italian navies who are engaged in track-laying went on strike yesterday afternoon, demanding a raise of ten cents a day from the contractor.

A bunch working at the G.T.R. struck simultaneously. At the G.T.R. the navies got fighting and stones were thrown. One man got hit in the face. The striking men refuse to leave the cars and trouble is looked for if an effort is made to eject them. The police were kept busy yesterday afternoon.

Victim of X-Rays.

Montreal, July 8.—The funeral took place yesterday morning of Miss Edna Bole, younger daughter of D. W. Bole, ex-M.P., president of the National Drug & Chemical Co. While horseback riding close on two years ago Miss Bole sustained an injury to her hip and an operation was successful. X-ray photos were taken of the injured member for medical research purposes, but unfortunately some burns resulted from X-rays which it was found impossible to heal.

Revolution in Colombia.

Colon, July 8.—A revolution has broken out in the Republic of Colombia, apparently against the Government of Rafael Reyes, the President of the republic, who is now in London.

The trouble began Sunday morning at Barranquilla. There was little resistance, and the rebels were entirely successful. Two hundred men armed with rifles then marched down to Savanilla and took that port without firing a single shot.

Want Protection in Lumber.

Vancouver, B.C., July 8.—A resolution was passed by the Board of Trade asking the Boards of Trade of

the Dominion Government to secure the establishment of a duty of two dollars on rough lumber and thirty cents on shingles imported into Canada. This was passed in view of the fact that last year's importations of lumber into Canada from the State of Washington amounted to over four million dollars.

Detectives Guarded Stock Exchange.
New York, July 8.—It was learned yesterday that since Friday last a force of experienced detectives have been on guard in the vicinity of the New York Exchange following the receipts by the police of a letter which threatened that between Friday and Tuesday the Exchange would be blown up with dynamite.

A Charge of Abduction.

Collingwood, July 8.—Wm. S. Had-don and Joseph Morgan were arrested here on a charge of abducting Eva Readman, the 12-year-old daughter of George Readman of Owen Sound. The young men had visited Owen Sound on an excursion. Returning, the two were refused admission at local hotels.

To Control Cable in War.

London, July 8.—(C.A.P. Cable.)—According to a Melbourne despatch yesterday, as a result of communications with the imperial authorities, the Commonwealth Government will shortly introduce a bill enabling the Commonwealth to seize control in time of war or emergency of the shore ends of the ocean cables touching Australia.

Another despatch from Melbourne yesterday says that official returns show a most marked improvement in musketry efficiency in the Australian militia and volunteers. The percentage of marksmen in the trained soldiers' course has risen in two years from 25 to 39, and the percentage in the recruits' course from 58 to 65.

STRIKERS ORDERLY LANCASTER, ONT.

Troops Are at Glace Bay Mines and Peace Is Secured.

THIRD OF OUTPUT CLAIMED

Company Officials Declare That They Are Raising One-Third of Normal Amount—Men Claim Many Desertions From Ranks of Workmen—Some of the Poorer People Are Already Suffering.

Glace Bay, C.B., July 9.—The beginning of the fourth day in the struggle between the miners of the United Mine Workers and Dominion Coal Co., finds both sides confident of victory.

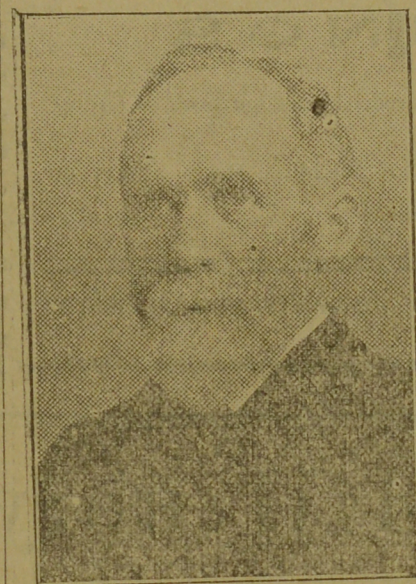

Quietness reigns throughout the colliery districts, after a somewhat strenuous day yesterday.

Early last evening the detachment of troops arrived from Halifax, after an all-day run by special train.

The force is made up of 250 men from the Royal Canadian Regiment, 200 from the Royal Canadian Artillery, 50 of the Royal Canadian Engineers, and details from the Army Medical Corps and the Army Service Corps.

The commanding officer is Lt.-Col. Waldmore of the Royal Canadian Regiment, with Major Macdonell as staff officer.

The moral effect of the presence of the red coats is probably counted upon for the good that is expected to result, for 500 men, even though armed, can't very well give absolute protection to a district that has within

JAMES ROSS,
President of the Dominion Coal Co.

a radius of four miles nine huge collieries, each of which cover from 10 to 20 acres of land, with towns and valuable property between.

Among outstanding incidents of a violent character occurring in the strike district late Wednesday night and yesterday were the attempted blowing up of Sydney and Louisburg tracks at Caledonia, the burning of a shack, and the stoning of a train at No. 6, the mobbing of the sheriff at No. 4, and the assault of Manager Maxwell of No. 1 during a general fusillade of stones.

The coal company is quite hopeful of success, although the output of the mines has been lessened by 65 per cent. The United Mine Workers are just as optimistic as the operators, basing their hopes on the fact that only two or three of the pits are being worked to advantage, while the majority of the pits have been tied up.

The company's normal output is about 12,000 tons a day. Last Friday, according to figures emanating from the company, the output was 8,538 tons, on Saturday, 11,065 tons, on Tuesday 5,610 tons; on Wednesday 4,055 tons, and yesterday it was estimated at 400 tons, a quantity of this being from the bankhead.

At No. 2 only sufficient coal was raised yesterday to keep the fires going. No. 3 was closed, but the company expect that with the troops here it will be possible to operate it to-day. Caledonia is reported by the company to have yielded 500 tons, of the normal 1,400 tons to-day. At Reserve No. 5 and 10, 1,000 tons was yielded, 600 being from No. 5. The normal output from these pits is about 1,200. International No. 8, with a normal of 700, produced 400. The remaining pits were practically closed.

As is usual in mining towns in times of strikes, large numbers of men, mostly foreigner and the cheaper grade of labor, are even at this early stage of the struggle, feeling the pinch of want. The U.M.W. headquarters all day long was occupied by men in waiting there for the purpose of impressing their wants on the committee. Assistance will be given, but only the necessities of life will be provided. The U.M.W. believes that the men, in fighting their own battles, should provide for their own wants. Where absolute poverty is felt, aid is given.

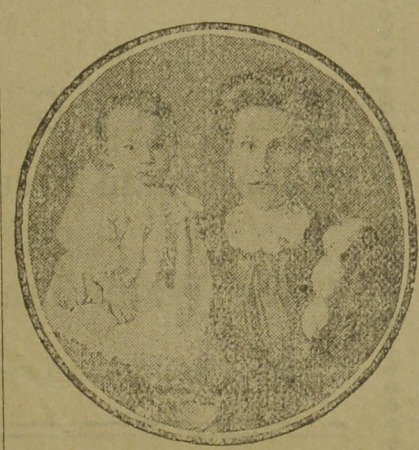

At present, the U.M.W. is proceeding with the assumption that the strike will be of short duration. In case of a lengthy struggle there is talk of starting an immense provision store, with a service extending to the different collieries. Some of the miners who are not bound by family and other ties to Glace Bay, are leaving for various places. There is no "tent-city" for strikers, as the company are not evicting the tenants from their houses.

Pugilist's Discarded White Wife.
Detroit, July 9.—A beautiful white woman, arrested in a negro resort here yesterday, told a pitiful story. She declares she is Jack Johnson's discarded wife, and the police bear out her allegation.

Collector's Books Show Shortage.
Ottawa, July 9.—William Anstess, collector and city traveler for J. G. White & Sons, wholesale stationers, has disappeared. His books show a shortage of \$800.

CARRIED BY "FRUIT-A-TIVES"

These Wonderful Fruit Juice Tablets Are Winning Friends on Every Side.

Lancaster, Ont., Sept. 16, 1903.

I was a martyr for many years to that distressing complaint, chronic Constipation. I tried many kinds of pills and medicines without benefit and consulted physicians, but nothing did me any real good. Then I began to take "Fruit-a-tives," and these wonderful little fruit tablets entirely cured me.

At first, I took five tablets a day, but now I take only one tablet every two days. I am now entirely well, and thanks to "Fruit-a-tives." I give you permission to publish this testimonial.

(Madame) Zephonie Donnell.

This is only one more link in the chain of proof that "Fruit-a-tives" never fail to cure Constipation or non-action of the bowels. 50c a box, or 6 for \$2.50, or trial box 25c. At dealers or sent on receipt of price by Fruit-a-tives Limited, Ottawa.

PREVENT TAKING COLD.

Often you come home, cold and shivering—feet are wet, throat is raw, chest a little sore. A bad cold is just beginning. Put a Nerviline Plaster on your chest, rub your throat with Nerviline, and take a stiff dose of Nerviline in hot water. This prevents a chill, and checks the cold instantly. No remedies so useful in the home, so sure to prevent serious illness as Nerviline and Nerviline Plasters. Sold by all dealers, 25c each, but be sure you get the brand with Nerviline, and take a genuine, and re-use any substitute.

TROUBLE FOR PUCCINI

Composer's Wife Imprisoned for Causing a Girl's Suicide.

New York, July 9.—The American prints the following cable from Lucca, Italy:

The curtain fell yesterday on a real life tragedy in the career of Giacomo Puccini, the opera-composer, that was quite as pathetic as the story of the heroine of Puccini's masterpiece, "Madama Butterfly." It was a story, too, that was not greatly dissimilar to the story of the opera.

The climax came when Signora Elvira Dantoni Puccini, the composer's wife, was sentenced in court yesterday to serve five months in prison for having caused the suicide of Doria Manfredi, a beautiful little serving maid in her villa, whom Puccini befriended after her father's death.

She accused Doria of being Puccini's mistress. The girl, a peasant and scarcely more than a child, crept out of the villa and swallowed poison. Puccini, when he heard of his protegee's death, had a bitter quarrel with his wife, and separated from her at once. When the authorities inquired into the suicide, he told them what he knew. Signor Puccini will also have to pay to the surviving relatives of Doria Manfredi a sum of money, the exact amount to be determined later by the court.

Coal Strike in England.

Hanley, Eng., July 9.—Serious rioting occurred yesterday throughout the North Staffordshire coal fields. A dispute regarding the time allowed for meals under the pit lads to cease work. They marched from colliery to colliery bringing out the adult miners. March colliery property was destroyed, and there were many conflicts with the police.

Kitchener Comes Via Canada.

London, July 9.—(C.A.P. Cable.)—The Express says that the Canadian and Australian invitations to Gen. Kitchener to inspect and report on their defensive forces will be accepted.

It is suggested that Gen. Kitchener be appointed inspector-in-chief of the overseas forces of the crown.

Clairvoyants Find Bodies.

Detroit, July 9.—Clairvoyants have located the bodies of four men drowned in the Detroit River on Sunday.

You cannot possibly have a better Cocoa than

A delicious drink and a sustaining food. Fragrant, nutritious and economical. This excellent Cocoa maintains the system in robust health, and enables it to resist winter's extreme cold.

COCOA
Sold by Grocers and Storekeepers in 1-lb. and 1/2-lb. Tins.

A FREDERICTON MAN.

Madill, Abraham Lincoln's Journalistic Friend, Was Born in this City.

Those who have read the Lincoln literature with which the past twelve months the newspapers and magazines have justly been deluged, have read a good deal about Joseph Medill, who in later days became the most eminent journalist of the mid-west, but few are aware that Joseph Medill was a Canadian. No politician or statesman ever attains any position in the world in a democracy without a few newspaper "pals," with whom they can sit down and talk out his ideas without fear of their publication until the proper time comes, and who are in a position to make things clear to the general public and clear up, as a public man is seldom able to do effectively, and misapprehensions with which the public mind may have become possessed. This is precisely what Joseph Medill did for Lincoln, and it is intimated by Miss Tatchell, one of the great statesman's numerous worshippers, that after Lincoln became president Medill wanted to become adviser in chief and made trips to Washington to tell the object of his loyalty, and indeed education, that he was going wrong. But the point of interest for Canadians is that the newspaperman did more than anyone else to make Lincoln the nominee of the Republican party and the president of the United States was a Canadian of Scotch-Irish ancestry, born in Fredericton, N. B., in 1823. It is true that he was to all intents and purposes an American, for when he was nine years old his father, a farmer, took his family to what he deemed the more congenial regions of Canton, Ohio. When only twenty-six years old he was editor of a paper which did not advocate the abolition of slavery in the states where it was already re-established, but was bitterly opposed to its extension to any of the new territories then being opened up for settlement. As students of the political history of the English speaking part of this continent are aware, this was Lincoln's initial policy, though he was afterwards forced to carry it to its logical development. As editor of the Chicago Tribune in later years and as first citizen of Chicago, a city whose English speaking population is in a very large degree Canadian, his fame became widespread, and in a reckoning of what the United States owes to Canada the name of Joseph Medill would be on our side of the ledger.

WILL BE DEPORTED.

Canadian Bankers' Association Arrange to Collect All American Silver Coins and Send it Back.

The Herald understands that the Department of Finance, at Ottawa, has approved of a plan submitted by the Canadian Bankers' Association, for the redemption of American silver, and deportation of American silver. On enquiry at the office of Mr. J. Knight, secretary of the Bankers' Association, The Herald learned that the work of collecting and deporting American silver will be commenced immediately by the banks.

It is estimated that in the Western Provinces of the Dominion, one-half of the silver in circulation is United States coinage, and the assistance given to the Government by the banks in replacing American silver with that of our own country in the increase in seigniorage (profit derived by the Government on bullion brought to the mint to be coined) is very considerable, and, of course, means a good thing for the country, though not to the banks themselves.

It is estimated that the American silver in Canada is quite forty per cent. of the total in circulation. About two years ago the banks arranged with the government to have American silver deported from this country, but at the end of a year the Government grant expired and the whole arrangement fell through. It is believed that the present plan, however, will be permanent for sentimental as well as business reasons.

When your throat rattles, your lungs and chest are sore, your throat is stuffed with cold—don't fear consumption—use Catarrhoxone and get well. It clears the throat, cures hacking, relieves tight chest and soreness in the bronchial tubes. To clear away Catarrh of the nose nothing could be better. Catarrhoxone is Nature's own remedy—it heals and soothes—cures every form of throat, lung or bronchial trouble. Prescribed by many specialists and used by thousands every day. 25c and \$1.00 at all dealers.

THE JULY HOME JOURNAL.

There is such an abundance of good things in the July Home Journal that it is difficult to say just what the outstanding features are.

"The Dominion of To-Day" tells of the wonderful growth of Canada from 1867 to 1903. The new serial story "The Mystery of Barry Ingram," by Annie S. Swan, starts in this number. The opening chapters give promise of its being one of the best stories ever offered to Canadian readers.

"The Awakening" is an excellent short story of a dream that came true. Many girls have ambitions to become writers. Their troubles and perplexities are told in brief in "The Girl Who Wants to Write."

Women are coming to the front as explorers and a short sketch of the travels of Miss Agnes Deans Cameron in Northern Canada is very entertaining. "Wanted, a Beauty Compound," is a splendid article advocating the retaining of the natural beauty of our towns and villages. It is excellently illustrated with photographs.

The whole issue is so profusely illustrated. The cover is an excellent reproduction in colors of "The Violet Lady," by Canada's foremost artist, W. Goode, who also contributed the "Summer Girl" which is printed in colors inside.

This magazine has improved so much recently that many leading Canadian women are reading the Home Journal in preference to foreign publications.

BABY'S GREAT DANGER DURING HOT WEATHER.

More children die during the hot weather than at any other time of the year. Diarrhoea, dysentery, cholera infantum, and stomach troubles come without warning, and when a medicine is not at hand to give prompt relief, the delay may prove fatal to the child. Baby's Own Tablets should be kept in every home where there are children during the hot weather months. An occasional dose of the Tablets will prevent deadly summer complaints, or cure them if they come unexpectedly. Mrs. O. Moreau, St. Tit, Que., says: "My baby suffered from a severe attack of cholera infantum, but after giving him Baby's Own Tablets the trouble left him, and he regained health splendidly." Sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

GREAT MEN CONFER.

(Times New Reporter.)

The arrival of Mr. Crockett and Mr. Foster today has greatly encouraged the Conservatives in the county campaign. Mr. Crockett's headquarters will be at the Standard office, where his photograph and copies of his speeches may be secured. The Times new reporter is authorized to state that both Mr. Crockett and Mr. Foster have been moved to tears since they arrived and learned how the pestilent gruff officials permitted St. John county roads to go to the bad, even while Mr. Hazen was earnestly imploring them to get busy and not wait for the operation of his highway act. Mr. Crockett and Mr. Foster agree with Mr. Hazen and Mr. Fleming that the only hope for the Liberals lies in the Conservative camp—but that the fact should not be stated with too much emphasis. The two leaders of Mr. Borden may be invited to speak at Hardscrabble during the campaign.

DO YOU WANT TO KNOW WHAT YOU SWALLOW?

There is a growing sentiment in this country in favor of medicines of known composition. It is but natural that one should have some interest in the composition of that which he or she is expected to swallow, whether it be food, drink or medicine.

Recognizing this growing disposition on the part of the public, and satisfied that the fullest publicity can only aid to the well-earned reputation of his medicines, Dr. R. V. Pierce, of Buffalo, N.Y., has "taken time by the forelock," as it were, and is publishing broadcast a list of all the ingredients enterlog into his medicines, "Golden Medical Discovery," the popular liver invigorator, stomach tonic, blood-purifier and heart regulator; also of his "Favorite Prescription" for weak, over-worked, broken-down, nervous and invalid women.

This bold and outspoken movement on the part of Dr. Pierce, has by showing exactly what his well-known medicines are composed of, completely disarmed all harping critics who have heretofore unjustly attacked them. A little pamphlet has been compiled from the standard medical authorities of all the several schools of practice, showing the strongest endorsements by leading local writers of the several ingredients which enter into Dr. Pierce's medicines. A copy of this little book is mailed free to any one desiring to learn more concerning the valuable, native medicinal plants which enter into the composition of Dr. Pierce's medicines. Address Dr. Pierce as above.

Scotch Anthracite COAL

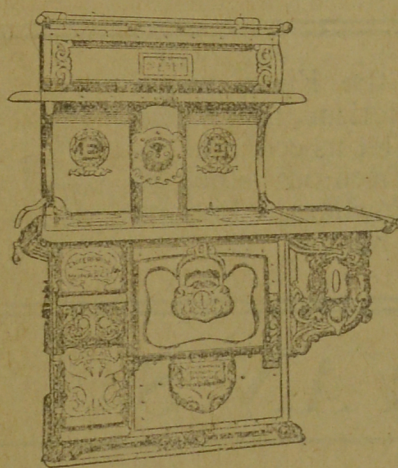

To arrive soon a large quantity of a above Coal. Buy now and get the benefit of the Summer Price.

Also in Stock Manitoba Oats, American (all kinds. Seeds and Fertilizer in season.
