

A. T. McMURRAY

(M. D. D.)

OFFICE HOURS 9 to 5.

Dentistry in all its modern branches. Special attention given to the care of children's teeth.

Patients living outside the city can make appointments by mail and thus do away with unnecessary delay.

Lady in Attendance

INTERCOLONIAL RAILWAY

On and after Sunday, October 11th, 1908, trains will run daily (Sundays excepted), as follows:

TRAINS WILL LEAVE FREDERICTON.

No. 803 Mixed for Campbellton, Moncton, St. John and Halifax	
For 817 Suburban for Marysville	5.45
For 821 Suburban for Marysville	6.15
No. 323 Suburban for Marysville	11.15
No. 801 Express for Montreal, Chatham, Loggville	16.20
For 837 Suburban for Marysville	18.30
No. 829 Suburban for Marysville	18.40
	21.20

TRAINS WILL ARRIVE AT FREDERICTON.

No. 818 Suburban from Marysville	8.15
No. 802 Express from Montreal, Quebec, Chatham and Loggville	13.05
No. 322 Suburban from Marysville	12.45
No. 826 Suburban from Marysville	18.20
No. 804 Mixed from Chatham, Moncton, Chatham and Loggville	18.50
No. 328 Suburban from Marysville	19.15
No. 330 Suburban from Marysville	21.55

All trains are run by Atlantic Standard time. Twenty-four hour operation. 24.00 o'clock is midnight. Moncton, N. B., Oct. 7th, 1908.

CANADIAN RY.

Passenger Train service from Fredericton, Effective Oct. 11, 1908. Atlantic Time—Daily except Sunday.

DEPARTURES.

2.25 a. m., for St. John, St. Stephen, St. Andrews, Houlton, Woodstock, and north to Presque Isle and Edmundston; also for Bangor, Portland and Boston.	
2.00 a. m., via Gibson Branch for Woodstock and north to Presque Isle and Edmundston. Leaves St. Marys 8.30 a. m.	
6.50 a. m., for Fredericton Jct. connecting with Atlantic Express for St. John and points	
7.50 p. m., for Fredericton connecting with Express for Areal, Ottawa, Toronto, and with Imperial Limited and Pacific Express from Montreal for the West, Northwest and Pacific Coast; also connects for Vanreboro, Bangor, Portland, Boston, etc., St. Stephen and Woodstock.	
10.00 p. m., for St. John and points East.	

ARRIVALS.

2.30 a. m., from St. John and East.	
2.45 a. m., from Boston, Montreal, St. Stephen, Woodstock, Houlton.	
7.00 p. m., from St. John and East.	
7.30 p. m., from Woodstock and points north, via Gibson branch. Arrives St. Marys 8.38 p. m.	
10.40 p. m., from Boston, Portland, Bangor, St. Stephen, St. Andrews, Woodstock and Houlton.

DENTAL SURGEON

President and Prizeman Boston Dental College, Class 1891. Registered by the Mass. State Board of Dental Examiners. Facilities and Experience for all requisite branches of profession. Special attention to saving aching or abscessed teeth. Young Lady in attendance.

SYNOPSIS OF CANADIAN NORTH-WEST HOMESTEAD REGULATIONS

Any even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section, or more or less.

Application for entry must be made in person by the applicant at a Dominion Lands Agency or Sub-agency for the district in which the land is situated. Entry by proxy may, however, be made at an Agency on certain conditions by the father, mother, or daughter, brother or sister of an intending homesteader.

The homesteader is required to perform the homestead duties under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) A homesteader may, if he so desires, perform the required residence duties, by living on farming land owned solely by him, not less than eighty (80) acres in extent, in the vicinity of the homestead, or upon a homestead entered for by him in the vicinity, such homesteader may perform his own residence duties by living with the father (or mother).

(3) If the father or mother, (if the father is deceased) of a homesteader has permanent residence on farming land owned solely by him, not less than eighty (80) acres in extent, in the vicinity of the homestead, or upon a homestead entered for by him in the vicinity, such homesteader may perform his own residence duties by living with the father (or mother).

(4) The term "vicinity" in the two preceding paragraphs is defined as meaning not more than nine miles in a direct line, exclusive of the width of road allowances crossed in the measurement.

(5) A homesteader intending to perform his residence duties in accordance with the above while living with parents or on farming land owned by himself must notify the Agent for the district of such intention.

Six months' notice in writing must be given to the Commissioner of Dominion Lands, at Ottawa, of intention to apply for patent.

W. W. CORY,

Deputy of the Minister of the Interior.

No. 2 is the middle strength, and is sold in three degrees of strength. No. 3 is the weakest, and is sold in three degrees of strength. It is sold by all druggists, or sent by mail on receipt of price. Price per bottle, 25 cents. Address: The Chamberlain Medicine Co., Toronto, Ont. (Formerly "The Chamberlain Medicine Co.")

When.... Advertising Paid.

By EDITH BOWMAN.

Copyrighted, 1908, by Associated Literary Press.

"That's what I call some package," cried Hosmer proudly as he held aloft a round metal package decorated with a smiling face which was sandwiched between the legend "You can smile—if you use Dentola."

"It is pretty," conceded the head of the firm as he took the can into his hands and inspected it more carefully. "Some actress, isn't it? Her face seems familiar."

"Actress nothing," was the contemptuous retort. Hosmer could afford to be flippant when he scored a success. "That's the little typewriter over in the shipping room. I caught her smiling like that one day, and it made a hit with me. I invented the powder to go with it. It's the old 'Saponica,' with a little carmine put in to make it look different. I tell you, Mr. Powers, in a week that Dentola girl will be known all over the country, and the sales—well, I'll be around for a raise in salary in about five weeks."

Powers smiled and nodded. Hosmer had a regular sense of self praise. When he suggested that the firm owed him a hat for an idea it was only an ordinary hit. The hint that he lunched about 2 o'clock was a sign that he had greater confidence in an idea. The last time that Hosmer had announced that he was worth a raise in salary was when he had introduced "sun-burn cream" which eventually had brought the cosmetic company very nearly a quarter million.

Dentola seemed destined to enjoy a more permanent success. Within two months the Dentola girl smiled upon the entire nation. Even in the tiny hamlets Dentola placards adorned the general stores.

The Dentola girl smiled life size upon the city throngs, and more than life size she beamed at train tired travelers along the trunk lines.

Vaughn, the head of the shipping department, was rather vexed over the incident. He had supposed that the picture was merely to be used to decorate the cans of powder.

It became something of a nuisance when visitors to the model factory of the cosmetic company insisted upon seeing the original of "Miss Dentola." Vaughn, resentful of the admiring glances of the masculine visitors, protested to Hosmer.

"It's all a part of the campaign," declared the sales expert, with a laugh. "Miss Dentola is the best saleswoman that ever was. We sold more than a million boxes last month, and the orders are still piling in. I tell you, Hen, it pays to advertise when you advertise right."

"Sure," assented Vaughn, "but you're overdoing it. We wanted to sell the tooth powder, not to bring people to the factory to see Miss Dentola. There was a chap in yesterday who said he had seen the pyramids and the Sphinx and the tower of Pisa and all the other show spots of Europe, but he felt he couldn't go back to Montana until he'd seen Miss Dentola. By the way he looked at her I guess he would have liked to take her back to Montana with him. He's only one. There's hundreds. It's all Miss Pryor can do to keep her work up."

"I'll take her over in my department," offered Hosmer, with suspicious readiness. Vaughn shook his head.

"She would have to learn an entirely new line of work," he objected. "She knows the shipping game now. Let her stay, even if your ads. are a nuisance and worse."

"But I think she ought to be in my department," urged Hosmer. "It is in the advertising end that people would expect to find her."

"You get out of here," demanded Vaughn, half in friendliness and half very much in earnest. He had had Minnie Pryor in his department for more than two years and had given her scarcely a look until Hosmer had made her nationally famous.

When men in Alaska began to send proposals of marriage to the girl, Vaughn began to realize that his assistant was decidedly pretty, and as this knowledge came to Hosmer about the same time there ensued a pretty race for favor.

Minnie Pryor, finding herself in demand for the first time, developed into a beauty. So long as she had been merely Minnie Pryor, typist, she had gone her quiet way, but now Joseph Powers, president and practical owner of the corporation, insisted that she be given a royalty on the use of her picture, and, though this was but a fraction of a penny per box, the generous use of lithographs enabled her to dress becomingly for the first time in her narrow life.

With the purchase of better clothes she had seemed to acquire that indefinable charm which belongs to the woman who knows herself to be in demand. She did not develop what Hosmer was wont to term "big head," but she held herself well, and the apologetic little typist of the shipping room had become the belle of the cosmetic company's world.

Hosmer had his room papered with her pictures, and the more he saw them the more deeply in love with the original did he sink. Vaughn had but one of the posters in his office, for he did not need them with the girl herself hovering by sharply based over the desk by the window, and he, too, was very much in love.

In the office both men made the best use of their time, but once the closing time arrived Miss Pryor disappeared.

Early in the campaign Powers had suggested that the liberal use of her face had rendered the girl rather conspicuous, so the company paid for a carriage that took her to and from her work.

At first Hosmer had approved the suggestion, but now he went to the other extreme. There was no chance to walk home with Miss Pryor, and his request for permission to call was met with a polite negative.

He and Vaughn could only fight it out during office hours, and when Vaughn objected to Hosmer's continued presence in the shipping department and asked Powers to give Hosmer a hint to that effect the sales expert retaliated by again reverting to his suggestion that Miss Pryor should be transferred to the sales office.

The constant bickering could have but one effect. From surliness they passed to open warfare, and at last they brought the matter to the head of the firm.

Each pleaded his case, and then they stood waiting the decision with an anxiety that showed plainly in their faces. Each felt that a victory with the chief would aid his fight, and the moments that passed after the case had been stated were painful to them both.

Powers glanced slowly from one to the other, and his face broke into a smile.

"You both say that you have the right to Miss Pryor's services," he began slowly. "I'm afraid that you will both have to hire other typists. Miss Pryor tells me that you both are—er—rather cordial to her. It seems that you, Vaughn, have suddenly discovered that you need Miss Pryor. Only a little while before the advertising campaign was started you told me that you should have to put on another girl, as Miss Pryor was willing, but slow. I fancy that the way out of this will be to get another Dentola girl and another typist for the shipping department."

"There's no reason for such drastic action," cried Hosmer, but Powers only smiled again.

"There is an excellent reason," he said slowly. "I am to marry Miss Pryor. She did me the honor to accept me, and as soon as the Dentola craze is forgotten we will be married. Meanwhile she has her royalty from the use of her picture, and she will not need her position. She would have told you this, Vaughn, had you waited until this afternoon."

Vaughn, too dazed to speak, turned and left the office, and Hosmer was about to follow when Powers detained him with a word.

"You said that you would win a raise on Dentola, and you have," he said kindly. "It pays to advertise, Paul."

"Yes, when you have something to sell," agreed the expert, "but I was trying to sell Dentola, not Miss Dentola. The next time I get out a good article I'm going to marry the original first and advertise afterward."

"Miss Pryor and myself are very grateful to you," said Powers, with a cordial hand clasp, "and I hope that you find another Dentola, Paul."

"And I bet I won't lose her to any other man," was Hosmer's grim reply.

Cretan Seals.

Some of the greatest scholars have used their learning more as a weapon than a means of illumination. Professor Lewis Campbell's gentleness and courtesy may be illustrated by the following true story: Some years ago he was in the chair at a meeting of the Hellenic society when Dr. Arthur Evans described the results of some of his first excavations in Crete.

Among his finds were a number of seals and other relics showing traces of affinity with early Egyptian art. Discussion followed, in the course of which a venerable admiral, who had been present at the battle of Navarino, rose and said that he did not know whether he was in order, but he would like to state that in the year 1828, when he was cruising in the Levant, he saw a herd of seals off the coast of Crete—a sight which he had never seen before or since. The situation was delicate, but it was saved by the chairman, who rose immediately to express the thanks of the meeting to the admiral for his interesting reminiscence.

"Here," he said, "we have another link with Egypt, for all of us must remember the story in the Odyssey of Proteus and his herd of seals on the island near the mouth of the Nile."—London Spectator.

Sick Folk's Fancies.

"Isn't it funny," said the brown eyed woman, "how important some things are to you when you are sick and how trivial they seem when you get well? When I was ill awhile ago I could not take any water to drink, although I nearly died of thirst. But late every night the nurse would bring me a small glass of cracked ice. Oh, how I anticipated that thing through long and painful hours, and when I could hear her cracking up the ice the sound was the most beautiful thing in the world. When I was eating it if one little scrap got lost in the bedclothes I almost wept, so precious it was. And now that I am well and have the icebox at my command I wouldn't eat a piece for anything."

"A friend of mine, a strong man, told me that when he was recovering from typhoid and couldn't eat anything he would lie for hours composing menus. He would call out his orders in a loud voice and then nearly burst into tears when no waiter appeared with loaded tray. Sick people certainly are funny, though they can't always see it at the time."—New York Press.

Money amassed either serves or ruins us.—Horace.

CARE OF PLANTS.

The Proper Way to Water Flowers Kept Indoors.

There are three ways to water plants, two wrong ways and one right one. Many people adhere to the plan of frequent application of small amounts of water. Thus the soil about the top of the pot is constantly moist, but the lower two-thirds of the soil is entirely dry. By this method the upper roots are nourished, while the lower roots, which demand water, soon die and the plant is continually in an unhealthy condition.

Directly opposite to this is the plan of overwatering which many persons thoughtlessly follow. They water their plants thoroughly today. Tomorrow they apply the same amount, and so they go from one day to another. The result is that the soil is kept saturated with moisture. It is in the condition of mud all the time, a condition that suits only aquatic plants and one in which the ordinary plant will soon become diseased.

The stagnant water will sour the soil, and the roots will begin to decay. By and by the plant dies. Either of the above mentioned methods are equally destructive to healthy plants.

There is only one right way. When you water a plant do it thoroughly—in fact, be sure every particle of soil is wet. Then do not apply any more until the surface of the soil is really dry. As long as the surface of the soil looks damp you may rest assured that the rest of it contains sufficient moisture. Enough should be given, as stated above, to completely saturate all the soil in the pot. If proper drainage is given all surplus water—that is, all water that the soil cannot take up and hold—will run off at the bottom of the pot through the hole provided for this purpose. By proper drainage we mean that something must be placed in each pot to keep the soil from washing down and stopping up the hole.

There should be at least one inch of drainage placed in all four or five inch pots, and from one to three inches used in larger pots. The best material to use for drainage is old bits of broken flower pots or broken bricks. Use small pieces, not much larger than a marble. Many people are careless about this drainage or ignorant as to its value, but no one can grow plants successfully without it.

Some readers may ask: "How can I tell when I have given enough water to permeate all portions of the soil?" Well, in answer let me say there is only one sure way, and that is to notice the drainage hole in the bottom of the pot. When we see the water trickling through that we know it is time to stop.

Some plants have roots that enable them to make use of much more water than others. Then, again, some soils part with moisture much more rapidly than others. Some rooms are kept so warm that evaporation takes place rapidly. When all these things are considered it will be seen that there can be no regular time for watering plants.

Water must be given when the appearance of the soil shows need of it; not until then.

Use ordinary hydrant water. Use it just the temperature you draw it from the hydrant. Neither chill it nor heat it. By following the above directions you should be very successful with the average plant.

MARQUIS' REMAINS EXHUMED

Duke of Montrose Has Famous Family That Goes Back to 1123.

Very few men have so famous a family record as the Duke of Montrose. How far the Grahams go back in the history of Scotland, it is hard to say. They were certainly well established in 1123, for William de Graham figures as witness to the charter from David the First to the monks of Holyrood house. William had two sons, Peter, ancestor of the Earls of Morton, and John, founder of the present family of Montrose. James, the first marquis, did valiant service for the king in the Civil War. When the monarch had been murdered, Montrose escaped from Scotland, but he would not abandon the cause, and with a few gallant followers, made a hopeless descent upon Orkney, where he was captured by the forces of Parliament. His execution at Edinburgh, with every circumstance of indignity, and the outrages inflicted upon his body, are among the most shameful in Scottish history. At the Restoration, Charles II. caused his remains to be dug up and buried in state in the cathedral of St. Giles. When at Eton, the present duke was caught by a master throwing stones at a truck while waiting on the station platform at Windsor for the train which was to convey him and his mother to London. The offended master ordered the boy to return to the college to receive his punishment, but the future duke, thinking himself safe in his mother's presence, did not take the matter seriously. The duchess, however, intimated her intention of delaying the journey so that the son might do as he was told.
