WAS HOTTEST DAY.

Yesterday Thermometer Reached 95 In Toronto—Man Dies.

Toronto, Aug. 9.—Everybody guessed right yesterday. It was the hottest day of the year, and a little bit hotter than any day of last year.

From the lakes region to the Atlantic the heat prevailed, with Ontario getting the worst of it.

In Toronto the observatory recorded 93.3 degrees of heat, which was the highest temperature registered, while London came second with 93 degrees.

It is probable that some parts of interior Ontario had a higher temperature than Toronto.

Last year's high temperature, 92.2, was recorded on July 12, followed by 92 on Aug. 4. Prior to yesterday, the warmest day this year was June 21, when 90.4 degrees were recorded.

One death and several prostrations were reported during the day, resulting from the excessive heat.

Timothy Waterhouse of 163 Munroe street, Toronto, died suddenly at his home early yesterday morning.

During the night he complained of the heat and went down stairs. In the morning his family found him dead in a chair.

About a year ago he suffered from a sunstroke, and ever since had not been feeling in the best of health.

Crazy With the Heat. New York, Aug. 9.—The heat yesterday moved two citizens of Staten Island to exhibitions of eccentricity.

That called out the police and fire departments. Anton Gyvobe, 36 years old, climbed a high tree and hung swaying to the topmost branches, chattering like an ape.

Threats to shoot from the police and to chop down the tree failing, a thorough drenching from a fire hose, being ignored, the firemen were finally compelled to run up a 60-foot extension ladder and snare their man from his perch with an improvised lasso.

He fought actively. A little later Ole Anderson, 37 years old, pealed off all his clothes, and climbing to the ridgepole of his three storey house, tried to jam himself down the chimney.

The fireman caught him alive.

World's Greatest Flight. Mourmelon Le Grand, France, Aug. 9.—Roger Sommer, a French aviator, who has been driving aeroplanes only for the last three months, Saturday beat Wilbur Wright's record of 2 hours, 20 minutes, and 57 seconds, by circling around in the air for 2 hours, 25 minutes and 15 seconds, and covering more than one hundred miles.

TO PROTECT SALMON

Scientists Say Fish in B.C. Will Soon Disappear.

SHOULD EXTERMINATE RATS

Convention at Winnipeg Offers Two Recommendations In Form of Resolutions to Western Provinces—Manitoba Should Drive Out Her Rat Pests and B.C. Should Guard Her Salmon Wealth.

Winnipeg, Sept. 1.—Many sections of the British Association wound up business yesterday. Thursday they all will get away in a special train for a trip to the coast.

Two resolutions of more than ordinary importance to western Canada were passed yesterday morning. One recommended that the Manitoba Government offer a bonus for the extermination of rats, and the other was in regard to the disappearance of salmon in British Columbia.

The federal authorities being asked to appoint a committee of investigation.

Prof. Shipley, head of the zoological department, thought the invasion of the province by rats was a matter of gravest importance to the wheat industry.

If allowed to spread they would destroy 25 per cent. of the yield annually. Most determined steps should be taken to exterminate these pests.

As for the salmon, the scientists feared that a few years would see their complete disappearance unless steps were taken at once, and to prevent it a commission should start work immediately.

The association has decided that in future large proportions of its income shall be spent in Canada for scientific research.

Woman Falls Into Cistern.

Braintree, Sept. 1.—Mrs. Lewis, wife of the time-keeper at the Massey Harris works, had a narrow escape from drowning at her home, 164 Dalhousie street, yesterday morning.

Going out into the outer kitchen she stumbled through a trap door over the cistern, and fell in. The cistern, which is eight feet deep, had a little more than five feet of water in it.

By standing on tip-toe, she was able to keep her chin above water level. For an hour she remained in this perilous position calling for help. A woman at the front of the house finally heard her.

Boys Nearly Drowned.

Kincardine, Sept. 1.—Murray McCrimmon, son of Dr. McCrimmon, and Leslie Thomson, son of T. C. Thomson, barrister, Toronto, had a narrow escape on the lake here yesterday. The weather was choppy and the young men went for a sail in a 20-foot dinghy.

As they were making the harbor the boat upset. Both being good swimmers, they regained the boat and drifted around in a heavy sea until taken off by the life-saving crew.

Seven Children Suffocated.

New York, Sept. 1.—Seven little children, inmates of St. Malachy's Home for Children at Rockaway Park, L.I., were suffocated in a fire which destroyed a portion of the home. There were 750 children in the institution. Most of them marched out in good order Monday night when the fire alarm was sounded.

A Boy's Suicide.

Buffalo, N.Y., Sept. 1.—Prescott C. Luce, a 15-year-old boy, committed suicide late yesterday in the bathroom of his home here. He tied his feet together, stuffed a cloth in his mouth, tying a stout string around his neck and fastening it to a hook in the wall, threw himself to his knees and strangled to death.

Health Measures to Protect Czar.

Sebastopol, Sept. 1.—Extraordinary sanitary measures are being undertaken in the Crimea, in view of the approaching arrival of Emperor Nicholas and the members of the Imperial family. A special health cordon against cholera has been erected in the Yalta district.

May Ban Theatre.

Montreal, Sept. 1.—Archbishop Bruchesi says he will place the Academy of Music under the ban on account of the dancing of the famous Lois Fuller, who is coming here next week along with a Parisian stock company, should she prove offensive.

INDIANS NOW WEALTHY.

Dokis Tribe Get Money For Land and Squaws Are Very Popular.

The distribution of the first installment of the million dollars which the Dokis Indian tribe are to receive for their famous pine limit took place at Sturgeon Falls a few days ago, and was exceedingly interesting.

The first Indian to get his share was the young chief, Alex. Dokis, whose late father, the old chief, during his lifetime refused to sell the limit.

Romance pictures the young chief taking up his father's policy at the grave of the aged chieftain and resolutely fighting the battles of the dead to the brink of his own last resting place, with a fine scorn refusing to look upon the plunder gouged from the slaughter of the forests, but stern fact shows the son of his father eagerly advancing to the lodge of Indian Agent Cockburn and cheerfully accepting the share of his family, amounting to \$5,625 on the first payment.

The sum of \$52,000 was paid the band, which represents a part payment only of the ten per cent. allowed them according to the terms of the surrender of the pine timber on the reserve. Another distribution will be made of the cash payment to the band after the limits are paid for in full by the purchasers. The first payment was at the rate of \$625 per head. Chief Dokis, with a family of nine, received \$5,625, while Henry Dokis, whose family roll call numbers ten, received \$6,250.

The distribution was made at Sturgeon Falls by Indian Agent Cockburn and the tribe was fully represented by heads of the following families: Dokis, Restoule, Metegemens, Kisseo, and Ennewich, to the number of 84 men, women and children, who will draw interest on the capital amount, which will mean to some families \$3,000 per year.

The Indians listened stolidly to the explanations of the Indian agent that the piece of paper each received meant that a large sum of money was in the Quebec Bank to their credit, which could be obtained when required. A short lecture on banking and the beauties of the savings department followed, after which the Government checks marched solemnly to the bank in the firm grasp of the Indian recipients, and each one drew the face value of the check, and, burdened with wealth, returned to the presence of the Indian agent, where each Indian piled his money up on the table and joyfully regarded the stacks of greenbacks.

One Indian insisted on having his money translated into bills of small denomination, and was loaded up with a mountain of greenbacks, five-dollar bills and under. With a Longboat grin he staggered into the office of the Indian agent, money bulging out of every pocket. Slowly unpacking himself, he piled his treasure on the table, making a bigger display than any of his red brothers, which afforded him the greatest satisfaction.

The braves could hardly be persuaded to refrain from their determination to pack the money back to the reserve, twenty miles across Lake Nepissing, but finally, after making generous purchases and paying their bills, nearly all deposited their wealth in the bank.

The timber was sold for \$871,000. The dues on saw logs is \$2 per thousand feet, and on square and waney timber \$50 per thousand cubic feet. After deducting the 10 per cent. cash payment to the Indians, the bonus and the dues on the timber after it is all cut will give the band a capital of about one million dollars, which they will draw interest upon.

An interesting result of the sudden acquisition of wealth by the Dokis band has been the frequent and prolonged visits of young bucks from other tribes, who are finding new attractions among the maidens of the Dokis families, and the matrimonial market has taken quite a boom. One wedding has already taken place, and indications are favorable for many more in the immediate future, as every Dokis maiden represents a cash value of about \$1,000 and a yearly income of \$300.
