

Don't Neglect a Simple Cold in the Head.

JAPANESE CATARRH CURE CURES COLD IN THE HEAD IN A SINGLE NIGHT.

It is pleasant and harmless to use and clears the head almost instantly. You can use it on the smallest infant with Perfect Safety.

Catarrh of the head usually starts with a cold in the head, and if left unchecked in this climate rarely gets well itself. Another cold is usually added and before it gets well incipient catarrh sets in, and as each fresh cold is contracted the disease gradually becomes worse, until hearing, sense of taste and smell are gone, and finally incurable lung trouble is the result. If you have a cold in the head don't neglect it. Japanese Catarrh Cure relieves cold in the head in a few minutes and will cure in a single night.

Mr. Alex. McRae, the well-known tailor of New Westminster, B.C., writes: "I was for some weeks suffering from a cold in the head, which was apparently developing into catarrh. I purchased a box of Japanese Catarrh Cure, and in less than two days the trouble entirely disappeared. I can highly recommend it; the first application relieved."

Sold by all druggists. Price, 50 cents; or mailed. Address The Griffiths & Macpherson Co., Limited, Toronto, Can.

Maternal Love of the Whale.

No other member of the animal kingdom displays more maternal affection than the whale, especially if its calf is harpooned. The harpooner never throws his harpoon into the little one with the intention of killing it, for if this is done the mother will instantly forsake it. If alive and struggling, however, the dam can be easily enticed toward the boat to meet its fate. Knowing this, the whale fishermen always strike a calf if possible and thus often make captures that could not be effected under other circumstances.

As soon as the dam becomes aware of the snaring of her young she rushes toward it, encourages it to swim away and even assists it by taking it under her fin. She seems to lose all regard for her own safety and boldly attacks the boat containing the whalers or circles about it totally regardless of the harpoons that are hurled at her and enter her flesh.

Pranks of Nature.

A shower of a remarkable character occurred in Sicily on April 24, 1781. On the morning of that day every exposed place within an extensive district was found covered with a gray water which, being evaporated, left a deposit nearly a quarter of an inch in thickness. It was determined that this solid matter must have come from Mount Etna. It is certain that vast quantities of solid substances are constantly afloat in the atmosphere. The sunsets all over the world are redder to this day on account of the dust from the mighty eruption in the strait of Sunda years ago, which has not yet entirely settled.

Fair Bargain.

Uncle Benjamin—What yoh gib me foah mah boss?

Rastus—Ah'll gib yoh a load ob hay; dat's a fair bargain.

Uncle Benjamin—Yoh gib me a load ob hay? An' what d'yoh expect Ah'll do wid the hay an' no boss to eat it?

Rastus—Ah'll len' yoh the boss till he's got it eat up.

Her Accent.

French Professor—Ah, yes, mademoiselle, you spick ze French wizout ze least accent.

Miss Breezy—Real kind of you to say so, but do I really?

"Oh, yes! Zat ees, wizout ze least French accent."

Brine springs flow under the town of Norwich, England. They have been there for centuries and were used for the production of salt long before the Christian era.
