**Singing School For Thrushes.**  
A writer in Forest and Stream tells us of the methods the thrush adopts in teaching his little ones to sing.  
"Find," he says, "a family of wood thrushes and carefully note what takes place. The old male thrush will sing the sweet song in loud, clear, flutelike notes once and then stop to listen while the young birds try to imitate the song. Some will utter one note, some two. Some will utter a coarse note, others a sharp note. After awhile they seem to forget their lesson and drop out one by one. When all are silent, the old thrush turns up again, and the young thrushes repeat their efforts, and so it goes on for hours. The young birds do not acquire the full song the first year, so the lessons are repeated the following spring. I take many visitors into the woods to enjoy the first thrushes' singing school, and all are convinced that the song of the wood thrush is a matter of education pure and simple."

**Seven.**  
Numerous are the queer beliefs concerning the number seven. From the very earliest ages the seven great planets were known and ruled this world and the dwellers in it, and their number entered into every conceivable matter that concerned man. There are seven days in the week, "seven holes in the head, for the master stars are seven," seven ages both for man and the world in which he lives. There are seven material heavens. There are seven colors in the spectrum and seven notes in the diatonic octave, and the "leading" note of the scale is the seventh. Be it noted that the seventh son is not always gifted with beneficent powers. In Portugal he is believed to be subject to the powers of darkness and to be compelled every Saturday evening to assume the likeness of an ass.

**High Explosives.**  
"Tommy," said the schoolteacher to Tommy Taddells, "what do you understand by the term 'high explosives'?"  
"Sky rockets, ma'am," replied Tommy.

If the average man were as good as he thinks other men ought to be, it wouldn't be long until his vanity made him topheavy.—New York Press.

**Curly Hair.**  
Persons with naturally curly hair are said to be possessed of more lovable and sweet natures than those with wavy or straight capillary adornment. On most occasions the fact that we are looking our best is a wonderful incentive to good behavior, and the woman with natural curls can discount her straight haired sister many a time and oft. She knows it. Why should she not be amiable? Straight hair was considered by the ancients as a mark of the gods' displeasure. Hair which was straight before sickness will sometimes grow curly afterward.

**What He Wrote On.**  
"Hello, Starveling! How is literature?"  
"First rate."  
"Writing anything now?"  
"Yes, a book."  
"What on?"  
"An empty stomach principally. You couldn't lend me the price of a dinner, could you?"

**Pleasant For the Lover.**  
In Mexico the young men can show great attention to young ladies and at very little expense. They are therefore quite eager to invite them to theaters, parties, etc. And no wonder, for it is the custom in that country for the lady's father to pay for the tickets and furnish the carriage, supper, etc.

**Pineapple Juice.**  
The Lancet points out that fresh pineapple juice contains a remarkably active digestive principle similar to pepsin. This principle has been termed "bromelin," and so powerful is its action upon proteids that it will digest as much as a thousand times its weight within a few hours.

**More Filling.**  
"The girl who jilted a poet and married a butcher did an eccentric thing."  
"Not at all. She recognized the great fact that beefsteak is more filling than blank verse."

The true test of civilization is not the census or the size of cities or the crops—no, but the kind of men the country turns out.

**Our Lack.**  
"What is the national air of this country?" asked the foreigner.  
"This is a republic and therefore has no national hair," replied the native.
