WHAT TO WEAR IN BELTS.

The Shaped Kind Are Most Becoming to the Average Person.

High belts are still popular, but experience teaches that they must be made with care if they are to be worn with the straight front corset. The prettiest belts are made high at the back. The material is cut on the cross and is mounted on the bodice. The belt slopes gradually toward the front. Often the belt does not meet in front by a couple of inches, the intervening space being hidden by a tie of lace or a portion of the vest. For wearing with shirt waists a useful belt is made of crosscut glaze or soft satin matching the color of the skirt. It is folded and stitched to a bone about four inches long at the back, and thence on either side the material slopes away

to a point. The belt may be tied in a knot and the ends pinned up to the blouse, or it may be fixed with a buckle.

The shaped belt is far more becoming to the figure than the ordinary straight kind. The object of employing crosscut material rather than ribbons is that the former when pulled tight fits so much closer to the figure.

The three-quarter driving cloak shown is of pongee, with a double caped collar and rounded revers of red silk outlined with ecru applique. The cuffs are of the crimson silk, also outlined with the applique.

JUDIC CHOLLET.

Heredity and Genius.

Expositions of the laws of heredity fail in affording no clue to the understanding of genius. As these laws of inheritance are now expounded it would seem that no offspring could ever rise above the average level of preceding generations, and we have all had thousands of commonplace ancestors. In animals excellence is, as a rule, easily accounted for; in man it is not so. How comes it that in the same family one member rises not merely above all the rest, but above the bulk of mankind? One only of the Bonapartes was a Napoleon; one only of the Shakespeares could write "Hamlet." And why should the son of an ordinary Lincolnshire farmer and his probably ordinary wife have turned out not merely the greatest natural philosopher of his time, but of all time? We are still waiting for a second Isaac Newton. To say that such men are "sports" is to give us a word for a thing and merely to cover ignorance. The sport must be caused, and what was the cause? The excellent work being done in tracing the influence of heredity only makes more astounding these prodigies of genius.

THE CRAZE FOR WHITE.

Even Heavy Gowns Are Made of It. Some Novel Ideas.

The fondness for white this season extends even to tennis and outing suits. The white mohair ones are extremely smart and are accompanied by white shoes and white straw or taffeta hats. White storm serge is a favorite material with yachtswomen and trims up well with gold or silver braid and marine buttons. Anchors embroidered on the cuffs or collars add a bit to the jauntyness.

Touches of black velvet to set off a hat or gown are becoming almost indispensable. A bow tied loosely and

set on the side of a hat of the palest blue or pink, with the ends hanging slightly over the brim, is extremely effective. Another pretty and novel idea is to wear one of these velvet knots at the nape of the neck on the slightly low neck dresses used for day wear.

A smart costume of white glaze linen which is shown in the picture is made with an Eton jacket and a plain skirt trimmed with bands of pale blue linen. This is worn with a white muslin and insertion blouse and an outing hat of white linen stitched and trimmed with a bow and band of blue ribbon.

JUDIC CHOLLET.

Quite Likely.

Tarantula Jim—What killed Stingaree Bill?

Alkali Ike—Acute pistolitis. I reckon that's what the doctors called it.—Judge.

The Succession.

"Of course," said the bachelor thoughtfully, "there can be no such thing as joint rule in a family. Some one must be the head."

"True; but the scepter passes from one to another."

"How?"

"Well, at the beginning of married life the husband holds it; then it gently and unobtrusively passes to the wife, and he never gets it back again."

"She keeps it forever?"

"Oh, no; the baby gets it next."

Growing Suspicious.

"I wonder who it was that said politeness doesn't cost anything," said Farmer Cornstossel.

"Don't you believe it?"

"Well, I have my doubts. Whenever I go to town and some stranger is especially polite to me I always feel as if it was liable to cost me anywhere from \$1 to \$75, according to how much I happen to have."

Vanadium.

Vanadium does not melt in a heat of less than 2,000 degrees F., is not affected by any acid, and increasing, as it does, the ductility of copper, it is very valuable to the makers of electrical appliances, but the price being \$600 a pound, it is almost prohibitive.

A Slim Outlook.

"I think your papa, dear Rosa, has been making inquiries about me."

"What has he told you?"

"Nothing. But he offered me a cigar, and it was simply frightful!"

The Same Old Hole.

Door-knob—What's the matter with you?

Door-key—I'm in a hole again.

No Danger.

Prof. W. Hodgson Ellis, Official Analyst to the Dominion Government, has proved by analysis that "Sunlight Soap is a pure and well-made soap, and has a thorough cleansing power, without danger to the clothing or skin."

Clothing is worn more in the wash than in use where common soaps are used, and the hands are liable to eczema. Try Sunlight Soap—Octagon Bar—next wash day, and you will see Prof. Ellis is right. No one should know better than he.
