

Rail Road Men

In all departments of active service stand in need of the readiness of mind and promptness of action which depend on a healthy nervous system. Let a railroad man be "rattled," and every life depending on him is in danger. A great many railroad men have found in Dr. Pierce's Golden Medical Discovery a valuable tonic for the overstrained nervous system. It builds up the body, purifies the blood, nourishes the nerves, and induces a healthy appetite and refreshing sleep.

"I suffered for six years with constipation and indigestion, during which time I employed several physicians, but they could not reach my case," writes Mr. G. Popplewell, of Eureka Springs, Carroll Co., Ark. "I felt that there was no help for me; could not retain food on my stomach, had vertigo and would fall helpless to the floor. Two years ago I commenced taking Dr. Pierce's Golden Medical Discovery and little 'Pellets,' and improved from the start. After taking twelve bottles of the 'Discovery' I was able to do light work, and have been improving ever since."

PEOPLE'S MOVEMENT

ONTARIO'S POPULATION CROWDING INTO THE CITIES.

A Recent Official Census Bulletin Shows a Decided Movement From the Suburban Centres of Population in This Province, but in the Province of Manitoba the Reverse Is True.

A recent official bulletin contains a statement showing the urban and rural population of Ontario and Manitoba by census districts as enumerated at the census and compared with that of 1891. Ontario's total population is 2,182,942, of which 1,247,190 are located in rural and 935,752 in urban districts. In 1891 the total was 2,114,321, made up of 1,295,323 rural and 818,998 urban. The rural population of the province has, therefore, lessened by 48,133 in the last decade, whilst the urban population increased by 116,754, leaving a net increase in population of 68,621. Manitoba's population, on the other hand, was 254,947, to which number the rural districts contributed 184,714 and the urban districts 70,233. This is an increase of 73,216 in rural population, and of 29,225 in urban population, compared with 1891. The following table will serve to show the drift of population in the counties of Ontario since the last census:

A Canadian Kipling Needed.

We need a Kipling in Canada more than one is needed in England. The people over there who make a business of sport, who live simply for amusement, have, as a rule, plenty of money and can afford to make amusement a business, so far as their finances are concerned. Few Canadians can afford to live any such useless and ignoble life. Those who try generally make the experiment on their father's money, or on the earnings of their husbands, and the funds thus obtained soon come to an end.

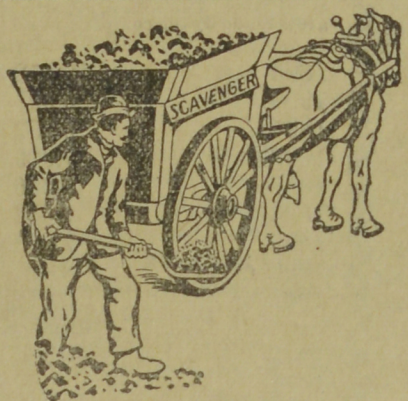

Yes, we need a Kipling to rebuke us for our follies, and to tell us the honest truth about ourselves. Cricket and curling and some other games are noble pastimes, and people are benefited by engaging in them. But is that any reason why people should carry other amusements to extremes that ruin their health, unfit them for every kind of duty, reduce their pockets to impecuniosity and their minds to imbecility? Canada needs a Kipling—Knoxonian in The Westminster.

LOADED UP WITH IMPURITIES.

IN THE SPRING THE SYSTEM IS LOADED UP WITH IMPURITIES.

After the hard work of the winter, the eating of rich and heavy foods, the system becomes clogged up with waste and poisonous matter, and the blood becomes thick and sluggish.

This causes Loss of Appetite, Biliousness, Lack of Energy and that tired, weary, listless feeling so prevalent in the spring.

The cleansing, blood-purifying action of

BURDOCK BLOOD BITTERS.

eliminates all the pent-up poison from the system, starts the sluggish liver working, acts on the Kidneys and Bowels, and renders it, without exception,
