

Peary's Dash for the Pole.

Brave Explorer Tells of His Visit to The Frozen North.

BELIEVES THE OBJECTIVE POINT WILL YET BE REACHED.

North Sydney, Sept. 18.—Lieut. Peary arrived from the frozen north at 8.15 this morning. Peary did not discover the pole, but on his last dash made important discoveries.

"My last dash for the pole was the most successful one. I was farther north than 83.27 my previous record," declared Lieut. Peary, as he stepped from the deck of the steamer Windward here this morning, after two years of explorations in the Arctic regions.

Lieut. Peary is the picture of good health, but is suffering slightly in one leg as the result of the accident he met with in the North last winter, although his walk does not show any trace of the accident.

Mrs Peary and her daughter little Marie, herself a veritable child of the North, who had gone with the Windward to meet him, looked well, although the former is just recovering from an illness, seemed overjoyed at reaching terra firma with husband and father restored to them in safety.

The Windward left Sydney for Greenland on Sunday, July 13th of this year. It was about this time last year that the Peary Arctic Club's relief steamer, the Erik, with Herbert Bridgeman on board as Commodore, returned to North Sydney bringing back Mrs Peary and her daughter only with the news that the bold explorer himself had decided to pass last winter at Etah, North Greenland, so that at the first approach of the Arctic spring he might be at the base of his future operations.

The discoverer has been in the Polar region since he went north in the Windward in the early spring of 1900.

Peary made the following statement to a press representative:

"Having left Erik Harbor on the Ellesmer coast on Aug. 29th, we reached Payer Harbor in Sept. 16th, crossing Rosse Bay by sledge and boat. About a week later my Eskimo guides began to fall sick, and by November 19th, six adults and one child were dead and nearly all the others were weak, but fortunately out of danger. Early in January Eskimo came from Anavik bringing news of the fearful ravages of a fatal epidemic through the tribe. Word was sent back for the survivors to come to me, and they began to arrive seeking what medical advice and help I could tender them.

"On March 3rd my advance party six sledges in charge of Hansen left for Congor.

On March sixth I started with the main party of eighteen sledges, leaving Percy in charge at Payer Harbor. Congor itself was reached in twelve marches. Eighteen marches more took us to Cape Hecla.

The North end of the Robeson was all open across to the Greenland coast and patches of water extended northward as far as the eye could reach.

On April 1st I started again on my northern journey over the Polar Sea, accompanied only by Hansen, four Eskimos and six sledges. This section of the trip was exceedingly dangerous. We encountered old floes covered deep with snow and intersected with rubble. Ridges and lanes of young ice, were encountered from the moment we left the foot of the ice. This travelling was very similar to that experienced by the English expedition of 1876. After six days progress we next encountered open leads and ice floes in rapid motion. As we advanced the floes became smaller, and the open leads far more frequent. One march was exceedingly tortuous and owing to the character of the floes our course was deflected considerably to the west. At last at 84 17 N lat. northwest of Hecla, the polar pack became impracticable and further efforts to advance were reluctantly abandoned.

"Our return journey was far more dangerous and unpleasant. We encountered new leads and foggy weather, and

the foggy weather made travelling both difficult and oftentimes exceedingly dangerous. We regained Hecla on April 29th, and were delighted to reach Congor in safety on May 3rd. Cape Sabine was reached on the 17th. A few days later I proceeded north as far as Cape Louis Napoleon to complete the survey of Dobbin Bay, returning the first of June. Open water in Buchanan Bay prevented me from taking a trip across Ellesmere land.

"We waited with some impatience the arrival of the Windward, which I knew was coming to fetch me back to home and friends and civilization. It was August 5th before the Windward succeeded in boring her way through the ice and entering the harbor. I can assure you that it did not take me long to get on board. We left the same afternoon, and as it proved, just in time, for fifteen minutes later we saw the harbor close up with solid and heavy ice. We at once forced our way across Smith Sound, and my Eskimos with their belongings and most of the dogs were landed in Buglefield Gulf.

After a few days spent in the exciting and useful sport of walrus hunting, the Windward then started south reaching Cape York on August 28th.

The Windward at once continued her journey southward and we reached Chateau Bay on the Labrador on Sept. 14th, and at once sent word of our safety to our devoted secretary and manager, Herbert Bridgeman, who was then in New York and at once left for Sydney to welcome us home.

One year at Payer harbor was a pleasant one, though the sorrow felt at the ravages caused by disease among my faithful Eskimos often made my heart bleed. Food was abundant, and we had an excellent supply of muskox and walrus meat. The northern sledge trip through the Arctic was not marked by special experience, suffering or danger more than is to be expected in Arctic work. The Windward with her new engines made excellent time on her return trip."

Such in brief is Peary's story of the trip. The Windward has on board a number of exceedingly interesting relics and curios. These include the instruments, chronometers and Arctic library abandoned at Congor by the Greely expedition, and an excellent collection of natural history specimens. These include magnificent specimens of bear, musk ox, reindeer and walrus skins, and the skeleton of a two hundred pound narwhale, a great rarity. There are also living specimens of the musk ox, walrus, Arctic hare and Eskimo dog, which are to be forwarded to the gardens at Central Park, New York.

"There is one interesting fact respecting our present expedition, which is worthy of special notice. Our march, that is the total length of the trip made in sledges from the winter quarters to the furthest point reached north, covered a greater latitude than that made by previous Polar expeditions. This makes me feel certain that if I was only able to preserve the fascinating work to which I have been devoting myself I could on my next expedition winter at Cape Hecla and I might reasonably expect to reach the Pole. Although I have been engaged in Arctic work for ten years I have only been trying for the Pole in four of these.

"Under favorable conditions the Pole can be reached from Franz Joseph Land and also from Grand Land latitude 73 deg. if winter quarters are as far north as I would just as soon winter at Cape Hecla as at Sabine or Etah. In fact," emphatically declared the Lieut., "if one is properly prepared for the local conditions one can live at Hecla as well as in South Greenland or Labrador or Cape Breton or Nova Scotia or New York."

"Game is plentiful everywhere. For instance, when we wintered at Congor we killed over 200 musk oxen besides hundreds of Arctic hares the flesh of which is exceedingly palatable. Altogether I have made four sledge journeys which had they started at 83 deg. would have brought me to the Pole. You would therefore, readily see that my assertion that the Pole can be reached is by no means founded on insufficient or unreasonable data.

"Do you believe that there is such a thing as the traditional open Polar sea," asked the reporter.

"No there is absolutely no foundation

whatever for such an idea, neither do I believe in a palaeocrystic sea, a sea covered with the immovable primeval ice. The Polar sea is indeed frozen, but it is ice in a state of perpetual oscillation. I feel assured that when in May, 1900, I rounded the northern coast of Greenland I trod upon the most northerly land of the Globe. In the most northerly sections of Greenland that we visited we found traces of the presence of Eskimo."

IT ISN'T TALKING THAT COUNTS

It is our earnest desire to make you a regular and pleased customer. We do not believe in long and tiresome arguments. Our large stock of pure drugs proprietary medicines perfumes and toilet specialties and our close prices, will impress you more favorably than long newspaper talks.

HAVE YOU USED IT?

Have you used Paine's Celery Compound? If not, we strongly recommend its use if you are nervous, weak rundown, or suffering from neuralgia or blood diseases. Paine's Celery Compound is the most reliable and efficacious medicine now before the public for rebuilding lost strength. Our stock is always fresh and pure. J. M. Wiley, Druggist, Fredericton, N. B.

Someone starts the rumor that Mr. Tarte will join the Conservative party. Mr. Tarte may go pretty far sometimes, but he'll draw the line at that.

The World Moves on and so Does the Wonderful Reputation of PAINE'S CELERY COMPOUND

No Other Medicine Ever Accomplished Such Happy Results.

The world moves on and so does the wonderful reputation of Paine's Celery Compound a never-failing cure for nervousness, sleeplessness headache, debility dyspepsia, neuralgia, rheumatism, kidney and liver troubles and impure blood.

As the sun rises in the morning to cheer and enliven the earth, so does Paine's Celery Compound go forth to bestow the blessings of health to the diseased and suffering. This is the character of work that Paine's Celery Compound is accomplishing. Parents are saved to children and children to parents.

Have you, sufferer, tested this wondrous life-giver? If not, you are not doing justice to yourself or family. Paine's Celery Compound has saved tens of thousands of our wealthy and plain people; it cannot fail in your case. Be wise and follow the example of the saved ones. Mrs. A. Allen, Ramsay, Ont., says:

"For ten years I suffered from nervousness and neuralgia, and have used medicines of all kinds without finding relief. Your Paine's Celery Compound was recommended to me, and after using seven bottles I find myself well and strong, and can rest and sleep with ease and comfort. I believe it to be the best medicine in the world, and I always recommend it with pleasure."

Recently an inquisitive woman was talking to James Whitcomb Riley on how poorly paid was the profession of literature. "But, Mr. Riley," said she sorely you have no cause for complaining. You must be a rich man. I understand you get a dollar for every word you write "Ye-es madam," said Riley, with his drawl "but sometimes I sit all day and can't think of a d-n word."

The average man always imagines that people engaged in other lines of business don't have to work as hard as he does.

Between the ages of fifteen and forty-five, the time when womanhood begins and motherhood ends, it is estimated that the aggregate term of woman's suffering is ten years. Ten years out of thirty! One third of the best part of a woman's life sacrificed! Think of the enormous loss of time! But time is not all that is lost. Those years of suffering steal the bloom from the cheeks, the brightness from the eyes, the fairness from the form. They write their record in many a crease and wrinkle. What a boon then to woman, is Dr. Pierce's Favorite Prescription. It promotes perfect regularity, dries up debilitating drains, heals ulceration, cures female weakness, and establishes the delicate womanly organs in vigorous and permanent health. No other medicine can do for woman what is done by Dr. Pierce's Favorite Prescription.

LOWER PRINCE WILLIAM. (Special Correspondence to the Herald.)

Sept. 20.—Another week of fine weather will finish the harvest in this locality. A number of the farmers are busy digging potatoes, which will be a poor crop as they are rotting badly.

Larkin Bros., fine view photographers of St Stephen, spent a month in the village. Their work was done in first class style and they were patronized in nearly every family.

Dr. H. M. Jewett of Providence, R. I., who was visiting friends here, has returned home.

The coronation supper which was to have been held in the Agricultural Hall on Wednesday, 10th, had to be postponed owing to the heavy rain to Thursday, the 11th, when a large number gathered and spent a pleasant afternoon. The proceeds amounting to \$30 goes to the Baptist church fund.

Mr. Banks, of Lincoln, has been here for the past two weeks finishing his contract on the Garden Creek bridge.

M. L. and J. L. Jewett have been engaged repairing their mill dam, which was partly tore away with the ice last spring.

Quite a number from this place attended the Free Baptist Sunday school picnic which was held at Lower Queensbury on Wednesday.

Miss Stella Estabrook spent a few days with friends at Fredericton and St John, the first of the month.

A gentleman was in the village on Thursday, taking orders for a Canadian map.

The Cause of Deafness.

Deafness and impaired hearing are due almost entirely to catarrhal inflammation of the eustachian tubes. Permanent cure is guaranteed to all who inhale Catarrhazone as directed. This vegetable antiseptic is inhaled at the mouth, and after traversing all the air passages of the respiratory organs is exhaled through the nostrils; it completely eradicates catarrh from any part of the system, clears the ears, nose and throat, and allays inflammation, congestion and soreness. For Deafness, Earache, Ringing in the Ears, Head Noises, Catarrh, Asthma and Bronchitis, medical science can devise nothing as beneficial as Catarrhazone. Complete outfit for two months' use, price \$1.00; trial size 25c. Druggists, or N. C. Polson & Co., Kingston, Ont.

Hamilton's Pills are Effective.

The Succession.

"Of course," said the bachelor thoughtfully, "there can be no such thing as joint rule in a family. Some one must be the head."

"True; but the scepter passes from one to another."

"How?"

"Well, at the beginning of married life the husband holds it; then it gently and unobtrusively passes to the wife, and he never gets it back again."

"She keeps it forever?"

"Oh, no; the baby gets it next."

Growing Suspicious.

"I wonder who it was that said politeness doesn't cost anything," said Farmer Cornstossel.

"Don't you believe it?"

"Well, I have my doubts. Whenever I go to town and some stranger is especially polite to me I always feel as if it was liable to cost me anywhere from \$1 to \$75, according to how much I happen to have."

Vanadium.

Vanadium does not melt in a heat of less than 2,000 degrees F., is not affected by any acid, and increasing, as it does, the ductility of copper, it is very valuable to the makers of electrical appliances, but the price being \$600 a pound, it is almost prohibitive.

A Slim Outlook.

"I think your papa, dear Rosa, has been making inquiries about me."

"What has he told you?"

"Nothing. But he offered me a cigar, and it was simply frightful!"

The Same Old Hole.

Door-knob—What's the matter with you?

Door-key—I'm in a hole again.

The Druggists are Agreed

that the surest and only Painless Corn and Wart Cure is "Putnam's." It was the first corn cure on the market, and still leads all competitors. Always refuse a substitute.

CENTRAL KINGSCLEAR.

Sept. 18.—Nearly all the farmers in this vicinity have finished harvesting and have begun to dig potatoes which

they report a very poor crop owing to the rust.

Misses Lottie and Beatrice Cliff of Victoria Corner are visiting their aunt, Mrs. Hedley Kilburn.

There is to be a picnic on the Macnaquac Island Saturday, Sept. 19.

The Free Baptist picnic which was held at Lower Queensbury Sept. 17th, passed off very successfully.

Miss Carrie Kilburn attended the wedding of Miss Maud Everett at Windsor Hall, Fredericton.

A True Nerve Tonic.

Will act, not so much directly upon the nerves as upon the digestive function and the abundant formation of red, vitalizing blood. Nerves can't be fed on medicine. They can, however, be restored and strengthened by assimilated food. The marvelous action of Ferrozone arises from its action over the digestive and assimilative processes. When you take Ferrozone the blood is purified, strengthened and grows rich and red. Then you grow vigorous, healthy and beautiful, ready for work, because you have the strength to do it. No tonic for the brain, blood or nerves compare with Ferrozone. Price 50c. Sold by C. A. Barchill.

Hamilton's Pills are effective.

This is the season of the year when it's too warm to have a fire and too cold not to have one.

It's never safe to judge the size of a man's influence by the size of his appetite.

Wide Awake Health Seekers.

THEIR FAVORITE MORNING DISH IS.

MALT BREAKFAST FOOD

The Only Cereal Food That Has The Complete Approval of Medical and Food Experts.

The values of foods as health producers are better understood to-day than they were ten years ago. The wealthy and those in humble circumstances are wide awake health seekers, favoring foods that contribute to physical energy and health-building. Malt Breakfast Food is popular everywhere and relished by young and old. The millionaire and the artisan find that it is a producer of flesh, bone and muscle. Dyspeptics find it an unfailing dyspepsia banisher. All Grocers sell Malt Breakfast Food.

This habit the weather has of showing its emotions on Saturday should be stopped. It interferes with the lawn tennis players.

Montreal merchants have begun to advertise furs, and it's a furstrate time to buy.

With all its faults Montreal has no "Big Bill Devery" in its political situation.

Air ship man in London has just broken the record. His neck will be next.

Sure Cure for Sick Stomach.

Such maladies as nausea, sick stomach, cramps and colic, yield instantly to Polson's Nerviline, and if you suffer periodically from any of these complaints just keep Nerviline handy and take a few drops in water for quick relief. A large 24c. bottle of Nerviline is a comfort and safeguard in any household, and will save great suffering and big doctors' bills every year. Do you use Nerviline? Try it. Hamilton's Pills Don't Gripe.

Strictly Business.

"Have you observed that man who has been abusing you?" "Yes," answered Senator Sorghum placidly. "I've been watching him with a great deal of interest. If I wanted anybody abused, I don't know but I should hire him in preference to anybody I know of."—Washington Star.

A Breakfast Musing.

'Tis an age of base deception. We'll be lucky to avoid The imitation beefsteak And the egg of celluloid.

Promoted His "Trust."

"How in the world did he manage to get so much on credit?" "Oh he's a trust promoter."
