

## They Extended Greetings.

### PLEASANT INCIDENT AT THE CHURCH OF ENGLAND SYNOD.

#### Presbyterian Delegation Received and Welcomed.

The Anglican and Presbyterian churches exchanged compliments and good wishes on the floor of the General Synod Friday afternoon at Montreal.

The occasion was a happy one, and the kind words of good will and co-operation from members of both denominations were evidently appreciated by the great majority of those present.

Among those present in the hall at the time were all the Bishops of the Upper House, as well as a deputation of bishops, clergy and laity representing the American Church, the lay and clerical members of Synod, and a goodly number of the churchmen and churchwomen interested in the work of the Synod.

His Grace Archbishop Bond occupied the chair and extended a hearty welcome to the Presbyterian delegates. They were: The Rev. Dr. Robt. Campbell, the Rev. F. M. Dewey and Mr. Walter Paul.

The Rev. Dr. Campbell was the first speaker. He expressed a great delight in being able to extend the greetings of the Presbyterian Church to the General Synod. He regretted that his seniors on the deputation, Rev. Principal MacVicar and the Rev. Dr. Barclay were unable to be present. He referred to the visit of the Anglican deputation to the General Assembly at Toronto in June last, and went on to say that he felt that courtesies such as these fraternal visits would do much to promote friendly and sympathetic relations between the Anglican and Presbyterian churches. "We recognize," said he, "in the Church of England with its glorious past and its magnificent traditions a force of tremendous power for good in the country. There is room, there is work for us all, for all the agencies that are making for righteousness. Immense problems are facing the Church, and all branches of the Church in Canada should co-operate in meeting and solving them. I am glad to see the interest manifested by the Synod in home missions, and I trust the Anglican Church will go in and possess the land."

Dr. Campbell referred to the fact that the late Archbishop Tait, of Canterbury; the present Archbishop of York, and the present Bishop of Stepney had received their early religious training in the Church of Scotland. He paid a fine tribute to the power of the Anglican Church, through Christ, to transform the human life, saying that he had found the sweetest and most loveable types of Christian manhood and womanhood within the fold of the Church of England. The more robust type, he added, were to be found in his own Church.

He also pronounced a warm eulogium of Archbishop Bond, who he said, was honoured and revered no less in the Presbyterian Church than in the Church of which he was a prelate.

The Rev. Mr. Dewey gave a short description of the mission work accomplished by the Presbyterian Church of Canada during the past year. He alluded to both the home and foreign fields, and told what had been accomplished in each. He spoke of the Chinese work, the labours of the late Dr. Robertson in the North-West, the life work of the late Dr. Mackay, in Formosa, and then described the nature of the home mission operations in the North-West.

He related his experiences at the recent Keswick Conference in England, where he had been assembled hundreds of earnest, devoted Christian men, intent on doing what they could to bring about Christian unity. On that occasion he had for the first time partaken of communion in an Anglican church. He rejoiced that denominational differences were gradually being swept away, as men became more Christ-like. Such was a condition of things to be welcomed and rejoiced over by the devout Christian. In conclusion he expressed the hope that the Anglican Church would continue to go on hand in hand with the Presbyterian Church in promoting the advancement of Christ's kingdom on earth.

Mr. Walter Paul urged upon his hearers the duty of assisting the Sunday-school and missionary work of the church to which they belonged. The Sunday-school was the nursery of the church, and could not be neglected. The laity should take a deeper interest in its success. So with missions. The successful church was the one that gave to missions. No church could be otherwise than missionary in its type and work.

The Bishop of Nova Scotia, Dr. Courtney, made an eloquent reply to the remarks of the speakers who had preceded him. At the outset of his remarks he said that when asked by the Archbishop to reply to the deputation he had shrunk from complying with the request for two reasons. In the first place he had done so because he feared that in what he might say he might to some extent surrender certain of those principles which as a churchman he could not relinquish. In the second place, he was afraid that in refusing to thus surrender these principles he might perhaps be lacking in courtesy to the delegates to whom he had been asked to say a few words of appreciation on behalf of the Upper House of the General Synod. On thinking the matter over, however, he had come to the conclusion that if he had to err at all it would be better for him to overlook church policy and church administration for the time being, rather than to decline to recognize the feeling that had prompted the delegation's visit. Such a feeling, he knew, was love of Christ and of His work.

His Lordship then went on to speak of Christian unity. He strongly emphasized the existence of such in spite of the many religious differences to be encountered on every hand. Unity, he said, was to be found wherever the Christian was found. The unity of the spirit could not be broken, no matter what the religion of the individual might be. It had existed through the ages and would continue to exist.

He was pleased to welcome the Presbyterian delegates, and he could only express the earnest hope that God might continue to bless the work of the church to which they belonged.

The Hon. S. H. Blake replied to the delegates on behalf of the Lower House. His address was remarkable for its sincerity and eloquence. In brief, but beautiful, language he thanked the delegates for the great work their church had accomplished for social purity, for the sanctity of the Sabbath, for missions, for an inspired Bible. He trusted that the Anglican and Presbyterian churches would in the future co-operate in everything that appertained to the building up of a healthy Canadian and a sturdy Christian manhood.

After Mr. Blake's address the members of the deputation shook hands with Archbishop Bond and then withdrew.

### A Prominent Hamilton Lady Writes About.

#### MALT BREAKFAST FOOD

#### SHE RECOMMENDS THIS KING OF CEREAL FOODS TO HER FRIENDS.

#### The Food That Has Made Thousands Strong.

A prominent lady in Hamilton, Ont., writes as follows to the Malted Cereals Company:

"After reading the strong testimonial letter of the President of the Ralston Health Club, I commenced the new century with Malt Breakfast Food, and am now a strong believer in its many health advantages. After many years of experience with other foods, I declare without hesitation that Malt Breakfast Food is the most beneficial article of diet that people can use at the morning meal. I find Malt Breakfast Food so delicious and strengthening, that I recommend it to my friends when I have opportunity." Grocers everywhere.

Dr. Jalap—Well, you may thank your fine constitution for pulling you through. Nothing else could have saved you. The Convalescent—But I cannot see that you have made any reduction in your bill for my fine constitution's share in the cure.

### STATUES HAVE SMALLPOX.

#### Peculiar Disease in a Museum at Athens.

#### THE BRONZE WORKS IN THE EGYPTIAN COLLECTION COVERED WITH GREEN MARKS.

#### Fifty Statues Affected—Enormous Losses Feared.

London, Sept. 7.—According to the Athens correspondent of The Chronicle a most extraordinary disease, extremely infectious, and resembling smallpox among human beings, has broken out among the statues in the Egyptian room of the National Museum there. A few days ago the distinguished politician and archaeologist, Mr. Stephanos Skouloudes, noticed some strange green marks on one of the bronze statues of the famous Egyptian collection presented to the museum in 1881 by Mr. Demetrios, of Alexandria. He at once communicated his discovery to the curator, who called in experts to examine the statue in question. They pronounced the marks to be due to an infectious complaint, to which bronze is liable, and which gradually spreads from the surface of the object affected to the inside, till the whole crumbles away into dust. The other bronze statues in the same room were then inspected, with the result that they were all found to be more or less tainted with the disease, while five of them had taken it in a most aggravated form. These five are the statues of Anta, the goddess of war; of Maout, wife of Jupiter Ammon; of Isis; and two statues of Osiris, one of them of the greatest value. Worse than that, the infection has spread to the Mycenaean room, which contains the results of the late Dr. Schliemann's excavations in 1876. There, a dagger, which was found in the fourth and finest of the six tombs, has fallen a victim to the malady. Altogether, about fifty statues are badly affected, and the loss will be enormous unless the plague can be stayed. A leading Athenian chemist pronounces the cause of the malady to be the presence of salt in the bronze, of which the statues are made, and his remedy is to extract it by means of baths. Mr. Momphatos, the Minister under whose department the museum comes, is taking steps to save the bronzes.

#### Nervous and Sleepless.

There is just one cure and that is plenty of food for the blood and nerves, which is best supplied in Ferrozone, than which no blood builder, nerve tonic or strength producer is better. Ferrozone promotes healthy digestion, which results in improved nutrition. The blood grows rich and red, furnishes stability to the entire system, and the store of nerve force and energy increases daily. A rebuilding of the constitution, new spirits, health and strength, all come from the use of Ferrozone. This marvelous renovator is sold by Druggists for 50c. a box, or six boxes for \$2.50. Sold by C. A. Burchill.

A widow named Picher, aged 82 years, has just married at St. Malo, Quebec, as her fourth husband a man named Anger, aged 84, who has already buried two wives.

### Do Not Trifle With Them!

#### PAIN'S CELERY COMPOUND

Permanently Cures Sick and Nervous Headaches That Make Life Miserable

Sick and nervous headaches are among the worst ills of life. The man or woman who is subject to headache at irregular intervals goes through life bearing a load of misery and wretchedness that is terrible to think of.

Headaches as a rule, result from a disordered condition of the nervous system. Mental excitement, loss of sleep, bodily fatigue and disordered digestion are exciting causes. When the brain becomes tired and debilitated, the whole nervous system is weakened, and headaches result. If the liver is sluggish, the kidneys in-

active and digestion deranged, headaches invariably follow. To cure and prevent headache, the nervous system must be strengthened and vitalized. The most persistent cases of headache, nervous feebleness and sleeplessness are permanently cured by Paine's Celery Compound; it is the great reconstructor of the nervous system. Mrs. A. H. Watson, Creemore, Ont., writes as follows:

"For many years I was sorely troubled with violent headaches, so that at times I was completely prostrated and unable to attend to household duties. I started to use Paine's Celery Compound, and experienced immediate relief; and since using it I have not had a recurrence of the trouble. I consider Paine's Celery Compound an invaluable remedy, and will always be pleased to say a word for it."

#### MIDDLE SOUTHAMPTON.

(Special correspondence to the Herald.)

Sept. 4.—The farmers are busy harvesting all kinds of grain which will be a good crop.

Mr. and Miss Dunphy, of St. Marys, are visiting at Conn. F. R. Brook's.

E. W. Fox, of Worcester, Mass., is spending a few days at his old home here.

Our teacher L. H. Huzzard has returned from a pleasant trip to Houlton, Maine.

Mr and Mrs W. S. Tompkins, and Miss Lillie Grant, and J. F. Grant have gone to the St. John exhibition.

Miss Mabel Patterson has taken the school at Waterville.

Dr. Campbell is a guest at the Central House.

C. S. Manuel, of St. John, manager of the provinces for the Royal Victoria Life Insurance Co., is here assisting H. H. Freeman, the company's representative for this district.

Mr. and Mrs. W. K. Oldham, are receiving congratulations on the arrival of a son at their home.

#### IT ISN'T TALKING THAT COUNTS

It is our earnest desire to make you a regular and pleased customer. We do not believe in long and tiresome arguments. Our large stock of pure drugs, proprietary medicines perfumes and toilet specialties and our close prices, will impress you more favorably than long newspaper talks.

#### HAVE YOU USED IT?

Have you used Paine's Celery Compound? If not, we strongly recommend its use if you are nervous, weak rundown, or suffering from neuralgia or blood diseases. Paine's Celery Compound is the most reliable and efficacious medicine now before the public for rebuilding lost strength. Our stock is always fresh and pure. J. M. Wiley, Druggist, Fredericton, N. B.

When the Populist farmers of Arlington, South Dakota, heard that President Roosevelt's son was here to hunt prairie chickens, word was telephoned all along the line and messengers were sent out advising the people to watch for trespassers, post notices and patrol the fields. At one farmhouse, young Roosevelt sought a drink and dogs were set upon him.

#### Ring in the Ears

This is an unfailing sign of catarrh, and if not checked will ultimately result in deafness. The simplest remedy is Catarrh-ozone, which if inhaled a few times daily, prevents the catarrhal condition from spreading. Catarrh-ozone quickly stops the ringing in the ears, head noises, gives permanent relief to catarrhal deafness. For catarrh in any part of the system, bronchitis, asthma, lung or throat troubles, Catarrh-ozone is a specific, and is guaranteed to permanently cure or your money back. Large size, \$1.00; trial size, 25c. Druggists or Polson & Co., Kingston, Ont.

Dr. Hamilton's Pills cure Constipation.

To save the life of their brother, Robert, who had been badly burned by an electric current, Clyde and Louis Parrish, of Great Barrington, Mass., came to Winsted, Conn., and had 139 pieces of skin taken from their arms and grafted on the body of the unfortunate young man. The skin is healing and physicians are hopeful of the victim's ultimate recovery.

#### A Purely Vegetable Corn Cure.

Putnam's Painless Corn Extractor is entirely vegetable in compound, never stings or makes sore spots. Insist on "Putnam's," it cures in one night.

For a list of druggists and dealers in the United States and Canada, send for the free booklet "Putnam's Painless Corn Extractor" to Putnam's Painless Corn Extractor Co., New York City.

#### For a Pinch of Snuff.

Louis XVIII. of France, while reciting an ode of Horace to his chamberlain one day, suddenly stopped to take a pinch of snuff and was annoyed to find that he had left the box in his bedroom.

With a low bow the chamberlain handed him his own box, and the monarch took a good pinch from it, after which he recited the long ode to the end. He then said to the chamberlain:

"You have a poor niece, I believe. Well, I like your snuff so well that I propose, as a token of gratitude to you, to give her the right to open a toy store in the Tuilleries. I will sign the necessary papers this evening."

Thanks to this royal grant, the chamberlain's niece conducted a small but profitable business until her death, in 1859. Her little store then became the property of the state, and ever since it has been rented for about 400 francs a year.

Thus the French republic of today owes a portion of its income to the fact that Louis XVIII. appreciated good snuff.

#### Voices of the Ice.

The winter of the far north is not wholly silent, although so little life is manifest at that season. A paragraph from Captain Koldewey's account of his winter's stay on the east coast of Greenland makes this fact very clear:

All these movements of the ice—the gradual crowding and pressing, bending and pushing, the breaking of the masses of snow lying at the "ice foot"—do not go on noiselessly, but are generally accompanied by certain sounds, which are called the "voices" of the ice.

Now we hear a low singing, splashing or grumbling, alternating with various other noises, cracking and snapping; now it sounds irregularly from a great distance, like a confusion of human voices, the changing din of a train or a sledging party, or you fancy you hear the steps and voices of all sorts of animals.

There is a charm in listening to these sounds on a still night.

#### Smells of Cities.

A famous English artist insists that each city has its own peculiar odor; that a stranger can smell a city—"the great, blended odor of the entire city." There is truth in his remarks. When a stranger enters Munich, there is a smell as of many breweries—a peculiar, sweetish, yet pungent odor of malt, not at all unpleasant to a beer drinker. After a day or two the smell is not remarked, but after the stranger leaves the city the smell is distinct in his memory; it exerts a spell; it urges him to drop his work, to take the next steamship. We have not been in Munich for seventeen years, but that sweet smell haunts us still. Paris has a peculiar individual odor; so has London, so has Berlin, so has Dresden. Boston no doubt has its own smell, which is highly respectable, rather musty, with a suspicion of old family cockroaches.

#### How Coal Resembles Ice.

The Electrical Review calls attention to an interesting explanation of the burning of coal. Coal petroleum and illuminating gas are related to one another much as are ice, water and steam. For this reason perfect combustion of liquid fuel is already advanced a long step toward vaporization, just as ice is advanced toward steam when turned into water. The volatile elements of coal are locked up in solid form, or virtually frozen solid. Professor Dewar demonstrated how great an amount of heat must be taken from the so called permanent gases to make them liquid and how much more to make them solid. Yet nature has solidified gas into the form of coal, and solid coal, like solid ice, will only dissolve into vapor through the expenditure of heat.

Father of the Pastor (after the sermon)—How Horace has changed since he was a baby!

The mother—What an idea! Of course he has changed.

Father—What I mean is that when he was a baby he used to keep me awake!

#### Toothache Cured in One Minute.

Saturate some batting with Polson's Nerviline and place in the cavity of the tooth. Rub the painful part of the face with Nerviline, bind in a hot flannel, and the toothache will disappear immediately. Nerviline is a splendid household remedy for cramps, indigestion, summer complaint, rheumatism, neuralgia and toothache. Powerful, penetrating, safe and pleasant for internal and external use. Price 25c. Try Nerviline.

Use Dr. Hamilton's Pills for Biliousness.

Try the HERALD for visiting cards.
