Corner in Winnipeg Wheat.

WINNIPEG, June 14.—There is every evidence of a corner in Winnipeg July wheat, that option having risen almost nine cents within the past few days.

Some members of grain exchange say it will advance further, while others are of the opinion that it is just a flurry, and it will not hold. A great many shorts have run to cover on the advance, but there is still a large short interest, who will probably have to cover higher up.

It is rumored that J. Ogden Armour of Chicago is a large holder of the July option, while Winnipeg and Minneapolis people are short.

July opened yesterday at 136 3/4, sold up to 139, then reacted and closed 135 3/4.

Fights For Life on Scaffold.

FLORESVILLE, Texas, June 14.—Using as a weapon a sharpened spoon, Refugio Juarez, sentenced to hang for criminal assault, fought desperately on the scaffold to prevent execution. He stabbed Sheriff William Wright over the heart when the officer attempted to adjust the black cap. The wound is not serious. The first time the trap was sprung Juarez fell across the trap. He protested his innocence to the end.

Attempt to Dynamite Church.

LATONIA, Ohio, June 14.—Unknown persons blew up the First Presbyterian Church Saturday night with a dynamite bomb. The pastor has taken an active part in fighting liquor cases now on trial. This is the fifth attempt in the last day or two at dynamiting.

CLEVER ART FORGERS

They Flood the Markets Abroad With Their Wares.

PARIS THE CLEARING HOUSE.

The French Capital is the Chief Mart For the Disposal of Imitation Antiques—Italy Leads in the Production of the Spurious Articles.

Italy has always been the classic soil for fabrications, but in some departments Holland and Paris run her close. Vienna has a specialty for rock crystal and thirteenth century gold work. Florence and Luca for fourteenth century armor. London imitates the pate tendre of Sevres. Constantinople makes oriental weapons, Madrid Damascus swords. Dresden sculptured Ivories, Aix-la-Chapelle pewter plate. Berlin Roman potteries, Amsterdam wrought iron, Rotterdam Indian porcelain, Odessa tiaras and antique jewelry, while Paris is the chief mart and clearing house for all these products.

Italian bronze statuettes, now so much sought, are turned out with dexterity and taste in Tuscany. It is said that it was from one of these foundries there issued the group of virtue oppressing vice, assigned to Gian Bologna, which is now the choice treasure of a celebrated French collection. Switzerland makes a specialty of Louis XV. repousse work.

As for renaissance and mediaeval jewelry, hardly a bit is real except what is in museums. It is not to be bought. In the disturbed epochs that followed the renaissance precious stones were broken from their settings and sold to meet urgent needs. The same need for extreme diffidence applies to the pretty bibelots of the eighteenth century, watches, chateaux, bonbonnières. Of modern fabrication, too, is the enameled jewelry of the sixteenth century. Vienna turns it out to perfection. And so cunning are the makers that, for example, they take care that the ring on which a locket is suspended should show signs of friction, well aware that the buyer who thinks himself cute will look for this indication.

As for the peasant jewelry, now so much bought and sought in Florence on the old bridge and elsewhere, the genuine is long ago exhausted, for, after all, peasants own but a limited stock. It all consists of clever copies or more often tasteful combinations of old designs. The stones, too, despite their fine designations, are rarely anything else but those marvelously clever tinted rock crystals so ingeniously made in Switzerland and sold by the ton if desired.

Venice is the great depot for ebony inlaid with ivory, and cabinets incrustated with tortoise shell, once its glory and now in their decadence, are still the joy of traveling Americans on the lookout for bargains. Buy if the object pleases you, but do not when you pay your dollars imagine you are exchanging new lamps for old. As for old clocks, grandfather or other, there is not one genuine in a hundred. Ware ivory! They are generally bone or, worse still, celluloid aged by the help of tobacco or of that invaluable hand-aid, licorice juice.

Nor does even glass defy the artifice. In the Museum of St. Germain can be seen Roman goblets, their outside incrustated with dirt, whose iridescence has been obtained by fish scales fixed upon their surface. Sometimes real bits of iridescent glass are transferred upon a modern framework. Cologne turns out lacrymatory vases by the gross, not even troubling to copy the old shapes, but using the long narrow bottles in which cheap sweets are sold. These are buried in dung after being smeared with some concoction of which the secret is guarded, and in a little time they issue from retirement patinated and iridescent. Old German and Bohemian glass is also excellently copied in Hamburg and Paris. Venice, too, has not forgotten its traditions and turns out its own old wares.

Sevres and Dresden innocently helped the counterfeit by selling their not yet decorated pieces, if imperfect, for a trifle. On this genuine ground the forger worked with ease. This traffic has been stopped. Still the forger knows no obstacles or overcomes them. And false Sevres and Dresden are supplied by all dealers, and the purchaser rarely has the minute knowledge that will save him. In the eighteenth century oriental porcelain was openly made in England and Holland and sent to China for decoration, when they returned as real China porcelain, or the reverse process obtained. The porcelain was made in China and decorated in what was presumed to be the Chinese style in Europe. Paris at the present moment makes and exports old China porcelain, and many a tourist who buys a find at Hongkong or Shanghai merely brings back coals to Newcastle. Rhodian plates are made near Paris in absolute perfection. Except as a matter of sentiment there is no need to seek the old. Be cautious, too, in buying Greco-Roman pottery. It is mostly made at Naples.

Most of the genuine things were snipped up long ago or else are owned by museums or by the heirs of those for whom they were made and who do not need to part with them.—London National Review.

Time's Revenge.

"I wonder if everybody will have what he wants a hundred years from now."

"I doubt it. The men will then probably be agitating for the suffrage."—Louisville Courier-Journal.

MANNING THE STATIONS.

Discipline Aboard Ship at Sea in Times of Emergency.

At no time is the perfect organization aboard ship so well illustrated as in the time of an emergency. The slightest scent of danger in the wind must find every man ready. And every man is ready. Every man has a number. Every man has a station. A bell tap may send your dining room steward off at a run just when he is serving your soup. At the bell tap he is no longer your steward. He is "No. 78" in the ship's emergency organization, and when he gets to his station he finds Nos. 54, 45, 236, 117, 248 and some others there to act with him like a machine. Aboard a big ship there are sometimes as many as sixty stations about the vessel, and at the sound of an alarm bell thirty seconds have not elapsed before every man has responded to his number at his station and is ready to act to fight fire, to man the lifeboats, or what not.

Up in the wheelhouse is further exemplification of what system will do. Within reach of the officers are a dozen contrivances of machinery that connect with every part of the ship. A touch of one lever closes a bulkhead in this or that compartment of the hold, a touch of another man all emergency stations, a lever he mans lifeboat so-and-so, and a lever there mans any one or all. Here is a telephone, its wires extending to every part of the ship, and an officer's voice carried to a distance station in the bowels of the ship is so magnified by mechanical means that it can be heard twenty feet from the receiver and fairly bellows its orders.

A sailor or steward never knows at what minute, day or night, he may be called to his station. At the sound of the signal bell he must be at his post. There is a drill of some kind every day aboard ship, but the men never know whether they are running to a real fire or only a drill. Boats are uncovered, falls overhauled, davits swung out. Every boat must have its compass, night signals, fresh water and provisions ready for immediate action. From the chart room the captain can start a squad in the most remote part of the ship simply by pressing a button, and the flashing of tiny electric lights faithfully record how every detail of the drill is being carried out. A chart gives the location of all bulkheads, and a tiny light sparkles when this or that water tight compartment is closed. In case of a collision every bulkhead below the water line is closed by a turn of a lever in the wheelhouse, making the modern ship practically unsinkable.—Van Vliet Adling in Book-keeper.

He Dazed Lew Wallace.

Shortly after the first success of "Ben-Hur" Lew Wallace had occasion to go over to London and one day picked up a pirated copy of the novel at a railroad newsstand. To his amazement he found the subtitle left off, a preface interpolated and one of the chapters rewritten. Of course he boiled with rage, and as soon as possible he called on the publisher. That gentleman coolly admitted his crime and told Wallace he thought the amended form better adapted to the British taste, don't know. His gall was so stupendous that the novelist was awed and went away without spilling his gore.

It Was Good Advice.

A wildly turbulent peasant was once a witness in a trial before Chief Baron O'Grady. The counsel, after pestering him for some time, put a question to him which reflected on the witness' character.

"If ye ax me that again I'll give ye a kick in the gob!" was the answer. The counsel appealed to the court, stating that an answer was necessary to his client's case, ending up with the query, "What would your lordship advise me to do?"

"If you are resolved to repeat the question," replied the court, "I'd advise you to move a little from the witness."

DENTISTRY.

Maritime Dental Parlors

DR. J. B. CROCKER, D. D. S.

All Dental work done by latest and improved methods.

Teeth extracted absolutely without pain.

Special attention given to treating and saving natural teeth.
