

THE PARANOIAC.

Queer Delusions That Come With This Curious Mental Disease.

"That curious form of mental disease known as paranoia is seldom or ever cured," said a noted Chicago alienist.

"A paranoiac may be able to transact business with a fair degree of efficiency, but, as a rule, few of this class can be made to stick to work, as the nature of the malady prevents concentration of mind. One so possessed is afflicted with strange delusions, especially with the notion that he is being persecuted. Many an individual who is denominated a crank has paranoia. In general these unfortunates are misanthropic, have no social intercourse with their fellows and are brooding and introspective. Very often their mania leads them to the notion that they have been born to lead mankind in a religious way, and they proclaim themselves prophets of God. Quite often, too, they are discoverers of some wonderful invention that will astonish the world.

"It was a paranoiac who followed the great actress Mary Anderson from place to place, declaring himself her favored suitor and threatening to kill any man who sought her company. These threats were what led to the locking up of the demented creature, and I believe he finally shot one of the asylum attendants. Paranoiacs very frequently develop homicidal tendencies, and it is prudent to watch them at all times."

The Birds' Nests That Men Eat.

The swifts arrive in the Andaman islands toward the end of November, but they take their time in building the nests, which are formed from a gelatinous secretion from the salivary glands of those beautiful members of the swallow tribe. If there has been a wet December, the first crop of nests is generally a poor one, being soiled by the damp and drippings from the roofs of the caves. Collectors, however, begin in January to go around the island to the different caves in an open boat. The best quality resemble pure isinglass and are worth their weight in silver. Afterward there are two other collections. The caves in which the nests are found are scattered about the islands. Some are far inland, others in rocks concealed in mangrove swamps.—London News.

Smoking-Room for Ladies.

Montreal, May 11.—Keeping pace with the times the Allan Line has introduced a mixed smoking-room on their steamship Virginia, and on the voyage out from Liverpool a number of ladies took advantage of the privilege to smoke cigarettes. This smoking-room was formerly used as a lounge room for the men alone.

What a Little Smoke Did.

Belleville, May 11.—Benjamin Sanford is to appear before a magistrate for breaking the nose of George Hurst, when the latter declined to cease smoking a cigarette, the smoke of which was annoying ladies on the street.

Prince Rupert Lots.

Montreal, May 11.—It is announced at the Grand Trunk Pacific offices that all arrangements have been completed for the sale of 2,000 Prince Rupert town lots at Vancouver on May 25 to 29 inclusive.

Goes to Prison at 82.

Comber, May 11.—Isaac Goderich, aged 82, was sent to the Central Prison for one year for horse stealing. He has done time for similar crimes before.

The Unmaking.

He (boastfully)—It takes six generations to make a gentleman, you know, she (calmly)—Yes, and what a pity that it only takes one generation to unmake him!—Exchange.

NAMING NORTHERN LAKES.

Queer Cognomens Are Found In the Silver Country.

A story telling of the discovery of Lake Gow Ganda by Dr. Bell of the Geological Survey in 1874 has been widely published recently. Dr. Bell named the lake at that time Lady Dufferin, but as the country continued to be undeveloped the vice-regal name was soon forgotten except by a very few.

One of the few who heard of Lady Dufferin Lake in the north was J. W. Bartlett, after whom has been named the celebrated Bartlett Mines. Mr. Bartlett was never able to locate the lake by that name, however, and it was believed to be mythical until the resurrection of an old Government report.

How little Lake Gow Ganda was known may be understood when it is stated that there is not so far as known a map published prior to 1903 which gives anything like the correct outline.

That the Indian name should have clung to the lake near which the Bartlett and other well known silver mines are located is not surprising.

A look at the recent mines indicate that the Indian names have quite generally prevailed. North of Gow Ganda is Oboshkong. To the south-east is Wakemika and to the east is Wigram. Other names which appear are Chinopachit, Washkigamoy, Kookaganing, Tamagamamingue and Ashaganing. There are then the more familiar names of Red Squirrel, Caribou, Bear, Round, Jumping and Diamond Lakes. The mining rush has added Miller, Leroy, Everett and Lost Lake. The latter received its name, it is said, from a Mr. Sanderson, formerly of Toronto, who when lost discovered the lake. His cabin now stands on his mining claims on the east shore of Lost Lake. Up the Montreal River, which has been for years a canoe route, appear such commonplace names as Mountain Lake, Bay Lake and Elk Lake. Individuals have figured in making the geography of the north country. Sam's Lake is about 18 miles west of the Bartlett Mines at Gow Ganda, and was named, it is said, after Sam Long, a well-known trapper. Reeve Lake is named after the well-known prospector, A. L. Reeve. Duncan's Lake is said to be named after a pioneer Hudson Bay man of Scotch descent. Leroy Lake is named after Mr. Leroy, one of the 1906 prospectors. Jack's Lake, Duff's Lake and Miller Lake have a similar origin. Turtle Lake, Bear Lake, Gull Lake and Pike Lake have names which partly explain their adoption. Red Cedar, Choke Cherry, White Water and Hangingstone have peculiarities which the names explain. The silver country is dotted with so many hundreds of wonderful lakes, large and small, that the animal and vegetable kingdom had to be drawn upon to give names to them all. Some of them may win a place in the mining history of the north, but to-day Gow Ganda holds the centre of the stage.

Canada Leads in Game.

Canada possesses the most exciting forms of sport for the hunter in the world to-day. The greatest hunters of the world have learned this for a fact, says The National Sportsman. Many men who have grown grey in hunting big game in the jungles of Africa have enjoyed the most exciting sport after grizzlies and Rocky Mountain sheep in British Columbia, or after moose in Ontario, Quebec and New Brunswick. Tremendous herds of caribou are known to exist in the farthest north of Canada, migrating each autumn through Labrador and near the Hudson Bay posts in the Great Slave Lake country.

More Farm Lands.

An agricultural census of Ontario, Quebec and the Maritime Provinces having been taken showed an increase of cleared farm land of no less than 2,877,992 acres compared with the census year 1901. Live stock exhibited an increase of 310,912 milch cows, 438,691 other horned cattle and 947,677 pigs compared with the census year. Surely this is a magnificent showing.

Five Accidents at Galt.

Galt, May 26.—Five accidents occurred yesterday. George Harriman, fireman on a freight train, was injured by the bursting of a cylinder; Bert Heinrich's gasoline launch blew up, wrecking the stern seats and scorching the owner, Mrs. W. Barraclough, a New York visitor, fell from the cellar stairs and broke an arm; James Dryden, carpenter, fell from a roof 20 feet, and his spine is probably fractured; Mrs. R. Patrick, sr., standing on a chair doing housework, fell and broke several ribs.

No Child Criminals.

Albany, N.Y., May 26.—Governor Hughes yesterday signed the bill amending the penal law to provide that a child of more than seven and less than sixteen years of age, who shall commit any act or omission which, if committed by an adult, would be a crime not punishable by death or life imprisonment, shall not be deemed guilty of any crime, but of juvenile delinquency only.

Earthquake at Messina.

Messina, May 26.—One of the severest shocks since the great earthquake occurred here Monday afternoon. The movement was both vertical and horizontal, and lasted ten seconds. The shock was preceded by a rumbling noise. The populace fled panic-stricken, and the walls of ruins in various places collapsed.

Serious Situation In Syria.

Berlin, May 26.—A special correspondent of The Tagblatt sends the following from Laraca, Cyprus: "The situation in Syria is most serious. The autonomy movement is gaining ground, while home rule is at a standstill. The troops stationed at Damascus refuse to recognize Mohammed V. as Sultan."

S.D. HODG KILL

Charles Spurgeon once said that there were three great enemies to man—"dirt, debt and the devil." He might have added one more and included dyspepsia. The evil results of this disease could hardly be exaggerated. Its effects are felt in mind and body, and are so far reaching as the effects of the curse that was laid on the Jackdaw of Rheims which was cursed in "eating and drinking and sleeping, in standing and sitting and lying." The good effects of Dr. Pierce's Golden Medical Discovery are most marked in aggravated and chronic cases of dyspepsia. It enables the stomach glands to secrete the necessary quantity of digestive fluids, and this at once removes that craving or knowing sensation so common to certain forms of indigestion. It tones and regulates the stomach, invigorates the torpid liver and gives the blood-making glands keen assimilative power. "Golden Medical Discovery" cures ninety-eight per cent. of those who use it.

Dr. Pierce's Pleasant Pellets are superior to all other laxative medicines when the bowels are obstructed.

Demand for Annuities.

Ottawa, May 26.—The revenue of the annuities branch of the Trade and Commerce Department after five months' operation has reached \$113,000, and is still growing. Applications in hand will double this amount. Annuities are being purchased by parties in all parts of Canada, including the Yukon. Many applications have been received from parties in the United States, but the law does not allow the selling of annuities outside of Canada.

Death of Hon. Wm. Chisholm.

Halifax, May 25.—Hon. William Chisholm, M.L.C., one of the most prominent citizens of Halifax, and for years one of the most active of business men engaged in the Nova Scotia lumbering industry, died yesterday. Mr. Chisholm was a native of Antigonish, and was of Scotch descent, being a son of John Chisholm. He was born April 21, 1832, and was 77 years of age. He was one of the wealthiest citizens of Halifax.

Some people look upon tea as a mere drink. It all depends upon the tea. "Salada" Tea is a delicious and refreshing beverage. Sold only in sealed lead packets.

WHEN YOU CAN'T SLEEP.

There is many a man and woman tossing night after night upon a sleepless bed. Their eyes do not close in the sweet and refreshing repose that comes to those whose heart and nerves are right. Some constitutional disturbance, worry or disease has so debilitated and irritated the nervous system, that it cannot be quieted.

Or again, you have, a sinking sensation, a feeling you are going to die; or perhaps, you wake in your sleep feeling as though you were about to choke or smother, and rest leaves you for the night. If you allow these conditions to continue for a short period even, you will begin to feel your health declining. It is the nerves and heart not acting rightly, and they can only be set right by the use of Milburn's Heart and Nerve Pills. They soon induce healthful, refreshing sleep, not by deadening the nerves, but by restoring them to healthy action.

Mrs. E. Nutt, St. Mary's, Ont., writes:—"I can gladly recommend your Milburn's Heart and Nerve Pills as I was greatly troubled with my nerves. I was so bad I could not sleep at night without the lamp burning, but after taking four boxes of the pills I became all right again."

Price, 50 cents per box; 3 boxes for \$1.25, at all dealers or The T. Milburn Co., Limited, Toronto, Ont.

VALEDICTORY ADDRESS.

(Continued from Second Page.)

We entered as usual the Intercollegiate League and debated the representatives of Mount Allison college in this city. The subject was "Limited Reciprocity with the United States." We regret that our college did not secure the decision but feel that our efforts were amply repaid by the discipline of many contests and research upon the question. The four sessions of the Annual Mock Parliament, which close the regular meetings for the year, were of the most successful nature. There was an abundance of healthy fun interspersed with some brilliant discussions upon the vexing problems of Dominion politics. These sessions, with the annual mock trial, are capable of giving a valuable insight into the official phraseology and methods of our legal and political life and should secure hearty support.

The publication of the "University Monthly" is also an important feature of the society's work. During the year the issues have been regular and timely. The editors have given it their best thought and, with an abundance of literary and technical articles, it has been brought perhaps nearer than ever before to the ideal of a College Journal. The "Monthly" serves as a link in binding together the sons of U. N. B., and offers to the undergraduate an opportunity of developing the art of journalism, which has become a valuable asset in our national life.

Another phase of College activity which, rightly used, can be made a powerful complement to our scholastic attainments is athletics. A vigorous, physical life is basal to intellectual endurance, self-control and self-mastery. In the large Universities chairs greening established for the object of adapting physical training in its broadest sense to the needs of College men, but, in our smaller institutions, the place of this must be filled very largely by voluntary exercise in the gymnasium and on the athletic field. It is, therefore, gratifying to know that in this respect the year has been in a large measure successful.

STRONG IN ATHLETICS.

Football practice was well attended, and a strong enthusiasm maintained throughout the season. Nine match games were played in all, which resulted in four victories for U. N. B., while two of the remaining five were ties. In basketball, for which our facilities are unsurpassed, a vigorous interclass series of games was played, in which the juniors carried off the highest honors, and in eight games with the leading provincial teams, our representatives met with only two defeats. In hockey, too, the year has been unsurpassed. Several matches were played with the city teams, in which the showing was good, while in the Intercollegiate series the championship was easily secured. The Collegiate sports on the 24th were attended with the usual amount of interest, and a strong team will enter the Intercollegiate meet to be held at Moncton tomorrow.

The Engineering society was re-organized on a slightly different basis and has had a prosperous year. Papers have been read before it at frequent intervals by practicing engineers on subjects which are vital to every member of the society. It has proved in this way a valuable supplement to the regular course of the Engineering department.

The Glee club was able to enlist the theatrical talent of the College, and on the 23rd of April, the supposed birthday of the "Bard of Avon," presented his comedy "A Midsummer Night's Dream." In the signal success of this attempt the club wishes to express a hearty appreciation of the services of Professor Geoghegan, whose untiring effort, wide experience and knowledge of the English drama, made him an invaluable help. It is to be regretted that there have been no regular meetings for the purpose of song, and the class of 1910 should see that these are re-organized next year.

A Forestry society has been organized among the students in the new department of Forestry, with Dr. Fernow, the eminent Professor of Toronto University, as honorary President. The membership is as yet small, but earnest, and it adds another element to the new course which we feel is destined, under the able leadership of Professor Miller, to play a larger part in the life of our province.

The organized societies of the Ladies department have also had a prosperous year. The "Delta Rho" has held some interesting and instructive debates, while the "Ladies Society" has contributed much to the social life of the college. The growing importance of this department of our University is worthy of special note. During the past years the ladies have shown a deep interest in all that pertains to student life, and a willingness to ably assist in our all its functions, while from their numbers have come some valuable contributions to our record in scholastic attainments. In our own class, they have nearly equalled us in numbers, and must be given a first place in the honors of the day.

The Y. M. C. A. and Y. W. C. A. have had an active, and it is hoped, an altogether successful year. Edu-

cationists are coming more and more to feel that the ultimate aim of education is one with the aim of religion, which is nothing less than the perfection of personality or the development of character, and in this the Christian association has something to offer which needs no apology. The great issues that face the college student in these days are not such as can be carelessly set aside. The weekly meetings of the year, addressed by the strongest men available, have touched upon some of these vital themes and, it is hoped, have helped some to find a satisfaction in that triumph of principles which it was their object to secure.

We surrender the leadership of these various associations into the hands of the class which is about to succeed us, feeling confident that you will be mindful of the past records and, in doing your part, will exercise a strong control.

During the past year another name has been added to our list of Rhodes scholars. The appointee, Mr. Ralph Sherman, has our hearty congratulations, and best wishes for a successful career in England's famous seat of learning.

It is to be regretted that the efforts of our energetic Chancellor to secure an increased grant from our provincial government were, for the time being, unsuccessful. We live in an age of competition, progress and stupendous activities. In order for us to keep pace with the times, to maintain our efficient staff of professors, and to accommodate a growing student body there is need of additional funds and the question is therefore of vital importance. It is hoped, however, that our government in which we have all confidence, will find it possible to meet the needs in the near future.

FACULTY CHANGES.

Since the beginning of our course some marked changes have taken place in the curriculum and in the personnel of our Faculty. New chairs have been established in the departments of Agricultural, Chemistry, Mechanical Engineering and Forestry, which, under the very efficient leadership which was secured in each, have done much to keep our course abreast with the activities of the times in which we live. Of the Faculty which took its place in the Academic procession today, only two members have been present since the beginning of our course, our esteemed professors of the chairs of Classics and English. Those who have gone have left their impress upon us, and their loss is regretted, but in each case, the University must be congratulated upon the very scholarly and energetic men who have been secured to fill the vacancies.

The time has now come, your Honors, for that which is perhaps the hardest task of our whole College course—the farewells. To you, Mr. Chancellor and gentlemen of the Faculty, we feel the first obligation, and to you is due the first acknowledgment. With a truth which far outstrips the words did Tennyson say that he was a part of all he had ever met, and, in those cases where we have maintained at all times the proper receptive attitude, your love of duty, increasing efforts and personal touch with our lives, have led us to set our affections upon those habits of life which require intellectual honesty and moral integrity. Knowledge, the rich heritage of the past, has never been imparted to us simply in the abstract, but ever related to that category of the real values in life which lead us "to feel the noblest, think the clearest, act the best," and now as we step forth and strive to crystallize in character and express in society the ideals which we have formed under your instruction, we assure you that we will never forget our experience here and the contribution you have made to our lives.

GOODBYE TO FREDERICTON.

To the citizens of Fredericton we must also bid adieu. To the process of education, which is as big as life itself, you have also made a contribution. You have taught us the spirit which we in turn should show as we go out to make up a part of so-called society. You have welcomed us to your homes and churches, heartily responded to our solicitations, well patronized our student activities and overlooked our mid-night disturbances. We assure you that the friendship we have formed is not one to be forgotten, and that our farewell to you is one of the hardest. When tonight we hear it borne away in loud accents upon the midnight air, it will assure you anew how deeply we feel our parting.

To the undergraduates, we feel that little need be said, since what we are, and have been, is sounding in your ears. You have honored us as a class and ably assisted in our work; as today we shall mingle our voices with yours for the last time in the songs of our dear, old Alma Mater, and shall give a parting hand-clasp, it will be with the assurance that the University spirit will lack nothing, and that her name will be untarnished when you, in turn, lay down your charge. We know that you have caught today that fire of en-

thusiasm which has bound a hundred other classes in loyalty to U. N. B. The following lines will express to you the sentiment which we commend:

There's a breathless hush in the close tonight;

Ten to make the match to win;
A bumping pitch and a blinding light,
An hour to play the last man in.
And it's not for the sake of a ribbed coat
Or the selfish hope of a season's fame,
But his captain's hand on his shoulder smote,—
"Play up! play up! and play the game!"

The sand of the desert is sodden red,
Red with the wreck of the square that broke;
The galling's jammed and the colonel dead;

And the regiment blind with the dust and smoke.
The river of death has bridged its banks
And England's far and honor a name,—
But the voice of a schoolboy rallies the ranks,
"Play up! play up! and play the game!"

This is the word that year by year,
While in her place the school is set,
Every one of her sons must hear
And none that hears it dare forget.
Bear through life like a torch in flame,
And falling fling to the host behind,
"Play up! play up! and play the game!"

Classmates, the efforts of four short years have now gained a meaning; the call of the nation has sounded to us, and today a noble Alma Mater is bidding us to respond and go forth to do honor to her name. Life will not be all one long ripple of laughter, the world will have many a buffet, but when the dark cloud shall hover at times o'er our lives, let us recall this day and the pleasant times spent here, and push on with a determination to justify the training we have received. Ours is an age of materialism and great activities, and it would be difficult to express our national needs in any more appropriate words than the prayer of J. C. Holland:

"God give us men! A time like this demands
Great hearts, strong minds, true faith, and willing hands.
Men whom the lust of office does not kill;
Men whom the spoils of office cannot buy;
Men who possess opinions and a will;
Men who have honor, men who will not lie."

Shall we be anything less than that?
And now to Faculty, students, city and friends, it becomes my duty on behalf of the class to say farewell, "A word that must be, and hath been—
A sound which makes us linger,—yet farewell."

A WONDERFUL COLD CURE.

Just think of it, a cold cured in ten minutes—that's what happens when you use "Catarrhzone." You inhale its soothing balsams and out goes the cold—sniffles are cured—headache is cured. It's the healing pine essence and powerful antiseptics in Catarrhzone that enable it to act so quickly. In disease of the nose, for irritable throat, bronchitis, coughs and catarrh it's a marvel. Safe even for children. 25c and \$1.00 sizes at all dealers.

Prince Rupert Sales On.

Vancouver, B.C., May 26.—In less than two hours yesterday morning \$233,000 was invested in Prince Rupert property. Fully half the buying was done by Vancouver people. The afternoon sales ran the figures up to over \$400,000. In no case was it necessary to withdraw the property because of failure of bidding to reach the "upset" prices. Seattle, Winnipeg and Cordova, Alaska, money was represented, and there were a host of scattered buyers. There were fully 1,500 people in attendance. There are 2,400 lots to be disposed of.

Customs Officers Active at Falls. Hamilton, May 26.—The activity of the customs officers at both sides of the International Bridge Monday was an eye-opener to Hamilton people who spent the holiday in Buffalo, especially those who went bargain hunting in the departmental stores. The trains were delayed both ways an unusual length of time, and the customs men made careful inspection of every coach. The officers confiscated a considerable quantity of stuff. Those who were caught included the stenographers in two or three uptown business offices.

DR. HAMILTON'S CURE FOR PIMPLES.

All skin diseases such as pimples originate through failure of the kidneys and liver. All taints that block the avenues of health must be removed. Dr. Hamilton's Pills do this quickly. They cleanse the system, make the skin smooth, restore roses to the cheeks and give clear, dainty complexion. For good looks, good health and good spirits there is nothing so sure as Dr. Hamilton's Pills. 25c boxes at all dealers

"The Bath De Luxe"

3500 Pores to every Square Inch on your Body

Think of the million skin glands, 3,500 to every square inch of your body! Think what it means to health and beauty to remove every foreign particle from these ducts. The skin glands form a part of the entire respiratory system. The skin cannot breathe when clogged. The pores remove many impurities from the blood. These impurities must be carried away to insure health and cleanliness. No sponge or wash cloth is so sanitary as this.

Knickerbocker Spraybrush

Through hundreds of tiny tubes of velvety rubber, a myriad of water jets penetrate, cleanse and instantly carry away every particle of dirt or waste matter from every pore. Pliable to every contour of face and figure, it constitutes a miniature hand shower-bath, pleasanter and more effective than any other bath appliance.

KNICKERBOCKER SPRAYBRUSH OUTFIT No. 1—Brush 5½ inches long, 2½ inches wide, with 595 hollow teeth, one nickel-plated extension handle, five feet fine rubber tubing, faucet connection..... \$3.00

Other Styles \$1.25 and \$2.00. Made by The Progress Company, Chicago, Ill.

KNICKERBOCKER SPRAYBRUSHES ARE FOR SALE BY

D. J. SHEA, Plumber

Scotch Anthracite

-- COAL --

To arrive soon a large quantity of a above Coal. Buy now and get the benefit of the Summer Price.
