MEN! I'LL CURE YOU BEFORE YOU PAY ME

Let any man who is weak, broken down, old and decrepit in physical weakness, full of pains and aches, gloomy, despondent and cheerless—any man who wants to be stronger and younger than he feels—let him come and tell me how he feels, and if I say that I can cure him and he will show that he is honest and sincere, he need not pay me a cent until I cure him.

I don't want money that I don't earn. I don't need it, and I am not after it. But I am after the dollars that are now going wrong in the quest of health. Look at these poor wrecks of humanity that are spending all they can earn on drugs—dope that is paralyzing their vital organs—that have spent all they have earned for years without gaining a pound of strength for the hundreds of dollars wasted.

That is the money that I am after, because for every dollar I take I can give a thousand per cent. interest. And I don't want it at all until I have cured you, if you will secure me. I have cured so many cases right here that I can prove my claims to you, but if that proof is not enough, I'll cure you first and then you can pay me. Is that fair?

Most of the Belts that I am selling now are to men who have been sent here by their friends whom I have cured. I think that is the best evidence that my business is a success from the standpoint of cures, as well as on the dollar side.

Just lately I have received letters of praise from these men:—

J. DAHAL, SS. "Mima," Halifax, N. S., completely cured of Rheumatism.

W. Y. PYKE, Red Bay, Nfld., cured of general debility.

WM. J. BYERS, Nipissing, Ont., restored his strength, after being unable to work for years.

JOHN NOBLE, Hanover, Ont., cured of Rheumatism.

If you will come and see me, I'll explain it to you. If you can't call, let me send you my book, full of the things a man finds inspiring to strength and courage. Free if you send this ad.

A HALIFAX WOMAN CHOKED TO DEATH

Mrs. Samuel Harrison Attacked By a Drunken Man and so Cruelly Treated That She Died in a Few Minutes—Percy Wallage Arrested for Her Murder.

Halifax, N. S., May 28—Percy Wallage, a young man of 22, will likely stand trial on a charge of murdering Mrs. Samuel Harrison tonight. He is a prisoner and is held for the crime, pending the report of the coroner who is making an investigation.

The assault, which ended in the death of the woman, was most brutal. Mrs. Harrison had been working in the upholstering department of the Nova Scotia Furnishing Company's factory, till 10 o'clock, and as she was emerging from the door, Wallage came along, caught her round the throat and forced her back through the door, throwing her to the floor.

Screams brought help and Wallage was put out but he got back, made a second attack on the woman, cutting her face and digging his fingers deep into her neck. The police arrived and Wallage was taken in charge and the woman in the brief moments of life that remained was able to identify Wallage as the man who assaulted her. Then she fell back dead.

Wallage was drunk and shortly before had tried to force an entrance into a nearby house. He will come up for examination tomorrow. The woman's body was taken to an undertaker's room whither her daughter had been summoned. She said her mother was 50 years old.

GREAT BARGAINS ---IN--- DRY GOODS

Dress Goods, Prints, Fancy Ginghams, Table Linen and Towelling to be sold at less than manufacturer's prices.

Sale Commences Today and Ends Wednesday

40c. Tweeds and Self Striped Lustres	25c. yd.

32 and 36 King Square.

THE SHAD FISHERY

Better Run of Fish Now Than for the Last Two or Three Years

The warm weather of the past two days has been very favorable for the shad fishing. A wholesaler, in conversation with a Telegraph reporter yesterday, said the boats are now landing bigger catches than for the last two or three years. Next week will see the conclusion of the spring run of shad.

Although the number of shad being caught is large he said the bulk of the fish will be used fresh. There will be very few, if any, to salt down. Salt shad, indeed, have for years been very scarce and often there have been none offering. The reason is found in the smaller number of the fish being taken. Fourteen or fifteen years ago, he said, one boat would often land as many shad as the whole fleet.

A few salmon are being taken in the shad nets but the real run of these fish will not start till after next week. Gaspereaux fishermen continue to do fairly well both with the drift nets and the weirs.

A Woman's Sympathy

Are you discouraged? Is your doctor's bill a heavy financial load? Is your pain a heavy physical burden? I know what these mean to delicate women—I have been discouraged, too; but learned how to cure myself. I want to relieve your burdens. Why not end the pain and stop the doctor's bill? I can do this for you and will if you will assist me.

All you need do is to write for a free box of the remedy which has been placed in my hands to be given away. Perhaps this one box will cure you—it has done so for others. If so, I shall be happy and you will be cured for 2c (the cost of a postage stamp). Your letters held confidentially. Write to-day for my free treatment. MRS. F. E CURRAH, Windsor, Ont.

The police have been asked to be on the look out for a fourteen year old girl, Alice Massey, who left Moncton on Wednesday last for this city. The girl is described as being of dark complexion and when last seen was wearing a black skirt and blue shirtwaist, a red sweater and a blue felt hat.

INSPECTION OF CATTLE

Applications for milk licenses for 1909 are being received slowly at the board of health office. So far only about twenty have been issued. Secretary T. M. Burns said yesterday that a good many of the herds are being inspected by veterinaries.

With regard to the promise of the agricultural department of the local government to appoint dairy inspectors, he said he had no definite information. He had written to Hon. Mr. Landry, commissioner of agriculture, about the matter, but so far had not heard from him directly, although T. A. Peters, the deputy commissioner, had written to say that he understood two dairy inspectors had been appointed, one to be stationed in Moncton and the other in Sussex. Mr. Burns said that if such officials had been appointed he had not received any certificates from them relative to dairy herds.

The Book Agent—Madam, at least I claim to be a gentleman.

Miss Cayenne—Thats all right — so long as you're not required to prove it.

VERY HIGH.

First Gambler—I raised the pot to a thousand dollars on a royal flush.

Second Gambler (a joker)—That was carrying things with a high hand.

TOO COSTLY

Geraldine—I don't believe in flirting.

Gerald—Neither do I. The last time I tried it I was sued for breach of promise.

SLAUGHTER SALE ---OF-- Boots and Shoes

Commencing Thursday, May 27th, for 10 Days Only

Unprecedented Bargains

Every Price Quoted a Money Saver

Boots for Men, Women, Girls Boys and Little Tots.

Positively Cash Only.

GEORGE WARD LOSES FOOT AS RESULT OF ACCIDENT

Elevator Weights in H. Horton & Sons Building Fell Five Stories—George Ward Badly Injured.

About 5.30 o'clock last evening owing to the parting of the wire cable in the elevator shaft of the building occupied by H. Horton & Son, Ltd., in Market square, three heavy counterpoise weights fell from the fifth floor to the basement, tearing through the back of the elevator, which had just reached the bottom, and crushing the left foot of George Ward, one of the clerks of the firm. Two other employes, William McManus and James Walsh, who, with a machinist from E. S. Stephenson & Co., were in the elevator at the time, escaped unhurt. Mr. Ward was taken to the hospital, where his foot was amputated. He is about twenty-one years of age and a son of Mrs. Rebecca A. Ward, 7 Golding street. He has been with the firm about four years.

The elevator, which is operated by a motor, had been found not to be working satisfactorily and as the motor was thought to be in need of repairs George A. Horton, general manager of the company, telephoned to E. S. Stephenson & Co. yesterday morning. Two men were sent and made some changes in the motor, but later in the day Mr. Horton's attention was called to the fact that the elevator would not descend into the cellar. He telephoned again to Stephenson & Co. and a machinist was sent to make matters right. The elevator appeared to be in good order when about 5.30 p. m. the machinist, who was testing it, stopped at the third floor and invited Mr. Ward and Mr. McManus to take a ride down and satisfy themselves that it was running satisfactorily.

They entered and on descending to the second floor the elevator was stopped at the request of Mr. Walsh, who joined them. The basement was reached without mishap, but as the elevator came to rest, from some cause not fully explained, the wire cable attached to the three weights, which, acting as a counterpoise, were at the fifth floor, parted and the three heavy pieces of metal fell from the top to the bottom of the shaft.

They were arranged in a groove side by side at the rear of the shaft and gathering increased momentum as they descended, they finally crashed into the basement, splintering the woodwork of the back of the elevator, one of them landing with terrific force on the left foot of Mr. Ward, who was standing near the back at the time. The other three men escaped unhurt.

The crash was heard by Mr. Horton in his office and as he ran out to ascertain what had happened he heard Mr. Ward's cry of pain. He was suffering intense agony with his foot badly crushed and was quickly carried into the main store, where he was made as comfortable as possible while awaiting medical aid.

Dr. H. G. Addy and Dr. E. J. Broderick were telephoned for and the ambulance was also summoned. Dr. Broderick arrived first and, seeing that nothing could be done on the spot, ordered Mr. Ward's removal to the hospital. An examination of his foot showed that there was no hope of saving it and it was amputated above the ankle about 9 o'clock. On enquiry at the hospital later it was learned that Mr. Ward had stood the operation well and that his condition was satisfactory.

An examination of the cable after the accident showed that it had parted at the joining place, where the strands of wire were interlaced. The elevator, when working properly, shuts off the current automatically when either at the top or bottom of the shaft. It failed to shut off the current on reaching the bottom just before the accident and it is supposed that an unusual strain on the cable pulled it apart, causing the weights to fall.

Mr. Horton, in speaking of the accident last evening, said he felt the unfortunate occurrence very keenly as only in the morning he had warned Mr. Ward not to touch the elevator as it was not in working order.

THE CARLETON ELECTION CASE

Trial Date Will Be Fixed on Monday--Objections of Hon. W. P. Jones Overruled.

Before His Honor Judge McLeod in chambers yesterday the Carleton county election case again came up. A. B. Connell, K. C., appeared on behalf of the petitioner, Wm. J. Owens, the defeated government candidate at the local by-election in Carleton county, and Hon. W. P. Jones, K. C., for Geo. W. Upham, M. P. P., the respondent. Mr. Connell applied for an order to have the date of the trial fixed.

Mr. Jones opposed the granting of the order on the following grounds:

1. That there was not sufficient publication of the petition as required by law. The act requires that the petition shall be posted in the office of the registrar of deeds and in this case it was posted in a recess outside the door of the county building. The county building contains, besides the registry office, the chambers of the county court judge and a number of offices of county officials.

2. That even if the posting was sufficient it was too late as it was not done until twenty-seven days after the petition was filed, and the law provides that it shall be posted forthwith.

At the conclusion of the argument his honor overruled the objections, saying that he thought the provisions of the act had been reasonably carried out. On Monday afternoon at 3.30 o'clock the date of trial will be fixed.

Mr. Connell has taken out a summons calling upon the respondent to show cause why date for trial should not be extended. This matter will be argued at 2.30 p. m. of the same day.

VAGUE PAINS POINT TO RHEUMATISM

There is no disease more sneaking, treacherous and insidious than rheumatism—today you're well—tomorrow perhaps in bed. The pain may settle in your back, arms, legs, thigh bones, knees, fingers—not even the heart is exempt.

Nerviline is the cure—a few vigorous rubbings with this trusty liniment proves what wonderful healing powers a good medicine can possess. Deep into the aching tendons and muscles, right through the bones and sinews goes the penetrating, pain-destroying properties of Nerviline. Failure is impossible—Nerviline always cures rheumatism, sciatica, neuralgia and lumbago—in fact there is not an ache or a pain that a liniment should cure that won't yield quickly to Nerviline.

Don't hesitate to try "Nerviline"—it has restored thousands of despairing, broken-down men and women, has astounded physicians with its rapid cures, and in your case, as in others just as bad, Nerviline will cure quickly. Refuse substitutes—use "Nerviline" only. Large 25c. bottles. Sold by all dealers.

The St. John City Rifle Club will hold their weekly spoon match this afternoon on the local range, the match starting at 1.30 sharp. Major S. B. Smith will act as range officer and will receive match tickets up to 2.30, after which tickets will not be received. If the weather is at all favorable, a large attendance is expected.

She—You seem to think it very funny that I should refuse you.

He—Yes; Jones bet me $50 you would not refuse anyone, and I win.

To Suffer From Headaches Makes Life Miserable.

It takes a person that has had or is subject to headaches to describe the suffering which attends them.

The majority of cases are caused by constipation and dyspepsia. The dull throbbings, the intense pain, sometimes in one part, sometimes in another, and then over the whole head, varying in its severity by the cause which brings it on, purely indicates that there is something the matter with the stomach or bowels. To the fact that Burdock Blood Bitters reaches every part of the system is due its success in relieving and permanently curing headache. It has proven a specific for the malady in all its forms.

CONSTIPATION AND HEADACHES.

Mrs. Allison E. Brown, Summerfield, N.B., writes: — "I have been troubled with Constipation and Headaches for a long time. After trying different doctors to no effect, a friend asked me to try Burdock Blood Bitters. I find I am completely cured after taking three bottles. I can safely recommend it to all."

DR. GEO. F. MATTHEW HOME FROM OTTAWA

He Tells of the Meetings of the Royal Society—Fine Collection of Fossils for Natural History Society

Dr. George F. Matthew returned to the city yesterday from Ottawa where he had been attending the May meeting of the Royal Society of Canada. He left here last Tuesday and was obliged to leave the federal capital before the close of the meetings. Naturally Dr. Matthew was most interested in the meetings of section iv, devoted to the geological and biological sciences. He himself read three papers before the section, on the Geological Age of the Little River Group; Revision of the Flora of the Little River Group, and Remarkable Forms of the Little River Group. In the revision of the flora of the group Dr. Matthew described one of the fossils found this spring by A. Gordon Leavitt and which was new to science.

Among other interesting papers read was one by Dr. R. W. Ells on the Oil Shales of Albert County, in which he said these were much richer than the Scottish oil bearing shales. Dr. L. W. Bailey read a paper on the Geological Factors in the Physiography of New Brunswick.

Dr. Matthew was asked last night about the collection of fossils he intends to donate to the Natural History Museum here if, after the end of three years, the society shall have raised enough money to pay off the mortgage on the building. His collection, he says, he calls a general collection. It includes more than 1,000 specimens of all kinds of fossils from every strata of the earth's crust. A good many are from foreign countries, but it is especially rich in fossils that occur outside of the Cambrian in New Brunswick and other parts of the maritime provinces. The collection is one specially suited for a museum or for advanced students of paleontology.

Dr. Matthew said he had devoted himself to the study of geology for forty years. Some years ago the University of Toronto purchased his collection of Cambrian types of New Brunswick and Nova Scotia. It is probable that his collection of co-types of the Cambrian strata of the two provinces will be purchased for the new museum in Ottawa.

AYER'S HAIR VIGOR

Stops Falling Hair — An Elegant Dressing

Destroys Dandruff — Makes Hair Grow

Does not Color the Hair

J. C. AYER COMPANY, Lowell, Mass.
