

AT DEATH'S DOOR

Doctors Had to Give Her Morphine to Ease the Pain

FIVE BOXES OF "FRUIT-A-TIVES" CURED HER

Enterprise, Ont., Oct. 1, 1908.

For seven years I suffered with what physicians called a Water Tumor. I would get so bad at times that I could hardly endure the pain. I could neither sit, stand nor lie down. Hypodermics of Morphine had to be given me or I could never have borne the pain. Many physicians treated me, but my cure seemed hopeless, and my friends hourly expected my death. It was during one of these very bad spells that a family friend brought a box of "Fruit-a-tives" to the house. After much persuasion I commenced to take them, but I was so bad that I

was only when I had taken nearly two boxes that I commenced to experience relief. I kept up the treatment, however, and after taking five boxes I was cured, and when I appeared on the street my friends said, "The dead has come to life." And this seemed true, because I certainly was at death's door. But now I can work almost as well as ever I could, and go camping and berry-picking with the girls. I will be glad if you will publish this testimonial, if it will further the interests of "Fruit-a-tives." They should be in every household. Yours very truly, Mrs. JAMES FENWICK.

Through the whole country around Enterprise, Ont., people are talking about this wonderful cure. By their marvellous action on the kidneys, "Fruit-a-tives" cured Mrs. Fenwick when the doctors said she could not be operated on and was doomed to die. "Fruit-a-tives" cured Mrs. Fenwick when all else failed. Try them for your trouble. 25c. and 50c. a box, at all dealers or sent postpaid on receipt of price. Fruit-a-tives Limited, Ottawa.

WILL PUT A PRICE ON MASONIC HALL FOR NEW CITY HALL

Committee Have Three Plans in Mind and Have Not Yet Decided Upon Any.

The committee appointed to report on the question of providing additional accommodation at city hall or of acquiring a new building met yesterday afternoon and after discussing the plans of the architect, which were submitted last year, the committee inspected the Masonic building in Germain street. It is understood that the directors of the Masonic Hall Company will meet at an early date and place a definite offer before the committee. It is said the company would be willing to dispose of the property for \$70,000. Should the council decide to enlarge and improve the present city hall the cost of

installing an elevator and fitting up the top floor for offices would, by the estimate of the architect, amount to \$8,000. If another story were added the figures would be increased to \$15,000. Another proposal is to erect a city hall in the centre of the Market Square. The committee will probably hold several more meetings before they report.

LOTS ARE.
The Congressman—A public official is the servant of the people.
The Senator—And usually he's the kind of a servant that carries a large bundle every time she goes home from her place of employment.

THE GREATER TASK.
His Boss—Sambo, it must be hard to have the reputation for chicken stealing that you have.
Sambo—It sure is, but 'tink o' havin' to live up to dat reputation, huh?
Jinks—It would be funny if we could see ourselves as others see us.
Blinks—It would be much funnier if I knew ourselves as our neighbors know us.

CANADA'S TIMBER SUPPLY HAS BEEN OVER ESTIMATED

It Is Not Inexhaustible, Declare Speakers at the Forestry Convention — It Takes a Century to Grow a 12 Inch Tree—Some Startling Figures Showing How Timber Has Been Wasted

Toronto, Feb. 12.—What has Canada really got in the way of timber? Throughout the papers read at the convention of the Forestry Association which terminated today, doubt was cast upon the estimates made of the timber supply of the dominion and the feeling was concretely expressed in a resolution asking the dominion government to appoint a royal commission to inquire into the matter. At the same time the association expressed its appreciation of the dominion government's intention to appoint a parliamentary committee to investigate forest conditions. It regarded the matter of such importance that a recommendation with regard to a full inquiry by a royal commission was considered desirable.

Another important recommendation was that the several local governments, not already having done so, controlling crown lands, be requested to withdraw definitely from location all lands, at present open for location, as may be found, on inspection, to be unsuitable for farming purposes and that no towns or settlements be located on less than 50 per cent. of agricultural land be opened for settlement.

In the case of lands now under license which are found to contain more than 50 per cent. of land suitable for agriculture, that previous to opening of such township the licensee be given reasonable time in which to take off the merchantable timber.

The association desired to impress upon the federal and provincial governments the great necessity of placing in forest reserves all lands at the head waters of streams. Votes of thanks were accorded the governor general, Lieut. Governor Gibson and Hon. Sidney Fisher for their interest in the proceedings and to the authorities of the university for placing the hall at the disposal of the association.

It was decided to appoint a committee to consider the preparation of farmers' bulletins of warning and an instruction bulletin for schools, material for the inclusion of elementary forestry in high schools courses, and the preparation of maps and lantern slides for lecture purposes. Great attention was also expressed at the progress made by the governments of Ontario, Quebec and New Brunswick in the matter of forest protection.

"What we want" was put emphatically in regard to forestry matters in a paper read by Professor E. E. Knowlton, dean of the faculty of forestry at the university. "First of all they wanted the governments of the dominion and provinces to change their attitude. 'Devil take the hindmost,' or 'what has posterity done for us' was the doctrine of the majority of mankind. Hence it was not natural that the Canadian governments, like others which

had to deal with newly developing countries had allowed the present generation to waste resources without regard to the future. Overlooking the providential function of government, they had pulled down the house and sold the bricks instead of securing rents by proper management.

"During the last 40 years \$1,000,000,000 had been sent out of the country in raw material and a similar value used in fuel. During the same period probably not \$80,000,000 had been collected by the governments in dues.

"It needs to be driven home to every Canadian that, in spite of foolish assertions to the contrary and exceptional cases observed in single individuals, the growth of trees in forest in our northern climate is the detestable and rocky soils, which are the heritage of the forest, it takes, in the average, not less than 100 years to make a twelve inch tree, and the majority of trees which lumbermen cut have required 150 years and more to make log sizes.

"They wanted the governments to realize that there were other ways of doing forest properties than merely exploiting them.

"That forests could be managed as crops to be reproduced while utilization is going on.

"Poor forests could be improved but no such provision as setting a diameter limit in cutting, would suffice to secure needed supplies for the future.

"Real forestry, not simply tree planting, which commenced when the first tree was cut, was what was needed.

"Two kinds of crown lands were only fit to grow timber and, having that in view, some restriction should be placed on settlement.

"The most fundamental want was efficient protection against forest fires. "We must convince every George Washington, with his hatchet," said Professor McLellan of Queen's University, in moving that the association undertake preparation of such literature and its distribution, and also preparation of maps which would graphically bring before the public what had been done, what was being done, and what was needed for the future.

Rev. A. E. Burke, Prince Edward Island, bore testimony to the value of the educational work of the association. In his province they had nothing in the shape of crown lands or forests, but great progress had been made in regard to private plantations.

J. B. Miller, vice-president of the Canadian Lumbermen's Association, thought that mistakes had been made by the Ontario government in opening up for settlement lands unsuitable for agricultural purposes, particularly in Barry Sound and Muskoka district.

ALDERMEN AS USUAL PUT BLAME ALL ON THE CHIEF

Delegation From Women's Council Met the Safety Board Last Night and Urged for a Patrol Wagon, a Jail Matron and No Expectation in the Streets.

The safety board last evening passed an order instructing the water and sewerage department to place all the fire hydrants in Germain street on the new 12-inch main and to remove the old hydrants in King street and replace them with the improved Cory hydrant. This action was taken on recommendations in the report of the chief of the fire department, some sections of which were taken up and discussed.

A delegation from the Women's Council asking for a jail matron, a patrol wagon and the enforcement of the by-law against expectorating in the streets were referred to the chief of police.

After hearing a delegation of ministers from the Carleton churches who asked for the use of the lower hall in Carleton city hall to provide quarters for the proposed Carleton Every Day Club the board recommended that the request be granted and a rental of \$1 a year charged.

Ald. Vancouver presided and Ald. Elkin, Baskin, Scully, Holder, McGowan and Sproul were present with the director and Chief Kerr.

The delegation from the Women's Council, consisting of Mrs. David McLellan, the president, Mrs. T. H. Bullock and Mrs. D. P. Chisholm, were first heard.

In reply to the chairman, Mrs. McLellan said that last spring the Women's Council petitioned the board for a police matron, but nothing more had been heard of it, although they had been anxiously waiting all last year for some action to be taken. Incidentally they had heard that the petition found its way into the hands of the chief of police. There was no woman connected with the police department to search women prisoners. They were supported by the magistrate in their views that such a woman was very necessary.

The chairman replied that he did not quite know how the matter stood. He believed it had been discussed by the board and referred to the chief of police, who informed them that a police matron was not necessary.

Mrs. McLellan said she had asked Chief Clark and he had told her it was very necessary but he wanted a patrol wagon first. When the petition was sent in the council thought it was settled that there should be a patrol wagon.

The chairman said the board had no money for the purpose in the estimates and could not get it. Two extra men would be required and it would entail a lot of expense.

Mrs. McLellan—"But don't you think it is a necessity? A gentleman—a stranger in St. John—recently commented on the disgraceful sight of a drunken man being dragged through the streets."

Cataract Cannot be Cured
with LOCAL APPLICATIONS, as they can't reach the seat of the disease. Cataract is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Cataract Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Cataract Cure is the perfect combination of the two ingredients in what produces such wonderful results in curing cataracts. It is a blood purifier. Don't try for a long or a short time.

By Our Formula

We produce in Hood's Sarsaparilla a medicine that has an unparalleled record of cures of Scrofula, eczema, eruptions, catarrh, rheumatism, anemia, nervousness, that tired feeling, loss of appetite, etc. The combined and proportional of the more than twenty different remedial agents contained in Hood's Sarsaparilla are known only to ourselves, so there can be no substitute. This medicine makes healthy and strong the "Little Soldiers" in your blood—those corpuscles that fight the disease germs constantly attacking you.

chief of police within the next few days. The delegation then withdrew.

The chamberlain submitted plans for the steel shelves in the city's vault.

On motion of Ald. Sproul it was decided to call for tenders and proceed with the work.

Rev. W. R. Robinson, Rev. Jacob Heaney and Charles G. Brown appeared as a delegation to ask for the use of the lower hall in Carleton City Hall for the Carleton Every Day Club.

Rev. Mr. Robinson said the large room was wanted to organize an Every Day Club for men. He said that every day clubs were one of the greatest movements of the day.

Rev. Mr. Heaney said the platform of the club was the brotherhood of man and the object was to get in touch with men who never went to church and help them to help themselves.

Mr. Brown said that the success of the club depended on their getting the large room. They did not expect to make money and would have to finance the club. He hoped the rent would be as nominal as possible.

The delegation then withdrew. A communication from the Carleton Cornet Band asking for the room at a rent of \$100 in order to give concerts to provide funds for the band was read.

In reply to Ald. Baskin the director said the band had not paid any rent for their room for years.

The chairman said he thought the good the Every Day Club would do was worth a good many hundreds of dollars.

Ald. Elkin thought the movement should be encouraged in many ways. He moved that the club be given the room for a year at a nominal rent of \$1.

Ald. Scully said he was opposed to giving the room practically free. He would not object to helping to pay the rent but personally he favored letting the band have it. He did not believe Carleton needed an Every Day Club.

After some further discussion the motion was carried.

Sections in Chief Kerr's report dealing with hydrants were taken up.

Chief Kerr said he would ask for an order to have all the hydrants in Germain street placed on the new 12-inch main. The safety of the city demanded it. He also wished the board to instruct the water and sewerage department to replace the old type of hydrants in King street with new hydrants of the Cory pattern.

Motions instructing the water and sewerage board to carry out the chief's recommendations were adopted and the board adjourned.

Chief Clark, when asked last evening with reference to the requests brought forward by the delegation from the Women's Council said a recommendation for a patrol wagon was included in his annual report and that which was already in the hands of the safety board. With regard to the appointment of a police matron the board had received his written opinion some months ago. He believed it would be a step in the right direction but at the same time there were other reforms in connection with the work of his department which were more needed. The men on the force, he added, had received instructions to enforce the by-law against expectorating on the pavements, and he believed conditions in this respect were much improved.

WORK AND WORRY WEAKENS WOMEN

New Health and Strength Can be Had Through the Use of Dr. Williams' Pink Pills.

It is useless to tell a hard working woman to take life easily and not to worry. But it is the duty of every woman to save her strength as much as possible; to take her cares as lightly as may be and to build up her system to meet any unusual demands. It is her duty to herself and to her family, for her future health depends upon it.

To guard against a complete breakdown in health, the blood must be kept rich and red and pure. No other medicine does this so well as Dr. Williams' Pink Pills for Pale People. This medicine actually makes new, red blood, strengthens the nerves, restores the appetite and keeps every organ healthily toned up. Women cannot always rest when they should, but they can keep their strength and keep disease away by the occasional use of Dr. Williams' Pink Pills, which have done more to lighten the cares of weak women than any other medicine.

Mrs. James H. Ward, Lord's Cove, N. B., says:—"About two years ago I suffered so much from nervous prostration that I was little better than a helpless wreck. I suffered from headaches and a constant feeling of dizziness. The least unusual move would startle me and set my heart palpitating violently. I had little or no appetite and grew so weak that I was hardly able to do any household work, and I could not do my housework. In every way I was in a deplorable condition. As the medicine I had been taking seemed to do me no good, my husband got a supply of Dr. Williams' Pink Pills. I had only been taking the Pills for a couple of weeks when I seemed to feel somewhat better and this encouraged me to continue the treatment. From that on my strength gradually but surely returned, and in the course of a few more weeks I was once more a well woman, able to do my own housework, and feeling better than I had done for years. I have since then watered to the healing power of Dr. Williams' Pink Pills."

Every other weak, sickly, worn out woman should follow the example of Mrs. Ward and give Dr. Williams' Pink Pills a fair trial. These Pills will send new blood coursing through the veins and bring brightness and energy to the weak and despondent. Sold by all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

ADMIRED AVOID DUPLICATION.
Mr. Pompaus—"So you want to marry Ella? Isn't it asking too much, young man?"
Fargnon—"Oh! I don't know—er—you see, I'm rather partial to stout girls!"

A LARGE TREE.
Mr. Newrich—"Gee! His family tree must be very extensive."
Mr. De Style—"Why so?"
Mr. Newrich—"He paid \$5,000 for it."
