The leading furs for jackets the coming season are—SEAL, PERSIAN LAMB, PONY and MUSKRAT, and we would like to show our assortment to you.

D. MAGEE'S SONS, Manufacturing Furriers, 63 King Street

NOTABLE WOMEN AND THEIR WORK

Mother Ernestine has received a prize of 15,000 francs given for acts of devotion by the French Academy of Moral Science. She occupies in France about the same position as is held in America by Mrs. Ballington Booth. She is known as the helper of ex-prisoners.

She is now over 80, and ever since she was 20 she has given herself to works of reclamation. Almost immediately after she entered the order of the Sacred Heart she began her labors in the prison for women at Rouen. After a few years of this work she began to wonder what became of her charges after they left prison. This led her to rent a small room and to take two of her ex-prisoners there and launch them in the trade of shirtmaking.

The number of her charges increased so rapidly that the police authorities decided to allow her 500 francs yearly. A few years more and it was decided to put all young prisoners in her charge. The result of this was the establishing of a refuge with Mother Ernestine at the head.

Here for a number of years she had 38 sisters working under her, and often the inmates in the refuge have numbered more than 500. These women are taught dressmakin, tailoring, housewifery, and gardening.

Miss Gertrude Bacon of London and Miss Spencer of Highgate, are said to be the most accomplished women aeronauts in England. Miss Spencer belongs to a family of aeronauts, and is the only woman in England who has made an ascent in a balloon entirely alone. When she accomplished this feat she remained up two hours, and then made her descent with ease and dexterity.

Mrs. Asher Richardson of Ashertown, Tex., has been appointed assistant general superintendent of the Ashertown Gulf Railroad. Thirty-two miles of the road have been completed, and it is now being extended 60 miles more. Mrs. Richardson has charge of the employment and work of a large body of men.

Mrs. Elizabeth Gerberding, president of the Woman's League of Justice in San Francisco, has announced that she will take an active part in the states election next fall. The league has a membership of more than 2,000 women, and all of them are said to be as determined as their president to have their say in the next political campaign.

THE LATE WM. CROTHERS

Sussex, N. B., Sept. 13—(Special)—The funeral of the late Wm. Crothers took place this morning from the residence of his daughter, Mrs. Edward Parlee. After a short service at the house the body was taken to the Plumweseep church, where the Rev. Mr. Campbell, of Shubenacadie (N. S.), who assisted Rev. Frank Baird in the service, preached the funeral sermon. The funeral was quite largely attended.

To atend the W. F. M. S. of the Presbyterian church of the maritime provinces the following ladies left for Truro today:—Mrs. J. H. Thomson, Mrs. Struan Robertson, Mrs. T. Somerville, Mrs. J. Sterling, Mrs. R. A. Jamieson, Mrs. R. Church and others.

Your Blood is Poisoned

If You Suffer From Headaches or Neuralgia

Frequent attacks of Headaches or Neuralgia are Nature's warnings of Blood Poisoning. The pain is due simply to the tortured nerves, inflamed by the blood being overloaded with impurities, because of inactive bowels, kidneys or skin.

There is usually chronic Constipation and the foul matter, instead of passing from the body, is absorbed by the blood. The kidneys are not as strong as they should be and fail to filter from the blood, the necessary amount of impure matter.

Instead of the skin throwing off one and a half pounds of waste matter every day, it becomes inactive and does only half its work, leaving three quarters of a pound of this waste to poison the body. Headache powders and pain killers simply numb the nerves and have no helpful action on the organs causing this poisoning of the blood. To cure Headaches and Neuralgia, the blood must be purified, which can be done only by making the kidneys, bowels and skin healthy and active.

"Fruit-a-tives," made from concentrated and intensified fruit juice, is the greatest blood purifying medicine.

"Fruit-a-tives," or "Fruit Liver Tablets," is a scientific cure for Headaches and Neuralgia, and never fails to cure because "Fruit-a-tives" stops the cause of these troubles.

50c. a box, 6 for $2.50, or trial, box 25c. At dealers or from Fruit-a-tives Limited, Ottawa.

INCREASES FOR SCHOOL TEACHERS

Board Meeting Last Evening—Doctors Urge Medical Examiner for Schools.

At a meeting of the board of school trustees last night a report from Architect F. Neil Brodie was read to the effect that the fire escapes were still in an uncompleted state. The secretary was instructed to write to Mr. Brodie asking him to notify the contractor that the work was long behind hand and that the contractor would be held responsible. A letter was received from Daniel Mullin, K. C., enclosing two leases, one for the lot in Newman street now occupied by the board, and one for the lot next to it. Those present at the meeting besides the chairman, R. B. Emerson, were Mrs. Skiner and Messrs. Coll, Russell, Day, Lockhart, Smith, Nase, Dr. Bridges and Truant Officer McMann.

The meeting of the teachers' committee, held after the regular board meeting, was largely taken up in considering the recommendations made by a sub-committee regarding increases in the teachers' salaries. It was decided to increase the salaries of all the lady teachers on the board $20 a year. In addition to the increases to the lady teachers a number of the male principals and teachers were also granted advances. These included Rev. Cormier, of the Leinster street school; Enoch Thompson, La Tour school; Michael D. Sweeny, St. Peter's; Thomas E. Power, High school, and W. J. S. Myles, principal of the High school.

Following the committee meeting there was a short meeting of the board, when these advances were approved.

The first business of the trustees was the consideration of correspondence.

The applications of Miss Hennessey, Miss Walsh, Miss Perley, Miss Bell, Miss Willis and Miss Sweeney for positions on the teaching staff, were placed on the application book. Miss Edna G. Powers applied for leave of absence for a year. The superintendent thought that as Miss Powers was not strong it might be granted.

Mr. Russell moved it be granted without pay, which was carried.

Miss A. M. Roach also wished for a year's leave of absence to attend Harvard to study languages. This also was granted without pay. Miss Pauline W. Livingstone wished leave of absence till Oct. 1 on account of her health. This was left in the superintendent's hands.

Rex R. Cormier wrote asking for an increase of salary owing to the opening of a new room in Leinster street school. His present salary is $775, and he wanted it increased to $800. This was referred to the teachers' committee.

The New Brunswick Medical Society wrote enclosing a recommendation adopted at the annual meeting of that body. This was to the effect that a medical examiner be appointed for the schools of the city and county of St. John.

Mr. Coll thought the communication ought to have been sent to the common council. The letter was finally referred to the teachers' committee.

Mrs. Hatheway wrote to the board in connection with the introduction of military training into the Normal school. She had written, she said, several of the clergymen of the city and she wished the board to pass a resolution opposed to the idea.

Mr. Coll pointed out that the board was not officially aware of the matter and the letter was laid on the table for future reference.

The chairman intimated that the finance committee had called on Recorder Skinner in reference to his bill for services in connection with the proceedings against incorrigible truants. The recorder had intimated that he would be willing to accept $50. On motion it was decided to settle with the recorder on that basis.

The matter of salary for Miss Hargrove, which was left over from last meeting, was then taken up. The superintendent said he had made arrangements with her for $225 from the board. This action was confirmed.

Miss Mary A. McInnes

Miss Mary E. McInnes died Monday at her residence, 151 Chesley street. Deceased who was sixty-eight years old had been ailing for about three months. The immediate cause of death was old age. Miss McInnes was well known in the section of the city in which she lived and will be sincerely missed. She is survived by a sister, Miss Jane McInnes; three nieces, Mrs. Simon McCormick, and the Misses Mary and Jennie McInnes all of this city; and one nephew, Malcolm McInnes also of St. John.

BOARD OF TRADE

Conference With Head of Maritime Board Re-Withdrawal — General Matters

The first quarterly meeting of the board of trade for the season, which was held yesterday afternoon, was slimly attended, there being only nine present. There were five new members elected as follows: Hilyard Bros., Tilley & Fairweather, J. C. McIntosh & Co., W. A. Munro and Charles Robinson, manager for Anderson & Co.

W. E. Foster, the president, occupied the chair. The secretary, W. E. Anderson, read the minutes of the meeting of June 3rd and a summary of the proceedings of the council for six months, which were approved.

Mr. Foster announced that the government had decided to give a subsidy of $10,000 to the Magdalen Islands steamship company and he had no doubt the service would be of great value to the south shore. Referring to the action of the delegates at the meeting of the maritime board of trade, he said that they had simply carried out their instructions in announcing the withdrawal of the St. John board from the organization. It might be, he continued, that after they had held a conference with W. E. Snowball, the president, they might decide not to withdraw altogether. He wished to make it clear that all the St. John people desired was to reform the board and that their action was not prompted by any jealousy. Nothing definite had yet been done, he continued, with regard to the transfer of the harbor lots to the C. P. R. and he hoped that the fullest publicity would be given to the agreement.

E. A. Schofield called attention to the importance of the British commission appointed to consider the West India trade. The merchants of this city, he thought, had not taken as much interest in the matter as they should have. Every one of the commissioners were, he pointed out, men of high standing. He had a letter from Sir Edward Morris, one of their number, who expected St. John to come to the front. Halifax was at the present time, he thought, undoubtedly the chief exporting centre for the trade, but he hoped St. John would have a direct line to the West Indies before a great many years. He hoped that when the British commissioners come here there would be a large representation to meet them.

C. W. Brown next spoke of the desirability of having a telephone line from Cape Spencer to Point Prim. He introduced a motion that the secretary be instructed to communicate with the New Brunswick telephone company on the matter, which was carried.

W. F. Burditt suggested that in view of the slimness of the meeting and of the fact that there were many subjects which ought to be widely discussed a general meeting should be called in October. He moved that such a meeting be held at the call of the chair. This was carried and the meeting adjourned.

HARRIMAN'S SUCCESSORS

New York, Sept. 13—The continuance, temporarily at least, of the Harriman policies in the management of Union Pacific, Southern Pacific and the chain of allied railroads, was made certain today when Robert S. Lovett, E. H. Harriman's personal counsel and close friend, was elected to succeed him as the head of the executive committee of the Union Pacific railroad. To further strengthen the dominance of the "Harriman idea," Jacob H. Schiff and William Rockefeiler—both heavily interested in the Harriman enterprises—were elected directors in place of Mr. Harriman and the late H. H. Rogers, respectively, and were also chosen to places on the executive committee.

The Union Pacific still remains without a president, as Mr. Harriman occupied this position also. It is understood, however, that an operating man—probably L. F. Loree, president of the Delaware & Hudson—will be elected for the place at the annual meeting of the stockholders to be held on Oct. 12.

PARIS WALYING FROCK WITH HUSSAR HAT.

For early autumn wear the Moyen-age models will continue to be the favorites, and many smart little frocks along these lines are seen both here and in Paris. This is a serge trotteur model in the new bronze olive shade which is having a special vogue among the Rue de la Paix dressmakers just now. The longwaisted cuirass is emphasized by lengthwise patterns in braiding, and a fringe effect produced with the braiding increases the suggestion of length. The hat is one of the new hussar turbans, with a high velvet crown rising from a brim of strip beaver.

THE FREDERICTON EXHIBITION

Fredericton, N. B., Sept. 13.—What promises to be the greatest exhibition this city has ever seen will be formally opened by Lieutenant Governor Tweedie at 8 o'clock tomorrow evening. Splendid progress was made today with the work of installing exhibits and getting things in shape for the opening. Considerable yet remains to be done, but Secretary Hooper is confident that by sundown tomorrow evening everything will be in readiness. The number of entries in various departments now totals 3,500, which is almost double the number received for the successful exhibition held here two years ago. If the exhibits of stock, agricultural produce, poultry and fruit already here can be accepted as a criterion of what is to come, visitors to Fredericton during the next ten days will see something that will cause them to sit and take notice. The directors who have labored hard for weeks past to make the exhibition one creditable to the city and province are greatly delighted with the outlook and feel assured that only fine weather is needed to ensure complete success. Visitors are already arriving in big numbers and the streets here this evening present a lively appearance. Hotels have made arrangements to accommodate many guests and at the information bureau at Staples' drug store, York street, hundreds of names have been collected of citizens willing to take care of two or more persons. As in former years it is felt that there will be ample accommodation for all visitors.

On Wednesday the Canadian Pacific Railway will run special excursions from St. John, St. Stephen, St. Andrews, McAdam, Green Road, Plaster Rock, Edmundston and intermediate points good to return until Saturday. The fare from St. John will be $1.60; St. Andrews, $2.25 and Newburg Junction $1.45, with corresponding reductions for other points.

R. A. Snowball's exhibit of shorthorn cattle, sheep and agricultural produce arrived from Chatham this evening. A special train with live stock belonging to Walter McMonagle, Sussex, and others will arrive at an early hour tomorrow morning by way of the I. C. R. A number of exhibits from points north arrived this evening by Gibson branch.

A splendid collection of N. B. minerals will be installed today in the main building by Dr. L. W. Ballie. It consists of specimens of oil shale, manganese, iron ore, gypsum, granite, antimony, plaster, copper, marble and coal.

The mayor and city council and other representative citizens have been invited to occupy seats on the platform in amusement hall during the opening ceremony. The speakers will be Governor Tweedie, Premier Hazen, President Campbell and others. Immediately after opening Prof. Broadwick will make a balloon ascension from the centre of the show ring. He will go a distance of 4,000 feet and descend by parachute, exploding fireworks during the return to earth. Prof. Chadwick's seven-year-old daughter will make ascensions every afternoon during the progress of the show.

WALKED STREET IN LADY GODIVA GOWN

Wearing only a smile, a woman strolled through Third avenue, New York, at 4 o'clock Monday morning. By the time she reached 107th street more than forty men were following, uncertain what to do in the emergency. She was clearly asleep. The men doubted the propriety of allowing her to continue through the chilly atmosphere, but they had no clothes to offer her if they stopped her.

Policeman Donohue of East 104th street station, came along just as the woman burst in song. He blushed furiously and was as much rattled over the situation as the others. His salvaton came in the form of a friend who had been celebrating Labor day in the country and wore a light coat.

Taking off the coat, Donohue ran up to the sleepwalker and wrapped it around her. He then noticed she had a small piece of veil about her neck. As he took her to the station his friend trailed along to get back his coat, and the others followed through curiosity.

In the station the woman had become wide awake. She said she was Albertina Pots, 43 years old, of No. 185 East 109th street, a widow. She has long been addicted to sleep-walking, and earlier in the evening she was taken home by a friend who found her walking the streets. Dr. Mosher took her to the Harlem hospital.

WORK IN THE SCHOOLS

(Toronto News)

The Ontario Education Department recognizes that the introduction of industrial and agricultural instruction in the common schools might easily be carried too far. The New York Post opposes those people who would reorganize the elementary school system so as to substitute soil-chemestry and dairying for geography and spelling. The average farmer lad does not suffer from over-profiicency in the latter branches. The Post says: "The average of culture is not so high in our country districts that we can afford voluntarily to reduce it—this aside from the common truth that a general education pays for itself by increased practical efficiency in any occupation. American agriculture, it is quite true, is in need of being placed on a higher scientific basis. But such higher knowledge must radiate from our agricultural colleges, our experiment stations, and our various government enterprises. Transforming the little red schoolhouse into a farmers' institute for boys, would be to make the agriculturist's last condition worse than his first." At the same time, it should be possible for teachers in rural districts to inspire in their pupils a fresh interest in agriculture and country life to the end that the stampede to the cities may be checked.

IN TRAINING

Kitty—I hear that Grace is learning pole vaulting. I suppose she will soon be quite a jumper.

Peggy—Yes, she is preparing to jump at the first young man who has the nerve to propose.

MORNING LOCALS

In regard to the salvage corps companies responding to the new I. C. R. fire alarm boxes, No. 2 company will respond to box 152, Mill street, and No. 1 also on a second alarm. No. 1 company will respond to box 422, I. C. R. round house, and No. 2 company to No. 3 engine house to cover other boxes.

At last night's meeting of No. 2 Salvage Corps the resignation of W. A. McIntyre as foreman was accepted, and F. H. Elliot was elected in his place. G. A. Profit and A. W. Stephens were received as members.

About fifty people from here are expected to attend the N. B. and P. E. I. S. S. convention in Chatham on October 20, 22. The topics to be discussed will be of value to teachers and Sunday school workers.

Charles Baillie, the King street tobacconist, secured three fine trout in Lily Lake last night. Two weighed fourteen ounces. They attracted much attention in the window of White's restaurant.

The price of pork jumped 50 cents a barrel yesterday, an advance which dealers attribute to the scarcity of hogs. Lard is now selling for 16 cents by the pail.

The Y. M. A. of Exmouth street church will hold a fair for four nights, beginning on October 26. A turkey supper will be given on the 28th.

About thirty guests enjoyed a dinner and dance given at the golf club last night by C. F. Inches, Wm. Vassie and Hugh McKay in honor of the wedding of Miss Constance Inches to W. H. Harrison.

St. Vincent's Alumni will hold an entertainment in aid of the convent library on Sept. 29, in St. Malachi's hall.

A social was held by the young people of St. John's Presbyterian church last night in honor of Wm. Irwin, who will leave for Dalhousie University tonight. He will enter the ministry.

No inquest was deemed necessary into the death of Michael Burke, and permission has been given for his burial.

At a meeting of the home mission committee of the St. John Presbytery, held last evening, arrangements were made for a tour through Charlotte county and along the St. John river for Rev. Simon Fraser, returned missionary from Trinidad. On Wednesday evening Rev. Mr. Fraser will address a united meeting in St. Stephen's church.

Mrs. Frances E. Lunn

Centreville, Sept. 13—A gloom has been cast over the village by the death on Thursday last, of Mrs. Frances E. Lunn, widow of Dr. Chas. W. Lunn. She underwent a severe operation some time ago and was thought to be doing fairly well, when heart failure set in and she passed away, aged 48 years, leaving three sons and one daughter and three brothers.

The funeral was on Saturday and was largely attended. It was conducted by Rev. R. W. Ferguson, assisted by Rev. H. R. McGill and Rev. Geo. Ayres. Mrs. Lunn will be much missed, having taken a prominent part in church and social interests. The magnificent flowers sent testified to the general esteem in which she was held.

DON'T MISS THIS

Ladies who are in need of a Coat or Suit should get here.

50 Ladies' Coats in travelers' samples to sell at manufacturers' prices, from *$5.00* to *$30.00.*

Get More Out of Your Coal

You know that perfect combustion depends upon a thorough mixture of air with the gases evolved from the burning fuel. You know that this perfect mixture rarely, if ever, occurs in your furnace, because there is always more or less ash and clinker on the grate bars to effect the air supply. As proof of this note the ease with which a steam boiler can be kept up to pressure just after the fire is cleaned and the gradual increase in the consumption of coal as the ash and clinker collect on the grate bars. You know also that imperfect combustion means extra fuel—coal wasted—money thrown away. Then why not install

Cyclone Shaking and Dumping Grate Bars

With them the fire can be cleaned in a few seconds without waste of fuel or any heat lost whatever. It is child's play to clean fires with these Grate Bars, and they will not only save coal, but they will save labor for the fireman, help prolong the life of your boiler and give increased power if required. They will do still more, they will give you results from fuel that it would be impossible for you to use with ordinary grate bars.
