New York, June 24—Summary— American stocks in London firm especially Harriman group. Bank of England unchanged. American Car and Foundry annual meeting today. Conferenece of Steel presidents resolves to maintain standard rails at $28 a ton. Senaae fixes duties on lumber and coal on reciprocity arrangement with Canada. Further delay in interboro plans for new subway. Reported agreement reached on proposed corporation tax. Lighter business reported in copper market. Iron Age says only moderate business in pig iron, but hardening tendeny in places. Copper stocks in London show strength. Buffalo, Rock and Pitts burg will earn about 43-4 on common this year. Canadian crop outlook continues good, although rain is needed. J. Ogden Armour says his advices from all sections are that crop outlook is highly satisfactory. Stock exchange will close on Saturday preceding Independence day. Dominion government will subsidize between Canada and Mexico on the Pacific. Tweleve industrials advanced 1.26. Two active railroads advanced 1.27.

NEW YORK FINANCIAL BUREAU.

New York, June 24—Some special bull operations against the shorts may be witnessed today. The market is of course relieved of a certain amount of weak margined accounts and rallies easier with pressure lifted. While prices may work up toward former high level ,the trading area limits we doubt whether they will as a rule hold the fullness of recovery. We would therefore maintain neutrality and not refuse long profits on bulging, nor ignor opportunities to make short sales on advances. The most important development for consideration of daily operators and others is the elimination of the supervision from the proposed corporation tax. It is not likely to be objected to under the revised circumstances. The hot weather of late has ben very beneficial to crops in view of the extensive moisture in the ground and it is likely that the outlook has been much improved. It must be admitted that the call for proper margin in the Hughes recommendation had much to do with the drop in the market, but the general technical position is not yet strong enough to induce us to agresively take the bull side again and we believe opportunities are presented on both sides under existing conditions for alert daily operators who maintain a free lance position and art chiefly, by technical and manipulative considerations ignoring news and new stories to a large extent. Press comment is more favorable, but market literature is still divided.

London, 2 p. m.—Cons 84 3-8, Anc 48 3-4, C 80 7-8, A 115 7-8, BO 117 1-2, CO 77 1-8, GW 3 1-8, CA 181 7-8, D 48 3-4, PR 88 3-4, Erie 36 1-8, EF 52 1-4, Ills 147 7-8, KT 39 5-8, NP 151 7-8, Cen 134 1-2, OW 43 1-4, Pa 136 1-4, RG 151 1-8, RI 31 1-4, SR 32 1-4, SP 129 5-8, St 152 7-8, U 193, US 67, USQ 123 3-8, WA PR 56 1-4.

Liverpool—wheat opened 1-8 to 1-4 off, corn quiet, unchanged. 1.30 p. m—Wheat 1-4 to 3-8 up from opening, corn 1-8 up.

Albany—Permission has been formally granted the Erie railroad by the up state public service commission to issue $1,000,000 four per cent general lien bonds.

New York, June 24—The rally which was in progress yesterday at the close promises to go somewhat further today, but I would not get too enthusiastic about the market yet, but would take profits on part of all stocks bought at low levels on any bulges. This rise has been largely due to short covering, and when this is completed the market is apt to sag off again.

THE WINNIPEG WHEAT MARKET.

St. John, N. B., June 23.

The Ogilvie Flour Mills Co., Ltd., supply the following quotations of the Winnipeg wheat market:

June wheat	129 3-8
July wheat	129 3-4
October wheat	107 3-4

CONSUMPTION IS THE CAUSE OF 5,000,000 DEATHS YEARLY

John Burns Presents Valuable Facts at Opening of the Tuberculosis Exposition in London—Some Startling Statistics Showing the Ravages of the Great White Plague.

John Burns, M. P., opened at the Whitechapel Art Gallery the Tuberculosis Exhibition organized by the National Association for the Prevention of Consumption. In a speech full of the most valuable facts, and listened to with rapt attention, he dwelt on the dread effects of the scourge, and on the methods of prevention. Condemning the fetish of the workman's front parlor which he described as "a mausoleum for wax fruits and stuffed birds; a museum sacred to the undertaker and the doctor," he declared that it would add 25 per cent. to the breathing space of every workman's home and much to the comfort of his family, if that fetish was broken up.

"The most useful exhibition I have ever known in the Metropolis. Its object," Mr. Burns went on, "is to attract the serious, the humane, and the patriotic; the patriotic because this is an effort to expel from our shores an enemy subtle, destructive, self-imposed, more deadly than war, more exhausting than battle itself; the humane, because the evils of poverty, of weakness, of misery, are accentuated by the scourge that consumption inflicts upon its victim and sufferers; the serious because consumption wastes our national substance in riotous killing, and in killing many, weakens more and transmits to multitudes the haunting horror of enfeebled after-life."

In the past forty years, said Mr. Burns, tuberculosis had been reduced some 50 per cent. In the past thirty years great advances had been made in the methods of its treatment, but in the past five years the greatest progress of all had been made, mainly through the efforts of public-spirited and devoted doctors and by the education of the people.

'Every year the world loses five millions of people through the scourge of tuberculosis. Remember that figure; every year a London perishes from one disease.

"London alone has 9,176 deaths—more by consumption alone, than we lost of officers and men in the three and a quarter years of the South African War. And here is an extraordinary figure. More deaths occurred in the Metropolis, and more people suffered from this disease, than the total number of soldiers and sailors, officers and men, who have been killed and wounded in 70 wars and expeditions in the six years ending 1903. In a hundred years of European war, with all its horror and all the burden of death and sickness, that Napoleon and others imposed in the last century—all that loss of life is eclipsed by only thre years' bills of mortalities of the old world from consumption and its attendant evils.

PROGRESS IN RECENT YEARS.

"There has been great progress in recent years. Two hundred and forty seven per 100,000 was the deatth-rate. It is now but 115 per 100,000, or 53 per cent. decrease, in forty years. But notwithstanding this improvement, it is still true that one out of every eleven deaths is due to tuberculosis. This drain of human vitality is greatest at the working years of life. Fifty-six of the total deaths from consumption are between the ages of 20 and 45 years—the prime of life, physiologically, economically, and reproductively.

"These terrible death-rates at the working period of life illustrate the need there is for rapid advance to be made. Consumption shortens the life of the working engineer, for instance, by no less than fourteen years. One- seventh of the total friendly society deaths are due to this cause; 20 to 30 per cent. of all deaths in many of the large friendly societies are due to this complaint at ages between 20 and 45. And the effect of it is that we have wages waste, contributions dissipated, homes destroyed to an enormious, almost incalculable extent."

So much for the direct loss through death and sickness. But there was another loss; the indirect loss of widowhood, or orphanhood, the loss of the dependents of the breadwinner. Two-thirds of the consumptive deaths between the ages of 20 and 50 years occurred in London. No wonder that 40 per cent of our total pauperism, in and out-door, was due to the widowhood and orphanhood.

There was no single cause, he continued, for the ravages of consumption. One of the chief causes was social inequality. Generally speaking consumption was the child of poverty, the daughter of ignorance, the offspring of drink, the product of carelessness. In London the death rate from consumption was 132 per 100,000. It was only 78 in happy, prosperous, and healthy Hampstead; but it was 215 in Finsbury.

"It can be fought," Mr. Burns declared, "by many forces in many ways, led by General Wellbeing — higher wages, cheap and better food, better housing, increased sobriety. As pauperism diminishes consumption declines. As food cheapens, tuberculosis disappears."

Mr. Burns condemmed the fetish of the workman's front parlor, which he remembered as a "masoleum for wax fruits, stuffed birds and china dogs, a museum sacred to the landlord, the insurance agent, the undertaker and the doctor.' "If the fetish of the front parlor was broken up," he said, "it would add 25 per cent, at least to the breathing space of every workman's home, comfort and happiness to the women and children, and more geniality to father's tea.

He advocated strenuously the abolition of the "comforter," or "soother," for babies. "I would endure the charge of being a bureaucrat," said Mr. Burns, "with pleasure and equanimity if with one order I could make the 'comforter' a public nuisance, and schedule it as a dangerous instrument for the children of our towns and cities."

"A good kitchen," he observed, "is the best pharmacy; a good table is the best doctor and cleanliness is the best cook."

HOW TO INSURE THAT THE SUPPLY OF MILK IS PURE

In the De Laval Monthly, a dairying publication, is a description of the Brookside Farms Dairy, which should be of interest to all who are concerned in the problem of securing pure milk. This dairy supplies milk as pure as it is humanly possible to get it, but if it were not located within easy distance of its market in New York, its owners would long since have been put out of business, for only in one of the largest cities in the world could customers be found in sufficient numbers to pay 20c. a quart for milk, and 72c. a quart for cream, when the ordinary prices are 8c. and 40c. respectively. Purity and cleanliness cost a lot of money.

Milk produced by the average farm dairy contains from 1,000,000 to 5,000,000 bacteria per cubic centimetre. Not long ago the City of Boston endeavored to pass a law prohibiting the sale of milk containing more than 500,000 bacteria per cubic centimetre, but abandoned the attempt when it found that even this standard would result in a local milk famine. Milk certified as pure by the medical commissioners in the large cities yields 30,000 bacteria per cubic centimetre; but the milk from the Brookside Dairy averages about 22. Thirty per cent. of the samples analyzed last year showed no trace of bacteria whatever. What purity means in the keeping qualities of milk is indicated by a test vouched for by the Milk Commission of the Medical Society of New York. On February 3rd a quart of Brookside milk bottled on January 28th was opened, and the contents partly used. It was then recapped and left standing for the rest of the day in a warm room. Later, it was put in a refrigerator, opened again in twenty days, and found to be still sweet. On another occasion a bottle of this milk, kept on ice for forty-three days, was found to be absolutely sweet.

If a cow is healthy, it may be taken for granted that the milk is absolutely pure as it comes from her udder; the problem is, therefore, to keep it free from contamination from the moment it leaves her body until it reaches the consumer. Dust is the great contaminator, and it is dust upon which the clean dairyman makes war. The walls and ceiling of the Brookside milking barn are lined with enameled sheathing; the floor is of cement, laid on a layer of pitch and tar, and all the interior fittings are of metal. Two complete flushing systems make the work of watering the cows and removing the offal easy. Planer shavings are used for bedding, as being less dusty than straw. Every three weeks all the long hair on the cows' udders and flanks is clipped short, so that the animals can be more thoroughly cleaned. They are groomed twice a day, at 4 a. m. and 2 p. m., an hour and a half being consumed in each operation.

The modus operandi is thus described: First, each cow is curried and brushed; second, all soiled spots are washed off each animal with a 2 per cent. solution of disinfectant; third, each cow is dampened all over with pure water; fourth, each animal's tail is washed with the disinfectant solution; fifth, each cow's udder is washed with pure water; sixth, all udders are washed with a mild disinfectant; seventh, udders are rewashed with sterilized water; eight, each cow's udder is dried with a clean sterilized towel for each animal. Following this, all the doors and windows of the barn are closed tight, and the walls, ceiling and everything inside is thoroughly sprayed with a hose, so as to make it utterly impossible for a single particle of dust to be floating about."

The cows being ready, the milkers prepare for the ordeal by taking a wash, and clothing themselves in white duck suits and caps, which have been washed and sterilized since last used. They are supplied with sterilized stools and pails, the latter being covered with sterilized cloth. Then they proceed to the sterilized barn; and as they enter they are not allowed to use their sterilized hands on the sterilized door, but must employ their sterilized elbow. The first few drops of milk from each cow are milked into a separate receptacle, because they are usually infected with bacteria that enter through the teats. The milk once taken from the cow, there ensues a long and complicated process of straining, cooling and bottling; to the end that milk that came clean from the stable is clean when sealed in sterilized bottles for consumers.

Twice a year the herd is examined for any taint of tuberculosis, and a doctor looks as closely after the health of the milkers as the veterinary surgeon does to the condition of the cows. When a new animal is bought, it is kept isolated for a month, and is watched for any symptoms of tuberculosis. Should any suspicion arise, a cow is banished from the barn at once. The cattle are all grades, Guernseys and Jerseys, and are far from being champion milkers. They cost from $75 to $100 each, so that when any of them is condemned the dairy does not suffer the financial loss that the death of a pure-bred, heavy milking cow, costing perhaps four or five times as much, would entail. Not the cow, but the purity of the milk, is the object upon which all energies are directed at the Brookside Farms Dairy; and its success conveys a lesson to both dairymen and milk consumers.

Mr. and Mrs. George Andrews arrived yesterday from Panama, where Mr. Andrews is engaged in work on the canal. Mrs. Andrews was formerly Miss Ella Holder, of the North End. They will spend three weeks in the city.

AMUSEMENTS

NEW MUSICAL FEATURES AT THE NICKEL TODAY

For the remainder of the week Nickel patrons will be regaled with still more popular musical comedy bits by Holmes and Buchanan, who increased their hit again last evening before large and delighted crowds. The new bill by this talented pair will be two duets, the first of which is to be a distinct novelty. The Telephone Duet "I Won't Be Home to Dinner," from Gus. Edwards' musical farce The Merry-Go-Round, and the other a conversational number "Smile On Me," from the comedy Miss Pocohontas. Both these are brand new to St. John and will cause a flurry of excitement for their extreme "New Yorkiness."

Miss Jennie Evans has a cute little summer number, "A Night, A Girl, A Moon," and the orchestra has fresh selections. This radical change in the Nickel's list of features is calculated to assure a continuation of the large patronage of the week so far. The pictures are: Shakespeare's "The Tempest" by the Clarendon Co. of England; "A Romance of a Lion Tamer," "A Soldier's Heart" and "Alphonse Gets in Wrong." The children are notified that Holmes and Buchanan have a big novelty for them on Saturday.

THE CIRCUS NEXT WEEK

Collier & Co. has organized a trained animal show that will prove a rare delight for the "little ones." The wonderful and almost human intelligence displayed by the trained dogs and ponies will leave an impression of interest on their minds that even time cannot efface, to say nothing of the merry antics of a troupe of clowns in amusing buffoonery, especially engaged to interest and amuse the children.

Collier & Co. will give performances in the Victoria rink for a week, commencing next Monday night.

INTERESTING ITEMS

Most laundries do average work and thousands are content, but Ungar's is a superior way and the people are delighted. 'Tel. 58.

Great bargains in trimmed and untrimmed millinery at C. K. Cameron & Co., 77 King street.

A tickling or dry cough can be quickly loosened with Dr. Shop's Cough Remedy. No opium, no chloroform, nothing unsafe or harsh. Sold by all Druggists.

New Lace Nett Shirtswaists for wearing with jumper dressess just to hand. Stylish and moderate in price. London House, Charlotte street.

Economy headquarters at the North End is the place to save money on your clothes' purchase. C. B. Pidgeon's is the place for genuine bargains. 6-24-li.

ANOTHER SALE OF HATS AND FLOWERS AT M. R. A.'S.

Commencing tomorrow morning another sensational offering of Fashionable Summer Hats for ladies', misses and children, and trimmed hats at nominal prices; also wonderful bargains in artificial flowers. Purchasing now will allow ample time for trimming in preparation for the holiday. All should come as the usual saving surprises will prevail. No approval or exelevator to second floor.

Dr. T. H. Lunney and Victor Lunney arrived home yesterday on the Montreal express after a trip to Germany, Belgium, France, Scotland, England and Ireland. They visited all the principal points of interest and returned via Montreal.

SOME RELICS OF CHILD TORTURE

London, June 22—At the office of the National Society for the Prevention of Cruelty to Children one of the most treasured possessions is the following account:—

For hemming a duster .. .. 2d.
For having a broken arm set .. 6d.
For having a tooth out .. .. .. 2d.
For taking medicine.. .. .. 1d.
For being good on a wet day .. 2d.

It was sent in by a small member of the League of Pity, one of the 18,000 children who save up their pennies to help other little ones. All that this generous mite "earned" was put down on its collecting card and forwarded to the society.

TORTURE INTRUMENTS.

There are other objects of interest at the offices in Leicester Square. There is a case of torture instruments just inside the door. Look well at them. They are not barbarous relics of the Middle Ages. They have all be used on children during the last twenty-five years.

Here are a chain and padlock with which a clergyman was accustomed to fasten his daughter to a bedstead, like a dog. Here is a leather belt with a brass buckle, used by a mother to beat her children of nine and five, leaving the imprint of the buckle on their tender flesh. That stove rake was the means of correction employed in the case of a girl of fifteen; who was found with cuts and bruises all over her body and head. Those sticks were knotted together so that a father could chastise his girl of ten. That clog had nails driven through it so that they would run into the foot of a child which limped painfully about the streets, exciting pity and causing thoughtless people to give alms.

NEED FOR A CHAMPION.

The Society for the Prevention of Cruelty to Children is just celebrating its twenty-fifth birthday, and by way of marking the occasion, a tablet was unveiled at the office in memory of its founder, the Rev. Benjamin Waugh, who died last year. His epitaph is noble. "He was," it reads, "the champion of the child."

How badly children needed a champion the record of the society's work shows. In the first year of its existence it inquired into ninety-five cases. In its twenty-fifth year, just ended, it had before it 49,792, affecting 144,234 children. During the quarter of a century it has befriended in all close upon a million and a half of children, and dealt with 700,000 offenders.

Prosecutions sometimes result in gratifying reformations. A young house painter was summoned for striking his little girl viciously. He admitted he had a bad temper, and promised to try to curb it. The magistrate gave him a chance to do so. He was merely bound over. He has so completely altered, that the child, instead of hiding from him now, runs to meet him, and loves to ride on his shoulder.

The members of Sapphire Lodge, No. 37, I. O. O. F., Daughters of Rebekah, will hold a pound social in their hall, Simonds street, this evening at 8 o'clock. All Oddfellows and Rebekahs and their lady and gentlemen friends and others are invited. Ladies are asked to bring a pound.

PILES

DR. CHASE'S OINTMENT.

WEDDINGS

Baxter-Reid

A very interesting event took place last night at 8.30 at the residence of the officiating clergyman, Rev. Gideon Swim, 116 Waterloo street, when Herbert Vernon Baxter, of this city, was married to Miss Annie J. Reid, of Young's Cove, Queens county. There were no attendants. The bride was becomingly costumed in white.

Hoeffler-Smith

A pretty wedding was solemnized yesterday in Smithtown, when Miss Jennie L. Smith was married to Dr. John Conrad Hoeffler, of Buffalo (N. Y.) The ceremony was performed at 5 o'clock by Rev. Herbert Whalley. After the ceremony the young couple left for St. John. They will spend their honeymoon in a trip through the maritime provinces, after which they will go to Salamanca (N. Y.), where Dr. Hoeffler practices.

Harrington-Kilpatrick

The marriage of Miss Lillian May Kilpatrick, youngest daughter of Sergeant and Mrs. Henry Kilpatrick, to Leonard Charles Harrington, of Milledgeville, took place last evening at the home of the bride's parents, 479 Main street. The ceremony was performed by Rev. J. E. Purdie, curate of St. Luke's church. The bride was becomingly attired in a beautiful costume of white silk. She was given away by her father. Only close friends and relatives were present, and after the ceremony a tempting wedding repast was served. The young couple received many useful and beautiful tokens of esteem from many friends. They will reside in Belleyue avenue, Pokiok.

Francombe-Foster

A pretty wedding was celebrated at 170 Adelaide street last evening at 8.15 o'clock when Rev. B. H. Nobles united in marriage Lizzie Gertrude Foster and Arthur Francombe. The bride was attended by Miss Jennie Adams, while Samuel Francombe supported the groom. Among the large number of wedding gifts was a handsome lamp from the McAlary Grocery Co., where the groom is employed. After the ceremony supper was served. Mr. and Mrs. Francombe will reside at 170 Adelaide street.

Ward-Harris

Moncton, N. B., June 23—(Special)—The First Baptist church was the scene of a pretty wedding at 1 o'clock this afternoon, when Miss Jennie G. Harris, daughter of Charles J. Harris, was united in marriage to Isaiah D. Ward, Sunny Brae. The ceremony was performed by Rev. F. S. Bamford, pastor of the Lewisville Baptist church, in the presence of a large number of friends. The bride was attended by Miss Ethel Wood, while the groom was supported by Geo. B. Harris, brother of the bride. Mr. and Mrs. Ward left on the C. P. R. on a wedding trip to Boston and New York.

Carpenter-Crandall

The residence of Mr. and Mrs. W. E. Nobles, 240 Little street, Edmonton, Alberta, was the scene of a happy event on Tuesday, June 15, when Arthur Gladstone Carpenter, son of Isaac W. Carpenter, for many years member for Queens county (N. B.), in the provincial legislature, was united in marriage to Hazel Claudia Crandall, second daughter of Elmer E. Crandall, of Chipman (N. B.), and granddaughter of Senator G. G. King.

The ceremony was performed by Rev. F. W. Paterson, pastor of the First Baptist church, Edmonton. Mr. and Mrs. Carpenter will reside in Edmonton.

Livingstone-Lennox

Rexton, N. B., June 23.—A very pretty and interesting wedding took place here yesterday morning, at the home of Mr. and Mrs. Alex. Lennox, when their niece, Miss Pauline Slater Lennox, was united in marriage to John W. Livingstone, bookkeeper for R. C. Tait at Shediac. The bride, who is one of our most popular young ladies, is well known in musical circles, having occupied the position of organist in St. Andrew's church for some years. She is also a leading soprano. The house was prettily decorated for the occasion with cut flowers and potted plants and in the parlor, where the ceremony was performed, was a beautiful arch of snowballs and lilacs, under which the bridal party stood while Rev. A. D. Archibald tied the nuptial knot. The bride looked charming in her traveling suit of blue with hat to match and entered the parlor leaning on the arm of her uncle, who gave her away, while Miss Nellie Clark most acceptably rendered the wedding march. A large number of guests were present and immediately after the ceremony sat down to the wedding breakfast. The happy couple took the 10 o'clock train for a tour to P. E. Island. A large number of friends accompanied them to the station, showering rice and good wishes. Mr. and Mrs. Livingstone will reside at Shediac.

Charters-Pettingell

At 3.30 o'clock yesterday afternoon in the Baptist church at Gondola Point a wedding of more than local interest took place when Miss May, youngest daughter of George Pettingell, of that place, was united in marriage to Alvin Leslie Charters, of St. Marys, York county. The church was prettily trimmed with flowers, the altar being one solid bank of white snowballs. The bridal party stood under a large floral arch. The friends of the contracting parties completely filled the church.

The bride was beautifully attired in a handsome costume of white silk. She wore a veil and orange blossoms and carried a large bouquet of white carnations. The bridesmaid was Miss Louise Pettingell, sister of the bride, who was also attired in white silk with hat to match and carried a bouquet of pink carnations. There were also two little flower girls, Miss Edith Kierstead and Miss Jean Morrison. The groom was supported by his brother, Louis Charters, of Fredericton.

The ceremony was performed by Rev. J. W. Kierstead, of this city, assisted by Rev. Miles McCutcheon,of Gondola Point. After the ceremony more than forty guests assembled at the home of the bride's father, where a dinner was served and congratulations were showered on the happy couple. The bride received many beautiful and useful presents, including two substantial checks. From the groom she received a gold locket. The groom's present to the bridesmaid was a gold brooch. The young couple will leave today on a wedding tour of the province. They will reside in Fredericton.

Dooley-Irvine

A very pretty wedding occurred on Monday, June 7, at St. Lawrences' church, Brookline, Mass., when W. M. Dooley, late of the Telegraph and Times, St. John, was married to Miss Maude Irvine, daughter of S. C. Irvine, late of His Majesty's forces, Bermuda. The ceremony was performed by the Rev. Fr. McManus, and amid showers of confetti the happy couple were driven to the station, where a train for Halifax was taken, in which city the honeymoon was spent.
