

# White Blood Corpuscles and Disease Germs

Scientists have been learning more and more about the white blood corpuscles and our dependence on them for health and strength.

They are everlastingly fighting for us, to protect our red blood corpuscles and bodily tissues. And the healthier and stronger we keep, them the better they fight.

Many thousands more would be victims yearly of infectious and contagious diseases if the white corpuscles in their blood were not in fighting condition. It is only when these corpuscles are healthy that they can protect the red corpuscles and the bodily tissues from the germs and toxins or poisons of these diseases, which invade the system through the air we breathe, the water we drink, the food we eat, and otherwise.

### Eighty Steamships Have Filed Their Outward Manifests at the Customs House—Grain Export Largest in the History of the Port

Up to date eighty steamships have filed their outward manifests at the customs house. The valuations of exports is now over the seventeen million mark. It looks now as if this year's figures would exceed those of last year, which amounted to over twenty-three millions.

The grain shipments this season will be the largest in the port's history, and the shipment of United States products will be away ahead of any previous year. The following statement will give the name of the steamer and the valuation of each cargo.
