toms at Liverpool, in part of Duties Collected by him at that Port in 1828, under the Acts of Parliament, amounting to 144*l.* 10 7¾.

In which statement there is an error of 20s. in favor of the Province.

It does not appear that the late Deputy Treasurer B. M. Goldsmith, Esq, has paid over or accounted for any part of the balance of 653*l.* 10 3¾, reported to be due the Province by him by the Committee of last year, neither does he appear to have accounted for the balance of 103*l.* 5 10, also reported to have been due to the fund for the relief of sick and disabled Seamen.

No. 36. Is the account current of the Deputy Treasurer at Chediac between the 1st January and 20th October, 1828, shewing a balance in his hands at that date of 116*l.* 10 11, accompanying this is an account of the ordinary Duties collected and secured at Chediac, amounting to 49*l.* 6 4. He gives no list of Bonds.

The Committee do not find any returns of Duties on goods sold at Auction throughout the Province, during the last year; and they recommend that the Treasurer, as well as the Deputy Treasurers, be directed to call on the Auctioneers, in their respective districts, and to require them to furnish a statement of the amount of Duties on Goods sold by them at Auction, respectively, and not previously accounted for.

All the foregoing accounts appear to be correct except where particularly noticed in this Report.

All which is respectively submitted to this Honorable House.

W. Crane,
John Ward, Jun.
Thomas Barlow,
W. Taylor,
Alex. Rankin.

TUESDAY, 20th January.

Read a third time, as engrossed, a Bill in amendment of the several Acts for establishing Grammar Schools.

Mr. Ketchum moved for leave to bring in a Bill in amendment of an Act for the relief of confined Debtors; and the said Bill being brought in, was read a first time.

Mr. Partelow in the Chair of the Committee.

The Chairman from the committee, reported that having gone into the further consideration of Supplies to be granted for the Public Service, they had passed several Resolutions, which he read, and they being again read at the Clerk's Table, were agreed to by the House, and are as follow:

Resolved, that there be granted to His Excellency the Lieutenant-Governor, a sum not exceeding 200*l.* for the purpose of assisting aged and distressed Indians, in the different Counties of the Province. To William H. Lyon, a settler on the Great Road leading from Fredericton to St. John, and at the junction of the road through Gagetown to Nerepis, to reimburse him in part for services rendered to poor travellers and distressed emigrants, the sum of 20*l.* To Matthew Brannan, a Clerk in the Secretary's Office, the sum of 15*l.* as a mark of approbation of his uniform obliging conduct and courteous demeanour, in attending to the Duties of the office, and his unwearied attention in giving every information in his power to persons who have occasion to attend to the said office. That the sum of £—, be granted to His Excellency the Lieutenant-Governor, or Commander-in-Chief, in aid of paying a Missionary for the instruction of the Indians, provided the said Missionary be approved of by the Lieutenant-Governor, or Commander-in-Chief of this Province.

And upon the question for sustaining the Resolution, the Committee divided—

YEAS.—Messrs. Speaker, Parker, Palmer, Allan, Ketchum, M'Kay, Ward, Clinch, Wyer, Munro, Campbell.

NAYS.—Messrs. Barlow, Humbert, Crane, Scott, Weldon, Harrison, Gilbert, Taylor, Freeze, Rankin, Dow

And the Chairman decided in the affirmative.

And upon the question for filling up the blank with 25*l.* the Committee divided—Yeas 12, Nays 10. And it was carried in the affirmative.

To the High Sheriff of Queens County, the sum of £25, for executing a Writ of Election and returning a Member to serve in General Assembly. To James Whitney and others, the sum of £150, to enable them to run a good and sufficient Steam Boat between Annapolis, Digby, and St. John, for seven months, and a good and sufficient vessel for the remainder of the year, provided the said Proprietors carry the Mail, if required, without any additional charge; the said sum of money to be drawn when it shall be proved to the satisfaction of His Excellency the Lieutenant Governor, or Commander-in-Chief, that the services have been performed. To the joint Committee of the Council and House of Assembly, appointed to inquire and report on the subject of a Penitentary, the sum of £50, to defray the expense of printing the Report and other incidental charges, and also to enable them to procure any plans and documents which they may deem necessary for the information of the Legislature. That the sum of £25, granted in 1828, to the late Robert Reid, formerly High Sheriff of Northumberland, be re-appropriated and granted to Agnes Reid, widow of the late Mr. Reid, to relieve her in her present distressed situation. To His Excellency the Lieutenant-Governor, the sum of £75, for the services of a Tide Waiter at Miramichi, for the year 1829. To His Excellency the Lieutenant-Governor, or Commander-in-Chief, a sum not exceeding £50, to defray the necessary expense of repairs required on the Buildings adjoining the Province Hall, and of painting the Supreme Court Room.

And the Chairman further reported that he was directed to ask leave to sit again.

Ordered, that the Report be accepted and leave granted

Mr. Humbert moved the following Resolution.

"Whereas upon consideration of the petition of Daniel Green, complaining of injuries sustained by reason of imprisonment on a Warrant from the late Solicitor General.

"Resolved, that the High Sheriff of King's County, be summoned forthwith to appear at the Bar of this House, to give such evidence as may be required of him, touching the said Petition."

To which Resolution the following amendment was moved by Mr. Parker.

"Whereas it appears to this House that the injury complained of by Daniel Green, may be redressed in the ordinary course of legal proceedings; Thereupon Resolved, that the Petition presented by the said Daniel Green to this House, praying further interference be dismissed."

And upon the question for adopting the amendment, the House divided.

Yeas.—Messrs. Parker, Crane, Freeze Partelow, Barlow, Weldon, Ward, M'Kay Clinch, Wyer, Campbell.

Nays.—Messrs-Humbert Palmer, Scott, Harrison, Gilbert, Taylor, Ketchum, Rankin, Munro, Dow, Allen.

The House having divided equally, the question was then decided from the Chair in the negative.

The question was then put on the original Resolution, whereupon the House again divided.

Yeas.—Messrs. Humbert, Scott, Gilbert, Taylor, Ketchum.

Nays.—Messrs. Parker, Crane, Partelow, Barlow, Weldon, Ward, Harrison, M'Kay, Freeze, Clinch Rankin, Wyre Allen, Munro, Dow, Campbell, P lmer,

Which was carried in the negative.

COMMUNICATIONS.

[FOR THE COURIER.]

On the Soil and Products of New-Brunswick.

In my observations lately, on the *Climate* of New-Brunswick, I intimated to you that, should it be agreeable to your readers, I would endeavour to shew, that the soil of this Province is by no means ill adapted for the Agricultural pursuits. Its geographical position on this continent, although, the most northern on the south side of the great Lakes, and of their outlet, the Saint Lawrence; does not prevent the ripening of all grains usually cultivated in North America. Even at the Bay Chaleur, and the Restigouche, the most northern part of the Province, although Indian Corn or Maize, which requires a continuance of warm weather, will not always succeed; yet, wheat rarely fails,—it is more frequently destroyed by rust, than by frost. The higher settlements of the River Saint John, above the Grand Falls, are also unfavourable for Maize; but wheat is raised there in sufficient quantity to furnish a sufficient supply to Fredericton and its neighbourhood.

Southward of these parts, in the Parishes of Kent, Wakefield and Woodstock, the extraordinary fertility of the upland, has encouraged the settler to cultivate wheat, as extensively as any other grain; and with such success, as to raise more than they consume. On some new lands, the produce has been very great.—The usual returns are 20, and 24 bushels to the acre.

The rich intervale land within the Parishes of Maugerville, Sheffield and Waterborough, produces yearly, extensive crops of Maize, so productive indeed as to have yielded, in some instances, 80 bushels to the acre. These must be understood as extraordinary cases; but, they furnish a specimen of what might be expected, under the best modes of husbandry. The usual crop, is, from 25 to 40 bushels per acre.—This fertile tract is the largest extent of intervale in the Province. It is a continued level for more than twenty miles, along the river, on its eastern side, and the greatest part of its soil is alluvial, when sown with grasses, it will produce three tons of hay to an acre. The soil of the large islands, situated in the river, adjacent to these places, are of similar composition and yield corresponding crops.

Intervale lands, which constitute a soil, inferior only to those of Marsh, being formed from the deposition of rich sediment by the annual overflowing of the rivers, in the spring of the year occur, in almost every part of the Province, on the banks of its rivers and brooks.

The most extensive tracts of interval land besides these already named, are on the banks of the River Saint John; consisting of beautiful islands, and strips of land along its whole course, frequently more than a mile in length.—A few miles above Fredericton, there is a group of Islands, containing upwards of 1900 acres.—The Miramichi river, on both its branches, but chiefly the south western one, is enriched, with this soil:—As also the fine settlement of Sussex Vale, on the Kennebeckasis river, where it separates into three branches.

The sea marsh of the Province deserves especial notice, as being the most fertile of any of its soils. The largest tract is situated in the County of Westmorland, at the head of the Bay of Fundy. Some thousands of acres of it, are there defended by Dykes against the sea, and are in a state of high cultivation. This County in consequence, has great advantages as an Agricultural district, and has long been noted for its excellent butter and cheese, as well as for its cattle, which are of a superior kind.

This general view of the good lands within the Province, exhibits a very favorable picture: but it is by no means exaggerated. The interior of the adjoining State of Maine, which is in the same latitude, and the lands of which are of a similar kind, are stated, from particular enquiry to afford much higher results, than those which I have mentioned. The wheat, on lands, not even of prime quality, are said to yield, on an average, thirty three bushels of wheat to an acre.

THERMOS.

[FOR THE COURIER.]

Sketches relative to the Boundary Line.

Mr. EDITOR,—As every thing connected with the North Eastern Boundary (so called) between the United States and the British territories is, at this period of suspense, interesting to the subjects of both Governments, I shall crave a small portion of your columns to give a short description of that section of the Province adjacent to the Line; and also to the tract in dispute, at present under British jurisdiction and occupied chiefly by British subjects.

The settlement of Houlton, being nearly at the extremity of the undisputed Territory of the United States, claims our first notice; not only from its proximity to the British Line, but likewise as being near to the British settlement on the western side of the river Saint John;—it is, besides, the only settlement, of any consequence, on the line of the Northeastern Boundary, owned, or claimed by the United States.

This settlement touches the British Line, at a distance of nearly twelve miles from the river St. John, and lies nearly parallel with the Parish of Woodstock, on the right bank of the river, at about ten miles distance; being about twenty-two miles from Fredericton, the capital of New-Brunswick. It was formed about twenty years ago, by a Mr. Houlton, (whose name it bears) a citizen of the United States; and is, at present, a flourishing Village; having several new settlements adjoining it, among which are, Hudson, Foxcraft, Limerick, Keswick, &c. The major part of the inhabitants of Houlton, which is the parent settlement, are subjects of the United States. The other settlements, (with the exception of a few American families,) are chiefly composed of families from New-Brunswick, who, having been involved in debt, have removed to this place with their families, in order to evade the process of the British Laws, and, with the view of commencing the world anew.

Houlton has lately become of importance, having been selected by the American Government for a military post, on the Northeastern Boundary. The sum of fifteen thousand dollars was appropriated last year by the general Government, to be expended in improvements at this point; and troops were employed last summer, in opening a Military road, from the Metawamkeg, (a branch of the Penobscot river,) for the purpose of fortifying it.—The erection of Barracks and other Military works have been already commenced at Houlton, sufficient to accommodate four hundred men.

The site for those works is judiciously chosen, Houlton being the most commanding spot of ground in the neighbourhood, and is only about a mile distant from the Boundary Line.—The height on which the works are placed, completely commands, and overlooks the surrounding country, (with the exception of Parks' Hill on the British side which is about one and a half miles distant.) The surface of the ground declines each way from the works; particularly on the side facing the British territory: the Boundary line passing at this point, through a range of low land, which rises gradually as it recedes from the line; forming a ridge of high land at Houlton on one side, and at Park's Hill on the other. The river Maduxwikik sweeps along the foot of these ridges, and is within view of the barracks.

The Barracks consist of three ranges of buildings, forming three sides of an oblong square. The barracks for the privates consist of four buildings in each range, each 60 feet in length; with a small vacancy between them. They are about twenty-one feet wide, and are one and a half stories high, with dormer windows; so as to admit of two suits of rooms on the garret floor. The officers quarters consist of two buildings of 96 feet in length, and about thirty one feet in breadth, two stories high; the eaves of the building being nearly in a line with the top of the dormer windows in the privates, barracks—there is also a small vacancy between them. The quarters for the privates form the two longest sides of the square, and those for the officers, stretch across and connect them, with the exception of the small vacancies before noticed.—These spaces, with the remaining side of the square, will be inclosed; forming a parade and yard for the use of the troops.—The other buildings consist of some houses which are not yet finished.

Four companies of the 2d Regiment of United States Infantry, are at present quartered at Houlton; consisting of nearly two hundred rank and file, with as yet an inadequate complement of officers: several of these belonging to the companies being absent, attending to other duties. They have a small band of music, and four pieces of artillery brass six pounders, well mounted with substantial travelling carriages. Part of their supplies are procured in Houlton and on the river Saint John, and the remainder from the United States by the way of Bangor:—transported in Batteaux, up the Penobscot, into the Metawamkeg, as far as that stream is navigable: from whence they are conveyed through the wilderness to Houlton by the road before noticed. The distance from the head navigation on the Matawamkeg to the barracks at Holton, is only about twenty-seven miles.

Mars Hill is in view from the works at Houlton at about thirty miles distance. This is the point at which the British Commissioners, under the Treaty of Ghent, place the termination of the direct north line of boundary, from the source of the Saint Croix: being by them supposed to be the height of land contemplated in the Treaty of 1783, and also that referred to in the fifth article of the Treaty of Ghent; at which point the line dividing the Territories of Great-Britain from those of the United States, should take a new direction. From this Hill a succession of High Land commences, stretching to the westward. Mars Hill lies about six miles from the right bank of the River Saint John, and completely overlooks the surrounding country. The view from thence extending, in fair weather, to the Cathardan mountain on the Penobscot. The distance from this Hill to the river Restook is nearly twenty miles. Supposing the line of the Boundary to be prolonged beyond Mars Hill, it crosses that river between three and four miles from its confluence with the St. John.

(To be continued.)

[FOR THE COURIER.]

MR. EDITOR,—Permit me through the medium of your valuable Paper to put a question or two to the Editor of the New Paper—the "New-Brunswick Religious and Literary Journal," touching a sentence contained in the Prospectus, viz:—He says, "*As there is no work of the kind published in the two Provinces, he will not be considered as interfering with any other man's field of labour ! ! !*" Now, let me inform the Editor, that there has been a Magazine, published by the Baptist Society, in this City, for two years past, and is still continued, with a large circulation. Is the Editor of the Religious Journal aware of this? And if he is aware of it, how can he reconcile such an assertion as the above with his conscience? Surely he cannot plead ignorance as to the existence of such a Periodical, of two year's standing. Mr. M'Leod has a right, of course, to issue a Paper of *any stamp* he chooses;—but he should not, in thus issuing a Periodical, assert that the ground is wholly clear, when in fact the ground has been entered upon—and it is to be hoped, some good seed has been deposited, through the medium of the *predecessor* to the Religious Journal.—I cannot but feel sorry that Mr. M'Leod should have made so bold an assertion, when the said Magazine is living to confront him.—And in his Editorial remarks, he affectionately calls on Ministers of *every* denomination to support his undertaking, in the shape of contributions, &c.—This is all well enough;—but if each were to give his *Doctrinal* views, I imagine the columns would exhibit a heterogeneous mass of matter, or a species of *cross-readings.*—I would not be considered as hostile to the effort of the Editor, only I wish TRUTH to stand forth in all its native purity and excellence, and let each periodical stand on its own merits.

CANDOUR.

*Below 0.

The arrival of the December Mail from England on Saturday last, enables us to put our readers in possession of a variety of foreign intelligence:—the dates from London are down to the 6th ult.—The papers, however, furnish us with nothing *decisive* as to the leading matters of public interest, with which our columns have been for some time past occupied.—We are happy to observe that His Majesty's state of health has recently been much improved.—Lord Liverpool died on the 4th. ultimo.

Two ships, on board of which the Emperor Nicholas and the foreign Ambassadors sailed from Varna for Odessa, were overtaken by a violent storm. The Emperor landed at Odessa, after four days of extreme danger. The ship in which the Ambassador was, was totally dismasted.

There was a report that there was to be a congress of the European powers at London or Paris, for the purpose of settling the existing differences.

The town of Bajazet in Asiatic Turkey, has surrendered to the Russian troops, having been abandoned by the Garrison.

The Montreal Herald of January 7th, says,—That, in consequence of the stoppage of ice below the city, the water has been rising over the banks of the St. Lawrence. By noon on monday it had dammed up the creek, so that its waters were forced into the western parts of St. Paul street and the streets that intersect it, and the passengers who wished to proceed dry-footed had to pass along in vehicles. In Griffintown many of the inhabitants were forced to leave their houses in canoes and on horseback, in consequence of the water coming in at their doors. In some instances it rose as high as the windows, and of course extinguished the fires. Their cattle had to make their escape by swimming.

The New College.—Our readers in perusing the extracts from the Journals of the House of Assembly, will have observed, that the public were in doubt with regard to the true construction of the clause of the Charter which refers to the religious test of those persons who are to be eligible to fill the offices of Professors therein; and that an address from the House of Assembly, was sent to His Excellency the Lieutenant-Governor, for the purpose of receiving from him, as Chancellor, information on the subject.—His Excellency's Message on the 19th sets the matter now finally at rest.—This circumstance is matter of congratulation to every liberal minded British subject, whether he belong to the Church of England or not.—So long as we do not violate the Laws of the land, nor infringe upon those of the Constitution, as to *state*-matters, let us *all* as to *Church* matters, have equal rights, and be entitled to equal privileges.

We understand by a late report from Fredericton, that, in consequence of instructions having been received from Government, by the last English Mail, stating, that no Judge of the Province, shall be eligible to fill the situation of President, in the expected absence of the Lieutenant Governor, therefore, it will by right of seniority devolve upon the Honorable William Black.—We cannot help expressing our satisfaction, in this instance, because we know that Mr. Black's extensive commercial transactions, in this Country, have been the means of furnishing him with a thorough acquaintance with its general interests. Such an appointment, we are sure, would be, to the public generally, a satisfactory one.

Masonic Ball.—On Wednesday evening last, the "Brethren of the mystic tye," belonging to Saint John and Union Lodges, gave a splendid Ball in Mason Hall.—The number, and respectability of the Ladies and gentlemen, who honored the meeting with their presence, were fully equal to the expectation of those Masons, who took an interest in seeing that the affair should be properly conducted.—Much pains were previously taken by the Committee of management, for the purpose of having the Ball-room appropriately decorated,—and it did them much credit. It was visited, during the day, by some of our most respectable citizens, not belonging to the order of Masonry, who expressed themselves much pleased with its appearance.—The dancing commenced at 9 o'clock, and continued till twelve; when the company retired to the supper-room, where Mrs. Lawson had prepared for them, in good style, excellent tea and coffee, with their necessary accompaniments,—after partaking of which, the Ladies and Gentlemen returned to the Ball-room and the dancing recommenced and was kept up, until an early hour next morning,—when they separated, as they met, pleased with themselves and with one another.

We beg leave to draw the attention of our readers to the notice given by Mr. Tenney, of his intention to exhibit, on Monday evening next, a number of Chemical experiments, accompanied by explanations, which will contain, in a condensed form, the substance of the Lectures given during the course.

General Lectures on the science of Chemistry, have always been a source of pleasure to those who were given to study; but they have for the most part, been so wrapt up by the use of technical phrases that few persons, who have not received a liberal education, have been able to profit by them.—Mr. Tenney's Lectures, however, consists of such explanations as are suited to almost the meanest capacity.—We have not before, heard the principles of Chemistry illustrated in such familiar language, nor their application to the common concerns of life made so clear.

Having seen Mr. T's Chemical apparatus, and witnessed the performance of a number of his experiments, we can with confidence recommend the attendance of his Lectures, as being a source both of pleasure and instruction.—We trust he will receive such encouragement as will induce him to give a second course before he leaves the City.

From the Miramichi Mercury of the 20th inst.

"*The Election.*—At three o'clock on Wednesday last the High Sheriff, agreeable to law declared the Poll closed, and stated Mr. Cunnard had a majority of 39. John Nesmith, Esquire, as the representative of Mr. Fraser, then rose, and in his name demanded a Scrutiny."

[We are sorry to observe that there is a probability that part of the time of the next Session of the House of Assembly will be occupied with an Election-Scrutiny.—We have lately had as much of that as is beneficial to the Province. It is probable, however, that the parties interested, will, previous to that time, be able to settle the question between themselves:—it is sincerely to be hoped that this may.

After Mr. Nesmith demanded a Scrutiny on the part of Mr. Fraser, Mr. Cunnard addressed the Electors at considerable length.—We admire his speech, as being expressive of high sentiments of candour towards his opponents, and of independence of spirit with regard to the interest of the public.—In the Mercury of the above date the following notice is given with regard to the scrutiny:]

"The scrutiny proceeds but slowly—after three days application only 16 votes have been struck off from both sides—leaving the majority in favor of Mr Cunnard the same as at the closing of the Poll."

ST. ANDREWS, Jan. 26.—On the 17th inst. the High Sheriff of this County was resisted in the execution of his duty at Campo Bello, when attempting to arrest several individuals, and had to retreat with the party he had with him and were pursued by the miscreants and fired upon.—On Monday evening he proceeded to Campo Bello, with a posse commitatus (the Rifle Corps under the command of Capt. Boyd), and succeeded in securing seven of the offenders, four of whom found bail; the remainder were brought to Saint Andrews and lodged in the County Gaol. As we acknowledge the principle, *that every man is supposed to be innocent, till he is proved guilty*, we decline publishing the names of the persons apprehended.—Herald.

MARRIED.

On Sunday last, at St. Andrew's Church, by the Rev. Dr. Burns, Mr. Andrew Brown, to Miss Jane Mills.

Also by the same, Mr. William Stout, to Miss Eleanor S. Laidley, all of this City.

DIED,

At Carleton, on Sunday last, in the 26th year of her age, Caroline, wife of Mr. William Wetmore, and eldest daughter of the late Dr. Claudius Messenet, of Saint George.

On Monday, at Mahogany, Parish of Lancaster, John Brundage, Esq. an old and respectable inhabitant.

On the 19th inst. Mrs. Mary Hetherington, late of this City in her 29th year, leaving a husband and two small children to lament their bereavement.

SEVERAL Valuable FARM LOTS, in Tracts of Land, of 200 Acres each, or thereabouts, composing the greater part of Knox's Grant—so called, situate in the Parish of Norton, in King's County, agreeably to the Surveyor's Plan of the same.

☞The above forms part of the Real Estate of the late W. F. Knox, Esq. deceased, and will be Sold by virtue of an Order of the Governor and Council, obtained for that purpose.

The conditions of Sale—terms of payment, and further particulars may be made known on application at Mr. Swymmer's Office, St. John.

December 26, 1828.

CHEMICAL LECTURES.

MR. TENNEY

HAVING completed his course of Lectures upon the Elementary principles of Chemistry, begs to return his thanks to those who have done him the favor to attend.

It has been suggested to Mr. Tenney, by a number of respectable Gentlemen, who have attended his Lectures, that a repetition of his Experiments would be an amusing treat.—He proposes, in consequence, to exhibit them on Monday Evening, at the Masonic Hall, to commence at half-past six o'clock, precisely.

Mr. Tenney will accompany the Experiments with such observations as he trusts will make them, not only amusing, generally, but instructive to those who may have attended his previous course of Lectures.

☞Tickets may be had of Mr. Reynolds, and Mr. M'Millan, or at the Hall.—Price 2s. 6d. each.

January 31, 1829.

TO THE PUBLIC AND FRIENDS!!

THE Subscriber grateful for past favors acquaints them that he has relinquished his business in St. John-street, in favor of (his late faithful servant) John Henry Robertson, and hopes that the Public and his friends will favor the said Person with a share of their custom and confidence:—Also the subscriber requests all persons unto whom he is indebted to apply for their respective dues, and such as are unto him indebted to forthwith pay on the said Premises.

ANDREW MACKENZIE.
