MARINE INSURANCE OFFICE.
Committee of Directors for the ensuing week.
CRAVEN CALVERLEY
R. W. CROOKSHANK, Sen.
GEORGE D. ROBINSON.

OUR latest intelligence, this week, comes to us through Belfast papers to the 12th May, brought by the brig *Emma Zoller*, Capt. ABERDEEN, arrived at St. Andrews. The *Chronicle* of the latest date, states, that the accounts of HIS MAJESTY'S illness afford but little hope of his recovery.—From the extensive arrangements making in France for the projected attack upon Algiers, and the Dey's anxious preparations for defence, the conflict it is expected, will be of the most obstinate nature.

A private letter received in this City, informs, that the tonnage duty on vessels calling at Cork, for orders, will in future be only one farthing per ton, instead of 2d., which has heretofore been exacted in such cases.

GREEN PEAS, well filled, were for sale in our market, this morning, at 12s. 6d. per bushel. They were raised by Mr. URQHART, of Belleisle, and we believe are the earliest that have ever been known in this part of the Province.

MAD DOGS.—We have been informed that some days since, a dog belonging to Mr. Charles Early, of Mahogany, about four miles from Carleton, was discovered to be in a highly rabid state, and had caused considerable loss to the farmers in that neighbourhood, having bitten four sheep belonging to Mr. Harding, two or three sheep belonging to Mr. Perry, a fine ram and ewe belonging to Mr. Olive, two sheep and a pig belonging to Mr. Brundage, and several geese, the property of other settlers. The dog has since been killed.—Accounts from French Village, also mention the appearance of Hydrophobia among the canine species, in that quarter. A person coming from thence on Saturday last, states, that he assisted in killing two dogs, on the Marsh Road, supposed to have been affected.—Our City authorities will no doubt do all in their power to prevent the introduction of this dreadful malady into the City.

While a general alarm prevails respecting the spreading of the Small Pox, and while every precautionary measure has been adopted by the Public Authorities, to prevent its introduction into the City, it was with much surprise we learnt, that two of the Aldermen, accompanied by a Physician, landed on Partridge Island, the night before last, without the knowledge of the Visiting Physicians, and, we presume, without authority, and after having communication with the persons labouring under that disease, again returned, thus rendering in a great measure ineffectual the precautions adopted.

If such intercourse is permitted there can be no longer any necessity for detaining the unfortunate individuals under observation, or burdening the inhabitants with the expence attending their detention. If the Law permits, we would recommend, that these Gentlemen be sent back again to the Island, and kept there as long as it may be deemed necessary to detain a single individual disembarked from the infected vessel.—*Com.*

THE Circuit Court closed its sittings on Thursday last. On that day, the prisoners who had been found guilty, were brought up, and received the following sentences :—

Adam Hull, (a coloured man) convicted of the murder of PATIENCE HOPE, an elderly coloured female, was sentenced to be hanged on Thursday next the first July.

Jeremiah Smith, and *Thomas Kavanagh*, found Guilty of Grand Larceny, to be imprisoned six months, and to be kept, during that time at hard labour, under the direction of the Magistrates.

For a copy of the following communication, addressed to Capt. SABINE, by a Member of the Royal Institution in London, we are indebted to an intelligent Gentleman, resident at Sussex Vale. The samples of Salt, Coal, and Water, now reported upon, and which have been inspected by some of the most eminent scientific men in the Mother Country, were obtained at Sussex Vale, in this Province. We trust that the valuable Mines and Springs at that place, will be found of sufficient importance to induce men of capital and science to make further research, and ultimately engage in working them with advantage both to themselves and the Country.

" *Royal Institution, February* 19, 1830.

" SIR,—I have examined the samples of Salt, Coal, and Water, which you wished me to look at for Sir HOWARD DOUGLAS : and report as follows, hoping you will excuse my brevity, for my time is short.

" The coal is a good bituminous coal—rather pyrrtous and sulphuretted ; but if in quantity and in a neighbourhood where it is wanting, likely to prove valuable.

" The salts are in two samples. Both are common salt. That in large crystals is nearly pure, containing only a minute trace of sulphate of lime. That in small crystals differs only in form, and containing much sulphate of lime. Neither contain salts of magnesia.

" The water is a strong solution of common salt : is in fact the liquor of a brine spring. It contains some sulphuretted hydrogen, but not a great quantity. It probably contained more when drawn. It also contains much sulphate of lime, being nearly saturated with that substance.

" Commercial considerations must determine whether the Salt Spring is worth working. If it and the coal are together, and in a part where as yet but little of either has been found, they would probably be valuable."

(Signed) M. FARADAY.
To Capt. SABINE, Royal Artillery.

FROM THE WEST-INDIES.—By the remarkably fast sailing brig *Tantivy*, in 15 days from Barbados, we have received papers from that Island to the 5th instant. The English packet had arrived there with London dates to the 6th May.—The accounts from the neighbouring Islands are of rather a gloomy description—The weather being most unfavorable for making sugar. In Trinidad and Grenada, the incessant fall of rain had occasioned much loss of stock on the estates, and injured the roads in the latter Island to such an extent as to put a temperary stop to the conveyance of produce.—Major-General Grant had taken his departure from Trinidad, for England ; and Sir Charles F. Smith had been sworn in as acting Governor.—The Trinidad whale fishery had been remarkably successful this season ; and it is confidently asserted, that there is at present sufficient oil on hand to supply the whole of the West-India Islands and Colonies at one half the former price.

The *Port of Spain Gazette* contains accounts from the Republic on the Main to the 24th April, by which it appears the forces of Venezuela were prepared, in case Bolivar should not arrange the differences amicably, to strike a decisive blow—and as his army is said not to exceed three thousand regular troops, there can be no doubt of his being easily overthrown, should he hazard an engagement. He is, indeed, represented in a most critical situation—destitute of cavalry or the means of procuring them—and beset on every side by a host of enemies.

A Tobago paper furnishes the particulars of a piratical attack on the brig Countess Dunmore, to windward of Barbados, on her passage from London to Tobago. The master and passengers were treated in a most brutal manner, and the marauders took with them whatever articles they desired.—On this information reaching Barbados, His Majesty's schooner *Fire-Fly*, Lieut. Holland, was immediately despatched in pursuit of the piratical vessel, which was described as being a long low built schooner, of about 135 tons, mounting one long pivot gun amidships.

The *Jamaica Courant & Advertiser*, announces the arrival in that Island, of Vice-Admiral Colpoys, commander of the united Naval stations. The gallant Admiral, it is stated, has expressed his determinatian of passing a large portion of his time in Jamaica.—It is also stated, that there is not the remotest prospect of reducing any part of the Dock Yard establishment at Port Royal.

American Enterprize frustrated.—An extract of a letter from Smyrna, published in the American papers, states, that five vessels had arrived at that port from the United States, and that two more were expected—making in all seven cargoes. These shipments were made with the expectation of their being admitted into the Black Sea ; but, notwithstanding the treaty of Adrianople was generally understood to guarantee its free navigation, it now appears that American vessels are not allowed that privilege.

NEW COMET.—A Hamburgh paper of the 4th May, speaking of a recently discovered comet, says—' The new comet has a small, but very brilliant, nucleus, a bright body, and a pale train, about 2½ deg. long. Were it not for the moonlight it could be seen without the help of a glass. It moves very slowly to the North East, and will probably be visible for a considerable time.'

Went Passenger in the Woodman, for Liverpool.—WILLIAM B. KINNEAR, Esq. Recorder of this City.

MR. GIBB'S ACADEMY.—This Seminary underwent a Visitation and Examination on Monday last, the result of which was highly favorable to its reputation. Several of the parents, and other individuals interested in the improvement of the youth were present, and along with the Rev. Dr. BURNS, who conducted the examination, marked with pleasure the progress made since last occasion of a similar nature.—*Observer.*

ACCIDENT.—On Thursday Evening, the 17th inst. as the Engineer of the Steam Boat *St. John*, was cleaning out the Boiler of the said Boat (then near St. Andrews,) by forcing out the water, the steam being high at the time, the Cook (*Francis Lafateen*) unfortunately (although warned before) went down to the entrance of the Engine Room, in the Forward Cabin, at the instant the hot water was discharged, and was so dreadfully scalded that he died the next day (Friday) at 2 o'clock.—*Ib.*

On Tuesday, a Coroner's Inquest was held on view of the body of *Greg Cassady*, one of the Emigrants lately arrived in the William Booth, Verdict—the deceased came to his death in consequence of having gone out of a window, three stories high, in a fit of delirium.—*City Gazette.*

CASUALTY.—On Sunday the 13th inst. a seaman, named *William Thomas*, belonging to the *Restitution* of Plymouth, fell from the yard-arm of that vessel to the deck of a vessel lying alongside.—He was taken to the Hospital, where he lingered until Tuesday last, when he died.—*Col.*

We have the pleasure to announce that a communication has been received from the Directors of the Glasgow North American Colonial Society, in connection with the Established Church of Scotland, stating that they had nominated to the pastoral charge of St James' Church, Newcastle, the Rev. JAMES SOUTER, A. M. of Aberdeen. His ordination was to have taken place early this month, and it was expected he would leave Scotland in one of the first autumn vessels for this port. —*Miramichi Schediasma, June* 15.

On Sunday evening two men, named Thomas Hanney, and Jonathan Thamolt, shot a large bear near the residence of the former in Nappan. His Bear-ship, on Saturday night, helped himself sans ceremone, to a fine pig, belonging to Mr. H. —he fed instanter upon a part of poor grunty, and called the next day to conclude the repast. But death was in the pot ;—Bruin's career closed, ere his banquet commenced.—*Ib.*

MILITARY.—The 8th Foot, now stationed at the Royal Barracks Dublin, are in daily expectation of the arrival at Kingstown harbour of a transport ship to convey them to Nova-Scotia.

The 32d Regiment, at Richmond Barracks are also awaiting the arrival of transport vessels, to convey them to Canada.—*London Gazette.*

COLONIAL ITEMS.

QUEBEC, June 10.—Extensive shipments of wheat and flour for the English Market have been made since the opening of the navigation. The flour has been shipped at about 30s. per barrel ; the wheat at from 6s. to 7s. per bushel. Some fine Lower Canada Wheat for shipment, without being cribbed, brought as high as 6s. 8d.—*Gazette.*

In consequence of the Court of King's Bench being obliged this morning to postpone the trial before a special jury of the cause M'Leod *vs.* Meek, there being no pannel, fifteen of the absent jurors were fined £5 each. On Saturday, four or five other gentlemen were also fined the same sum for a similar reason. Owing to the great pressure of business among merchants at this moment, time is often very precious, yet no rules could safely be made but general ones, and individual convenience or advantage must always be sacrificed to the public.—*Neilson's Gazette, June* 14.

The Saw Mill and Flour Mill, with the greater part of the wharf, at Etchmin, belonging to the Hon. John Caldwell, were burnt on Saturday night. Mr. C's loss is estimated at £3000.

Arrivals at Quebec.—Comparative statement of arrivals, tonnage, and settlers, at the port of Quebec, to the 14th June, 1829 and 1830 :—

	Vessels.	Tons.	Settlers.
1829	248	60,832	5689
1830	301	81,734	9839

We have understood that in consequence of the rate of tolls on the Erie Canal having been augmented, advices have been received that there will probably be upwards of 30,000 barrels more of flour sent from the north western part of the state of New-York to this market than was calculated on in the early part of the season. This will give additional employment to our steamboats and to British shipping, and further tend to convince our fellow subjects in the West Indies, that they may with perfect confidence look to the resources of the *St. Lawrence* for supplies fully adequate to their wants.—*Montreal Gazette.*

An Editorial article copied from the *New-York Commercial Advertiser* into this day's paper, announces that no success has attended Mr. M'Lane's proposals at the Court of St. James' respecting our West India Trade. This important intelligence sets those doubts to rest which we expressed last Saturday, and also proves that our surmises respecting General Jackson's Message, being intended for electioneering perposes were correct. With the motives which prompted the course of proceeding which the Cabinet of Washington adopted we have nothing to say on this side of the boundary ; it has however had the good effect here of bringing to publicity communications received in Canada and the United States on the subject which might otherwise have remained unknown, and thereby putting those interested in the Trade in possession of very favourable intelligence. The result of this negociation, which so deeply involved our Colonial interests, will cast a gleam of joy throughout British North America. The effects of the present system are beginning to develope themselves in a very striking manner. The trade of the St. Lawrence never was so extensive, especially in the staple articles of produce, as it has been this Spring. Gentlemen who have been connected with the Forwarding Business on our River for several years, concur in corroborating the fact of encreasing trade ; and from present appearances there is reasonable ground to hope for a progressive encrease, provided our Colonial Commerce be left on its present basis.

Canadian Courant, June 9.

MARRIED,

On Tuesday Evening last, by the Rev. B. G. GRAY, Mr. CHARLES J. MELICK, to Miss MARGARET, youngest daughter of Lawrence Foster, Esq. all of this City.

At Hampton Ferry, on the 16th inst. by the Rev. Elias Scovil, Mr. PETER Z. PARLEE, of Sussex, to ANN CATHERINE, eldest daughter of Mr. James Crawford, of the former place.

At Kingston, on Wednesday evening last, by the Rev. James Cookson, Mr. DANIEL BACON, to Miss SARAH, fifth daughter of Mr. William Burnett, all of the Parish of Norton.

DIED,

In this City, on Wednesday evening last, the Rev. Mr. MONTAGUE, one of the Emigrants lately arrived in the *William Booth*, aged 30 years.

In King's County, on Friday the 18th instant, after a short but severe illness, in the 73d year of his age, Mr. ENOS FLEWELLING, one of the earliest settlers of this Country, and greatly lamented by a large circle of acquaintance.

On Monday, the 14th inst. at Fredericton, ELIZABETH, wife of the Honorable THOMAS BAILLIE, Commissioner of Crown Lands, deeply and deservedly regretted by all who knew her.

At St. Andrews, on 16th inst., DANIEL MACMASTER, Esq. one of the first Settlers and oldest inhabitants of that town.

At the same place, on the 17th inst., Mr. DAVID MOWAT, second son of the late Capt. JOHN MOWAT, of that town, aged 25 years.

At the same place, suddenly, on Saturday last, CHARLES JOSEPH BRISCOE, Esq. Waiter and Searcher at the port of St. Andrews, aged 52 years.
