Miramichi, Nov. 8—Arrived, brig Partisan, Dale, Liverpool.—11th, brig Hebron, Bibby, Dublin; Kent, Stirling, Irvin.—Total, 190.

Richibucto, Nov. 4—Arrived, brig Shannon, Thompson, Belfast; Ranger, M'Millan, Newfoundland.

QUEBEC, Nov. 11.—The greater part of the vessels in port are well advanced in their loading, and will proceed to sea the present week. The navigation is as open now as in the beginning of October. Pilots from below state that all the ice which had formed on the shores a fortnight back, has entirely disappeared. They experienced very rough cold weather at the beginning of the present month, and some, from the time that they were discharged from the vessels they piloted down, were from seven to ten days beating up, owing to the long continuance of westerly winds.

At least nine vessels with cargoes are still due at this port. All these may yet be expected to arrive. About a dozen sail in ballast, from different ports, long due, can hardly be expected.

We have to notice an instance of dispatch which occurred last week. The *British Tar*, Harby, 383 tons Register, from London, with upwards of 500 tons of general cargo, commenced discharging on Monday last, and cleared on the Saturday following, with a full cargo for London, and will sail this evening.

TO MARINERS.—A notice has been issued from the Trinity House, that a *green* buoy, marked "*wreck*," has been laid 10 fathoms N. W. of the collier brig sunk in the Gulf Stream, near the Goodwin light vessel, and that a similar buoy is laid 10 fathoms N. E. from the schooner sunk in 8 fathoms low water, about 1½ miles N. by W. of the Goodwin light-vessel.

Sunken Rock near the Bahamas.—Extract of a letter, from Mr. George Duncan, late commander of the brig Lorton, of Liverpool, to the Secretary of Lloyd's:—"You will oblige me, as well as my seafaring brethren, traders to or about the Bahama Islands, by causing it to be made public, that the brig Lorton, of Liverpool, from St. Domingo to Nassau, on the morning of the 2d of July, struck on a sunken rock, bearing from Egg Island N. by W. ½ W. eight miles, and immediately filled with water. The rock is about the size of a boat's bottom, and six feet below the surface of the water, with seven to eight fathoms of water on both sides of it. The longitude of this rock is, by a good chronometer, of Messrs. Molineux & Sons, London, 77 1 15, and latitude, by a meridian altitude of the sun, 25 38. The rock is not in any chart which I have seen, and the fishermen in the vicinity of the place report that they did not know of it. When the vessel struck she was going 7½ knots per hour."

Rev. Mr Ford's Lectures.

THE First LECTURE of the course on the sublime Science of ASTRONOMY will be given on MONDAY Evening next, the 25th instant, at 8 o'clock, in Mr BRAGG's Public Room.

The subject having been already introduced, this Lecture will treat of the apparent motions of the Heavenly bodies, and of the true figure and magnitude of the Earth—of the Sun, and Planetary System, together with the Fixed Stars, in so far as they agree with the sun. The Lecture will be accompanied with Illustrations on the Orrery, shewing the position of the Planets with regard to the Sun and each other—their true relative motion—their magnitudes and distances and the Satellites surrounding their primaries.

TICKETS for the course to be had of Mr. *John M'Millan*, Prince William Street; and Mr. *G. Blatch*, Market Square. *St John, Nov.* 23.
