

POETRY.
L. S. D.
If your Minister, stretching you, ask what is the one thing which, in the eyes of the world, is the most precious of John Bull's.
Go search the lore of ancient times,
And the glowing tales of romance;
Of Moorish Spain and chivalrous France;
But neither in Eastern nor Southern land,
Can Aladdin's lamp or Merlin's wand,
Compare with the talismans of the North.
The great, all-powerful L. S. D.
Whenever you hear a "Thy prate,"
About "Constitution in Church and State,"
Do you think he cares a title or jot,
Whether Religion is honoured or not?
He values canon and civil law
For place and for pension prate he ho—
His seal burns only for L. S. D.
Do you think that a man, in seeking a wife,
Looks only for love and a peaceful life,
Like romantic people, in days of old,
Or, like the sage, in his later half,
For an animated golden calf?
Like the Israelites, he bends the knee
To it—or its symbol—L. S. D.
Time was, I believed in a thoughtless hour,
With the sage of old, that "Knowledge is power,"
But now I see 'tis "Mammon" we covet in Mammon.
For it rules us all, it rules us all—
The rich and the poor, the great and the small:
Do we honour the Garter, or K. O. B.
So much as the order of L. S. D.
Does your draper client ask for just one half yard?
Do you buy due to the inch of gold?
Or, for coffee, purchase a chicken?
Do you, your tailor presume (as no doubt he doth)
To try your temper and calibrate your cloth?
All this, and all similar, is wrought by the spirit of L. S. D.
Whether you hear of a patriot elf
Plying his country, and land—himself—
In short, whenever you hear or see
Canst, deceit, or hypocrisy,
Or villainy, under vile pretence,
Assuming the garb of nobility,
Scorn not the truth unfilled by me—
The agents of mischief are L. S. D.

MISCELLANY.
[From the Edinburgh Advertiser.]

INCREASE OF POPERY.—In the Protestant Journal of this month, the reader is presented with a map of the encroachments of Popery in England, Scotland, and Wales, up to January, 1835. The examination of this map furnishes the following instructive results: In 1825, the number of Roman Catholic chapels in England and Wales, was 338. In 1835, the number is 429, making in ten years an increase of seventy-one chapels, or an average of seven chapels per annum. In Scotland, the number of Roman Catholic chapels in 1829, was 51. In 1835, the number is seventy-four, being an increase of twenty-three chapels in four years, or a little more than five per annum. On comparing the population of Scotland with that of England, we have here a rate of increase in Scotland three times greater than that in England.—Twenty-three chapels in four years to a population of two millions and a third of a million, being three times the increase in England of seventy-one chapels to a population of thirteen millions. Twenty-three chapels are more than all the churches of worship erected by the Dissenters—more, we venture to affirm, than the increase of all the Protestant sects in the same period. It has often been said that the last knowledge a man arrives at is the knowledge of himself, and so it is with our own country. Our eyes have been abroad over the whole earth, every where but at home; the heathen afar off has been better known to us than the heathen amongst ourselves; and whilst planting the gospel in foreign parts, we have allowed error to re-establish itself in the parishes of Scotland. Explain it how you will, it will still remain an astounding fact that in the last four years, Popery has built more churches in Scotland than all other Christian sects put together. We may be told that these churches are erected principally by the Irish emigrants; it may be so in the west of Scotland; it is not so with the seventeen chapels of Inverness-shire, or the twelve chapels of Banffshire. [oh! oh! oh!]

WONDERS OF CHEMISTRY.—Aqua-fortis and the air we breathe are composed of the same materials. Linnen and sugar and spirits of wine are so much alike in their chemical composition, that an old shirt can be converted into its own weight in sugar, and the sugar into spirits of wine. Wine is made of two substances, one of which is the cause of almost all combustion or burning, and the other will burn with more rapidity than any thing in nature. The famous Peruvian bark, so much used to strengthen stomachs, and the poisonous principle of opium are formed of the same materials.

French and English Acquaintance.—In some countries it is almost as easy to get a good estate as a good acquaintance. In England, particularly in the north, it is almost as easy to get a good acquaintance as a good estate. In some countries it is almost as easy to get a good estate as a good acquaintance. In England, particularly in the north, it is almost as easy to get a good acquaintance as a good estate.

alone is acknowledged, then tell me what nation is or was so. As a thousand things co-operated in ancient Greece to produce that universal state of perfection in which we find the fine arts to have been there, a happy constellation of the most fortunate stars—so a thousand favourable circumstances concur, in America, to make it possible that a far greater amount of liberty can be introduced into all the corners of her political society than ever was possible before with any other nation, or will be at any future period, yet also requiring its sacrifices, as the fine arts with the Greeks required theirs.—*Lieber's Stranger in America.*

CAPTAIN OF TRINIDAD.—When the British soldiers landed, they broke open the boiling-house and distillery, and made grog in a most original manner, and on a very extensive scale. They rolled out three hogheads of sugar, and seven puncheons of rum, which they emptied into a well of water, drew up the mixture in bucketfuls and drank it. This singular mode of making grog was introduced by the regiment under the command of Colonel Pictou—the immortal Pictou of Waterloo. During his government, he endeavoured to make the Colonial Department reimburse the proprietor of the plantation for the damage sustained on the landing of his regiment; this he was not able to accomplish. Sir Thomas Pictou was one of the most able generals this island ever had. His way of treating debtors that had the means, but wanted the will to pay, was original; instead of undergoing the heavy delay of a Spanish law process, creditors were in the habit of going to Governor Pictou. He would summon the debtor before him, and ask him if the plaintiff's claim was just. If the defendant answered in the affirmative, Pictou rejoined, "pay him, Sir, immediately." Perhaps the defendant would remark that he had no money at that moment. "When will you have it, Sir?" "This day week." Here the governor would say, addressing the plaintiff, "Here is your money," at the same time paying him himself; and then turning to the defendant, he would add, "take care, Sir, that you produce the money within ten days." This was enough for few men would venture to trifle with the Governor. He had the art of making himself loved and respected by the honest members of the community, and feared by the worthless.—*Monthly Magazine for January.*

BROTHER JONATHAN.—A joint commission having been appointed by the Governments of Great Britain and the United States, to determine the boundary line between the States and the British North American possessions, the American Commissioners proposed that the latitude should be calculated geographically, that is, from the centre of the earth, which they said was a far more scientific and satisfactory method than the ordinary one of calculating it superficially from the Pole to the Equator. The effect of this would have been to give the United States a tract of country extending from the Atlantic to the Pacific, and averaging 14 miles in breadth, to which, by the usual mode of calculating, they have no claim. Dr. Watson, to whom the British Commissioners entrusted the scientific branch of the negotiation, quickly saw through the dishonest scheme of Brother Jonathan, and thereby preserved this large extent of territory to his own Government.—*Mechanic's Magazine.*

GUNS AND GUNPOWDER.—The power accumulated within a small space of gunpowder is well known, yet, some of its effects, under peculiar circumstances, are so singular, that an attempt to explain them may perhaps be excused. If a gun is loaded with ball it will not kick so much as when loaded with small shot; and amongst different kinds of shot, that which is the smallest, causes the greatest recoil against the shoulder. A gun loaded with a charge of snipe shot, kicks still more. If, in loading, a space is left between the wadding and the charge, the gun either recoils violently, or bursts. If the muzzle of the gun has accidentally been struck into the ground, so as to be stopped up with clay, or even with snow, or if it be fired with the muzzle plunged into water, the almost certain result is that it bursts. The ultimate cause of these apparently inconsistent facts is, that every force requires time to produce its effect; and if the time requisite for the elastic vapour within to force out the sides of the barrel, is less than that in which the condensation of the air near the muzzle impedes the sufficient force to drive the impediment from the muzzle, then the barrel must burst. It sometimes happens that these two forces are so nearly balanced that the barrel only swells; the obstacle giving way before the gun is actually burst.—*Babbage's Economy of Manufactures.*

MANUFACTURING FEMALES IN AMERICA.—The state of Newburyport to Lowell was crowded with well-dressed females, unembarrassed in manner, untainted with forwardness or vulgarity, and who evidently had not been accustomed to high life. On our arrival at Lowell, we observed several stages deposit loads of the same sex, which circumstance was accounted for by the extensive cotton manufacturing situated in the immediate neighbourhood. There is a constant succession of females departing from and arriving at Lowell; the high wages of those attending the factories attract such as particularly want a sum of money, after which they return home.—The females engaged in manufacturing amount to nearly 5,000, and as we arrived at Lowell on the afternoon of Saturday, we had an opportunity of seeing those connected with some of the largest cotton factories, retiring from labour. All were clean, neat, and fashionably attired, with reticules hanging on their arms, and cashes on their heads. They commonly walked arm-in-arm without displaying levity. Their general appearance and deportment was such that few British gentlemen, in the middle ranks of life, need have been ashamed of lending any one of them to a tea-party. Next day, being Sunday, we saw the young females belonging to the factories going to church in their best attire, when the favourable impressions of the preceding evening were not effaced. They lodged generally in boarding houses, and earn about 8s. 6s. sterling per week, independent of board; serving girls earn about 4s. 3s.—*Sheriff's Tour through North America.*

The Temperance Almanack, published at Albany, states that out of twenty-four thousand persons confined in the jails and poor houses in the state of New York in 1833, eighteen thousand were certified by the keepers to be intemperate in their habits.

PUBLIC CONTRACT.
The Commissioners of the Bay of Fundy Light House, and those of this Harbour, will receive Tenders, till the 15th June next, 2 o'clock, for a quantity of PALE SEAL OIL, not exceeding
2000 Gallons, and
5000 Gallons Porpoise OIL,
the same to be delivered to them at this Port, to be perfectly clear of all dregs or sediment, and to the entire satisfaction of the Commissioners.
Payment to be made in one month after the delivery of the oil, (which must take place by the 15th July) or sooner, if the article is accepted before that date. Security must be stated on the Tenders for its due performance, and the Tenders left with any of the Subscribers.
JOHN WARD, Secy.
R. W. CROOKSHANK.
THOMAS BARLOW.
JOHN WARD, Junr.
L. DONALDSON.
St. John, 18th April, 1835.

PUBLIC CONTRACT.
The undersigned Commissioners will receive Tenders until Saturday the 30th of June next, for such quantities of PALE SEAL OIL, as may be required for the use of the Lights at Head Harbour, Macleod's Island, and Saint Andrew's Harbour, for Twelve Months from the first of August next; the Oil to be pure and free from sediment, and delivered at the respective Light Houses at the risk of the Contractor, at such periods as may be necessary. But the winter supply must be delivered on or before the first of October. Cash will be paid in thirty days after the delivery of each lot.—The quantity of Pale Seal Oil is about 1000 Gallons, Porpoise, 400 Gallons.
Security will be required for the due performance of the Contract, and the Oil will be subject to inspection before shipment for the respective Light House Establishments.
JOHN WILSON, } Commis-
JAMES CAMPBELL, } sioners.
St. Andrews, 5th May, 1835.

CENTRAL BANK.
PUBLIC NOTICE is hereby given that the remaining Instalment of Forty Seven per cent on the Capital Stock of the Central Bank of New-Branswick, is required to be paid into the hands of the Cashier, at the Bank in Fredericton, on MONDAY, the 6th day of July next.
By Order of the Board of Directors,
H. G. CLOPPER, President.
Fredericton, 11th March, 1835.

CARD.
A MEMBER of a Medical College in Great Britain, is desirous of giving instruction in the various branches of his profession, to two young Gentlemen, preparatory to their entering a regular College education, who will in all respects be treated as if belonging to the family; the situation is one of the most pleasant in the Province, and about 40 miles from St. John. N. B.—Lessons in the Latin language can be given at the residence of the Tutor, who will meet with immediate attention.
By Appointment,
JAMES CAMPBELL, M.D.
St. Andrews, 5th May, 1835.

REMOVAL.
THE Subscriber has removed his Stock of MEDICINES, &c. from the Laboratory, King Street, to the first house from the southwest corner of King and Germain Streets—where he will dispose of them at very reduced prices. (Nov. 50.) H. COOK.

Billiard Table.
FOR SALE.—A full-sized, superior Billiard Table, with six brass lamps, and a new cloth, complete. For particulars apply to Mr. Geo. Scammell.—Inquire at this Office. May 16.

EMIGRATION.
THE Subscriber is desirous of bringing Passengers, from all parts of the world, to the Derry, & Dublin, on the most reasonable terms, and has made arrangements to have a conveyance from those Ports once every Month during the season. For particulars apply to the Subscriber, or to his Friends who find this mode very desirable, as the greatest punctuality in every respect will be attended to.
WILLIAM DOUGAN,
St. John, N. B. 5th July, 1834.
