**CLARK'S IMPROVED
WATER WHEEL.**
THE Subscriber respectfully invites pub-
lic attention to his Patent Improved Pa-
tent Water Wheel, for propelling Mill and other
Machinery, for propelling Mill and other
Machinery, and one which is most required in
this Province, is that one-third the quantity of
water required by other wheels is sufficient to
propel it, while the power is greatly augmented.
It also possesses the peculiar advantage of work-
ing equally well with back water, and is a most
valuable and economical improvement. The prin-
ciple, are requested to apply to Messrs.
Harris & Allen, Portland, or to the Subscrib-
er, at the residence of Mr. John S. Clark, in
Carleton, for further particulars.—where, also,
plans may be seen, and the Water Wheel, or

do well to inspect the Patent Improvements
now submitted, before making their arrange-
ments.

JOSEPH S. CLARK.

ADVERTISEMENT.
R. FOULIS having been appointed Agent
by Mr. Turner, the original Inve-
ntor and Patentee of the RE-ACTING WHEEL, begs
leave to acquaint the Public, that any orders
transmitted to him will be punctually attended to.
R. E. assumes his Principal, and the Re-acting
Wheels have been proved practically in this Pro-
vince, and that apart from the pretended improve-
ments which individuals may have adopted to
them, which are of little or no utility. The wheels
in the simplicity of Mr. Turner's construction
are in all respects what have been long and
much wanted by all persons concerned with the
Waters, when all others are stopped by frost.
October 18th, 1834.

**Re-acting Water Wheel,
IMPROVED.**
THE Re-acting WATER WHEEL, origi-
nally invented by Mr. Turner, and improved
90 years ago, and subsequently improved by
Messrs. Parent, De la Cour, Segner, Engel,
Bernoulli, Waring, Ramsey, Ewart, Wight,
& Turner; but very recently further improved
by the subscriber, (so as to resemble the origi-
nal in nothing but the principle.) is now getting
into general use in these Provinces, and is al-
ready being introduced into the United States,
and may be procured of any desired
power, at the Foundry of Messrs. HARRIS &
ALLAN, of this City, where the latest improve-
ments may be investigated, and any information
given regarding the same.

From the manner in which the improved
wheel is now hung, the difficulties heretofore ex-
isting and complained of by the wearing away
of the foot, and jamming of the false bottom,
are completely overcome and for ever obviated.
It can be easily kept supplied with oil, and will
continue in motion under water, notwithstanding
any unusual rise of back-water, freezing of
the surface water, or being thrown off the per-
pendicular from the heaving of the building for
frost.
Mill Seats surveyed, Plans and Specifications
for all sorts of Machinery furnished on
moderate terms, by applying at Harris & Al-
lan's Foundry, or to the Subscriber in this vicin-
