These several accounts, marked D. to J. inclusive, your Committee recommend to be paid.

Your Committee cannot close this Report without congratulating the Common Council and the Citizens generally on the flourishing condition of the Corporation Revenues.

There are large, extensive and valuable Water and other Properties within the limits of the City, yet unleased, which are rapidly increasing in value, and the extensive Farms and other Lands in the County, owned by the Corporation, (which are let only for a short term of years,) are likewise improving. These properties, when the proper time arrives for bringing them into requisition, will, without doubt, add immensely to the sources of Revenue of this Corporation.—The Steam Ferry, now in the course of being established by the Common Council, will bring some of these properties into immediate use, and into great demand: even with the present income, the Common Council may continue the system, so judiciously introduced and adopted, of effecting annually a gradual and at the same time an efficient improvement in the Streets without an increase of the debt.

Respectfully submitted.

Avon Bridge Company.

SEALED Tenders will be received at the Office of the Secretary of the Avon Bridge Company, until Tuesday, the 17th day of May next, at noon, from persons tendering for the Erection, (Materials included,) of a SOLID ROADWAY under the *Ferry Hill* bank to the *Avon Bridge* abutment, with Six SLUICES therein, at equal distances from each other, to commence at the foot of the hill near Mrs. Dills, and run in continuation of work there already done, on which there is now a Railing for the abutment, in a direction that would strike it at one hundred and thirty-two feet distant from the outer end, until it comes within 40 feet of said abutment, and thence with a curve until it actually does strike the abutment 110 feet from the outer end of said abutment. The road to form a regular inclined plane from the abutment to the railing. The above mentioned work to be built of square Hemlock Timber, none of which to be less than 12 inches at the small end, and tied with round Hemlock logs of not less than 20 feet long, and 12 inches diameter, to be placed not exceeding 8 feet apart, dove-tailed, and halved into the timber above and below the tie, together with two tiers of crossing logs on the inside running parallel with the Bank. The whole work to be secured with two inch juniper treenails, 24 inches long, and filled in from the bank, from such part thereof as may be directed by the Superintendant, so as to form a smooth level with the top of the outside elevation.—The Sluices are to be made of Birch Timber, and covered crosswise with 4 inch plank, and pass through the whole of the width of the road. The whole distance from the railing to the abutment is about 756 feet, and about one hundred and eighty-six feet of this work are already nearly completed; the height of the front will probably average 10 feet. The work to be completed by the 15th of August next, and payment will be made upon its completion. The work to be done under the inspection of a Superintendant appointed by the Bridge Company, and to be subject to his approval. No Tender will be received unless the party tendering be present at the time of opening the tenders, or give satisfactory reference to some person residing in Windsor, not a Director.

By order of the Board of Directors,
HARRY KING, SECRETARY.
Windsor, 26th March, 1836.
