(From the London "Sun," 16th May.)

National Loan Fund Life Assurance Society.

On Wednesday, the annual general meeting of the National Loan Fund Life Assurance Society was held at the London Tavern, Bishopsgate-street, at one o'clock; T. Lamie Murray, Esq., Chairman, in the Chair.

The Chairman opened the proceedings by calling upon the Secretary to read the advertisement convening the meeting.

The Secretary having read the advertisement,

The Chairman said—Gentlemen, the Directors have prepared a report of the proceedings of the Society since our last annual meeting, which the Secretary will now read.

The Secretary then read the following report:—

The Seventh Annual Report of the Directors of the "National Loan Fund Life Assurance Society," to the Proprietors.—13th May, 1846.

The Directors have again the pleasure of meeting the Proprietors on the recurrence of the seventh annual general meeting of the Society.

The influence a remunerative industry has on the provident habits of the general community, has been constantly pointed out by the Directors as the true source of that praiseworthy inclination to avail itself of the advantages of life assurance.

The financial and industrial character of the past year, especially remarkable for its extreme vicissitudes, has been prejudicial to the progress of life assurance, inasmuch as the sudden adversity which at once prostrates the resources of provident foresight is not more unfavourable to institutions of this kind, than the sudden prosperity which too often is apt to neglect the rules of ordinary precaution.

It is, however, highly gratifying to the Directors, notwithstanding these discouragements, which have so peculiarly marked the past year, and so largely interfered with the business of life assurance, to be able to state that the progress of the National Loan Fund Society has been uninterrupted, and its business for the last year even greater than in the three preceding years combined.

Not to mention the number of life assurance offices whose institution preceded the National Loan Fund, so many new, though some of them short-lived competitors, have sprung up since that period, that the field of exertion would appear to be constantly narrowed. There is scarcely to be found a community of sentiment, occasional association, or casual interest, that has not been seized on, and exhausted in the formation of new assurance societies.

As the expenses of management, particularly where so much competition exists, must always form a considerable item in each new establishment, however economically conducted, it is a question worthy of consideration whether the assurer is benefited by the constant sectional subdivision of his patronage.

In the course of the previous year the Directors have endeavoured, with care and assiduity to extend the connexions of the Society. They congratulate the proprietors on the result of their efforts, and believe they have laid the foundation of a stable institution, whose extensive range of action and public utility will not be without its influence on the policy-holders and proprietors.

At the date of the last meeting the number of the policies then issued were 2 781. These have since augmented to 3 550, exhibiting an increase in the policies of 769, and of new premiums within the year of £12,691.

Since the formation of the Society to the end of 1844, the decreement amongst the assured has amounted to £30,008 16s. In the last year the claims paid by the Society amount to £5,748 18s., making the total sum distributed to the representatives of the assured £35,757 14s., being less than the expected mortality by £11,027 6s. and so far may be considered a proof of the care taken in the selection of lives.

The Directors, in conformity with the deed of settlement, have caused the annual investigation into the affairs of the Society to be made by the Actuary; and it is now presented, together with the accounts of the Auditors, and will be read to the meeting. Following the plan of distribution laid down in the preceding annual division of profits, of taking one-fifth of the reserve fund for immediate distribution to the proprietors and policy holders of five years' standing, the prosperous position of the Society enables the Directors, after reserving 30 per cent. of this sum, to divide amongst the policy-holders entitled to this distribution, a reversionary bonus, varying from 35 to 85 per cent. on the premiums; and to the proprietors a bonus of 3¼ per cent. on the past year, in addition to the regular interest of 5 per cent. already paid to them.

The following table, prepared by the Actuary, exhibits the amount of the four last annual bonuses, to which the holders of policies of five years' standing have become entitled, with the options of receiving the same in cash, or by addition to their policies, or in reduction of annual premiums.

EXAMPLE.

Age	Sum Assured	Annual Premium	Policy taken out in	Bonus in addition to sum Assured			Bonus in Cash			Permanent reduction of annual Premiums		
	£			£	s.	d.	£	s.	d.	£	s.	d.
			1837	217	15	1	100	0	11	16	4	2
			1838	192	3	0	87	1	4	13	10	1
60	1000	£74 3s. 4d.	1839	165	11	10	74	1	9	11	3	2
			1840	1‚6	7	6	54	0	10	7	18	10
			1841	111	6	8	49	10	0	7	10	4

There are to be elected three Directors, in lieu of John Griffith Frith, Esq., Hunter Gordon, Esq. and John Rawson, Esq. whose period of office has expired, but who are eligible to be re-elected, and offer themselves accordingly; and also two Auditors, in place of Professor Wheatstone, F.R.S., and Professor Graves, A.M., F.R.S., whose period of office has expired, but who in like manner offer themselves for re-election.

Approved by the Court of Directors.

T. LAMIE MURRAY, Chairman.

The report and the audited accounts having been read,

The Chairman rose and said—Before I move the adoption of the report, if any gentleman would wish to ask us any questions on the subject of the Society, we shall be happy to answer him.

After waiting for a short time, in order to give any gentleman an opportunity of putting questions to the Directors, of which, however, no one present seemed disposed to avail himself,

The Chairman continued—No gentleman seems disposed to put any question. I suppose I may take that as an indication of perfect satisfaction, and a willingness to adopt the report of the Directors. The past year has been decidedly a prosperous one, and had we been more disposed we might have taken more credit and drawn obvious conclusions from the success we have met with. But this is quite unnecessary, as the public will not be slow in forming a correct judgment, and therefore we have contented ourselves with setting forth the facts as they exist. It will be seen on reference to a former report, that the reserve fund had reached £24,000. In the present year after deducting the bonus of last year, it has attained the sum of £37,000 and upwards. It is from this fund, which has been constantly accumulating since the first valuation of the Society's business, that the bonus to the policy-holders and shareholders are derived; and, although one-fifth of it becomes divisible every year, yet, as its augmentation is greater than its reduction, the annual division becomes greater and greater in each year. A glance at the successive divisions to the policy-holders will at once prove the justice of these observations. The Society commenced its operations in the year 1837, and up to the last valuation, in December last, about eight entire years, the bonus payable on a policy of £1000, dated in 1837, will be this year £217 15s. added to the policy, should it become a claim before the next annual valuation; £100 0s. 11d. in cash, should the assurer prefer to receive it in money, or a reduction in his annual premium of £16 0s. 4d. A policy of £1,000 taken out only five years ago, in 1841, will be by the present division, entitled to a bonus of £111 6s. 8d. The Society has received greater support in the past than in any previous year. Those who are engaged in the business of life assurance know that the past year has not been a favourable one, by reason of those causes to which we have alluded in our report. I attribute this increase in our business to the excellent principles on which we are founded, which seems to afford a greater protection to the assured under the frowns of fortune. If the past year has been prosperous, the present one is promising, the application for policies being even greater since December last than in the corresponding period of last year (hear, hear). I might go further—the subject of life assurance is a wide one—I might easily be led into a long discourse. I do not think the intelligent meeting I am addressing will require this from me. You will find your interests set forth in the proper place, and I do not think you will be disposed to complain. I may, I think, without hesitation, promise you the continuance of an equal, if not a greater bonus on your shares in each succeeding year. I will, therefore, conclude by moving the adoption of the report. (Cheers)

J. W. Scott Esq. seconded the motion which was carried unanimously.

A resolution was then put and carried, to re-elect the Auditors and Directors.

Wm. Studley—Gentlemen, there is one thing which we ought to do in justice to the Directors and Chairman as well as to ourselves, and that is, to move a vote of thanks to them for their efficient services. I am sure there is no gentleman but must feel highly gratified at the report which has just been adopted; as for myself, I am particularly so, having a large interest in the concern.

A Proprietor said he would take the honour to himself of seconding a motion so well deserved.

The motion was carried unanimously.

The Chairman—Gentlemen, on the part of the Directors as well as of myself, I beg to return you our most sincere thanks. We certainly had a very serious as well as anxious labour in examining upwards of seven hundred policies, which have been taken out within the past year. Gentlemen were aware of all the necessary inquiries which were consequent upon such an examination, but if their labours were considerable, the progress and success of the Society, and the approbation of the proprietors were their reward. I beg again, gentlemen, to return you our sincere thanks.

The meeeting then separated.

LES ADIEUX DU PREMIER.

My cab is at the door,
Of my red box here's the key,
But before I go, John Russell,
Here's some good advice for thee.

Act, that honest hearts may love thee,
Act, that party knaves may hate;
And from office when they shove thee,
Have a heart to meet thy fate.

Tho' Protection roar around thee,
As loud as roar it can,
Tho' they set on to confound thee,
"Young Ben," that nice young man."—

Tho' county members yell,
Tho' you sever party's link.
Tho' bed-chamber lords rebel,
Speak out boldly what you think.

Tho' for shorter term than mine,
Quite sufficient of a bore
You'll find office, I opine,
And be glad when it is o'er.—*Punch*,

VARIETY.

Acadia College.—On the 18th June, at the public anniversary of the College, Messrs. Edward Anderson, Stephen W. Deblois, James S. Morse, Asabel Bill and Lewis Johnston were admitted to the degree of A. B. with the usual solemnities.—*Halifax Guardian.*

Canada.—Some of the rumoured appointments were officially announced in the *Canada Gazette* of the 4th July, viz:—Sir Allan Napier McNab, Knight, to be Adjutant General of Militia, in and for the Province of Canada; the Hon. William B. Robinson to be Chief Commissioner of Public Works; John Hillyard Cameron, Esq., to be Solicitor General, in the place of Henry Sherwood, Esq., resigned, and to be one of Her Majesty's Counsel in and for that part of the Province, formerly Upper Canada; the Rev. Egerton Ryerson to be Superintendent of Schools; Edward Burroughs, and Louis Fiset, Esquires, to be Joint Prothonotary and Clerk of Her Majesty's Court of Queen's Bench for the District of Quebec; Edward Henry Bowen, Esquire, to be one of the District Judges for the District of Gaspe.

Sir Allan McNab's appointment will very probably secure the Speakership of the Assembly to Mr. Morin, who filled the chair during the absence of Sir Allan for a few weeks last session.

Dr. Tache, and Donald McDonneil, Esq. have been appointed Deputy Adjutant Generals of Militia, with the rank of Lieutenant Colonel.

Fortifications in Canada.—*Montreal, July 3.*—Yesterday, the Sheriff held a Special Session, at the Court House, to determine the sum of money to be awarded to Mr. Woodrow, of Longueuil, as compensation for 17 acres of land taken from him by the Board of Ordnance. The land formed part of a piece of 50 acres, which was bought by Mr. Woodrow, in 1844, for £425. A great deal of conflicting evidence was given; some of the witnesses fixing the value of the land taken as low as £25 per arpent, while one considered each quarter acre to be worth £50. The difference was, in some measure, owing to the different views of the valuators, some of whom looked upon the land merely as a farm, while others regarded it as the site of a new city. The Jury gave a verdict £700, which makes the price something more than £40 per arpent.

This trial is the first of a series, occasioned by the proceedings of the Board of Ordnance, who have taken possession of nearly all the land between the "Fire fly" landing, and the landing of the other ferry, for the purposes of fortification.

The Government has consented, without the arbitration of a jury, to give Mr. Hardy, of Longueuil £50 per acre for sixty four acres of land on the site of the intended fortifications.

The whole sum which the British Government proposes to expend for the fortification of the Colony, we have heard estimated at not less than two millions and a half sterling. Perhaps there can be no impropriety in naming the leading objects to which it is currently reported to be devoted. St. Helen's Island is to be very strongly fortified, so as to command the river front of this city. The shore on the opposite side is to be covered with strong works of considerable extent. The advantage of this will be, that, should the protecting force on the frontier be driven in by an invading force, and Isle au Noix and St. John's either turned or captured, our troops may find, on that side of the water, a place of defence, under cover of which they may either defy the enemy and protect the approaches to the capital, or be enabled to embark and cross without rout and confusion. Nun's Island, at the mouth of the Chateauguay, will also be strongly fortified, with the view of affording similar protection, and checking any advance on a route which has before been attempted, until a flotilla can be assembled on Lake St. Louis, and a force on Isle Perrault sufficient to dispute the passage. The principal harbours on our side of Lake Ontario—Kingston, Port Hope, and Toronto—will also be protected by very strong works, so as to afford safe shelter to ships of war and cruisers, should the enemy be superior on the Lakes. Over 150 guns of great calibre, mostly of eight inches, are disembarking, or on the route, for completing these works. They bear the mark of the Low Moor Foundry and date of 1842, and are most formidable pieces of ordnance. Of the works, if any, to the west of Toronto we have heard nothing, but it is believed that Lord Sydenhams's suggestion is about being acted on, and that a number of iron steamboats in sections, each armed with one or two very heavy guns, are preparing to be launched on the lakes, to any part of which our canals can easily carry them, if occasion should require.

Escape from Slavery.—Capt. Kelly, of the brig Tory, of Yarmouth, N. S., while on his passage homeward from St. Lucia, Guadaloupe bearing N.E. about 40 miles distant, he fell in with a small boat containing four negroes, who had put off from Mariegalaute, in hopes of being able to reach an English island, where they would be free. Capt. K. humanely took them on board, and bore up for Nevis, where he landed them. When picked up, they were almost exhausted, and their frail bark could not have stood the violence of the winds and waves much longer. Before leaving Nevis, Capt. Kelly received a letter of thanks for his humanity and kindness from Lloyd's Agent, resident at Nevis, who stated that he had provided the negroes with a comfortable home on one of the estates.

Steamers for the Rio Grande.—The following steamboats have been purchased at Pittsburgh for the Rio Grande, by Capt. John Saunders, of Gen. Taylor's staff; Waterville, two years old $5,500; Corvette, new, $16,000; Rough-and-Ready, new, $12,000. These boats, excepting the Waterville, says the Post, are the very best specimens of light water drafts, built by our first builders, are to be delivered by the Government Agents in New Orleans at the above prices. Boilers and engines perfectly new. They are frail tenements for sea-going vessels, and will require fair weather and good management in taking them along the Texas coast. The model and arrangement of the boats are the results of long experience in navigating rivers.—They will run in shoal water, and carry more freight than any other vessels ever built. Their appearance on the Rio Grande will be the commencement of a new era in commerce and civilization.

Execution of Three Men.—On the 26th ult., Patrick Hayes, aged 21 years, and Patrick Rice, aged 22, were executed at Nenagh, for conspiring to murder the late Patrick Clarke, Esq. After their bodies were cut down, William Fogarty, aged 25, underwent the same dreadful punishment, for shooting at, with intent to kill, Mr. M'Donald, a steward in the slate quaries in that part of the country of Tipperary.

The prosecution instituted by the government against the Nation newspaper, for the publication of a seditious libel, has failed, as the jury were unable to agree upon a verdict, and were consequently discharged on Thursday last. The alleged libel consisted in an article published in the Nation, pointing out the methods by which troops transported upon railways might be successfully attacked by insurgent peasants.

A true bill has been found against Mr. Dunn, an Irish Barrister, committed by swearing in the Court of Bankruptcy that Miss Burdett Coutts owed him £100,000.

A Leeds paper states that Mr. William Hirst has discovered a method of propelling vessels by steam at a speed of thirty miles an hour, with half the power now used.

☞ NOTICE.

THE Subscriber takes the liberty of acquainting his friends and the public generally, that he has removed from the South Wharf to *Sands' Fire-proof Brick Building, Water Street,* where he purposes carrying on the

Auction & Commission Business,

and will feel much obliged to receive a share of their patronage, assuring them his best endeavors shall be used to give satisfaction.

May 23. THOMAS RAYMOND.

REMOVAL.

THE Subscriber has removed his **Auction and Commission Business** to the new Fire-proof premises in Prince Wm. St. lately erected by W. H. Street, Esq. which he has, at considerable expense, fitted up as an extensive and convenient *CITY AUCTION MART*, where he is prepared to receive Consignments of Goods of every description, to any extent. Parties consigning Goods for *positive sale* may draw upon him *at sight* for one-half the amount of the probable proceeds of such Goods.

JAMES McDONNELL,
Auctioneer and Commission Merchant.
June 6.

Good Security.

FIVE or SIX HUNDRED POUNDS wanted on good Real Estate security. For particulars apply at the Courier Office. June 20.

T. WALKER & SONS, *Agents.*

A liberal allowance made to Country dealers.

June 6.

ASTONISHING EFFICACY OF HOLLOWAY'S PILLS.

A WONDERFUL CURE OF DREADFUL ULCEROUS SORES IN THE FACE AND LEG, IN PRINCE EDWARD ISLAND.

The truth of this statement was duly attested before a Magistrate.

I, Hugh Macdonald, of Lot 55, in King's County, do hereby declare, that a most wonderful preservation of my life has been effected by the use of Holloway's Pills and Ointment; and I furthermore declare that I was very much afflicted with Ulcerous Sores in my Face and Leg; so severe was my complaint, that the greater part of my nose and the roof of my mouth was eaten away, and my leg had three large ulcers on it, and that I applied to several Medical gentlemen, who prescribed for me, but I found no relief.—My strength was failing every day and the malady on the increase; when I was induced to try Holloway's Medicines. After taking two or three boxes, I experienced so much relief, and found the progress of the disease so much arrested, that I was enabled to resume my ordinary labors in the field. The sores which were so disagreeable and repulsive to behold are now nearly all healed. Having received such truly beneficial aid, I feel myself bound to express my gratitude to the person by whose means I have thus been restored from the pitiable and miserable state I was in; and for the sake of humanity make known my case that others similarly situated might be relieved. (Signed) HUGH MACDONALD.

This declaration made before me at Bay Fortune, the 3d day of December, 1845

JOSEPH COFFIN, Justice of the Peace.

The above case of Hugh Macdonald of Lot 55, came personally under my observation; and when he first applied to me to get some of the Medicines, I thought his case utterly hopeless, and told him that his malady had got such hold that it was only throwing his money away to use them. He, however, persisted in trying them, and to my astonishment, I find what he has aforesaid stated to be perfectly correct, and consider the case to be a most wonderful cure.

(Sigd) WM. UNDERHAY, Bay Fortune.

Holloway's Ointment *will cure any cases of Bad Legs, Ulcerous Sores, Bad Breasts, Sore Nipples, Cancers, Tumours, Swellings, Contracted or Stiff Joints, Gout, Rheumatism, Lumbago, Burns, Scalds, Chillblains, Chapped Hands and Lips, Bunions, Soft Corns, Piles, the Bite of Moschettoes, Sand-flies, Chiego foot, Yaws, Coco-bay, and all Skin Diseases common to Europe, or to the East and West Indies, or other Tropical climes.*

☞ Sold by the Proprietor, 244, Strand, (near Temple Bar,) London; and by PETERS & TILLEY, *Provincial Agents*, No. 2, King street, Saint John, N. B.; James F. Gale, Fredericton; W. T. Baird, Woodstock; Alexander Lockhart, Quaco; James Beck, Bend of Petitcodiac; O. K. Sayre, Dorchester; John Bell, Shediac; John Lewis, Hillsborough; John Curry, Canning; and James G. White, Bellisle;—in pots and boxes, at 1s. 9d., 4s. 6d. and 7s. each. There is a very considerable saving in taking the larger sizes.

N. B.—Directions for the guidance of patients are affixed to each pot. *July* 11, 1846.
