HENRY RIDLEY'S
IMPROVED
ANTI-CORROSION PAINT,
For Painting and Preserving all kinds of External Wood, Iron, Plaster, and Brick-work.

THE superiority of the above article over every other description of Paint, for the preservation of Out-buildings, &c. has been evinced by the extraordinary increasing demand which the manufacturer has of late had for it. Two coats of the Anti-Corrosion will render Wood or Iron-work, however exposed, impervious to the weather: it is an effectual remedy for preventing the leakage of *Walls* of a porous quality, and will be found one of the cheapest and best preparations ever used for *Hot-house Lights, Sashes* of all kinds, *Tiles* to represent Slates and Gutters, as it equally resists the effects of heat and moisture. H. R. can confidently recommend it as the best possible covering for *Gates, Palisading* and *Hurdles, Wood Fences, Carts* and other Agricultural Implements.

It is considerably cheaper than common Paint, and will last four times as long. The colour most frequently used presents the appearance of fine Portland Stone, but Lead, Slate, Yellow, Green, Red, and other colours may be had.

It does not require a professed Painter to lay it on, as a person accustomed to common labour will find no difficulty in using it according to the following directions:—

Mix 3lbs. of the Anti-corrosion (which is a dry Powder), with about a quart of prepared Oil, (or sufficient to make it the consistence of thick cream) taking care to stir and mix the parts well together: then lay it on with a good Painting Brush in the common mode of applying Paint, rubbing it well in.
Saint John Agent—W. P. Ranney.
