R. MATTHEWSON respectfully informs the inhabitants of St. John and its vicinity, that he will give private instruction in the following branches of Mathematical Science, viz. Algebra, Geometry, Trigonometry, Mensuration, Surveying, Navigation, Conic Sections, Fluxions, &c. including the higher Algebraic Equations, Indeterminate Problems, Diophantine Analysis, the application of Algebra to Geometry; of Plane Trigonometry to the measurement of Heights and Distances; of Spherical Trigonometry to Geography and Astronomy; of the Differential and Integral Calculus to the maxima and minima of quantities, the determination of the lengths of curves, areas of surface, capacities of solids, and the calculation of Logarithms, Sines, Tangents, &c.

R. M. from former experience and success as a teacher of the Mathematics, flatters himself he will give general satisfaction to such as may entrust him with their instruction. He accustoms the student to familiar illustrations, logical reasoning, and as often as possible practical applications, which render this sublime and interesting study rather an amusement than a task, exercise and improve the judgment, gratify and expand the mind, stimulate its energies with an ardour after the investigation of truth, and rouse its curiosity to explore the mysterious wonders of nature in the fertile regions of science.

Important to Invalids.

THE Subscriber would respectfully announce to the citizens of Saint John, and the public generally, that he has been appointed Sole Agent for the British Provinces, for the sale of Dr. ADAM STEWART's (of Roxbury, Mass.) celebrated Vegetable MEDICINES, and that he will keep constantly on hand all the various preparations, together with books of directions which will be furnished gratis, to any who may wish to become acquainted with the Doctor's practice, whether purchasers of the Medicine or not. The great celebrity he has achieved throughout the United States, renders it unnecessary to go into any lengthened details to convince even the most incredulous that he is second to none of the Profession, in this or any other country; suffice it to say, that the Doctor was born and educated in Scotland, and has visited the most celebrated institutions in Europe, which, combined with his natural genius and a long practice, has entitled him to rank among the first of the disciples of Hippocrates. The following, whose certificates may be seen in the book of directions, are a few among the many thousands of patients who would cheerfully testify to the wonderful effects of this newly discovered Medicine.
