By His Excellency's Command,

GEORGE SHORE, *A. G. M.*

QUEBEC, Nov. 29.—An alarming fire broke out this morning, in *Parloir* street, in the house occupied as the Post Office. It was first discovered in the upper story, on the west end, nearest the Seminary. It being the dead hour of night, no immediate assistance could be got, excepting that of Mr. Russel and the Police, and the Gentlemen and Students of the Seminary, by all of whom every exertion was made to save the books and papers, but we are sorry to say great part of them are lost. Those in the safe, on the lower floor, were preserved, but some of them injured. The good old gable walls of the building, with the *coupe-feus*, saved Mde. Baby's house, and probably the Seminary, although it is well guarded against fires.

We are glad to hear that the house, which belonged to Mrs. Harkness, the widow of the late Dr. Harkness, is insured for £1000.

DEC. 1.—The horse-ferry-boats between this city and Point Levi discontinued their trips last evening, and the navigation is now entirely closed. The weather and the wind had been favourable for the vessels which sailed from this port a few days ago. The temperature has, however, been generally under 20 deg. Farenheit, and this morning, there is a great quantity of floating ice in the river. The thermometer on Monday morning at Montreal, was at 14 deg. above zero.

The navigation by the canals is generally closed. The quantity of bread stuffs which has been sent forward, has been less than was expected, and this circumstance, joined with the reported deficiency in the crops in Great Britain, has effected a rise in the prices.

REPEAL OF THE CORN LAWS.—The London Morning Herald, of the 13th November, contains a lengthy article on the effect which the repeal of the Corn Laws would produce upon the manufactures of the United States; which is noticed as follows by the Shipping and Mercantile Gazette:

"The Morning Herald urges that the manufactures of the United States would neither be checked nor diminished in favour of those of Great Britain, should we lower or abolish the duties on the imports of corn into this country. Our contemporary argues his point with much ingenuity, and employs, with effect, no inconsiderable portion of sophistry to display what he seems determined at every risk to prove. Now, we go thus far with him—we believe that the present amount of manufacture in the United States would not be immediately diminished to any great extent by the consumption of our merchandise in their place; but we believe that, with a proper amount of encouragement on our part to a reciprocal trade, —that with an increased power of consumption on the part of the republic—British manufactures would supply a very large portion of the increased demand: and the day, which must arrive, when the United States will manufacture her own cotton for nearly all her own purposes, would be thus postponed so long, and approach so gradually, that Great Britain would have ample time to create elsewhere a mart for the lost inlet for her industry. To this portion of the subject we referred recently in pointing out the advantage which would have resulted from the promotion of the culture of cotton in our East India Colonies — Here is a ground for the supply of the raw material, and here would be an incalculably vast mart for our manufactures. This is matter for the consideration of our Government; but, in the mean time, and until we can obtain a substitute, let us not, for the sake of mere theories, lose our present market in North America—a market capable, for a considerable time, of being increased with the increasing resources of the republic."

STATE OF PAISLEY.—The number of persons on the supply-list of the Relief Committee is, unhappily, still on the increase. The number is now 1170, with 3000 dependents. The number supplied with soup (a separate class) amounts to 694; some of whom get two, three, or four quarts of soup, according to the extent of their families; a halfpenny scone is given with each quart of soup. The total number requiring aid exceeds 5902.

The Birmingham manufacturers are now receiving some large orders from the United States.—These orders had been suspended while the McLeod affair was pending, but were issued after the trial had concluded. The calamitous fire at the tower will also give employment to a considerable number of hands in the gun trade. Upon the whole, the prospects of the Birmingham artisans for the winter are more cheering than could have been anticipated a short time since.—*Worcester Journal.*

THE POTATO CROP.—The Limerick Chronicle says that this year's potato crop will, beyond expectation, render fully an average produce throughout the South of Ireland. The favourable weather of the past fortnight has worked miracles for the farmer, and restored what was considered lost.

JAVA TEA.—Our letters from Amsterdam mention a very large sale at Rotterdam of Java Tea—at which about 3000 chests were sold for about the same price as the China leaf. Formerly very small quantities of this article were sold at a time, and, as was supposed, more as a matter of curiosity than for actual use. Now, some of the judges of Tea in Holland have been heard to remark that they consider the Java Tea equal to, if not better than, that of China, with the advantage that it will be found impossible to mix inferior with superior sorts.

Decrease in the consumption of Porter and Ale. —The decrease in the consumption of malt, from the 10th October, 1840, to the 10th October, 1841, in London and its vicinity, amounts to no less than 41,924 quarters, the quantity used in 1840 having been 776,219 quarters, and in 1841 being 734,295 qrs.

PROROGATION OF PARLIAMENT.—On Thursday last, the period of the prorogation having expired, the Parliament re-assembled *pro forma*. The Lord Chancellor, attended by other peers, entered the House of Lords soon after two o'clock. The Lord Chancellor then directed the Yeoman Usher of the Black Rod (Mr. Pulman) to summon the attendance of the Commons. The Lord Chancellor thereupon spoke to the following effect :—" By virtue of Her Majesty's commission, under the Great Seal, to us, and other Lords directed, and now read, we do, in Her Majesty's name, and in obedience to her commands, prorogue this Parliament to Tuesday the 21st of December next, to be then here holden, and this Parliament is accordingly prorogued to Tuesday the 21st December next."

The application of Capt. Taylor's floating breakwater for the formation of refuge harbours, on the coast of the United Kingdom, appears likely to be carried out with great advantage to our maritime commerce, and its practicability is almost universally admitted.

We are glad to find that the amount of loss said to have been incurred by the late destruction of the Small Armoury of the Tower, has been greatly exaggerated. An estimate of the value of the ordnance stores deposited therein was completed, by order of the Government, the day preceding the fire, and the amount was stated to be 186,600*l.* Of this amount, 10,000*l.* (5000 percussion muskets,) was saved, leaving 176,600*l.* If to this be added 50,000*l.* for the cost of re-erecting the building, the sum total will not exceed 226,000*l.*—*United Service Gazette.*

The suggestion of a correspondent to pull down the Tower, as an insult to the city of London, which it was built to keep in subjection, and convert its site into a dock for steamers, into which they might enter and depart at all times of the tide, and around which commodious wharfs might be built, one side being used to land passengers, and another to embark them, is, we think, well worthy of public attention; but we are afraid that a respect for antiquity will prevail over a love for the happiness of the present generation, and such a useful project will have no chance of being carried into effect.—*Sun.*

The frosty weather has set in at Liverpool.—There was ice of considerable thickness in the streets on Wednesday morning and some ponds were frozen over. The day was delightfully fine, though cold away from the sunshine. Yesterday there was a slight thaw, but the frost again assumed supremacy in the evening. In other parts of the country there have been heavy falls of snow, attended with thunder and lightning.

The Rev. Hugh M'Neile, at the request of the American Consul and several influential citizens, delivered to a crowded auditory at the Liverpool Amphitheatre, on Wednesday, a lecture on the life of Dr. Franklin. It excited immense interest, and the receipts, intended for the benefit of the Printers' Pension Society, amounted to £270.

The African expedition, consisting of the steamers Albert, Wilberforce, and Soudan, with a tender called the Emilia, and 300 persons, were on the 28th of August, off Alburka, in the River Nunn, one of the many mouths to the great Niger, and had sustained very few casualties.

Mr. Athill, a gentleman of African descent, has been appointed Chief Baron of the Exchequer in the Island of Antigua.

Another man has attempted to get into Buckingham Palace. He is insane.

There is no such fabric as scarlet cloth manufactured in Ireland. Forty years ago the Irish loom could clothe the British army, as it then did the yeomanry corps.

Sir Clifford Constable and Sir John Gerard, both Roman Catholics and staunch Conservatives, are shortly to be raised to the Peerage.

Letters from Glasgow, dated the 9th inst., state, that since that day week a number of failures had taken place in that city. These failures have added greatly to the existing apprehensions in that important commercial mart.

A private in the 60th Rifles, named Robt. Morris, quartered at Burnley, on Sunday evening last, in a fit of jealousy, stabbed his Lieutenant, Mr. O'Grady, and Elizabeth Hadden, a girl to whom he was attached, and then stabbed himself. All the parties died in a few hours.

Lieutenant-Colonel George Macdonald, half pay 16th Regiment, a veteran officer of 35 years full-pay service, has accepted the appointment of Governor of Sierra Leone.

The late Rev. Dr. Nott, of Winchester, has left to the Society for Propagating the Gospel in Foreign Parts, £6000, to be expended in building churches in Upper and Lower Canada.

The Governor General of India, Lord Ellenborough, with His Excellency's Military Secretary and Aides de-Camp, arrived at Devonport on Sunday week, immediately embarked on board Her Majesty's Ship Cambrian, Captain Chad, C. B., and on Monday morning sailed for India.

By letters received from New Zealand, *via* India, dated July 16, great complaints are made of the scarcity of money. The following is an extract:—"Send me no more goods of any kind ;—the fact is, there is no money in the place,—like all new colonies we are overwhelmed with goods, almost every article, not perishable, may be purchased at less than at home. This is because everybody brings out goods instead of money; and as of course there have been many things required for immediate use, the Sydney folks have taken most of our ready money. But this state of things will not last long. Already we are salting pork, and I hope in a few months we shall have done with importing cattle and sheep, and shall send out our own produce."

Having failed to obtain the young Queen of Spain in marriage for one of his own sons, we understand that Louis Philippe is now using all his influence to promote a marriage with a son of Don Carlos. The co-operation of Christina has been secured to this scheme.

STEAM-PACKETS FROM FRANCE.—The *Courier des Etats Unis*, expresses the opinion, that the French Government has engaged seriously and actively in the establishment of a line of Steamships, between the principal maritime cities of France and the United States. Mr. D'Aubigny, Captain in the Navy, who lately arrived at New York, it is stated, was sent by the Minister of the Marine, for the special object of ascertaining the present condition of steam-navigation in the United States, and of becoming acquainted with the improvements which have been here made. The voyage of the Prince de Joinville is said also to have been made with reference to this object.—*Boston Advertiser.*

A BOAT OVER NIAGARA FALLS.—The Buffalo Commercial Advertiser states that a boat, containing three men, went over the Falls of Niagara, on the night of Monday, the 22d ultimo. They had started from Schlosser at nine o'clock, intending to cross over to Hudson's Tavern, two miles above Chippewa. Shortly after they left the shore, cries from the river were heard at Field's Tavern, near by, but excited no attention, as similar noises are very common in that quarter, from boatmen passing to and fro. No suspicion of the accident was had until Thursday, when inquiry began to arise, and on Friday, awful evidence of the fate of the boat and her devoted crew, was presented in the fragments found in the eddy below the Falls. It is supposed that the boat was struck by a squall, and being heavily loaded, the wretched men on board being swept by the resistless current down the American rapids, and over the frightful precipice below! The names of two were Jehiel D. Kinney and John York, and the other was a stranger, who had merely taken passage for Canada.—Part of one of the mangled bodies is said to have been found.

CANADA.—The proceedings at the close of the late session of the Canadian Assembly were very much hurried. Among other laws, one was passed repealing former enactments with reference to Inferior District and Division Courts, and authorizing the Governor to make certain new arrangements. Unfortunately, the usual explanatory provision that by "Governor" is to be understood Governor, Lieutenant Governor, or other person administering the Government, is wanting; and as the time for making the new arrangements was limited to the 1st inst. and the law goes into force on the 1st proximo, it being now certain that there will be no *Governor* in Canada before that time, there will consequently be no Courts for the recovery of debts under £10 sterling. The Quebec Gazette, from which we take these facts, thinks the deficiency will be no great loss.—*Boston Daily Advertiser.*

Dr. Adam Stewart's CELEBRATED VEGETABLE MEDICINES.

FOR unquestionable proof of the good effects of these Medicines, the Agent is at liberty to refer to GEORGE BOND, Esquire, one of the senior City Aldermen; Rev. W. W. EATON.

[CERTIFICATES.]

Mr. U. J. Clark : Sir—About four months since, I had a fall which very seriously affected my knee; I applied to a physician who is considered one of the best in the City, and after submitting for some time to his treatment, I made application to several others and continued using their Medicines for three months, without any relief from the pain; as a last resort, I applied to you, and by using Dr. Adam Stewart's Liniment and one box of the Pills, I find myself entirely recovered. JAMES DRISCALL.

Queen street, St. John, N. B.

ULCERATED SORE LEG.

This may certify, that I have been cured of an Ulcerated Sore Leg, of about three years standing, by the use of Stewart's No. 1 Pills, after trying a great number of remedies, and attending to the prescriptions of several Physicians, to no purpose. PETER DRAKE,

Cabinet maker, Princess street, St. John, N. B.

DYSPEPSIA.

This may certify that during the greater part of the time for the last two years, I was so much afflicted with indigestion, pain and distress at the stomach, as scarcely ever to enjoy a comfortable meal, accompanied with occasional loss of appetite and general debility, I had recourse to a great many remedies, which proved of little service, as I found my health fast failing; when about three months since, I obtained two boxes of Dr. Adam Stewart's Pills and a bottle of his Aromatic Mixture, which I commenced taking according to his directions, and before I had done taking them, to my great joy, I found myself in the enjoyment of perfect health, and I have not had the slightest attack since. BENJAMIN BELL,

Boot and Shoe Maker, Duke-st. Saint John, N. B.

GRAVEL.—Two desperate cases—one cured, and the other greatly relieved within twenty-four hours; the partics' names may be had by calling on the Agent.

WHOLESALE & RETAIL

Tea, Wine, and general Grocery Establishment.

THE public are respectfully informed that the above establishment is now opened, and the subscriber is confident, from the quality of the Goods which he is determined to keep constantly on hand, and from the advantage he has in purchasing in the best English, Scotch, and Irish markets, that a trial is only wanting to insure a liberal patronage. The TEAS have been purchased personally in London since the great reduction, and their superior strength and flavour will no doubt give general satisfaction.

Private families will find it greatly to their advantage getting their supplies at this establishment, as nothing will be sold that will not be warranted of the best description and as cheap as any other house in the city. Every attention will be paid to customers and the smallest purchases gratefully
