LIVERPOOL, October 4.

By the India mail, papers have been received from Calcutta to the 7th, Bombay to the 2d August, and Hong Kong to the 24th June. The political news from India are unimportant. In China our relations were in an unsatisfactory state; there had been a slight disturbance at Canton, attended with another attempt to burn the boat-house adjoining the factories. A party of marines and seamen from the Pluto dispersed the mob. Commercial affairs were somewhat more encouraging at Calcutta; in Bombay they continued depressed; at Hong Kong, trade was altogether at a stand, and as three shroffs had failed for about a million dollars, there was little hopes of a revival for the season.

The *Times* of yesterday publishes the letters received by extraordinary express, in anticipation of the overland mail of August. The dates are from Bombay to the 31st, Madras to the 20th, and Calcutta to the 14th of August. No later news have arrived from China.

The wet season was drawing to a close; the rains had been sufficient and favourable, and there was a prospect of abundant crops.

The commercial intelligence is decidedly more favourable.

From Singapore we have received intelligence of a gallant fight between H. M. S. Nemesis and a fleet of eleven piratical prahus, manned by 500 hands, and mounting brass guns from 9-pounders to Lelas, of which ten were taken, and iron guns, of which five, 3 to 6-pounders, were captured. The conflict lasted from 1. 30 p. m. until dark; five prahus were taken, several severely shattered; the enemy killed were estimated at 100, and wounded double that number. The loss on the part of the British, three men killed and five wounded. Mr. Brooke, the Rajah of Sarawak, was on board at the time.

The *Morning Chronicle's* Dublin correspondent says that from all parts of Ireland "the accounts are most gloomy as to the prospects of the approaching winter. In the aggregate, there is abundance of food, but millions of the population who had existed in former years upon potatoes are, or very soon will be, totally destitute, unless sustenance can be provided for them by the poor rate or employment.

It is stated that there are now 13 000 fever patients in various temporary hospitals throughout Ireland.

Already three-fourths of the poor-law unions in Ireland have declared their inability to pay the new rates, and the probability is that before Christmas the remaining forth will have pronounced to the same effect.

Favourable winds brought into Plymouth, in a couple of days last week at least 150 ships laden with grain, waiting for orders. A great number of them were sent to the Continent.

The Turkish Government is about to discontinue all intercourse with Greece, and will probably commence hostilities.

Telegraphic communications passed through the whole circuit between New York and Montreal, a distance of ... miles, on Saturday evening last.

The Flour market ... firm in New-York on Monday last, at advanced rates; Mess $6.50 to $6.75 for Genesee and Southern; Mess ... $14.75, buyers—$15 sellers.

The Mail Steamer Hibernia, which left ... on the 16th inst. for Liverpool had $56 027 in specie as freight. She had eighty passengers from Boston, among whom was Colonel Whannell of the 33d Regiment.

The Bermuda Gazette of the 28th ult. says that Vice Admiral Sir Thomas Briggs has been nominated to succeed Sir Francis Austen in the Naval command of the North America and West India stations.

Of course ... of violent, harsh, ... were immediately ... which the men have ... band-master. This was the ... the band, as Signor Castaldini ... Colonel Bell, and has therefore no right to abuse ... entrusted to him, as he has nothing to do with the discipline of the men, beyond the performance of his duty in teaching them music. As his name implies, he is an Italian, a musician of considerable talent, and successful as a teacher, but it is said that he has been in the habit of applying to the band generally the most contemptuous epithets, such as "English brutes," and other terms unfit for publication; and that his behaviour towards them has at length driven the men to inflict this summary punishment on one holding for the time the position of their officer. They would have acted more wisely in preferring a complaint of Mr. Castaldini's conduct to Colonel Bell, whose known impartiality would have ensured them attention, a fair investigation, and ample justice. It is said that Mr. Castaldini, on a former occasion, was treated by the band of the 11th Foot, for the like conduct towards them, and that his connexion with that regiment was then terminated by his discharge. In all probability he will soon cease to be band-master of the Royals.—*Manchester Guar.*

A "RUSE."—One of our Secretaries of State for the United States struck out a good mode of getting rid of an intruder in a particular case. It appears that the door keeper of the Secretary's office was remarkably obliging, which proved quite the thing for a rabid office-seeker, who managed to get in every day and bother the secretary. When the annoyance had continued three or four days, the Secretary stepped up one morning to the door-keeper and inquired whether he knew what that man came after daily. "Yes," said the functionary, "an office I suppose." "True, but do you know what office?" "No, sir." Well then, I'll tell you; he wants your place." The meeting next morning, between the office-seeker and the polite door-keeper, is said to have been rich, from the peculiar manner in which the intruder was informed—"The Secretary is not at home."

An Important Letter—Please read it.

The following letter from Dr. Brigham, of Lowell, Mass. but speaks the uniform language of hundreds of other Physicians, who have tried, and therefore know how to appreciate JAYNE'S EXPECTORANT.

Lowell, Mass. Jan. 27, 1844.

Dr. David Jayne.—Dear Sir:—I have used your Medicine, (so universally known by the name of JAYNE'S EXPECTORANT,) in my practice for a number of years, and can most truly say, that I have been more successful in the use of that as a mild, safe and thorough EXPECTORANT, than of any which I have ever used. It is the best for the following obvious reasons. It does not, if given in proper doses, occasion a disagreeable nausea. It does not weaken the lungs and prostrate the system, like most other Expectorants in common use, nor does it abate the appetite of the patient, like other nauseating medicines which have been used by the faculty. In a word it is nearly or quite the thing which has been sought for by many of the faculty for ages gone by.
I remain yours, &c.
LUTHER BRIGHAM, M. D.

DR. JAYNE'S MEDICINES.—The EXPECTORANT, for the cure of Coughs, Colds, Asthma, and other Pulmonary Complaints; the ALTERATIVE, for Cancer, Scrofula, and Cutaneous Affections generally; CARMINATIVE BALSAM, for Dysentery, or Summer Complaint, and all disorders of the Bowels; VERMIFUGE, for the removal of the various kinds of Worms, Dyspepsia, Sour Stomach, Want of Appetite, &c.; SANATIVE PILLS, for Liver Complaint, Gout, Jaundice, Nervousness, Melancholy, Sick Headache, Costiveness, Bilious Affections, Female Diseases, &c.; HAIR TONIC, for the Growth and Preservation of the Hair, &c.

. The above long-tried and valuable Medicines, prepared by Dr. D. JAYNE, of Philadelphia are for sale by Messrs. T. WALKER & SON, Market Square, St. John.

Ex Maranham, from London.

By Her MAJESTY'S Royal LETTERS PATENT.

DELL'S
Hydro-Pneumatic Apparatus,
TO ANSWER EVERY PURPOSE OF
Heating & Warming,
Manufactured of various sizes and constructions, as Hot Water Stoves, Carriage Warmers, Bed Warmers, Spare Bed Airers, &c. &c.

A GREATER COMFORT, or a more decided luxury can scarcely be conceived, than results from the use of these Bed Warmers. Unlike all other attempts to heat beds by hot water, which confine the heat to the feet only, and warm the bed very inefficiently, however applied, in consequence of their warming merely the clothes, the feet, or whatever immediately touches their surface, DELL'S PATENT BED WARMERS depend for their decided advantage over all other plans ever before introduced, on the fact that they warm the air as well as the clothes, a difference so decided and remarkable, that invalids and others have invariably expressed their astonishment to find themselves in a complete *warm air bath* from the feet to the very shoulders the temperature to remain undiminished, and still found warm enough in the morning for washing, which, to travellers and to early risers, is another advantage in favour of this apparatus, and will render their use indispensable in Club Houses, Hotels, Boarding Houses, &c. Professional gentlemen, and all persons of sedentary habits, will find this apparatus exceedingly comfortable; placed in their apartment it acts like the hot water stove, (heretofore noticed) keeping up in small rooms an agreeable and healthy warmth, as no vapour, smell, or other annoyance can possibly be experienced by using this contrivance for producing an agreeable summer heat.

Persons returned from hot climates, experiencing all the evils of cold, will find the equable temperature afforded by this invention particularly grateful; and all aged or other persons who are martyrs to cold, will find their application so simple and effectual, that they may place one or more on a couch, or in any easy chair, and thus receive the full benefit of the genial warmth communicated. And in cases of severe cold, one of these Bed Warmers, covered with a flannel, and applied to the soles of the feet for two or three successive nights, will be found to give infallible relief. It is a well known fact, that numerous persons who have purchased have never since passed a single *cold* night without one in bed.

One great advantage of these Bed Warmers is, they are so light and portable that they can, without the slightest inconvenience, be carried by persons travelling, who have only to order the boiling hot water to be put in, and the apparatus placed in the bed previous to their going thereto, to ensure a warm, and, that greatest of desiderata—a dry bed.

The invention is already extensively patronised by the Medical Profession, and is being introduced into Hospitals and other public Institutions for the use of invalids.

In all cold climates abroad, in the Colonies and in the East Indies, where Cholera, Ague, &c. like complaints prevail, these Bed Warmers will be found indispensable, and indeed must come into very general use in every quarter of the world.
