Widely and deservedly known as a man of sound judg- ment, strong sense, and singleness of purpose, he was also as remarkable for his warm and sincere friend of the poor as the zealous Missionary, ready at all times to pour into the sick and afflicted, and as one, who un- wearied by storms or heat, has carried far into the wil- derness the message of the Gospel to numbers whom it may not reach for many years before; and where, by the excessive labours, he found his death in the prime of life.—Strongly attached to the principles and Sabbath schools of the Church of England, which he unhesita- tingly maintained and expressed, he had the happy skill to do it without offence, and his loss is as deeply mourn- ed by members of other denominations as by his own people.—In his former Parish of Grand Manan, where he labored for twelve years, will he long be remembered as one who among many difficulties laboured earnestly for souls, and whose house, hand and heart were ever open to the stranger, the poor, and the afflicted.—With a lingered a life of suffering for a glorious immortality; he died relying on the merits of Christ the Saviour. He came to live with the late Mr. Joseph Richardson about thirty-four years ago, in which family he resided till his death, where he indeed found an asy- lum for his declining years. It is more than probable that the deceased has survived Wolfe's entire army.—*Carleton Sentinel.*

REVIEW OF THE WORK.

Marriage requires the fulfilment of several con- ditions, in order that it may be really the cause of mutual happiness. Could the veil, which covers the origin of domestic wretchedness, be raised, and its true source in every instance disclosed, in how many could it be traced to physical disqualifications and their attendant disappointments. Excesses are always injurious; the gift, which when used in moderation is fraught with advantage, becomes, when abused, the prolific source of mischief, and of greater or less injury to the constitution and vital powers. The particular excesses, on the nature and consequences of which this Treatise professes to dilate, are productive of greater misery to the human frame, than any other to which it is subject.

This Work contains an accurate and complete account of the Anatomy and Physiology of the Reproductive Organs, and of their relative con- ditions in health and disease. Nor are these the sole contents of the work, the means of escape, as well as the nature of the danger, are pointed out in clear and intelligible language. It deservedly requires the closest attention and study, for what subject can be of more importance than the preser- vation of health, and of the physical capabilities of which every man should be possessed. It unfor- tunately happens, that the unhappy victim of excessive indulgence and vicious habits, whether acquired in early life, or from the follies of advan- ced age, while suffering from their invariable con- sequences, unwisely entertains a fear of applying to a qualified physician for relief. Shame and the dread so frequently but erroneously entertained that these complaints are beyond the reach of art, alike restrict him, and prevent his seeking for assistance where alone it can be procured. In acting thus, he forgets that accurate discrimination in ascertain- ing the causes of disease, sympathy with the sufferer, and above all, secrecy, invariably character- ize the intelligent and practical physician, and to the medical man, who can shew by his possession of the requisite legal qualification that he is entitled to esteem and respect in his professional pursuits the utmost confidence should be extended. DR. LA'MERT has obtained the highest medical hon- ours, as his diplomas testify, and the great extent of his practice for many years is a guarantee for his professional experience, which has reference almost solely to the treatment of these diseases.
