POETRY.

THE RABBIT ON THE WALL.

BY CATHARINE ALLAN.

The cottage work is over,
The evening meal is done;
Hark! through the starlit stillness
You hear the river run.
The cottar's children whisper,
Then speak out one and all,
"Come, father, make for Johnny
A rabbit on the wall."

He smilingly assenting,
They gather round his chair;
"Now, grandma, you hold Johnny—
Don't let the candle flare."
So speaking, from his fingers
He throws a shadow tall,
That seems, the moment after,
A rabbit on the wall.

The children shout with laughter,
The uproar louder grows,
E'en grandma chuckles faintly,
And Johnny chirps and crows.
There ne'er was gilded painting,
Hung up in lordly hall,
Gave half the simple pleasure,
This rabbit on the wall.

Ah! who does not remember,
When humble sports like these,
Than many a costlier pastime
Had greater power to please?
When o'er life's autumn pathway
The sere leaves thickly fall,
How oft we sigh, recalling
The rabbit on the wall.

MISCELLANEOUS EXTRACTS.

A Crash!—Fall of part of the Horse Shoe Fall.—On Tuesday evening the 10th December, our citizens were startled on hearing a loud and terrific noise, resembling as near as we can describe it, the heavy booming of artillery, in quick succession, which shook the earth round us very sensibly. We did not know for a time what could be the cause of such a fearful noise: and for a few minutes were thrown into amazement, supposing that Miller's Millennium was at hand. It proved to be a part of the Horse Shoe Fall on the Canada side, which had fallen, carrying away about ten rods of the rock in length by four in width. The canal boat, which has lodged for the last few months on the brink of the rock which has fallen, and which has excited the admiration of all who beheld it, was also carried over with the rock. It is now in the whirlpool, two miles down the river, dancing attendance to the freaks of that great malstrom. The crash occurred about 7 o'clock in the evening; and it is indeed providential that it fell at such an hour, and at this season of the year. Had it been in the summer when so many thousands of strangers are here, there undoubtedly would have been persons crushed to death; for it is precisely the spot where so many have continually passed, and where so many have stood to contemplate the grandeur of nature, and behold the waters of the mighty Cataract above them rushing terrifically over their heads, that is now filled with the huge masses of rock which have fallen from above. The loss of this portion of the rock has not in the least diminished in appearance the view of the Falls: but has, in our opinion, added to the scene, and looks grander and more sublime, if possible, than ever.—*Niagara Falls Iris.*

Bombay Railway.—The ceremony of of turning the first sod of the Bombay Railway, which may be looked on as the inauguration of the railway system in India, took place on the 31st October.

The "Beefeaters."—Till the constableship of the Tower of London was conferred upon the Duke of Wellington, in 1820, it was the custom to sell the situations of Warders, or what are commonly termed "Beefeaters," at the price of 300 guineas. The duke abolished the system of purchase, and filled the posts with deserving non-commissioned officers. He has, from first to last, appointed forty-five old soldiers, the value of whose situations would have been no less than £41,175.

A People Living Within their own Means.—Is it not remarkable, says the Savannah Republican, that China, with a well defined nationality of 4000 years, and a population for 2000 years denser, according to its area, than that of France or Britain, has never had cause to complain of the misery or distress of her people! Virtually, she has no paupers—no poor. Her infirm or unfortunate have been generally provided for by the State; while her masses have been, and are, the happiest and most independent people on earth. The reason of this lies in the habits of industry and love of peace of the Chinese. They till the earth in every available spot; they drain marshes, and earth over waste places; they turn all the riches of the earth to the most practical account, and, living peacefully and simply, they have comfort and plenty. No people on earth live so completely within their own means. They have never sought the *trade* of any country; never have interferred with any other country; but, minding their own business, have grown rich and been wise, when more boasting nations were steeped in poverty and ignorance. Surely the nations and people of Europe and the Western hemisphere have yet to learn their art of true living and well governing, of the very people to whom they are sending missionaries—*Sears' Family Visitor.*

The Man-Maiden—Miss Weber (the young Belgian lady mentioned in our last *Journal* as standing pre-eminent among the advocates of woman's rights, and as the wearer of male attire and the cultivator of a farm) is said to be handsome, and only twenty-four years of age. She dresses in the Parisian fashion of black dress coat and pants, with buff vest. Her defence of the practice is ingenious, if not satisfactory.

"The nether garment (she says) was first worn in the bifurcated form by the women of ancient Judea. The exclusive claim which man so pertinaciously maintains to the use of this garment is arbitrary, without a solitary argument to support it—not even that of prior usage. Nature never intended that the sexes should be distinguished by apparel. The beard, which she assigned to man, is the natural token of his sex."

Miss Weber may not only take our hat, but our pants, vest, dickey, and coat, also.—*Drawing Room Journal.*

Shooting Match Extraordinary.—The following account of a shooting match in that vicinity is from the Charleston Mercury:

"An extraordinary match of bottle-smashing took place at Mount Pleasant on the 23d inst., Mr. King backing himself to break ninety-five wine-bottles (viz—the hard Sherry or Madeira bottle) out of one hundred thrown up, and to be fairly broken in the air. Considerable speculation took place, and many heavy bets were pending on the affair; the odds were against his doing it, and fifty to ten against his hitting all, and seventy-five to ten against breaking ninety-eight which was taken by himself. After smashing one as a trial, the match commenced; the first five double shots were loaded and fired by Mr. King in ten minutes, and ten bottles scattered into hundreds of pieces. He broke all up to the sixtieth bottle, which was hit but not broken; from the sixtieth to the one hundredth all were broken. Mr. King loaded himself, washed out his gun three times, and hit, including the byshot, one hundred and one bottles, broke one hundred in one hundred and one shots. Time—two hours and eight minutes."

A test of skill, whi[illegible] leaves the above in the shade, is reported [illegible] Journal. At Gilmanton, N. The reporters u[illegible] consider sitting ble duties as an amusement; [illegible] six hours at a public meeting quite a spree! Correspondents send news from all parts—such as Manchester, Liverpool, Birmingham, London, &c., just to see their writing in print! The electric telegraph does what it can in order to enhance the value of the press! Advertisements and circulation are as easy to get as a fortune. In a word, a newspaper is certainly nearly three-thirds profit; and we strongly recommend some Sheffield speculator to start one! He might calculate on a good net income—(and it's easily netted—for in Sheffield advertisers and subscribers usually pay beforehand)—from the profits at the end of the year, which usually range up and down from £15,000 to £0 per annum—*Sheffield Times.*

Liberty of the Press in France.—A lamentable and yet somewhat ludicrous instance has been given within these few days of the "liberty of the press" in Republican France. The day *before* the opening of the Assembly, the newspaper called the *Presse* put forth an article headed "The President's Message," and, in compliance with the new law of the press which requires that every article be signed, it had its finis the President's name and surname. The document created great "sensation" for a few hours, when it was found that, although the article was really the President's, it was not his *present* "message," but was, in fact, a selection from pamphlets and proclamations issued by him at various periods of his varied career! For this capital, and, as it would be esteemed in this country, quite justifiable joke, the ingenious "irresponsible editor" has been heavily fined and sent to jail for a year!—*Scotsman.*

The Peninsular and Oriental Steam Navigation Company, at the last annual meeting of the proprietors, shewed a very flourishing state of affairs. The dividend for the past half year was four per cent. The nett profits for the year were £86,500;—the guarantee fund, by which they stand their own underwriters, now amounts to £160,000. The company's fleet consists of twenty five vessels, of 27,155 tons. Five new vessels are to be added.

The exports of copper ore from the Australian Colonies in the year 1849, amounted to 14,000 tons, which, at £22 per ton, would amount to Three Hundred and Eight Thousand Pounds.

THIS preparation has now been before the public nearly twenty years. Its great intrinsic merits have steadily advanced the sale and use of it, and it now enjoys a prominent position in the public favour.

The unexampled success which has attended its administration in every case where the patient was really afflicted with Worms, and the fact, that it is not a 'nostrum' or 'cure all' but a specific for one disease only, certainly renders it worthy of the attention of Physicians; a great many of whom having seen in the course of their practice the good and remarkable effects resulting from its use, have had the magnanimity to surrender their professional scruples and prescribe it as the best remedy known.

Every Druggist or Physician who has had any curiosity to enquire into cases where the Vermifuge has been made use of, can furnish abundant evidence of its efficacy in expelling Worms, and the good effect produced on the general health of the patient.

It is mild in its operation, contains no calomel nor other dangerous ingredient, and can be given with perfect safety to the most delicate infant.

St. Andrews, Province of New-Brunswick, October 18th, 1845.

I, Michael Croney, aged 55 years, hereby certify, that for three years previous to May, 1844, I was afflicted with worms, so as to be completely prostrate in strength, and unable to labor, during which time I was constantly under the hands of a physician, with little effect; that, at the time mentioned, I was induced to try one bottle of B. A. Fahnestock's Vermifuge, which produced such extraordinary effects that I was at once relieved from all the pains and spasms I was before afflicted with, and in one week I was restored so as to be enabled to resume my labor; and up to the present time, have enjoyed uninterrupted good health.
MICHAEL CRONEY.

TAPE WORMS,

And other worms in Adults, can be removed by the administration of

B. A. Fahnestock's Vermifuge.

The following are but a few of hundreds of those cases where it has effected a cure.

East Brooklyn, L. I. Feb. 10th, 1847.

This is to certify, that I took three vials of B. A. Fahnestock's Vermifuge, which had the effect to bring away fifteen yards of tape worm and a number of smaller worms. I would, therefore, recommend this medicine to the public as a safe and speedy cure for worms.
