DR. FONTAINE'S
Balm of a Thousand Flowers,
For the Toilet, the Nursery, for Bathing and many Medicinal purposes;

HIGHLY perfumed by its own ingredients: recommended by the Faculty of almost every European city, and established under the patronage of almost every Physician in London and Paris, and thousands of individuals, who make daily use of it in New-York, Philadelphia and Boston. It is the greatest luxury a lady or gentleman could wish for the improvement of health, for comfort and personal embellishment, and its delicate soothing sensation, and the delightful softness it imparts to the complexion.

We give a few of the prominent properties of the

Balm of a Thousand Flowers!

already well established by actual experience.

FIRST:
This Balm remedies every defect of the complexion,

and establishes in its stead Beauty and Health, at the time when both, by the changes of age, or freaks of nature, or disease, have been obscured or undermined—it cleanses the skin, and draws to the surface all impurities, and every species of pimples and blotches; also removes tan, sunburns, sallowness, and freckles, imparting to the skin its original purity, and an unsurpassed freshness, rendering it clear, smooth, and white.

SECOND:
It promotes the growth and increase of the Hair—causing it to curl in the most natural manner.

It cleanses the head from dandruff, giving vigor, health and life to the very roots of the hair.

THIRD:
It is a superior article for Shaving, being superior to all descriptions of Soaps, Creams, Pastes, &c.

As a *Dentrifice for Cleansing the Teeth*, it is by far the most medicinal of any compound yet discovered, preventing decay, relieving pain, ulcers and cankers, and renders the teeth white as alabaster. For bathing, for suffering infants, and for adults, to promote sweetness of body, cleanliness, health and strength, and to prevent eruptions, &c., there is no article more suitable than this BALM. It may be used in cold or warm, hard or soft water.

TAILORING ESTABLISHMENT.

THIS was the first place of the kind ever opened since Saint John contained twenty inhabitants, conducted upon the low price *Cash system*, and strictly carried it out.

It is now five years since the Proprietors, working Tailors, men who knew their business, and were regularly brought up to their trade in the Old Country, asked themselves, could a Merchant Tailor's business not be carried on, and make the customers pay *cash down*, allowing we charge them one-half of what we know to be usually charged where they are in the habit of crediting all who may patronise their system. In order to keep pace with the present day, we determined to deviate a little from those who had gone before us.

Some few friends—for be it known we had but few, save and except the man who pays for his coat before worn out—said you cannot expect to succeed, the place is too small, but you will soon know every body who is good and who is bad. We concluded that to discriminate, who was and who was not, was too nice a point for our experience, consequently we continued just as we commenced—namely, *Cash on delivery*, the course we adopted being entirely original with ourselves.

The man who gets his Clothes at this Establishment has not to pay for those who never pay.

FELLOWS'
Compound Fluid Extract of SARSAPARILLA.

A NEW and the most valuable Extract yet introduced, which is put up in Quart bottles, is cheaper, more pleasant, and warranted superior to any sold. It is prepared from the best

Honduras Sarsaparilla Root,

combined with Yellow Dock and other valuable productions, which from their purifying effects on the Blood render it the best

Spring and Summer Medicine

in the World, purifying and cleansing, giving tone and strength to the whole system.

This Extract is the result of numerous experiments, and the Proprietors feel confident that they have arrived at that perfection in preparing it to which no other manufacturer has yet attained. Every person has heard of Sarsaparilla. All have heard of its uses.—And many Physicians in this City are conscious of the fact that our Extract is far superior to those sold under the names of Townsend's, Sands', Bristol's, Brown's or Bull's Sarsaparilla, inasmuch as it contains other prime remedies besides those used by the above named parties, IS STRONGER, contains nothing but *Vegetable productions*, and is prepared *without boiling*, which causes it to retain all the volatile and active properties.

ENCOURAGE HOME MANUFACTURE.

We pledge our reputation on the truth of what we here state, that we believe it better in every sense than any other Extract of Sarsaparilla ever introduced.

Scrofulous Diseases, Cutaneous Eruptions, Rheumatic Affections, Syphiletic Disorders, Liver Complaints, Dyspepsia, Lung and Bronchial Affections, all diseases arising from the injudicious use of Mercury, Impure state of the Blood or habit of the system, are some of the many diseases which are cured by the use of this Sarsaparilla.

SUMMER TERM.
GORHAM COLLEGE,
LIVERPOOL, NOVA-SCOTIA.
Under the sanction and controul of the Congregational Union of Nova-Scotia and New-Brunswick.

PRESIDENT:
REV. FREDERICK TOMKINS, M. A., University College, London.

SESSION 1851—52.

THE mode of instruction pursued in this Institution, and the Text Books employed, will be precisely the same as those used at University College, London.

Special regard will be paid to the future occupation of the Student in the classes that are recommended.

The Mathematical Classes will be conducted on the same plan as those in University College, London, under the Professorships of Augustus DeMorgan, of Trinity College, Cambridge; and Richard Potter, M. A., of Queen's College, Cambridge.

Classes are already formed in the Greek, Roman French and German Languages; also in the English Language and Literature, and Composition in Greek, Latin, German and French.

In the Mathematical department classes are also formed for Geometry, Algebra, Trigonometry, Arithmetic and Experimental Natural Philosophy.

The special feature of the next term is, that a Class will be formed with a view to give full instruction in Practical Geodesy, comprising Railroad Surveying, Chain Surveying, the use of Surveying Instruments, Levelling and Trigonometrical Surveying. Students wishing to qualify themselves as Railroad Surveyors will find every practical information offered in this course. Fee for the Session, £8. Board and Lodging will be provided in the College at the rate of 8s. 6d. per week. Youths who have attained their 16th year are expected to enter the College; after that age they are not admitted to the Junior School.

The Summer Term in both the College and the School will commence on the 20th April, 1852, and close the beginning of July.

JUNIOR SCHOOL.

Boys will be admitted to this School if they can read and write. The whole arrangements of the Junior School will be under the direction of the President of the College. The system pursued will be a combination of that pursued in University College School, London, and the best Schools in New England.

The course of instruction will comprise the usual elementary subjects taught in schools, with Classics, French and Mathematics; the whole of Wilhelm's method of Vocal Music, as adopted by Hullah, and patronised by the Committee of Council on Education, will be gone through during the Session in the Junior School.

Fee for the Junior School, £4. Board and lodging, at the rate of 7s. 6d. per week.

A course of Forty Evening Lectures to adults, on Reading, Writing, Arithmetic, Algebra and English Composition, will be delivered forthwith. Fee, £2.

REPORT OF THE BOARD OF DIRECTORS OF THE
Saint John Mechanics' Institute,
For the Year ending May, 1852.

In accordance with a Bye Law of the Institute, the Directors beg to submit to the Annual Meeting the following Report:—

The year during which they have had the honour of holding office has been one of unusual interest—first, because the Institute is now free of debt, for the first time since the erection of the building in which we are assembled; and, secondly, because of the successful issue of the Industrial Exhibition held under its auspices—events which will ever form a conspicuous page in its history, and which cannot fail in exercising a beneficial influence on its future progress.

EXHIBITION.—In reference to the Exhibition, the Directors would beg to lay before you the following abstract of income and expenditure in connection with it. The total receipts from the sale of tickets, catalogues and materials used in the erection of the building amount to the sum of £681 2s. 5d., of which the expenditure was £585 10s. 6d., leaving a profit to the Institute of £95 11s. 11d. The Directors deem it due, not only to the Members of the Institute, but also to the public, who so cheerfully assisted in every possible way in adding to the success of the undertaking, to give a general statement as to the manner in which so large a sum was expended.

The following is a summary of expenditure:—

		£	s.	d.
1.	Printing, - - -	£38	18	8
2.	Gas Fixtures and Light,	42	8	6
3.	Glass, - - - -	23	16	3
4.	Paints and Brushes, -	10	17	9
5.	Building, - - -	288	10	11
6.	Ornaments, - - -	21	4	5
7.	Cartage, - - -	10	10	5
8.	Labour, - - -	119	13	7
9.	Music, - - - -	29	10	0
	Total, - - -	£585	10	6

The Directors are free to confess that the expenditure exceeded their expectations; yet, on the other hand, it should be observed, that the income was far beyond their most sanguine anticipations. Should another exhibition be undertaken, they are satisfied that many expenses incurred in carrying out this one might be saved, for the novelty of the undertaking, and the brief period allowed for its accomplishment, has added considerably to its cost. It is gratifying, however, to know, that not only has it added to the income of the Institute, but it has proved that there is sufficient mechanical talent and enterprize in the Province to supply its inhabitants with all that is essential to the comforts of life.

Before closing this branch of the Report, the Directors feel it but just to invite, on behalf of the Provincial Exhibition to take place in the City of Fredericton, in the month of October, not only the assistance of the Members of the Institute, but the Citizens in general; for whatever is done to develope the resources of the Province, and to advance the interest of those engaged in its industrial pursuits, through the medium of an Exhibition held in a distant section, cannot fail of acting beneficially here. The Exhibition held in St. John solved the important problem as to whether the time had arrived for displaying the mechanical genius of the artizans of New-Brunswick in a manner the most satisfactory. The grant of £500 to the New-Brunswick Society for the Encouragement of Manufactures, &c., for the purpose of holding an annual one, speaks, in no measured words, in commendation of the value of our efforts, in bringing to a successful close what was regarded by all as a great experiment. During its progress, two of the Officers of the above Society watched it with the deepest interest, and prepared a valuable report on the many specimens of Provincial labour which graced the building, not a few of which were regarded of such superior value, as to receive from them a high commendation. The result of their labour was an able paper, which appeared in the columns of the St. John *Courier* of last October.

LIBRARY.—The next department which the Directors would bring under your notice is the Library. It forms, and justly so, the most important and popular portion of the Institute. During the past year, a large addition has been made to it, and it now numbers upwards of 1500 volumes of standard works, in science, history, biography and general information, the value of which may be estimated at £500, and imparting information to over two hundred Members. When there are so many readers of such valuable works, in a community of the extent of ours, its usefulness must be great. Silently it is performing its work, the extent and value of which may be found in after-years. The Directors would, therefore, urge its claims on the attention of their successors in office.

During the past year, the following donations have been received in its behalf:—From the Rev. Mr. Wishart, the sum of £10; from Mr. Henry J. Lewis, proceeds of lecture, £41 10s. 8d.; and, through the attention of the Hon. John H. Gray, the Journals of the Legislative Council of the Province, from its first Session in this City, in the year 1786, down to the year 1851, have been obtained, in seven volumes, in perfect order, and substantially bound. The Journals and Appendices of the Assembly have also been received, but less complete, as a number of years are wanting. The Directors hope that a little effort on the part of their successors may complete a work which must be regarded by all as a most valuable acquisition to the Library. In the Appendices to the Journals of the House will be found information in reference to the public departments, to trade and commerce, which could in no other place be obtained. There will be no difficulty hereafter in procuring, from year to year, the Journals of the Legislature, when they come from the press. To the Hon. J. H. Gray the Board of Directors have communicated their acknowledgments for the above work.

READING ROOM.—The next department is the Reading Room. Of its value it is unnecessary to speak, for the constant attendance of Members proves that its worth is fully appreciated. On its stands are to be found the City Papers, with Provincial, Colonial, European and Foreign, together with the leading Magazines and Journals of the day.

MUSEUM.—The next subject worthy of notice is the Museum. Its value to the Institute cannot be too highly estimated, for without it it would be wanting in one very important element of instruction, for an examination of it will impart information which could in no other way be obtained.

In reference to its history, the Directors would submit the following:—On the 28th day of July, 1843, an agreement was entered into between the Institute, on the one part, and a number of gentlemen representative of the stockholders of the Gesner Museum, on the other. Two of the conditions in the agreement are as follows:—

1.—The Institute is to have possession and management of the said Museum for five years, on condition of appropriating the room known as the Museum Room for its reception and exhibition, on certain conditions contained in an agreement duly executed, a copy of which is in the possession of the Secretary.

The 2nd is—That the Institute is to have the right to purchase the collection, for the sum of *six hundred pounds*, at any time within the period of five years.

But, fortunately, such has been the popularity of the Mechanics' Institute, that nearly all the proprietors of the Gesner Museum have generously contributed their shares, and thus, without the payment of a pound, has this valuable property fallen into its possession. During the past year the following additions have been made to it:—

An Albatross, from Mr. James Williams, of Waverley House.
An Albatross, from Capt. Moran.
A Crocodile, from Lieut. Griffin.
A Syriac Manuscript, from a Lady.
A Mahogany Chair, from Mr. Nisbet.

If the Members of the Institute, when abroad, would keep it in view, many valuable acquisitions could be made to it, for many of the articles which constitute a Museum are of value in one place, while in another no importance is attached to them. And further, individuals often have in their possession what they consider of little worth, and consequently, they think, too trifling to present to an institution of this kind; yet they must not forget that a combination of such articles as are in themselves unimportant oftentimes are found to possess great value.

LECTURES.—In reference to the Lectures for the past Season, the Directors report that the Introductory Lecture was delivered by the Rev. Dr. Jacob, Principal of King's College; he was followed by—

Mr. Babbit, of Fredericton—"Self-Cultivation."
Mr. C. L. Hatheway, of Sunbury—"Agriculture."
Mr. John McLardy—"Climate."
Rev. Mr. Wishart—"The Female Sex."
Rev. Mr. Cooney—"Reading a means of Enjoying Good Society."
Mr. George Blatch—"Advantages of Mental Cultivation."
Mr. Hinton—"Insanity."
Mr. D. S. Kerr, of Fredericton—"The importance of elevating the condition of our country, and the most effective means of accomplishing it."
Rev. Mr. Stewart—"Arctic Discoveries."
Mr. Watts, of Fredericton—"An Hour with Mrs. Hemans and other Modern Poetesses."
Rev. Mr. Ferrie—"American Slavery."
Dr. Paterson—"Electricity."
Mr. Foulis—"Geological Phenomena."
Rev. Dr. Gray—"Climate of New-Brunswick."
Rev. Mr. Wishart—"Habit."

For the kindness of the above gentlemen, the Directors recommend the acknowledgments of this meeting.

FINANCES.—The next department which the Directors would bring under your notice is that of the Finances, from which it will appear that not only is the Institute free of debt, but there is a large balance in the hands of the Treasurer. The following are the receipts and expenditure for the past year:—

Bal. in Treasurer's hands,	£147	13	8½

The Directors, in conclusion, would congratulate the Members upon the highly flourishing condition of the Institute. It was only on the 27th day of November, 1838, that it was first established. The object of its founders will be found in the concluding words of the first Report submitted to the General Meeting of April, 1839. They are as follows:—"The Directors would congratulate the Members generally upon the favourable manner in which the attempt to establish a Mechanics' Institute in this City has been received. To that community they now recommend it as an institution which, if properly conducted, will be the means of affording to the industrious mechanic that theoretical knowledge which, if accompanied by industry and sound moral principles, will open to him the road to wealth, and entitle him to the respect and esteem of his fellow-citizens—will teach the man of wealth new and profitable means of investing his capital, and lead the man of leisure from the enervating paths of idleness and dissipation to the ennobling pursuit of knowledge, and will diffuse among all classes of the community a taste for literature, the arts and sciences, which cannot fail to be interesting and instructive, and highly beneficial in its results." From that time to the present its progress has been steady. If it cannot boast of as many Members as it ought, it affords to those who belong to it, and who have ever manifested a deep interest in its welfare, the satisfaction to know that it at all times has had a number sufficient to sustain and carry it forward, and to present it, in the year 1852, as not only free from debt, but in the possession of property to the following value:—

	£	s.	d.
Building, - - -	£3000	0	0
Museum, - - -	1000	0	0
Library, - - -	500	0	0
Philosophical Apparatus,	150	0	0
Diagrams, Maps, &c. -	75	0	0
Total, - - -	£4725	0	0

The property of the Members of the Saint John Mechanics' Institute. It must be evident to all that the Institute now rests on a firm basis, and that by a steady adherence to its Constitution and Bye-Laws, and by the continued efforts of its Members, (especially of those who are entrusted with its management,) in furthering the object for which it was founded, it cannot fail in exercising a beneficial influence on the community at large, and that before a period shall have expired as brief as that which has elapsed since it was founded, it will have more than one thousand Members, with a Museum unequalled in the Colonial Empire of Britain, and a Library which, for extent and value, will stand a comparison with that of any of the modern institutions of the day. Of the varied public edifices which adorn our City, it may be truly said that none produce more favourable impressions on the minds of the stranger, in reference to the enterprize and intelligence of our citizens, than the MECHANICS' INSTITUTE of St. John.

J. W. LAWRENCE, V. P.
WM. HUTCHINSON, Jr., *Secretary.*
