The Courier.

SATURDAY, MAY 29, 1852.

The Steamer *Cambria*, with the British Mail of the 15th inst., arrived at Halifax on Wednesday, in 10¾ days from Liverpool. She brought 52 passengers—among the number were G. R. Young, Esq., of Halifax, and Mr. J. W. Craig, of this City.

On the 13th, the Queen held a Drawing Room in St. James's Palace, in celebration of Her Majesty's Birth-day, which was most numerously and brilliantly attended.

In the general circle—the Right Hon. Sir John Pakington, the Queen's principal Secretary of State for the Colonies, presented to Her Majesty the Hon. Francis Hincks, Inspector-General of Canada; and the Hon. E. B. Chandler, Member of the Executive and Legislative Councils of New-Brunswick.

In the evening the leading members of the Government celebrated Her Majesty's Birth-day by full dress banquets, at which large parties of noblemen and gentlemen, supporters of the present administration, assembled. Sir J. Pakington, as head of the War and Colonial Department, had the honour of entertaining, among other distinguished noblemen and gentlemen, His Grace the Duke of Wellington, Commander-in-Chief; Viscount Hardinge, Master-General of the Ordnance; Lord F. Somerset, Military Secretary; Sir J. Burgoyne, Inspector-General of Fortifications; the Earl of Desart, Under-Secretary for the Colonies; Sir W. Colebrooke; the Hon. F. Hincks, from Canada; the Hon. E. B. Chandler, from New-Brunswick; and Mr. Pakington, Private Secretary to the Colonial Minister.

Parliamentary. — On Monday, the Chancellor of the Exchequer moved for leave to bring in a bill to assign the four seats in Parliament in lieu of St. Alban's and Sudbury.

He observed that, although he had not defined all the measures which Her Majesty's government had proposed, as being of paramount importance, to bring before the House prior to the dissolution of parliament, this he did refer to. After examining the claims of learned societies, colleges, and inns of courts, he should say that they were all deficient in the elements of representation, and then proposed that two of the four members be given to the West Riding of Yorkshire, and two to South Lancashire.

Mr. Gladstone said he should confine himself to the question whether this subject was one into which the house at the present moment should consent to enter, and it was his intention to move that the House pass to the order of the day.

Upon a division, the original motion was negatived by 234 against 148; leaving the government in a minority of 86.

On Wednesday the debate was resumed on Mr. Milner Gibson's resolution of the 22d, to abolish the duty on paper, the stamp duty on newspapers, and the tax onadvertisements Most of the prominent members took part. Eventually resolutions were voted on as follows:—Majority against abolishing paper duties, 88; newspaper stamps, 99; advertisement duties, 65.

On Thursday, Mr. Spooner moved for a Committee to enquire into the system of education pursued at the Roman Catholic College of Maynooth. The motion was met by an amendment that the House should resolve itself into a Committee to consider a Bill to repeal the Maynooth Grant Endowment and all other grants in aid of Religious Institutions. A long debate ensued, which brought out the whole force of the House. Further consideration of the question was adjourned until Tuesday.

On Friday, in reply to a question from Mr. Masterman, Sir J. Pakington stated that the attention of the government had been directed to the evil of desertion to the mercantile navy in the ports of Australia, caused by the extraordinary discoveries of gold; and it had been resolved to send military assistance to those parts. The colonies would be called upon to pay the expenses. The assistance of a man-of-war would also be given to the port of Melbourne: he had this day sent out despatches to that effect, and the assistance thus sent out would enable the authorities to check the evil of which so much complaint had been made.

In answer to Mr. Hume, Sir J. Pakington stated that attention was being directed to the subject of emigration to the Australian colonies; but he could give no answer to the inquiry as to sending out the distressed hand-loom weavers in Glasgow and elsewhere. A considerable sum had been sent home from Victoria for the purpose of promoting emigration; and government would continue to give their attention to the subject.

The dissolution of Parliament has, it is rumoured, been appointed to take place, if possible, about the 10th of June.

Liverpool, May 15.—The amount of bullion in the Bank coffers again exceeds twenty millions sterling, and the rates of accommodation are easy beyond all precedent. Although the arrivals of produce have been considerable this week, the confidence of merchants remains unshaken, and no more goods are submitted by them than is requisite for present necessities, as the deliveries far exceed those of last year, and prices yet rule moderate.

The state of trade in the manufacturing districts is favourable, with every probability of a permanent brisk business.

By the Board of Trade returns, it is clear that the deliveries of the principal articles of commerce fully demonstrate the stability of the trade of the country, and give the strongest hope of a fair remuneration for the outlay of capital, both to speculator and merchant.

The discovery of gold in England, and the opinion expressed by geologists that the character of the Devonshire range is identical with that of the Australian diggings, has created quite an excitement all over the country, and the expectation is, that Dartmoor will shortly have more visitors than on any occasion since the French prisoners of war were located on that plain. If the conjectures which have been published, in reference to the auriferous yield of the precious metal, should be borne out by subsequent events, there can exist little doubt that the abundance of gold must cause a very sensible effect upon the relative value of other commodities, upon the wages of labour, upon rents, upon permanent contracts, upon the fundholder, and all other parties possessing what are termed "fixed incomes."

In Metals a further increase is apparent in the demand, and prices are higher for Iron, Tin, and Copper.

The previous advance has been sustained for Coffee, Tea and Cocoa, and there is still an upward movement for Sugar.

The steady upward movement of the traffic of the various railways of the kingdom is most satisfactory.

The British Funds have remained very steady throughout the week, slightly inclining to a progressive advance.

London, *Friday Evening.*—In the English Funds this morning the improvement of yesterday was well maintained, and, except for a short interval, the market continued firm up to the termination of business. Consols for money opened at 99⅝ to ¾, to which they returned, after having temporarily touched 99½.

The report of the Liverpool Cotton Market for the week shews a large business at a further advance of ⅛d. per lb.

The weather, after being cold and wet, is much milder and fine to-day, which has somewhat checked the demand for Spring Corn, and rendered the trade altogether dull.

Two destructive accidents have happened in the Welsh mines. The first was an explosion of fire-damp, by which eighty persons perished; and the other was the flooding of a pit, by which twenty-eight were drowned.

An Englishman, named Murray, has been sentenced to death at Rome, for associating with political assassins. Great exertions are being made to save his life.

Capt. Coward, master of the *Renovation*, has been examined at Venice relative to the vessels seen in the ice. He states that at the time he saw the vessels he thought they were wrecked Greenlandmen; and if there had been any persons alive on board, they would have seen them with the glass.

The Gold Fields of Australia.—There is news from the Victoria gold mines to the 27th of January; and it confirms all the previous accounts as to the abundance of the precious metal. The following is an extract from a letter received by a Liverpool merchant, by the Statesman:—The Forrest Creek diggings seem still the most productive, if we are to judge from the fact of five Adelaide miners, who returned to ... of this ... having realised, after nine days' ...

work no less than 250lbs weight of gold, which will now be worth £9,000.

France.—The long anticipated 10th of May passed over with the greatest eclat, without the slightest disturbances. The Fete, was purely Military.

Italy.—A decree of the Grand Duke of Tuscany abolishes the constitution and restores matters as they were before 1848.

We cannot find, from any of the newspapers received by the Mail, that the Government Railway scheme has been alluded to in Parliament, and we have not learned whether Messrs. Hincks and Chandler have yet received an answer from the Government. We trust they will press the matter to an immediate decision, as the delay only serves to keep back others from carrying forward the enterprise.

With the exception of Thursday night, when a light rain fell for some hours, we have had another week of dry weather. The grain and grass crops must now be suffering very much through the country; and if ample rains do not come soon, we are afraid the next crop of hay will be a light one.

We learn, also, that although the few warm days early in May melted the snows, and raised a freshet which brought the greater portion of the timber nearly to the outlets of the streams, yet that, from the want of the usual rain freshet, but very little timber has been got out so that it can reach the market.

Farmer, Lumberer and Merchant will alike unite in wishing for rain.

Executive Appointments.—On Thursday last, His Honor the Administrator of the Government, in Council, appointed John Johnston, Esq., M. P. P. for this County, to the office of Stipendiary Magistrate in this City, vacant by the death of B. L. Peters, Esq.

We also learn that appointments were made to the office of County Inspectors of Schools, under the late School Act, as follows:—William P. Dole, Esq., for St. John; — Parlee, for King's; Samuel J. Scovil, Esq., for Queen's; — Davidson, for York; T. S. Taylor, Esq., for Sunbury; and G. H. Connell, Esq., for Carleton.

Queen's Ward Election.—The election for an Alderman of Queen's Ward, in the room of W. O. Smith, Esq., elected Mayor of the City, took place on Monday—the Candidates being Mr. J. W. Cudlip and Mr. W. H. Needham. The poll opened at 8 o'clock in the morning, and the contest was carried on with much vigour by the friends of both parties. Mr. Needham led for the first few hours, after which Mr. Cudlip overtook him, and by 2 o'clock he was some 50 votes ahead of Mr. N. At the close of the poll, at 4 o'clock, the votes were—for Mr. Cudlip, 228; for Mr. Needham, 174—majority for Mr. Cudlip, 54.

Mr. Cudlip, and Mr. Needham, both addressed the electors and others present. The former thanking his friends, particularly the young men, the "bone and sinew" of the City, for their efficient and successful aid in electing him Alderman of Queen's Ward.—The latter thanked the 174 electors who had voted for him, and said that he came forward in compliance with a requisition signed by 215 electors, who had promised him their support. He further stated that he would not again be a candidate for civic honours, and would not come forward on a future occasion, though all the electors in the City should sign a requisition to him for that purpose.—*Observer.*

Steamboat Collision.—*The Inquest.*—The Coroner's Jury which had been sitting for some days on the bodies of the two men who lost their lives by the explosion of the boiler of the *Anna Augusta*, caused by her collision with the *Transit*, returned a verdict, on Thursday night, of *Manslaughter* against Capt. Stevens and Francis Paul, of the *Transit*; and of *Manslaughter*, in a lesser degree, against Jas. Smith and Alexander Christy, of the *Anna Augusta*." Paul was steering the *Transit* at the time of the collision, and Smith was on the look-out on board the *Anna Augusta*, and Christy was at the wheel.

It is expected that their trial will come on at the next August Circuit Court in this City.

Fires.—About noon, on Tuesday last, a fire broke out in the barn connected with the premises of Mr. W. Forsyth, cartman, residing in Pitt-street, between Elliott-row and Union-street; and the wind being high at the time, the flames soon communicated to the dwelling-house, which, with one adjoining, known as Victoria Cottage, owned by Mr. T. G. Hatheway, and occupied by Mr. Thomas Hatheway, was nearly destroyed before the fire was got under. Mr. Forsyth's property, we regret to learn, was uninsured.—The resolute exertions of our City Fire Brigade prevented the fire spreading to the adjoining houses, which were in great danger.

Between twelve and one o'clock on Wednesday, a range of buildings at the Straight Shore, in the Parish of Portland, were destroyed by fire. They were owned by Mr. Alexander Petrie, and occupied by the workmen employed at his Steam Mills, which, although situated at a short distance, were fortunately preserved.

The fires in both cases are supposed to have been caused by sparks from the chimnies falling on the roofs, which, being extremely dry, were easily ignited. Several of the City Engine Companies hastened to the assistance of the Portland Firemen, and were of essential service in preventing the spread of the destructive element.

We are informed that at the moment the fire broke out in Mr. Petrie's buildings, the Directors of one of the Insurance Companies in the City were deliberating upon an application that had been made for insurance, and had named the rate of premium they would consent to.

A fire broke out in the premises of Mr. Thomas Rankine, Baker, in Mill Street, a little before three o'clock this morning, supposed to have originated from the oven. Through the exertions of the Firemen, who were early on the ground, the fire was confined to the upper part of the Bake-house, which was full of Biscuit and Flour, all of which is destroyed.

The only injury sustained by the Dwelling-house and Bake-house is from the effects of the water.—We are happy to learn that Mr. Rankine's insurance will cover his loss.

New Vessels.—A fine new Ship of 938 tons, N. M., called the *America*, was recently towed into this Harbour from Quaco, where she was built by Mr. William Vail, for Messrs. Moran and McLean.

Another fine Ship was launched on the 20th inst. from the Building Yard of Messrs. W. & R. Wright, at Courtenay Bay. She was named the *Constance*, is owned by her enterprising builders, is clipper built, measures 1106 tons, and has the appearance of being a very fast vessel.

A handsome modelled Vessel, called the *Ariadne*, was recently launched from the Building Yard of Mr. Alexander Sime, in Lancaster, opposite Indian Town. She is a thoroughly well built vessel, and measures 361 tons, N. M., and 401 tons, O. M.

A Brigantine, called the *Jessie McClew*, fully rigged, was launched on the 20th inst. from the Building Yard of Messrs. McLachlan & Stackhouse, at Carleton. She was built under contract for a gentleman in Scotland, for the Mediterranean trade, is constructed of the best materials, and measures 98 tons, N. M. and 170 tons, O. M.

Another Brigantine, called the *Stella*, also fully rigged and sails bent, was launched on Wednesday last, from the Building Yard of Messrs. George & James O. Stackhouse, at Sand Point, Carleton.—She is a fine looking craft of 214 tons, was built for Mr. James Thomson, and is intended for the United States trade.

☞ The Rev. John Armstrong, from Valparaiso, arrived in the Steamer *Admiral* last evening, and will preach in Trinity Church to-morrow at six o'clock, P. M.

The Rev. Mr. Elder, a much respected Minister of the Baptist Church in this Province, died a few days since, at Philadelphia, whither he had proceeded for the benefit of his health.

Bank of British North America *versus* Chesnut.—This cause, which, at the Court in Fredericton last February, was referred to the arbitration of Jas. W. Chandler, Esq., appointed by the Court, and F. W. Hatheway and W. D. Hartt, Esquires, chosen by the parties, has been brought to a close. The plaintiffs claimed £1600, (including interest,) which the defendant alleged he had paid in full. The transactions extended over a period of five years, and involved heavy amounts. The arbitrators met this week in Fredericton, and, after a laborious investigation, unanimously awarded in favour of the plaintiffs the sum of £1066, with costs. For the plaintiffs, the Attorney General and Mr. Wheeler; for defendant, Mr. Fisher and Mr. E. H. Wilmot.

Lectures in the Temperance Hall, Portland.—On Tuesday evening last, Mr. Robert Middlemore commenced the course of Lectures, as lately advertised, for the purpose of raising funds to assist in liquidating the debt incurred in introducing the gas and making other improvements in the Hall. The lecture was a very excellent one. His subject was "The British Constitution," and in elucidating it, he noticed many interesting and important features in British history, with which he appeared to be very familiar. We were surprised to find the audience so small, as the occasion should have brought together a full house.—The second lecture of the course will be delivered on Tuesday evening next, by Mr. John McLardy. Subject—"The causes of the diversity of Physical Climate."

Naval.—The *Resistance*, troop-ship, arrived at Halifax on the 18th instant, in thirty days from Devonport, with detachments for several regiments serving in the Colonies. It is said that she will take home the 42d.

The *Devastation*, 6, steam sloop, Com. Campbell, sailed from Halifax on the 18th, for a short cruise in the Gulf of St. Lawrence, after which she will return to Halifax, when the Vice Admiral will hoist his flag on board of her, and proceed to Quebec.

The *Bermuda*, 3, Lieut. Jolly, proceeds to the Coast of Newfoundland, for the protection of the Fisheries in that quarter during the present season.

The *Netley*, tender, will, it is said, be stationed in the Bay of Fundy this summer, for the same purpose.—*Halifax Chron.*

Prospects of the Crops.—The country hereabouts presents a charming aspect. The late mild and showery weather has covered the surface with richest verdure. Fields of grain exhibit a rank luxuriance of growth that promises a large yield. Fruit trees are covered with blossoms, and the lateness of the season precludes apprehension of blight from frost. The season, it is true, is uncommonly backward, and vegetation is no more developed now than it is in ordinary years on the 10th of May. But we have rarely, if ever, known it to exhibit so thrifty a growth at its present stage of development.—*N. Y. Jour. of Com.*

Passenger in Ship *Sea Bird*, on Tuesday, for Liverpool—The Rev. E. A. Warneford, Rector of Norton, King's County.

Government Emigration Office,
St. John, 29th May, 1852.

The Brigt. Ocean, 122 tons, O'Neill, master, sailed from Cork for this Port, on the 1st May, with 133 passengers—thirteen of whom are males above 14 years, the rest women and children. The Brig Mary, 180 tons, Howell, master, sailed from Cork on the 5th May, also for this Port with 88 passengers, of whom 51 are women and children. Lists of these passengers can be seen at this office, no other lists whatsoever have been received.

The Emigration Officer at Cork states, that, owing to the remarkably favorable season in Ireland, emigration is not so spirited as was expected: very few more may be expected from Cork this season.

M. H. PERLEY,
H. M. Emigration Officer.
