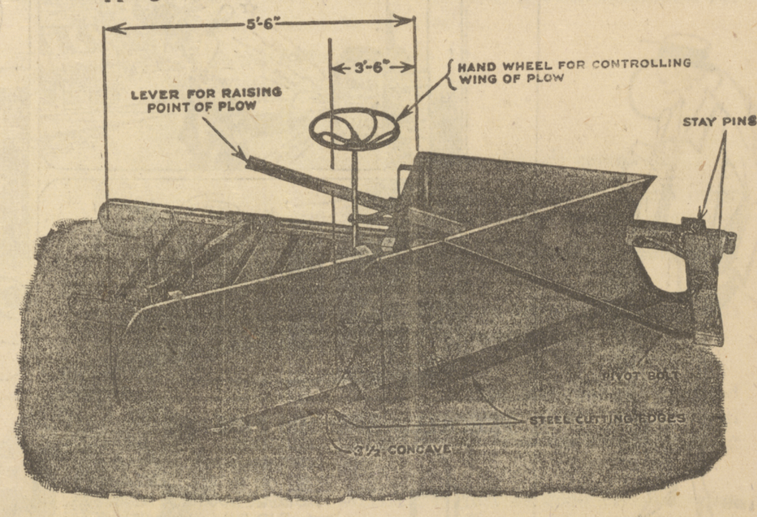
THE CHAMPION Sidewalk Snow Plow

The Champion Sidewalk Snow Plow is unequalled in cleaning snow from concrete, tar or gravel sidewalks. On concrete or tar walks it will clean the snow down to the walk. On gravel walks it can be adjusted so as to take the snow down to the gravel, yet not disturb the surface of the walk. The adjustment is made with the lever on the left hand side of plow and only takes an instant to do it. This lever will also raise the blade and wing about four inches from the ground, so that it will not take the snow off where it is wanted on street crossings. The machine will also mount any curbing without stopping the horse.



The wing on this Champion Snow Plow can be adjusted so it will plow a walk 3' 6" to 5' 9" wide. This adjustment is easily and quickly made by the hand wheel on right side of plow.

This plow will also make a straight walk and throw all the snow away from the buildings and fences towards the gutters.

The Champion Sidewalk Plow is built of A-1 material throughout, and well ironed, is the lightest draft and most durable snow plow on the market.
