THE GLASSVILLE NEWS.

No. 3 Vol. 3. Whole No. 27.]

GLASSVILLE, N. B. MAY 31st. 1895.

[PRICE 25CENTS A YEAR,

Head Quarters
FOR HEAVY GROCERIES IN
HAND
Is at **CARR'S.**

FLOUR,

I have just received another car **GOLDIE'S** Celebrated Flour, and can now give you your choice of the following well known brands
FIVE ROSES, QUEEN CITY, PEOPLE'S, MONARCH, VICTORIA,
Golden Star, Golden Sheaf, Queen, Parkdale, Jubilee and Gem.

TEA,

I have now on hand and bought to arrive shortly.
The Largest Stock of TEA
I have ever had at one time. I can give you good values in Straight **SARYUNES,** and **CONGOLUS,** but **BLENDED TEAS** are what are selling.
I keep on hand the well known
Union Blend, also Imperial and Perfection Blends,
No "CHEAP and NASTY" Tea in my stock.

SUGAR,

The Duty of half-a-cent a pound recently imposed on Sugar has increased the price, but it is still too low to permit of any reasonable person grumbling.

MOLASSES

I have a good stock of
Barbadoes Molasses, New Crop,
Bought Early, not "Take 'em as you find 'em" as some buy, but **SPECIALLY SELECTED.** P. S. The early Molasses is better than that shipped later.

IN DRY GOODS,

I have a large and carefully selected Stock, and values especially in **COTTON GOODS** are much Lower than formerly.

BOOTS AND SHOES,

I have my Spring Stock now in and as it was bought before the recent advance in Leather, I will **SELL** at the **OLD PRICES.**

If You Want a Nobby Suit of Clothes,

OR SOMETHING NEW IN HATS, Give us a call,

We have other things but we don't want this 'Ad' to be too long or you won't read it.
Call and See for Yourself.

JOHN T. C. CARR,
HARTLAND, N. B.

In the line of **PUMPS** we lead all competitors, and in prices they are not in it with us at all.

Do not buy of agents when you can buy of us a Better Article at a far Less Price.

We have now in stock the celebrated **CUCUMBER WOOD PUMPS.** MYERS' Double-action Force Pump, with Brass Cylinder, Glass valve seat. This is one of the best working Pumps for drilled wells there is on the market to-day.

We also keep in stock Lead and Iron Aqueduct Pipe Hydraulic Rams &c. &c.

W. F. DIBBLEE AND SON,
WOODSTOCK, N. B.

GRASS SEED,

Timothy, Alsike, and
Long Late Red Clover,
PURE AND CLEAN.

WALL PAPER,

WHITING,
LIME, FREDERICTON BRICK.

ONTARIO SEED OATS.

WOOL WANTED,

At 30cents per pound in Exchange for

G. NUNPHREY TAYLOR,
HARTLAND, N. B.

Arbor Cognoscitur Fructu.

The botany of this part of the country seems to be scarcely understood yet, we see and hear of new trees and plants that we did not think were natives of the province. We lately discovered that there must be a great number of "Boot trees" growing on the roadside, between Highlands and Argyle, for we noticed a vast quantity of the fruit, in every stage of ripeness and decay that appeared to have fallen from them. For nearly a mile the over-ripe and rotten fruit literally covered the ground, in all shapes, in all sizes, and in every conceivable variety of boot material. We notice too in the columns of a contemporary, that "Cowslips" are beginning to appear in the dells of Beaufort, we shall be obliged to look them up for the sake old memories, for we were not previously aware that Cowslips, Ox-lips, or Primroses were to be found in this part of the world.

Beneath this stone our baby lays,
He neither cries nor hollars;
He lived just one and twenty days,
And cost us forty dollars.

Christian Endeavour Young Lady, to our reporter: Are you saved, sir?
Well, miss, I hardly know, I'm reporter for the Glassville News.
Oh! I beg pardon, you're all right.

The Cheese Manufactory.

The Glassville Cheese Factory is now completed and ready for business, all the necessary apparatus for the manufacture of the marketable commodity is placed in position. The building is most substantially erected and is a very commodious one for the purpose. The room in which the Vats, Strainers, Steam-boiler, and Presses are placed is some thirty feet by twenty-five feet, and the curing room is ten feet longer, while overhead is a large room sixty feet long by thirty feet wide, presumably a store room. The steam boiler is of steel plate calculated to withstand a pressure of two hundred pounds to the square inch, though it will hardly ever be tested to it's full capacity. A Hydraulic ram will force a copious supply of pure water from a spring near at hand for all necessary purposes.

We will endeavour in our next, to give a description of the *modus operandi* of cheese making on the factory system, as it is evident, that a more uniform product must result from a scientific mode of operating, than from the old fashion 'rule of thumb' method, usual with small operators. The cheese must have a character for uniformity, and though with a pampered epicure it will not supersede Stilton, Gruyere, or famed Gorgonzola, it will find a market as long as it's quality and character are maintained.
